I received my card about 30 days ago but it was not filled out correctly.
Instead of filling in the frequency, the date of the QSO was added a second
time. I sent a request for another QSL to JA2JPA 2 weeks ago, as well as
requesting verification of QSO with EM1KA on a second band.

I tried to send my QSL cards to EA9IE using the following address which
I pulled out of the 1997 flying horse callbook:

Juan Rosales Fernandez
Apartado 410
51080 Ceuta
Ceuta and Melilla

The US post office return my letter with the following stamped on the
envelope:

"Returned for better address. Address must show
country of destination in english"

Does anyone have a route that worked?

****
Yes. The country is SPAIN. Add that to the end of the address you
used.

4. Antenna source for medium wave DXing

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-01 00:00:00 UTC
From: ehretg <ehretg@msu.edu>
Message-ID: <32CA6B1E.30D0@msu.edu>
Source record: 34116

Does anyone know of catalog source for air-core wound wire loops for improved AM reception? I saw an advertisement for one about a year ago but cannot locate the reference.

Can anyone suggest publications or mailing lists that offer medium wave hardware and supplies? Thanks.

5. Vanity Callsigns & Incoming Buro's

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-01 00:00:00 UTC
From: adell@planet.net
Message-ID: <MPG.d34486ee528776a98974f@news.planet.net>

Cross-posted to:
aus.radio.amsat,aus.radio.packet,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.shortwave

For Your Information. Important to note, especially if your incoming buro has a subscription fee

SO YOU HAVE A NEW CALL SIGN

The QSL Bureau has been innundated by letters from subscribers informing us of a change in call sign as a result of the Vanity Call Sign activity by the FCC. Simply sending us a note with a new call is not enough. You must re-subscribe under your new call. Here is the recommended procedure:

If you already have postage credits on file under your old call, we suggest you leave these credits alone for at least one year. You should subscribe to the QSL Bureau under your new call just as if you were a new subscriber. If you presently have a large number of postage credits on file under your old call, you may send us a written request to transfer (n) credits to your new call. Leave a sufficient number of credits in the old account for us to forward in-coming cards for the next year or so. When you think you have received all outstanding QSLs for the old call, then send us a request in writing to transfer all remaining postage credits from your old call to your new call.

While it may sound confusing, this is the only way we can keep track of our subscribers. Everything here at the QSL Bureau is filed under callsign. Please print your call (old or new) on any correspondence you send to the Bureau. If you want us to respond, send us an e-mail address or a self addressed and stamped envelope.

If you have any questions, please e-mail to k2aio@njdxa.org.

73,
Ron, K2AIO
W2 Bureau Manager

As for the antennas, check out "http://www.wolfenet.com/~kiwa/" or
email kiwa@wolfe.net. They sell two aircore antennas for AM, both
very effective.

For publications etc., take a look at "http://wcoil.com/~gnbc/". The
National Radio Club prints an AM DX newsletter and a variety of
printed material for the AM DXer.

For both, you should also take a look at "www.grove.net". Grove
Enterprises sells both books and hardware/supplies for all kinds of DX
including AM broadcast.

QST de W1AW
DX Bulletin 1 ARLD001
From ARRL Headquarters
Newington CT January 2, 1997
To all radio amateurs

SB DX ARL ARLD001
ARLD001 DX news

This week's bulletin was made possible with info provided by Tedd,
KB8NW, the OPDX Bulletin, DX News Sheet, The 599Rpt, 425DX News, and
Contest Corral from QST. Thanks to all.

HEARD ISLAND, VK0. The long awaited DXpedition to Heard Island has
already begun with the team's operations on Reunion Island. The
team, consisting of 21 radio amateurs, will soon depart Reunion
Island aboard the French vessel Marion Dufresne. Check your local
PacketCluster for the latest spots on VK0IR.

VIETNAM, 3W. Unni, LA6RHA, will be active for 5 to 6 days as
3W6RHA, from 0900 to 1200z, using SSB on 14182 and 14248 kHz. QSL
to home call.

SRI LANKA, 4S. Bob, G3REP, is QRV as 4S7RPG. He hopes to be on
1826.5 kHz, QSX 1837 kHz, from 2200 to 0100z for Europe, and at his
sunset at 1230z for North America. QSL to home call.

MALAYSIA, 9M. Dick, N4ISV, has received the call 9M2RY, and will be
QRV from here for the next several years on CW and SSB. QSL via
N4JR.

BAHRAIN, A9. Bob, A92GD, is active on 1834 kHz daily from 0230 to
0245z and on 1832 kHz, plus/minus 3 kHz, if there is QRM. QSL
direct.

GUANTANAMO BAY, KG4. Bill, WT4K, and Rusty, KG4AU, will operate as
a Multi/Single entry in the ARRL RTTY Roundup contest January 4 and
5. They will be using Bill's call, KG4GC. QSL to WT4K via buro or
direct.

MACQUARIE ISLAND, VK0. Tom Stoke, VK0TS, arrived on December 17 and
although his work at the meteorological station will keep him busy,
```

he will try to be QRV on 14222 kHz. QSL information is not as yet available.

SOUTH SHETLAND, VP8. Mark, SP3GVX, will be QRV on all bands using SSTV and satellite as HF0POL during his year at the Henryk Arctowski Base, King George Island. QSL via SP3FYM.

BURKINA FASO, XT. Hugolin, XT2HB is a new licensee here. He is active on 14120 kHz at 1730z and weekends on 14225 kHz at 0730z. QSL to Dep. 01, BP 6397, Ouagadougou, Burkina Faso.

THIS WEEKEND ON THE RADIO. Start off your contest season with the ARRL RTTY Roundup. Please see December QST, page 105, for details.
NNNN
/EX

13. 50MHz Dx News

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-02 00:00:00 UTC

22/12/96: D44BC Needs Help!
Greetings to all and a Merry Christmas!
Julio D44BC has just phoned to say he needs some help in order to keep active on
50MHz. The Cape Verdean licencing body wants to increase licence fees to hundreds of
dollars, if this happens then Julio says that all amateurs with go qrt and there will be no
activity from D44 anymore.(especially 50MHz! as D44AC is coming on the band also)
Julio has requested copies of licence renewals from other Countries to show how much
they pay in comparison. Anybody who has a renewal which states how much they paid is
requested to send it to Julio Vera Cruz D44BC who is QTHR, or forward a scanned copy
to me and I will forward it onto Julio. Julio has also requested I return to D44 in June for
another 50MHz operation, he also offered his accomodation.....more on this later Geoff
GJ4ICD

22/12/96: Big ES Opening in VK:
Stations worked 22/12/96 by VK3ALM, QF22oa:
Intense Es today.
0000 45.240/250/260 ZL video S9.
0000 46.172 VK4 video QG62 S9+ most of arvo
0000 46.261 VK2 video QF58 S9
0016 ZL2TPY RF70

0530 VK4RGG/B Gold Coast QG62
0530 VK2RHV/B Hunter Valley QF57
0530 VK2HT Newcastle QF57
Also, many VK2/3/4/5 stations active on 10M FM.
Called North on 144.100 with no results.
Adam, VK3ALM

20/12/96: More Es in US!
Another single hop opening in the US , 4's to 0's and 8's to 5's.

20/12/96: GB3IOJ 50.065 Rebuild!
GB3IOJ will be replaced in the next few days with a new FSK beacon, the beacon will comprise
of a GJ3RAX prime mover along with filtering and a Bnos 100 watt amplifier running with low
drive, the PSU will be a Bnos 24 amp supply and is currently on test in the shack at present into a
dummy load.
The antenna will be changed later for a higher gain one.

The original G3JVL exciter will become available FREE if anybody is interested, it runs 1 watt out
and comes with a diode matrix board for the keyer. The xtal will have to be changed if it is used in
Europe (50.065).....contact equinox@itl.net (gone to VE9AA)

19/12/96: V29/PY Opening!
After several weeks of CQ calls on the calling frequency without success, PP5VX worked (with
great difficulty at only 219) at 0030z on 18/12. PY2AA beacon also heard 339 in Antigua at
0045z. Presume this is TEP ??
Antenna setup here is still simple with a wire delta loop N/S being used..... David Bones
V29RSD.
David is also looking for a small beam of some discription, can anyone help? if so please email
David at: acm-crc@candw.ag

18/12/96: GB3RMK News!
Chris GM3WOJ phoned in the following information, GB3RMK will resume operation on the
23rd December after a full overhaul/rebuild. GB3RMK is operational on 50.060....

18/12/96: USA Activity:
We have a large number of active stations from EM 67 on six these days, stations include
N9QJV, KA9IJW, N9TAC, N9PDK from the Indiana side of EM 67, K4LRX from the
Kentucky side of the grid, since we all all interconnected with computers, a station needing a
contact with this grid or needed state can find one or all of us. All stations use a 100 watts, or
more and have beams, or wire antennas that do a great job on six. K4LRX will also work cw
around 50,095 if you need a cw contact with Kentucky, let us hope for a great season on the
magic band.....de K4LRX

17/12/96: ES to SV1SIX:
Today at 08.35UTC I have received SV1SIX for almost 45 minutes. With 559-599 rst + some
unrecognized TV carrier on 48.256.1 from South-East direction. I have called serveral times on
.150 & .112 without any respond. Also that time I have some FM-simplex on 43.500 &45.750 in
russian language - sounds like professional net.......SP5XMU deTom

Report from Adam VK3ALM.....

15/12/96: Es in Eu:
1000z Band open to OH, wkd OH0KCE and OH3NLP both S9, also copied OH1SIX
for 1 hr
de GJ4ICD.

15/12/96: IC756 Report:
I have now carried out some tests on the radio, it is quite clear that
only INTER-BAND Dual
watch is operational, although the radio seems to rx on 28885MHz and
50MHz this is not true!
This is due to the rx bandpass RF front end being
switched......therefore the radio cannot be used
for monitoring 28MHz and 50MHz at the same time..... more
later.....de Geoff GJ4ICD.

14/12/96: VK6 News:
Es QSO's on 50 MHz recorded from Perth to VK5 (Adelaide) and VK2
(Grafton) on Saturday
14th December at 0030Z. Distance to VK2 approx 4000 Km. 73...Don VK6HK

14/12/96: VK3OT Report?
Dec 13 13:34: 0700z 48.2396/48.250/48.2604 from 325 degrees at approx
8000 kM.

14/12/96: Eu Cluster Spots on 110!
Why this type of thing happens God only knows, it shows the bad

operating/operators we have
here in Europe. Maybe we should put a new 50MHz beacon on air! call is
EULIDS, on 50.110!

13/12/96: ES in JA and US!
During the past few days E's have been prevelant in the US and Japan,
also noticed has been an
increase in Xray flux activity again, Europe seems to have missed out on
these openings!
Interestingly, Japan and the parts of the US that have been seeing these
openings are further south
than Europe.....

12/12/96: TEP in US!:
Just heard several USA stations from the west coast, W7 on 50 MHZ. I had
a good TEP to the
northen part of South america and the Caribbean, with the V44K, J3EOC,
YV4AB, HI0VHF
beacons about S1 to S9.
I turned my antenna to 280 degress to see any propagation to the Pacific
as usual, then i started to
hear a N7CQS ??? station working into Costa Rica. After several calls i
work WA7JTM,
WB7OHF, W7RV, K7CA and W7CI. Not strong signals, S1-5, but NO QRM or
QRN. Very
clear Frequency. The normal way to W7 land is 320 degress, but this time
was 280. Several
others stations at the same time on TEP and ES.....de Peter PY5CC

10/12/96: IC756 Features:
The new IC756 has the following "NEW" features: A memory keyer that can
be made to repeat
it's memories, therefore acting as a beacon! and "TRIPLE" band stacking
register VFO's, offering
"3" VFO's per band by just a simple press on the "BAND" button.
Other features include a "TAILOR" made TREBLE/BASS audio tx setting and
NOISE
REDUCTION via a digital path.

23. Re: Pro & Cons on Cordless Telephone Headsets????

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-03 00:00:00 UTC
From: Rich Wall <richwall@asan.com>
Message-ID: <32CDDF62.7CC9@asan.com>
Source record: 34050
Cross-posted to: rec.radio,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space

The pros are the obvious freedom of a cordless headset.

The cons are great, in my opinion.

1)You can be listened to by other cordless phones, scanners, baby monitors and other devices. This results in no privacy.

2) If you live in an appartment or densely populated community, you can hear other handsets or headsets using the same frequency or channel you are on.

3) The batteries in the cordless unit can die with little or no notice. Nicad batteries have a fast "drop-off" and the time spent off the charger is limited.

4) In some cases other handsets or headsets can capture your base unit's dial tone and dial out on your line. This problem has been resolved with the newer models using security codes.

These problems become more evident in apartment dwellings where the chances of other having a cordless close to yours is strong.

I hope this helps you with your concerns.

Rich

T00TN is (was) in the Principality of Seborga (northern Italy). The calls from there in the past had 1P0 prefixes and T8 (until T8 was actually assigned to Belau).

The Principality is not recognized as a sovereign state at this time, so the QSO's count for nothing for DXCC (not even Italy, I am told, as the calls are not official Italian calls.) The cards from operations in Seborga are very nice as a rule though (even if they don't count for a country).

I recently heard that you could build a "transverter" (??) that would
allow you to use a 10m rig on 2m. If such a thing exists I would love more
info on it. Thanks.

I recently received my QSL. Sent direct with an IRC I think, or green
stamp. I think it came with a US stamp, this is mailed in the US.

> Herb, N4HA

You already got the address of the OK DX Foundation (OKDXF). Another QSL route is OK1TN. He seems to be the operator of this "DXpedition": ..TN ..TN

The "Principality" of Seborga is a very small island in the Mediterranean Sea - and no Principality at all. [that is: it was one - but several hundred years ago...] It's simply one of some thousand islands around Italy, belonging to Italy. All these exotic 1P0/T8/T00 [Tango-zero-zero] calls are sold by a local shop-keeper. You can get one, too, if you'd like. Maybe you like to choose, e.g. 007A [zero-zero-seven-Alpha] or T_HA [Tango-nothing-Hotel-Alpha]? But I don't know the price <grin>. Visit Seborga and the shop-keeper will tell you... Probably you will get a rebate if you buy several "licences" at once...

All these Seborga calls are illegal, don't count for DXCC, not even for Italy (I).

> Am I QSOing with hams wearing eye patches and peg legs?
Best advise: forget it.

Problem is you never know what's ultimately going to count. In a similar deal around 1978, when 1A0KM first came on, all the policeman on frequency yelling "pirate" convinced a lot of weaker souls not to call. It took awhile, but that eventually counted. Those who had their cards were in fat city. Those that didn't waited years for each subsequent operation.

Part of the operator strategy with Seborga has been to use a different prefix every time, so those working them will be inpsired to QSL (more green stamps) just in case *that* prefix is the one that will ultimately be the counter...

<MakeMyDay> Work First (& confirm), Worry later !!

Yeah ... took me a long time to figure out he was "TU" 4FF, too.
BTW, the op IS Markku (OH8SR) who also operated a number of years ago
as TU4SR as well. I must say, the man has "good ears" as there's no
way my signal could have been all that strong to him.

Tom,

It was TU4FF. QSL via OH8SR. I worked him, too, but it took me the longest time to figure out who he was. When he finished a contact he would sign TU (the typical thank you), then 4FF. At least that's what I THOUGHT he was signing. He was really signing TU4FF. He gave his manager as OH8SR and that's when I finally did some checking in the GOLIST. OH8SR is the manager for TU4FF. My frustration turned to laughter. 73.

You have the incorrect manager. It is JH1NBN, not JA1.

Dale, K4EQ

37. Operating Desk Plans

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-03 00:00:00 UTC
From: RJ Scott <kf7qz@prostar.com>
Message-ID: <32CD3C1A.1D70@prostar.com>
Source record: 34143

This might be DX related, I hope, afterall a good desk is a good start to dx'ing. What Im looking for is a few plans for operating desks. I recieved a couple of woodworking tools for CHRISTmas and want to put them to use (tablesaw and drill press). I seen a great desk on the cover of CQ several years ago. It was a 7 lander up here on one of the Islands. It was a 3 piece sectional that had a desk area with three sloping equipment faces. It looked really nice. But any and all plans, ideas would be appreciated.

Thanks in advance

38. QSL Info for DL3KBQ

==============================
*** Most Wanted in Italy ***
==============================

Thanks to the over 300 DXers who, answering to the 425 DX News invitation,
sent their most wanted through Packet, e-mail or snail mail. Thanks also to
the "big guns" who, notwithstanding they contacted all the countries (except
P5) expressed their appreciation about our initiative, offering useful
suggestions for the future. The following list, which considers the 48 most
wanted Countries, reports at first three places, as it was foreseeable, North
Korea, Heard Island and Bhutan. This situation is to be changed by the
forthcoming operations of VK0IR, which, if the expedition is succesful, will
delete Heard from the Most Wanted list. About Scarborough Reef a probable
activity on a grand scale is planned by OH2BH in May. No short-time activity
from Bhutan, but for Auckland (presumably in the next first three Countries
after the VK0IR operations) a DXpedition is on the way, planned for 1999, by
ZL8RI group. Patience is a virtue - the Bouvet expedition, organized by the
South Sandwich Island Antarctic DX Group, will not take place until December
1997 (but it is possible a delay to 1998), but it should be a successful one.
Another imminent change should come from the forthcoming operations from
St.Peter & St.Paul Rocks (currently at the 10th place).
```

VK0IR - Due to a strike in France, the departure of the ship has been
delayed. The team will sail from Reunion Island on 5 January in the
afternoon. They will head directly to Heard Island and will not stop
at Crozet. They will be QRV on schedule from Heard Island.

FO - FO5PP/p is active (mainly on CW) from Rurutu (OC-050).
I - On 6 January (weather permitting) Tony, IK8VRH and other operators
will be active as IK8UHA/IC8 from Scoglio dello Schiavone di
Miniscola (IIA NA-???) or, alternatively, Scoglio dello Schiavone di
Procida (EU-031, IIA NA-???). QSL via IK8VRH.
JA - From 2 to 4 January Hiro, JH4FBV will be /6 from Fukuejima, Goto
Islands (AS-040) on 40,. 20 and 15 metres (mainly CW). QSL via home
call direct (Hironori Funahashi, 1-11-38 Hamanochaya,
Kurashiki-city, Okayama, 710 Japan) or through the bureau.
KG4 - Bill, WT4K and Rusty, KG4AU will participate in the ARRL RTTY
Roundup Contest (4-5 January) as KG4GC. QSL via WT4K (ex KQ4GC)
direct or through the bureau.
TN - TN7A will be active until 6-7 January. QSL via JH1NBN.
W - From 6 to 12 January Jim, AA3ID and his wife Dianne, N3GPF will be
active from Hatteras Island (NA-067, USI NC-005S).
ZD9 - WA2JUN, QSL manager for ZD7WRG, reports that Johnny (ZD7WRG) will
not operate from Gough Island (AF-030) during his short visit
[425DXN 291].

****

>>> NEW IOTA REFERENCE NUMEBRS ISSUED IN DECEMBER <<<

OC-217 YB3 KANGEAN IS (Indonesia, YB3 islands, letter "e"), issued
following the operations by YB3SPS/P.

OC-218 FK MATTHEW ISLAND (New Caledonia, letter "e"), issued following the
operations by FK5M.

AS-125 HS GULF OF THAILAND NORTH EAST group (Thai islands, letter "a"),
issued following the operations by HS50A from Koh Chang.

The Reference Numbers have been issued provisionally, to be confirmed when
satisfactory validation material has been provided. Checkpoints are not
authorised to accept QSLs for these operations for IOTA credit until the
Reference Numbers have been confirmed.

>45 feet.
>Terry
>KI7M
>
>

ZS9 Walvis Bay, and ZS0 the Penguin Islands, were turned over to Namibia
by South Africa on March 1, 1994. Both are now deleted countries. Hams
in Walvis get V5 calls now.

ZS9 is allocated to "ordinary" South Africa. I've worked several ZS's
recently using the ZS9 prefix.

I do believe you heard TU4FF. Confused me at first too, as after several
QSO's he would send "TU" and then after some he'd send "TU4FF".

Kiwa has a killer air loop, but it costs over $300. Other than this,
some of the MW DXers will custom build one for you.

Quantum makes a very good amplified FERRITE loop.

C. Crane Co. has more MW hardware than most, 1-800-522-8863.

DX Ontario has a fair amount of MW info.

hello from Jim in Atlanta. All previous points correct,I've got some
experience with those too. I have found that the 900 mhz that use
spreadspectrum encryption work real well. You can be on hf running a k
with no rfi. The range is great,has the same charecteristics as our band
close by. Can be monitored,but they have to work for it! In my opinion
worth the expense. Good Luck KD4CDB

44. Re: Operating Desk Plans

Every bit as important to having that great desk layout is the CHAIR!
For long stints at the rig ... it might even be good to have TWO
different chairs (different pressure points). Personally, I use
a Herman Miller "Ergon" office chair as the main chair ... and a
30 year old "secretary's chair" (w/o arms) as my alternate.

Good luck on your construction project .. if you do a nice one, you
ought to submit an article to one of the ham mags... I'm sure many
of us would like to see it.

50. Heard Is. (VK0IR) DXpedition Info

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-04 00:00:00 UTC
From: lyndon@ve7tcp.ampr.org
Message-ID: <5aloo5$d8k@multivac.orthanc.com>
Source record: 34062

The Heard Is. (VK0IR) expedition is on track *mostly* according to the original schedule. Due to a labour strike in France their departure from Reunion Island has been delayed by 48 hours until January 5.

This delay has provided the expedition operators an opportunity to get warmed up while operating TO0R from Reunion on the low bands, giving out a large number of contacts on 160m.

The Heard Is. team is making good use of the Internet as way to let everyone know what's happening, as quickly as they can. This is an extension of the trials carried out during the XR0Y operation in 1995. As with XR0Y, we look forward to your feedback and participation!

VK0IR Internet Services

Here's the list of expedition-related services being provided via the Internet ...

* Heard Is. Expedition Home Page

The reference document for the expedition. Describes the goals of the present operation as well as some of the history behind the trip, and how this expedition will help future operations.

* The Heard Is. Tribune

N1DG's daily review of the expedition. This includes stories and pictures of the operation, uploaded through a combination of Internet and satellite links (amateur and commercial).

* Interactive Log Searching

So you *think* you worked 'em on 160?!? Use the Web to find out. And this time we have an e-mail based log query tool available for those of you who don't have direct web access.

* The Heard Is. DX-pedition mailing list

Due to the amount of traffic generated on the DX mailing list by the XR0Y operation, a seperate mailing list has been set up for discussion about the Heard Is. operation. This list is open to everyone, although you should be aware that none of the expedition operators will be reading it. (They won't have an internet link where they

are.) However, the pilot stations will be reading the
list, and will be forwarding along suggestions from
the mailing list to the operators.

The easiest way to access all of this is to point your web browser
at http://ve7tcp.ampr.org/DX/ and scroll down to the Heard Is.
section of the page. It contains hot-links to all the related
locations. (It also has a hot link to OH2BUA's special VK0IR cluster
spot network -- something that's not on any of the "official"
VK0IR locations :-)

You especially want to get on the mailing list. John Devoldere (ON4UN)
(the pilot station coordinator) posts frequent updates on the status
of the expedition to the list. (To join the mailing list, send a mail
message to:

listserv@ve7tcp.ampr.org

with ONLY the following word in the message BODY:

subscribe

Please do NOT put anything in the Subject header, lest you confuse the
software that runs the mailing list! In return for this effort, you will
receive yet another message asking you to confirm your subscription.
Please follow the instructions in that message EXACTLY. If you don't,
you won't get on the list. (Due to the volume of people subscribing,
mail to the -approve and -owner addresses just isn't getting answered.)

I worked Joe Lynch on 6M when he was in Mexico a couple of years
ago. Qsl'd about 3 times with SASE's and tried e-mail to him. He
eats stamps. Would not even take the time to e-mail me back. He's
a dead head!! Forget anything connected with him.

>> Don't need a beverage on 80, <<

Full size verticals are the answer due to the low angle BUT the ground
is the true key to making them work. 80 and 160m is where the effect
is most pronounced.

T31BB has been loud nightly on phone with 80m verticals when the ground
is well done.

65. BURO Question

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-05 00:00:00 UTC
From: kb9jqu@amsat.org
Message-ID: <32cf9ffd.697217@news.demon.co.uk>
Source record: 34077

This may be a silly question but one I need to ask anyway. I have
been operating as M/KB9JQU from England. If someone QSLs me via thier
bureau will it go to England? or the US?

My guess is the ARRL bureau in the US. I am sure someone in this
group has had expierence in this matter.

You might check with Ten Tec. They have started a line of kits and
while I don't have a catalog or ad handy, it seems that along with the
14MHz to 50MHz transverter they have another for 144MHz.....

SB DX @ WW $OPDX.286
Ohio/Penn DX Bulletin No. 286

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 286
BID: $OPDX.286
January 6, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W4/YV5DTA, N4AA & QRZ DX, W5IJU & ISLAND/DX News, N7KH, K7NPN, NL7TB, K8PYD, K8YSE, K9EL, CX5BW, F6AJA, G4BUE & DX News Sheet, OH2BUA, PA3GBQ, PB0ALB, VE1AL and ZS6EZ for the following DX information.

3Y, BOUVET. Several other DX publications report that Tony, WA4JQS, Director of Operations of the South Sandwich Island Antarctic DX Group, states the 1997/98 operation and paper work is going along very well. Permission had been received for a December 1997 landing date, but with the possible establishment of a CCAMLR (Convention of the Conservation of Antarctic Marine Lining Resources) ecosystem monitoring program being set up on the island and taking effect in October, 1997. Problems could arise just before departure time with permission to land. The South Sandwich Group has re-applied for a 1998 season landing date also, so that they would have time to work with any new requirements that the CCAMLR group should request. He also reports that there are many requests by the JA operators for them to postpone their landing until 1998, so that the 28 MHz band opening to JA would be greater. This was also a big factor in the new date request.

7O1A OFFICIAL RESULTS. The 7O1A operation recently conducted by Zorro, JH1AJT, and Franz, DJ9ZB, from Aden, Republic of Yemen, during December 15-23th, 1996, using only a TS-50, R5 (10/15/20) and wire dipoles (40/80), made 13140 QSOs with 105 countries. All QSOs were on SSB. The break down is as follows:

MHz No. of QSOs COMMENTS MHz No. of QSOs
--- ------------ -------- --- ------------
3.5 1078 JA: 240 14 3620
NA: 250 18 3635
EU: 588 21 1971
24 670
7 1926 JA: 500 28 240

NA: 600
EU: 826

9G, GHANA. Steve, PA3GBQ, will spend his 1997 holiday here from February 1st until March 8th. His callsign will be 9G5BQ. Also, he will take part in the ARRL CW contest maybe with a special callsign. This will be an all band event from on top of a mountain. Activity will be mostly during the night and morning hours on the low bands and WARC bands. He will also try to obtain a license on 160 meters. Steve may make a trip to TU-land during his holiday. All QSL cards via PA3GBQ.

9M8, EAST MALAYSIA. PB0ALB will be in Sarawak from April 19th to June 6th as 9M8CC. Activity will be on AMTOR/RTTY and SSB on 80-10 meters. Europe stations should look for him on 15 meters at 1100z, 20 meters at 1200 and 80 meters at 0000z. JA/USA stations should look for him somewhere between 0200-0600z for 15/20 meters and 1000z for 80 meters.

C6, BAHAMAS. The DXNS reports Rick, NE8Z, will be active January 13-20th as NE8Z/C6A from Treasure Key. Activity will be on CW/SSB. QSL via NE8Z or K8LJG.

CE, CHILE. Paul, F6EXV, has received his CE3/F6EXV licence. He will be active as soon as possible. It is reported that he will be there for 2 or 3 years.

CX, ISLA DE FLORES (URUGUAY). Pedro, CX5BW, and other CX operators will be active from IOTA SA-030, January 10-20th. They will put on the air 5 stations on all HF/VHF/UHF Bands. Special attention will be given to 6 meters. Their locator number is GF25. Activity will be on SSB, CW, RTTY and SSTV. The last two modes are a first for SA-030. They will put digital photos on the air of the expedition on SSTV. The group's callsign was not mentioned. QSL to: P.O.Box 2, Z.C. 11000, Montevideo-URUGUAY S.A.

CY0, SABLE ISLAND (BAD NEWS!). Al, VE1AL, reports, "the Canadian government has announced that it plans to close the weather station on Sable Island, unless private interests can be coerced into paying for the valuable services provided to the public. Another possibility is that the station there would be automated and serviced on a regular basis, much like the telephone facility that gets the attention of Telco employees (who happen to the be hams) on an irregular basis. Whether the others who have interests on Sable Island (oil companies and scientists studying the environment) would continue to remain there is not known. It would appear at this point that future accessibility to Sable by Amateur Radio Operators could be in severe jeopardy. On the other hand, it may be argued, this was not the case on St. Paul Island (CY9) where the lighthouse was automated a few years ago and there is no "permanent" population. While there is no maintenance of the landing site at St. Paul, sea access can be had with some degree of difficulty. Maintenance crews use government supplied helicopter service. However, Sable Island has special designation as an environmentally protected area and government permission for "visitors" would likley be scrutinized far more closely than St. Paul. Also, landing areas on the Sable Island

beaches are currently checked by "residents" prior to a plane's arrival. The landing site is a portion of beach that has been visually inspected and deemed to be packed hard enough by sea action so that a light plane equipped with very wide tires can touch down safely without becoming bogged down in the sand. No residents would preclude this and make airplane arrival difficult or even impossible. Approaching Sable by sea is, at best, extremely dangerous as it is known as "the Graveyard of the Atlantic" and this leaves only very expensive helicopter service."

H4, SOLOMON ISLAND. The German team of Bernhard, DL2GAC, and Siegfried, DK9FN, will be active here in February for at least two weeks. The callsigns to be used are H44MS for SSB and H44/DK9FN for CW.

IMPORTANT! JUST A REMINDER! EVERYBODY PLEASE READ!!! Leo, K8PYD, from the 8th Area QSL Bureau would like to remind everyone with new "VANITY CALLSIGNS" to send new SASE envelopes with your new callsigns on them. Also, you should still send an envelope or two with your old callsign on it just in case some cards continue to show up over the next few years at your QSL bureau.

PJ9, NETHERLANDS ANTILLES. The "Island/DX News" reports John, W1BIH, will be active as PJ9JT from Curacao, January 8th through March 30th. Activity will have an emphasis on CW, with operations on 160-10 meters. QSL via W1AX.

QSLS BEING LOST FOR ZS8RI. Chris, ZS6EZ, QSL Manager for ZS8RI, reports, "....A lot of people are losing their QSLs mailed to me, because they put "Edward and Marion Island" on the envelopes..... ZS8IR's QSL route is via ZS6EZ in South Africa. Do not put Edward and Marion Island on the envelope!" ..... de Chris, ZS6EZ, (Not on Marion Island!)

T32, CHRISTMAS ISLAND. T32Z, has been quite active. CW/SSB activity varies between 0130 to 0800z and also around 1900z. Check 21005, 14180, 7003 and 1826 kHz. ADDED NOTE: Kay, N7KH, the sister of T32Z, reports to OPDX that her brother is very concerned that wrong QSL information is being published by some DX bulletin. That information showed QSL via a W7! That information is totally incorrect, and any cards received by the W7 WILL NOT be forwarded to anywhere but the trash can. The correct QSL information is via N7YL, and always has been...

THE DX MAGAZINE (New Publisher). "The DX Magazine, previously published by Paul and Nancy Smith, following many years of publication by Chod Harris, has been purchase by Carl Smith, N4AA, current publisher of QRZ DX. The March/April 1997 issue will be the first one by the new publisher..." de QRZ DX .... Also, QRZ DX now has a WEB Page and will be expanded upon Carl's return from the UK. The address is: http://www.abooks.com/dx

USI ALERT (United States Islands Award Program). Jim, AA3ID, and XYL Dianne, N3GPF, will be back on Hatteras Island (NC-005S) on January 6-12th, with 10-80 meters (and 6m) capability. Their main operating frequency will be 14260 kHz. Special QSLs will be available.

VK0, HEARD ISLANDS NEWS AND UPDATES....
Jukka, OH2BUA, reports that a special real-time coverage for the Heard Island Dxpedition on the World-Wide Web is availabe now. Check the WebCluster at: http://www.clinet.fi/~jukka/heard.html

Heard Island DXpedition Teams's departure from Reunion Island has been delayed by a strike in France. The team had been ready to set sail January 3rd, but instead the team will now leave January 5th (More on this later). The bad news is the team will now head directly to Heard Island without making a planned stop at Crozet Island. John, ON4UN, reports that the French Regie Maritime, the semi-official agency that manages all ferries in France, went on strike so the crew of the Marion Dufresne, the expedition vessel, went on strike for 2 days as a sign of solidarity with their brethren in France. The team was active over the past week as TO0R from Reunion Island. Activity was mostly on 160 meters. As this was being typed, John, K8YSE, informed OPDX of the following information: "The Heard Island DXpedition team is now enroute to Heard Island per my QSO with them today around 1700z, Sunday. The expected landing date is January 12th, and they will not be operating until they get everything set up. Setup time is estimated to be 2 days. Everyone is in good spirits after their superb performance from Reunion Island on 160m. They are hoping to do the same from Heard Island." The team expects to be active for two weeks. They will sail back to Reunion Island but plan (hope) to stop at Kerguelen Island for about one day. KYFC!!

XT, BURKINA FASO. The DXNS reports Hugolin, XT2HB, is a newly licensed amateur and is often active on 14225 kHz around 1730z weekdays and 0730z at weekends. QSL direct to: Dep. 01, BP 6397, Ouagadougou, Burkina Faso.

Hello Joe
I have been using Log-EQF for several years and like it very much. I have tried several of the other logging programs and this one works the best for me. It is shareware, but with the registered ver you get several more features. I have talked to the N3EQF (who wrote it) several times. If you ever need tech support, he is the one that answers the phone. The price is VERY reasonable. You should be able to find it on most Ham download sites. <logeqf**.zip>
Hope this helps.

77. Help w/ CO6RJ and References?

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-06 00:00:00 UTC
From: "David B. Holtkamp (K5KH)" <holtkamp@roadrunner.com>
Message-ID: <01bbfc23$b95c27e0$ac6d3bc6@internet.roadrunner.com>
Source record: 33997

Hi all! I just worked CO6RJ (Antonio) and he said that he is good in the 97 callbook (presumably Flying Horse). My golist says QSL via CM6RJ, but the address for CM6RJ is different from the on-air address that Antonio gave for CO6RJ (that is only partial copy).

Can anyone help with a quick look up of CO6RJ in their 97 Callbook? *Please*?

Also, I tried looking at all the Internet callsign/qsl mgr websites I can find and no luck.

Does anyone know where the 97 callbook can be found on line?

Thanks in advance!

73s de David (K5KH)

78. Analysis & Synthesis Capability Now Available to Ham Clubs, Groups and Consortia!

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-06 00:00:00 UTC

Message-ID: <32D1848F.7675@webblabs.com>
Source record: 33998
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.space

I posted material some time ago regarding the Webb Laboratories Education & Professional Partnership Programs, unprecedented opportunities through which every faculty member, graduate student and undergraduate student (alternatively for the PP program - each member of a working group of designers) can achieve true ownership, at school, home and on the job, of powerful electronic CAE capability. The EP and PP Programs provide general, graphical nodal circuit analysis, RF/microwave-specific analysis, unconstrained nodal noise capability and true 'floating' two-nodes-per-port definition. In addition, the EP and PP Programs include the industry's most comprehensive transmission structure analysis/synthesis engine as well as the powerful SystemPlus suite of design tools for the wireless/receiver/system designer.

The complete EP or PP Program package, including over 500 pages of documentation, may be distributed department/group/consortium/company-wide with no restrictions, without expiration, and at no liability to the School, Group, Consortium or Corporation. EP/PP Program details, an editorial review and a growing example library may be found at:

http://www.webblabs.com/ep.htm

or

http://www.webblabs.com/pp.htm

I ask that you forward this announcement to potentially interested individuals. If you prefer, kindly reply with names and e-mail addresses of those to whom I should convey information directly. Thank you for taking the time to consider what has become a unique access and ownership opportunity for a great number of designers worldwide.

Wishing you a Happy New Year!

Kathy Goerg

Thanks for the info on the ZS9f.

Don't you just hate it when you think you might have worked a new one and it turns out to be just another South African? Darn! Well, Heard is suppose to be happening soon so maybe that one will turn out. Course 20 meters will probably be wiped out by the DX listing between 14.200 and 14.350. And I still don't believe those 59+20 reports I hear the midwest and east coast guys giving the Europeans on around 3.8Mhz. Just got to get a bigger antenna up.

Thanks.

86. Need QSL help with 8Z4A

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-07 00:00:00 UTC
From: fjh@alpha1.csd.uwm.edu
Message-ID: <5aslni$36s@uwm.edu>
Source record: 33999

While visiting my parents over the holidays I came across an old QSL
card that I never got around to sending. Looks like I worked 8Z4A on
10m SSB in November of 1979... Do any of you DXCC guru's know if the
logs from this operation still exist and if so, who I should pester for
a card? The lists I've checked show WA3HUP as the manager but that was
listed in the early to mid 80's I think.

Thanks & 73,

Fred, KF9ZI (ex WB2WDW)

You could program the beacon text and CWIDTEXT to say
what you want it to say and use that as the ID. I don't believe
that an ID must occur in a specific area of a digital transmission.
If that were true, we would not have alias calls.

Hi Curt!

Yes, you are right. Others have had the same problem. Usually they
just use their home callsign in MYCALL and rely upon the CWID to send
their complete reciprocal call. Of course you could set up the beacon
text to include your full callsign and location if you wish and send out
the beacon message at frequent intervals.

The best solution of all is to get a "real" UK callsign!

Source record: 34005

Hi, everybody!

I just installed the end-feed ZEPP antenna in my new QTH.
It's about 82 meters long and about 70 meters high (top of 20 floor
apartment house).

Last night, I watched the 160 meters and I can copy several JA
and VK stations. But, no W stations.
I worked with W0 station several years ago. It was my first and only
North American station on 160. My antenna was very poor at that time.

Anybody can inform me on which frequency can I hear most of
North American stations?

In Korea, our frequency range is 1.800 through 1.825 MHz.

I will QRV on the band as soon as possible because I need the new
station lincense for my new QTH.

Best 73!

>Yes, you are right. Others have had the same problem. Usually they
>just use their home callsign in MYCALL and rely upon the CWID to send

That has been my conclusion to this issue. I have my CWID set to my reciprocal callsign. I also set BTEXT to callsign and QTH, but I usually don't sent out a beacon very often.

>their complete reciprocal call. Of course you could set up the beacon
>text to include your full callsign and location if you wish and send out
>the beacon message at frequent intervals.
>
>The best solution of all is to get a "real" UK callsign!

Thats the plan. But I must first finish my US Amateur Extra. Oh well, perhaps it would do me good to study for both exams at the same time. I wonder what questions I could get mixed up? HI HI

>73 es Happy New Year,
>Walt (G3NYY)

And thanks to the usenet comunity for all the replys via e-mail and the group(s).

Some other interesting facts that came out of this. The MYCALL only takes 6 characters (as well as MYALIAS) due to AX.25.

In the UK you must ID via CW (actually MCW) anyway so this is not as big of issue as I thought. In the USA we don't have to use CWID on Packet (at least anymore).

Source record: 34013

>>> NEWS FROM THE RSGB IOTA COMMITTEE [1/97] <<<

The following notice has been received from the RSGB IOTA Committee:

IOTA REFERENCE NUMBERS ISSUED SINCE OCTOBER 1996
AF-077 ZS1 Cape Province-South Coast group (South Africa, operation
by ZS23I in October 1996)

The following Reference Numbers have been issued provisionally (Prov), to be
confirmed when satisfactory validation material has been provided:

AF-076 (Prov) 5N4 Gulf of Guinea group (Nigeria, operation by 5N4ALE from
Bonny Island during September to December 1996 - all
necessary paperwork has been received but information
still required about QSLing arrangements)

OC-217 (Prov) YB3 Kangean Is (Indonesia, operation by YB3SPS/P in December
1996)

OC-218 (Prov) FK Matthew Island (New Caledonia, operation by FK5M in
December 1996)

AS-125 (Prov) HS Gulf of Thailand North East group (Thailand, operation by
HS50A from Koh Chang in December 1996)

Validation is also awaited for the following operations from already numbered
groups:

OC-152 FO Tubuai Island (French Polynesia, operation by FO0SUC in
October 1996)

AS-067 JA Uji Archipelago (Japan, operation by JI6KVR in December
1996)

Checkpoints are not authorised to accept for IOTA credit QSLs for these
operations for which validation material is required. No change to their
status will now be made before the Honour Roll/Annual Listing update
deadline. IOTA members are reminded that updates for the annual listings
should be mailed to their nominated Checkpoints on or before 1 February 1997.

If my memory is ok the 8Z4 in 79 was by a group of
Jordanian stations. One of the guys was named Zidane
and Dr Salim OE6EEG was involved.

If this is correct, big chances that WA3HUP, Mary-Ann
was the manager. I had QSOs with the 8Z4 team but one
of my logbooks is missing for 79 and I can't confirm that.

NOAA Space Enviornmental Laboratory in Boulder, Colorado publishes weekly
solar data in conjunction with work by the Space Weather Operations(SWO).

The data includes the weekly forecast which is broadcast by the same people
over WWV on a daily basis. It does not appear on the web yet. However, you can
check out the great stuff they have at the home page. I don't have the exact
adress here but use a search engine for "Space Enviornmental Lab" to pull it
up.

Happy New Year, all.

I'd like to be able to record (unattended) my favorite radio programs and features for later listening. Something like a VCR with multi-event programming would do the job nicely. Some have suggested using a VCR and a tuner connected to the audio input, but that would require going back and retuning the receiver to different stations between events, which is not possible in this case.

Any ideas? Thank you in advance.
Michael

Me, too!

I bought a Reveal FM radio board for the PC (about $40 at Best Buy), with the idea of being able to program it as you suggest.

<flame> I got disgusted at the dain-bramaged software that came with it (only 10 presets, hard to set with fixed scroll rate, roundoff errors in freq display, . . .). I'd have kept it if I could have gotten specs for how to control it -- I'd have written a control program myself. But their "24/7" tech support line put me on permahold so I gave up and returned it. </flame> I could always buy another one if I decide to try it again someday. It seemed like a well-build piece of hardware.

Seems like you could build an integrated control out of an old XT with the FM radio card in it and an IR emitter to drive the VCR. If the VCR won't record sound without a video signal to sync to, put a CGA card in the PC; you could put a timestamp on the video to tell you when the audio was sent, freq, station/program ID, etc., in nice bold characters that would show up in fast forward / rewind.

If your existing FM receiver is IR controllable, then that opens other possibilities.

I agree, this is a product that is missing from the marketplace. Probably wouldn't be terribly hard for the VCR makers to implement, either; they already have the front end, what's a couple more chips for the FM broadcast IF and detector? They can sell an entire Walkman for $cheap. . . It'd be neat: an 8-hour stereo audio recorder! There's not much on the tube worth watching, anyway.

We can't be the only two who've felt this need. Ideas, anyone?

> Anybody can inform me on which frequency can I hear most of
> North American stations?
>
> In Korea, our frequency range is 1.800 through 1.825 MHz.

I realize this may not be directly helpful, but there is always a Worked All States and Awards Net (3905 Century Club) who meets at 0200 zulu on Tuesday, Friday and Saturday nights (date is US local not Zulu). Listening for this net will tell you when propagation to W land is good and perhaps then a CQ in the 1800 - 1825 band will get a response.

I generally always can hear at least one US station working CW generally between 1800 and 1825.

Good luck and 73s!!!

SB DX ARL ARLD002
ARLD002 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, The Ohio/Penn DX Bulletin, Chris, G4BUE, The DXNS, the Yankee Clipper Contest Club PacketCluster network and Contest Corral from QST. Thanks to all.

HEARD ISLAND UPDATE. Due to a strike by the French Regie Maritime, the departure of the ship from Reunion Island was delayed until January 5. They are now heading directly to Heard Island and will be on schedule to be QRV from Heard on January 13. They will leave Heard Island January 30 or 31 and will stop at Kerguelen on the way back as planned, but the chances of being QRV are minimal because of the limited time now available. The group has been active en route as TO0R/MM.

EASTERN KIRIBATI, T32. T32Z, has been quite active from Christmas Island. CW and SSB activity varies between 0130 and 0800z and also around 1900z. Check 1826, 7003, 14180 and 21005 kHz. QSL is via N7YL.

JAN MAYEN, JX. Per, LA7DFA, who is QRV as JX7DFA until April, will concentrate on 80 meter SSB in January. In February he will be QRV from the QTH on the western side of the island with high power and better antennas, and will concentrate on 80 and 160 meters. QSL to home call via bureau or direct.

BRUNEI, V8. Hiro, JA1WTR, formerly TA2ZY, VU2WTR and XW8HK, is QRV as V85HY on 80, 40, 30, 17 and 15 meters, mostly CW. QSL via bureau or direct.

ST. HELENA, ZD7. Cherie, ZD7YL, is QRV on 20 meter SSB. She is the xyl of ZD7TT who is in the Falklands. QSL direct.

ST PETER and ST PAUL ROCKS, PY0. Karl, PS7KM, and Tino, PT7AA, will be QRV for 2 to 3 weeks starting on January 25 as ZY0SK on SSB and ZY0SG on CW. Look for them on CW and SSB on the usual DX frequencies, no 160 meters. QSL CW QSOs via PT7AA and SSB QSOs via PS7KM.

WESTERN MALAYSIA, 9M2. Dick, N4ISV, is QRV as 9M2RY for several years. He can be found using CW or SSB on 80 through 15 meters. QSL via N4JR.

ARUBA, P4. Mike, K4PI, will operate at P49I from January 22 through 28, including the CQ WW 160 Meter CW Contest. Before and after the contest, he will be active on newband/lowband CW. QSL to K4PI.

GHANA, 9G. Steve, PA3GBQ, will be here from February 1 to March 8, using the call sign 9G5BQ. He will try to obtain a license for 160 meters. Steve may make a trip to TU land during this time. All QSL cards via PA3GBQ.

PAPUA NEW GUINEA, P2. The German group who were QRV as VK9CR in 1996 will be QRV in February from the Misima Island Guesthouse in the Louisiade Archipelago.

SOLOMON ISLANDS, H4. Bernhard, DL2GAC, and Siegfried, DK9FN, will be QRV at the beginning of February for at least two weeks as H44MS on SSB and H44/DK9FN on CW.

NETHERLANDS ANTILLES, PJ2. The Island/DX News reports John, W1BIH, will be active as PJ9JT from Curacao, through March 30th. Activity will have an emphasis on CW, with operations on 160 through 10 meters. QSL via W1AX.

QSL CORRECTION. Bill, K1SE, reports an error in ARLD001. All QSLs for A92GD should go to K1SE only and NOT direct to Bob. QSL to K1SE, P.O. Box 685, Manassas Park, Virginia 20113-0685.

USI ALERT, United States Islands Award Program. Jim, AA3ID, and XYL Dianne, N3GPF, will be back on Hatteras Island, NC-005S, through January 12, with 6 through 80 meter capability. Their main operating frequency will be 14260 kHz. Special QSLs will be available.

THIS WEEKEND ON THE RADIO. The Japan International DX Contest, CW, the DYLC Midwinter Contest, QRP ARCI Winter Fireside SSB Sprint and North American QSO Party, CW, are all available for your radio pleasure. Get all the details in January QST, page 107.

116. below .55 mHz

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-09 00:00:00 UTC
From: bmm1@fn5.freenet.tlh.fl.us
Message-ID: <5b37b0$3k0@fn5.freenet.tlh.fl.us>
Source record: 34029

I was listening to frequencies below the AM broadcast band the other day. There are numerous morse code repeating call signs between .2 and .5 mHz. I assume they are beacons. When I looked up their country of origin they are coming from all over the world, including Japan Russia China Turkey, Italy, Phillipines,, Chile etc. This part of the spectrum was important in the early days of radio but I cant imagine what beacons in this band would be for now. Does anyone know of a list of these, what their exact location is, what power they are radiating etc? Also below .2 mHz there are numerous odly modulated signals reminicent of LORAN. Does anyone know what these are?

Thanks

Bruce.

Save yourself $30, if you have WWW access, and do a search at
www.yahoo.com for online amateur radio callbook.

There are several, including one's that are updated DAILY!!

As for the international one? There are some international sources our
there, but not as good as the sources for American callbooks.

See if you can find W1TYQ. Think he is Michican now. He was a pilot
for the oil company and held HZ1 or 3TYQ and may have operated from the
neutral zone. However, I was operating out of HZ1AB from 1977 through
1985 and know there was no operations from the neutral zone during that
period of time.

Vic W1TYQ may have some info, but he retired and left Arabia in 76 or
early 77.

From your list the only one I have worked is T5/EI5C. Good Luck! I
have sent twice with SAE & greenstamps to no avail. I have also asked
the ARRL if this is even any good for DXCC. I figured it might even
be a waste of time in the first place if the paper work wasn't
submitted. I sent a note off to Bill Kennamer on Dec 16th requesting
the status of this one, but no response thus far. Looks like this one
is another DX black hole designed to suck up greenstamps.

>5. does anyone in AK operate 160 SSB ?

>Tnx a great deal ....
>cu next 'test
>73 de KR4TG
>Mike Del Pozzo

Hi Mike! Not sure when you worked the stations or how soon you are
expecting the QSL's.

I worked FW2OI on:
10/27/96 15M SSB
11/02/96 17M SSB
11/03/96 20M SSB
The QSL route was via DJ4OI. I have not rec'd my cards but it is MUCH
to soon to expect them at this point.

FR5DX - I won't even get into this one, but lets just say that the
envelope you sent your card in must contain greenstamps in large
denominations if you expect to have any chance of a QSL and then no
guarantees.

I worked T88T on:
10/19/96 20M SSB
10/29/96 30M CW
The QSL route is:
Belau DXpedition
Box 88
Morris, OK 74445-008
Once again, I don't know when you worked them or QSL'ed but from my
contact dates, it would be too soon to expect the QSL's

I worked S01M on:
3/4/95 15M SSB
7/30/95 20M SSB
QSL's were rec'd via:
Jose C. Perez Cervera

APDO 13325
41080 Sevilla
Spain

I suppose that you could have worked the above stations earlier than I
did but not sure how MUCH earlier they were active. My guess is that
you need to be a bit more patient (except in the case of FR5DX).

Not true! I QSL'd FR5DX twice to his home address, enclosing $1 on each occasion. I received a reply card within less than 6 months on both occasions ..... via the bureau!!!

OK - but at least he confirmed the QSOs, so I ain't complaining!

Someone else asked for this too so I'll post to the newsgroup.
There is a bandplan available on the web at the University of
Texas Amateur Radio Club site, http://www.utexas.edu/students/utarc/
Look for a icon that mentions band plans.

BTW, I'm posting this from a friend's account. If you have any questions
you can reach me at barron@liant.com.

My friend KA9DQQ (Dick) has the below equipment for sale.
He resides in Wausau, Wisconsin USA

Ten Tec Model 705/705A Electret Condenser Microphone
Ten Tec Model 585 Paragon All-Band HF Transceiver
Ten Tec Model 253 2 Kilowatt Automatic Antenna Tuner
Ten Tec 9420 Power Supply
Hercules II Model 420 Solid State Linear Amplifier

All Ownerï¿½s Manuals Included.
System Completely Rack Mounted.

Price $3,600.00 Plus Shipping/Handling/Insurance.

I am posting this for him, please call him for any additional
information.

Pricing on above equipment should be confirmed with KA9DQQ.
Final price is subject to his approval.
I reserve the right that if a typographical error occurred, it was
not made to misrepresent KA9DQQ or misguide the reader of
this posting. Laymanï¿½s termsï¿½ I am not the best of typists.

KA9DQQï¿½s personal information is as follows:

Email: elmer5@juno.com
Phone: 715-848-8095

Thank you for your time and attention.

In <32d16eea.1561298@news.demon.co.uk> kb9jqu@amsat.org (Curtis P Sardeson) writes:

>I am operating in England as M/KB9JQU and have found a small problem
>when trying to operate HF or VHF Packet. A Kantronics KPC-3 or KAM
>Plus do not allow me to assign M/KB9JQU to MYCALL.

>A telephone call today to Kantronics confirmed this.

This is not a KAM issue, it is an AX.25 issue.
The AX.25 protocol was defined to use only a 6-character callsign
field plus a numeric SSID (a number ranging 0-15) back in 1984. The
rationale was that "no amateur callsign is longer than 6 characters".

Of course this was wrong, and later a proposal was made for a new
version of AX.25 that would have more flexibility. But by then, there
already were so many users that a change had no chance of being
accepted. We seem to be stuck with it.

133. CQ 160 m

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-11 00:00:00 UTC
From: v.coletti@iol.it
Message-ID: <5b6mul$78j@mikasa.iol.it>
Source record: 34040

I have just put down the old antenna setup (three dipoles togheter,
for 80, 40 and 20 m) and set up a homebrew loaded dipole for 160 m.
It is 40 meters long and the coils are at 7.5 m from center balun.
Unfortunately I cannot put it too high, it is at only 10 meters on the
roof...
Before this, I worked a few countries shorting coax cable and using
the whole coax+3 dipoles as a wire vertical, vs ground.

On the first tries I contacted I and OE stations, up to about 1000 Km
and tonight at local sunset I heard strong CW from UA9.

I am operating mainly on 1843 SSB and 1838 CW (NOT so fast, HI)
on weekends starting at 16.00 UTC and everyday after 21 UTC (whenever
possible).

If someone wants to try contacting me, all stations are welcome.
I will also gladly accept any suggestions for better operations on 160
meters.

VK0IR - It is anticipated that the landing operation, including the setting
up of the first shelter will take approximately 4 to 6 hours, depending on
weather. One of the first tasks will then be to set up the NCDXF beacon. The
radio operation will only start after all infrastructure has been set up, and
after all antennas have been raised. This may take 2 or 3 days. During this
time we will be able to collect a lot of valuable propagation data from
listening to the beacon station. The NCDXF beacon will run from the island as
VK0IR with an R5 vertical. It will transmit on 14.100, 18.110, 21.150, 24.930
and 28.200 MHz. The beacon transmits for ten seconds on each band every three
minutes. The VK0IR transmission on 20 metres is at one minute and ten seconds
after the hour, and every three minutes after that. The transmissions on the
other bands follow every ten seconds with the 10 metre transmission starting
at one minute and fifty seconds after the hour, and every three minutes after
that. On each frequency it sends VK0IR in CW at 100W, then 1 second long
steady tones, at 100, 10, 1 and 0.1 W and then moves to the next higher
frequency. Listen for the beacon and report peak times, strength and SP/LP
specs to your pilot station or to ON4UN (E-mail to john.devoldere@innet.be or
via packet to ON4UN @ON4AWP.OVN.BEL.EU). The quality of these reports will be
an important tool to draft the operating plan for the first days of operation
```

VK0IR: AM I IN THE LOG? ---> PACSAT be used to send the contents of the logs to civilized word so that they can be use for log-checking. The log will only contain call, band and mode. It will not contain any duplicate QSO's and you will not be able to "browse" through the log. The log data will be available on:
* WORLD WIDE WEB: connect to http://www.aurumtel.com/hnews.html (from here you can go to the log server) or connect directly to the US log server page at http://www.aurumtel.com/heard-log.html or connect directly to the European log server at http://heard.eunet.be (once connected, enter the callsign you are interested in, and press the "search" button);
* E-MAIL: send an e-mail message to heard-log@ve7tcp.ampr.org with the call sign of the station in the body (one per line). The log server will immediately return a message to you with the requested data;
* PACKET RADIO: the following syntax has to be closely followed:
to : PA3BXR @PI8VAD.#ZH2.NLD.EU
subj: HEARD-LOG
msg : HEARD-LOG <<< call >>>
You can ask for log info for your friends as well. Put one call per line, preceded by " HEARD-LOG ". A maximum of FIVE callsigns are accepted. The callsign MAY NOT contain a slash (/). The log server will return a message to you with the required data. This may take some time though (from a few hours to a day or more if a lot of HF forwarding is involved!)

11 January 1997 No 297 BID: $425WW297B
==========
*** 4 2 5 D X N E W S ***
==========

5N - Mark, 5N0MVE (QSL via ON7LX) is back home in Belgium because his work assignment in Nigeria is over]
5R - Maurizio, 5R8FH is a lay missionary at Sakalalina, in South Central Madagascar. For the time being Maurizio is active only on 20 and 15 metres, with 80 watts and a three element beam towards Europe. QSL direct to I1PIN: G.Carlo Pignocchino, Via San Solutore 18, 10010 Ca-ravino-TO.
7O - Recent operations by Zorro, JH1AJT and Franz, DJ9ZB as 7O1A (15-23 December 1996) logged 13,140 SSB QSOs with 105 Countries, on 80 (1,078 QSOs), 40 (1,926), 20 (3,620), 17 (3,635), 15 (1,971), 12 (670) and 10 (240) metres.
7Q - Karl, WF5A will be active again (10-80 metres, WARC bands included, SSB and CW) from Malawi as 7Q7KH for four or five weeks starting in early February. QSL via home call.
8Q - Chris HB9CYV/8Q7YV and Martin HB9CYN/8Q7YN [425DXN 292] logged 2371 QSOs (almost all on CW), 1122 on 40 metres. QSL via bureau to their respective home calls. For direct cards, HB9CYN's address is e' Mar-tin Ghermi, Wyden 5, CH-5242 Birr, Switzerland. HB9CYV's (not HB9CRV 425DXN 294) correct address is Christian Zeller, Jaegerstr. 19, CH-8200 Schaffhausen, Switzerland.
8Q - In March Rolf (HB9DIF) and his wife Manuela will be in the Maldives

for three weeks together with Hans (DL8NBE). Rolf and Hans will be active on all bands CW/SSB/RTTY possibly with their old calls, 8Q7BV and 8Q7BE respectively. QSL via bureau only.
9A - Miro, 9A0AA/mm is active from the Antarctic Vessel "Hrvatska Cigra", near the Russian Vernadsky base.
9G - From 1 February to 8 March Steve, PA3GBQ will be active from Ghana as 9G5BQ. Operations will take place mainly during the night and morning hours on low and WARC bands. Steve is expected to participate in the ARRL CW Contest (possibly with a special call). QSL via PA3GBQ.
9H - From 14 to 24 January IZ3AHY, LX1PS and LX2BN will be active (all bands, SSB and CW) from Malta as 9H3XF. QSL via IK3OYS.
9M2 - Dick, N4ISV has got the call 9M2RY, with which he will be active (SSB and CW) for several years. QSL via N4JR.
9M8 - From 19 April to 6 June Peter, PB0ALB will be active (10, 15, 20, 40 and 80 metres) from Sarawak (OC-088) as 9M8CC. Hopefully Peter will operate also RTTY. QSL via PB0ALB.
C6 - From 13 to 20 January Rick, NE8Z will be active (SSB and CW) as NE8Z/C6A from Treasure Cay ((NA-080). QSL via NE8Z or K8LJG.
CE - Paul, F6EXV has got the CE3/F6EXV licence. Paul will be active from Chile for two or three years. QSL via F2VX.
CE_ssh - CE9MFK is active from Chilean Antarctic base Refuge Sherriff (WABA CE-09) on Livingston Island, South Shetlands (AN-010). He is usually QRV at 00.30 UTC on 14.245 MHz.
CX - From 10 to 20 Janury a group of CX operators will be active from Flores Island (SA-030) as CV5A (all band/all mode operations). QSL via P.O.Box 2, Z.C. 11000, Montevideo, Uruguay.
CY9 - From 10 to 20 June (+/-) Mike, VE9AA and Doug, VE1PZ will be active from St. Paul Island as CY9AA [425DXN 293]. They will be active on 160-2 metres SSB/CW (special emphasis will be placed on 6 and 160 metres).
F - Marc, ON5FP and Kristof, ON6NN will participate in the IOTA Contest (26-27 July) from Sainte Marguerite Island (EU-058).
F - From 23 to 26 January the station TM4ICF will be active on all bands SSB and CW. QSL via F5PTI.
FP - Jack, WA1CFS (ex N1REU) is organizing a "seriuos" activity ((CW, SSB and RTTY, all bands 10-160 metres, 2 and 6 metres, possibly satellite) from St. Pierre et Miquelon in August.
FR - TO0R (operated by the VK0IR team) went QRT on 5 January at 02.10 UTC. The logs can be found the log servers (see VK0IR: AM I IN THE LOG? above), where they will be available until the first logs for VK0IR are posted. At that time they will be removed. QSL via INDEXA, c/o W4FRU, P.O.Box 5127, Suffolk. VA 23435, USA.
FS - From 15 to 20 February (dates are still subject to confirmation) FS5PL, FG5BG and FJ5AB will be active from Tintamarre Island (NA-199).

11 January 1997 No 297 BID: $425WW297C

==========
*** 4 2 5 D X N E W S ***
==========

H4 - In early February Bernhard, DL2GAC and Siegfried, DK9FN will be active (mainly on the low bands) for two weeks at least as H44MS (SSB) and H44/DK9FN (CW). They are unlikely to activate "interesting" IOTA islands.
JX - Per, LA7DFA is active until April from Jan Mayen (EU-022) as JX7DFA. In January he will concentrate on 80 metres SSB and in February he will be active on 160 metres as well. QSL via home call (also through the bureau).
KC4_ant- On 19 December Henry, KC4/VE0HSS was active for a few hours from the base Upstream Bravo.
KC4_ant- On 12 January Greg, WB7CHV arrived [425DXN 294] to US Antarctic base Palmer (WABA K-010), on Anvers Island (AN-012), from where he will be soon QRV as KC4AAC.
KC4_ant- Art, KC4/KL7RL is now again active [425DXN 295] from multinational Antarctic base Patriot Hills (WABA MN-01). Art will be QRV for Europe on Wednesdays (20-21 UTC on 14.260 MHz) and Sundays (17-18 UTC and 20-21 UTC on 14.260 MHz).
KC4_ant- KC4/KC8CWI is active from US Antarctic base Amudsen-Scott (WABA K-08), South Pole. He is usually QRV on 20 metres during the weekends.
LU - From 20 to 30 January LW9DHU, LU6DO and LW5EJQ will be active (10-160 metres) from Martin Garcia Island (SA-055) as LW5EJQ/D. QSL via LW5EJQ.
LU_ssh - Pedro, LU1ZS is active from Argentine Antarctic base Teniente Camara Bahia Luna (WABA LU-17) on Meda Luna Island, South Shetlands (AN-010). Pedro is usually active from 23 UTC to 1 UTC between 14.190 and 14.240 MHz.
LU_ssh - LU8EYK/z is active from Aregentine Antarctic base Beyers Base Camp (WABA LU-19) on Livingston Island, South Shetlands (AN-010). He is QRV daily at 1 UTC on 14.331 MHz with Jorge, LU4EDL.
P2 - In February a group of German operators will be active from Misima Island, Louisiade Archipelago ((OC-117).
P4 - From 22 to 28 January Mike, K4PI will be active from Aruba as P49I. He will participate in the CQ 160 Meter CW Contest. QSL to K4PI.
PJ5 - From 24 to 28 January Mike, K3UOC will be active on CW (10-160 metres, WARC bands included) as PJ5AA from St.Eustatius (NA-145). He will participate in the CQ 160 Meter Contest. QSL via W1AF.
PY - From 9 to 12 January the station PT5T will be active (SSB and CW) from Maria Francisca Island (SA-026, DIB 67). QSL via PP5LL.
PY - From 8 to 11 February ZY3CEJ will be active (SSB and CW) from Furado Island (DIB 62). QSL via F6FNU o PY3CEJ (for South America only).
PY - From 20 to 24 February PY5AA (SSB) and PQ5L (CW) will be active from Mel Island (SA-047, DIB 24, DFB PR-01, DFH PR-01) on 80, 40, 20, 15 and 10 metres. QSL for PY5AA via LABRE/PR, P.O. Box 1455, Curitiba/PR, 80001-970, Brazil (or through the bureau). QSL for PQ5L via LABRE/SC, P.O. Box 224, Florianopolis/SC, 89010-970, Brazil (or

through the bureau).
PY0_sp - The addresses of the QSL managers for the forthcoming operations by ZY0SK and ZY0SG from St.Peter & St.Paul Rocks [425DXN 295] are P.L. Andrade (PT7AA), Rua Osorio de Paiva 75, Fortaleza/CE, 60720-000, Brazil (CW contacts only) and Karl M. Leite (PS7KM), Rua Estacio de Sa 1838, 59054-580 Natal/RN, Brazil (SSB contacts only).
S2 - Vittorio (I1SLY), Fernanda (IK1FLF) and Manju (S21AM) are organizing an activity from Kutubdia Island (AS-???) scheduled for 21-23 February.
V2 - From 12 to 19 February Matt, NM9H and Sean KX9X (ex KF9PL) will be V2/ from Antigua. They will participate in the ARRL DX CW Contest possibly as V21CW. Operations will take place mostly on CW, with emphasis on 160 and 80 metres and WARC bands. QSL via their respective home calls.

V5 - WB0HPS and KV0Q will join KY0A and W8UVZ [425DXN 293] in the operations from Namibia scheduled for 10-18 February. Outside the ARRL CW Contest all mode operations are expected (RTYY on 20 and 15 metres).
VE - Operator Steve at VE8RCS on Ellesmere Island (NA-008, CISA NT-005) appeared near 14.260 MHz around 20 UTC the last few days. Steve operates from NWT WX Station base Alert, which is the most northern human permanent settlement in the world. QSL direct to: Polar ARC, c/o CFS Alert, P.O.Box 5210, Stn. Forces, Belleville, Ontario, Canada K8N 5W6 (put the operator's name on the envelope).
VK_ant - Mike (ex VP8MAP) is active from Australian Antarctica (South Pole) until the end of January. He is usually QRV between 22 UTC and 3 UTC on 14.243 and 14.270 MHz.
VP5 - From 12 to 24 February Joe, K8JP will be active as VP5/K8JP. He will participate in the ARRL DX CW and CQ 160 Metres SSB contests as VP5JP. QSL via K8JP (Joe Pontek, P.O. Box 59573, Schaumburg, IL 60159-0573, USA).
VR2 - To celebrate the transfer of sovereignity over Hong Kong from UK to China, VR2/VR6 stations will be allowed to change their prefixes into VR97/VS97 (in 1997) and VR98/VS98 (in 1998).
VU_and - Last week Mani, VU2JPS and his wife Mala, VU2MTC (Port Blair, Andaman Islands) eventually got the equipment donated by the Heard Island DX Association [425DXN 249].
VU_ant - In early January another group of scientists (among them there is Sen, VU3PMG) arrived to Indian Antarxtic base Maitri (WABA VU-02), on Queen Maud Land. Current operators from VU2AXA are VU3DEN, VU3NHK and VU3PMG.
W - On 11 January Norm, N6JV will be active from a few USI islands (Big, Small, Goat, Schoolhouse and Indian) in Lake Berryessa.

W - From 16 UTC of 28 January to 1 UTC of the 29th Challenger Middle
School ARC, San Diego, CA, will operate a special event station,
KI6YG, to commemorate the eleventh anniversary of the Challenger
space shuttle tragedy. Frequencies will be on or near 14.250,
21.350, and 28.350. There will be a special commemorative QSL. QSL
to Challenger Middle School, Attention: Frank Forrester, 10810
Parkdale Avenue, San Diego, CA 92126, USA.
XU - Mike, XU6WV has not much time for operating. He has been active
mainly on 20 metres SSB (23.30-00.15 UTC or 12-13 UTC) so far, with
a few excursions on the WARC bands. He will have a 40/80 vertical up
within the next few days.
YB - Deddy, YB1XUR reports that the activity from Tukangbesi Is (OC-???)
[425DXN 295] has been postponed to late February (possibly from 21st
to 23rd). This is the only IOTA activity currently expected from
Indonesia.
ZF - Bruce, W6OSP and Joe, WA6VNR will participate in the CQWW CW 160 Me-
ter Contest (24-26 January) as ZF2QM from Cayman Islands. QSL via
W6OSP.
ZP - From 19 to 26 January ZP5KO and others will be active (10-160 metres
SSB/CW) from the island of Yacyreta (Parana river) as ZP0V.
ZS_ant - Marten, ZS6ZY will be leaving for Antarctica on 7 January. He will
be active as ZS7/ZS6ZY from the Aghulus (a resupply ship), from
SANAE base (WABA ZS-01) and from the new South African base at Ves-
leskarvet.

>>> NEWS FROM THE RSGB IOTA COMMITTEE <<<

The following notice has been received from the RSGB IOTA Committee:

IOTA REFERENCE NUMBERS ISSUED SINCE OCTOBER 1996

AF-077 ZS1 Cape Province-South Coast group (South Africa, operation
by ZS23I in October 1996)

The following Reference Numbers have been issued provisionally (Prov), to be
confirmed when satisfactory validation material has been provided:

AF-076 (Prov) 5N4 Gulf of Guinea group (Nigeria, operation by 5N4ALE from
Bonny Island during September to December 1996 - all
necessary paperwork has been received but information
still required about QSLing arrangements)

OC-217 (Prov) YB3 Kangean Is (Indonesia, operation by YB3SPS/P in December
1996)

OC-218 (Prov) FK Matthew Island (New Caledonia, operation by FK5M in December 1996)

AS-125 (Prov) HS Gulf of Thailand North East group (Thailand, operation by HS50A from Koh Chang in December 1996)

Validation is also awaited for the following operations from already numbered groups:

OC-152 FO Tubuai Island (French Polynesia, operation by FO0SUC in October 1996)

AS-067 JA Uji Archipelago (Japan, operation by JI6KVR in December 1996)

Checkpoints are not authorised to accept for IOTA credit QSLs for these operations for which validation material is required. No change to their status will now be made before the Honour Roll/Annual Listing update deadline. IOTA members are reminded that updates for the annual listings should be mailed to their nominated Checkpoints on or before 1 February 1997.

NEW CHECKPOINT

The RSGB IOTA Committee is happy to announce the following new Country Assistant and Checkpoint appointments for Brazil and South America:
* Helio Carlota, PY2DBU, as the Checkpoint for Brazil and South America (excluding French Guiana),
* Ronaldo Bastos Reis, PS7AB, as Country Assistant for Brazil,
* Pedro Sirzanink, PP5SZ, as Country Assistant for South America (excluding French Guiana).
PS7AB and PP5SZ will act as Assistant Checkpoints when necessary.
These new checkpoint arrangements, which have the support of the Brazilian National Society LABRE, took effect on 1 January 1997.

FINANCIAL CONTRIBUTION TO VK6LC'S LACEPEDE IS OPERATION OC-214

" [...] When a group or an individual go out of their way to make a collection for a DXpedition without any thought of benefit to themselves, it deserves to be recorded and publicised. This happened in the case of Mal Johnson VK6LC's operation from the remote Lacepede Is in May 1996 signing VK6ISL. DXNS 1704 [as well as 425DXN 249, ed.] carried a note at the time that the Diamond DX Club (DDXC) had decided to try and raise US$1000 for Mal towards the projected cost of US$5000 for this IOTA New One. Thanks to the tireless efforts of Gianni Varetto, I1HYW, this target was well exceeded, the amount collected reaching, with a US$260 contribution from the USA, a handsome US$1921! This was a tremendous, and extraordinary, gesture on behalf of an operator who has over recent years activated many new IOTA groups in Australia at considerable cost to himself. Needless to say, Mal is very grateful. Hearty congratulations to Gianni and the Diamonds. (This is quite separate from a donation of 450 pounds made by the IOTA Committee, with the assistance of a collection at the Windsor HF Convention, towards the cost of replacing equipment lost by Mal in an accident on his immediately following

operation from Sholl Island OC-140)." (Roger Balister, G3KMA, RSGB IOTA Manager).

****
********** GOOD TO KNOW ... **********
****

CADXA 1997 ---> The 1997 Central Arizona DX Association Board of Directors is as follows: Mike Fulcher, KC7V (President), Mike Bill, AA7NO (Vice President) Steve Thompson, N7TX (Secretary). Rick Dill, N7KO (Treasurer), Dave Hollander N7RK (Member at Large), Ned Stearns, AA7A (Member at Large), Gary Capek, K8BN (Immediate Past President). The CADXA Home Page is at: http://www.getnet.com/~davidh/cadxa.html

DX AWARDS DIRECTORY ---> Ted, K1BV is pleased to announce that the 1997 edition of his "DX Awards Directory" is now being printed. The book will show the rules for 2551 different awards from 122 DXCC countries. Many hundreds of address and rules changes are also included. More info by E-Mail from k1bv@top.monad.net or at WWW page http://top.monad.net/~k1bv

NJDXA 1997 ---> The North Jersey DX Association officers for 1997 are the following: Ben Friedland, K2BF (President); John Sawina NA2R (Vice President) Bill Hudzik, W2UDT (Secretary); Gene Ingraham, N2BIM (Treasurer). The NJDXA Home Page is at http://www.njdxa.org

QSL 3V8BB ---> The QSL manager for the 3V8BB operations between 21 and 26 November 1996 is DL2HBX (not DL2HSX).

QSL 3V8BB ---> The cards for the operations by Hans (DF2UU) and Win (DK9IP) from 3V8BB (11-17 September 1996) have all been mailed either direct or through the bureau.

QSL 5A1A -> Kenneth, SM4EMO ireports the mailing addresses of some operators active from 5A1A: op. Ali, Box 80462, Tripoli; op. Usama, Box 78665, Tripoli; op. Abubaker, Box 74421, Tripoli, Libya. Kenneth suggests QSL should be sent via registered airmail.

QSL D44 ---> The direct cards for Veronica's (IK3ZAW) and Martino's (IK3RIY) operations from Cape Verde [425DXN 271] have all been mailed. The remaining QSOs will be confirmed automatically through the bureau.

QSL D68XS, D68ET & D68DV ---> The direct cards for D68XS, D68ET and D68DV (August/September 1996) have all been mailed. QSL via DL4XS (Maike Stargardt, Friedrichsthal 21, 51688 Wipperfuerth, Germany) preferably via the bureau.

QSL I5DCE ---> IK1GPG (Massimo Balsamo, Strada Statale 28 Nord # 7, I-12084 Mondovi'-CN, Italy) has logs and QSL cards for all the operations by the late

Franco Guiducci, I5DCE. Between August 1989 and March 1996 I5DCE's operations included activities from the following IOTA groups: EU-014, EU-041, EU-049, EU-067, EU-075, EU-113, EU-151, EU-158, AF-065, AF-068, NA-102, NA-114, NA-147, SA-012, SA-059.

QSL KUWAIT ---> Hamad, 9K2HN reports the QSL info for the following Kuwaiti stations: 9K0A (via 9K2HN. also through the bureau), 9K2AI (via bureau), 9K2CA (via ON6BY), 9K2EC (via 9K2HN also through the bureau), 9K2DB (via bureau or direct to Ahmed Al-Holly, Box 17313 Khalidya 72454, Kuwait), 9K2F (for 1996 activities: via 9K2HN also through the bureau), 9K2GS (via WB6JMS), 9K2HN (via bureau or direct to Hamad J. Al-Nusif, Box 29174 Safat 13152, Kuwait), 9K2HR (via bureau or direct to Husain Al-Ramadhan, Box 6262 Hawally 32037, Kuwait), 9K2MR (via bureau or direct to Meshari Al-Ruwaih, Box 14591 Alfayha 72856, Kuwait), 9K2MU (via WA4JTK), 9K2NG (via bureau or direct to Nezar Al-Ghanim, Box 3007 Safat 13031, Kuwait), 9K2NM (via bureau or direct to Nawaf Al-Moharb, Box 14427 Al-Faiha 72855, Kuwait), 9K2QA (via bureau or direct to Ahmed Al-Turki, Box 954 Hawally 32010, Kuwait), 9K2QQ (via bureau), 9K2RR (via bureau or direct to Faisal Al-Ajmi, Box 1124 Farwaniya 80000, Kuwait), 9K2/YO9HP (via YO9HP). 9K2RA is the call of the Kuwaiti Amateur Radio Society (KARS), which manages the cards only for its own operations. Many amateurs in Kuwait are used to saying "QSL via 9K2RA" to mean "QSL via bureau". The KARS bureau mails the cards every three months (at the end of March, June, September and December).

QSL FT5XL ---> Didier, F5NZO has mailed all the direct cards for contacts made with FT5XL up to 7 November 1996. The last part of the logs will be coming with the operator himself, who is going to leave Kerguelen.

QSL VK9PG ---> The address of JR5XPG, who was active from Lord Howe as VK9PG [425DXN 291] is: Hidenori Uemura, 550-25 Zota-korehiro, Nagao-cho, Ohkawa-gun Kagawa 769-23, Japan.

QSL ZK1DI ---> DK1RV (Hans-Georg Goebel, Postfach 1114, D-57235 Netphen, Germany) has received the logs of ZK1DI up to 16 December 1996 (1,050 QSOs). Direct cards have all been already mailed.

QSL ZL7AA ---> ZL2AL (L.F. Jennings, P.O.Box 54, Hastings, New Zealand) still has a supply of cards and will QSL to all valid QSOs made with ZL7AA, Chatham Islands (May 1993).

THE DX MAGAZINE ---> Previously published by Paul and Nancy Smith, following many years of publication by Chod Harris, the DX Magazine has been purchased by Carl Smith, N4AA, current publisher of QRZ DX. For further information on this publication, send 10 SASE to: DX MAGAZINE, P.O. Box 16522, Asheville, NC 28816-4522, USA (E-mail: N4AA@AOL.COM).

WWDXC 1997 ---> The Western Washington DX Club 1997 Officers are the following: Bob Preston, W7TSQ (President); Dick Swanson, K7BTW (Vice President); Mike Schone, WA7BAY (Secretary); Marina Zuetell, N7LSL (Treasurer); Duncan Carman, W7JEN; John Gohndrone, N7TT; Joe Gregory, W7QN; Adam Kerner, K7ST; Larry Short, N7YQ e Roger Huntley, W7VV (Trustees); Mike Pickard, K7NPN (Outgoing President Trustee). The Club Home Page is at: http://www.eskimo.com/~oolon/wwdxc/

+ SILENT KEY + It was with the greatest sadness that we have learnt of the passing of Hugo, LU9AB (ex LU3ABX), who became a Silent Key on 26 December 1996.

QSL received via direct: 3C5A (AF-010), 3DA0CA, 5R8FK, 5V7HR, 5V7ML, 9A8P (EU-090), 9M2/G3OZF, (AS-072), CQ2I (EU-150), CY0AA, F5RUQ/p (EU-039), IL3/IK2XDE (IIA RO-011), IM0/IS0NHT (EU-024; IIA CA-016, CA-026, OR-006), TM5CHY (EU-039), PY0FM, V73AX, V85HN, VP8CWI, VR2KF, YE8P (OC-146), ZS23I (AF-077), ZS8IR.

I have in hand- and credited by ARRL- an 8Z4A QSL from November 14,
1979 which is a beaut. Apparently there was a very big operation from
8Z4 in November of '79 It was in all the papers. <g>

anyone that works the contests and wishes to know a little about the group
in tennessee can go to the TCG page http://hotcc.com/contest.html and get
some info
on these people they are also on a reflector site so if you send them mail
from my page it will be sent to the group so if you require a private
e-mail get the address and send it yourself...tnx and 73 all round...kt4wz

For TI9CF send it direct to his home address. According to his QSL
manager, W3HNK - he handles the other calls Carlos has but NOT the TI9
call (as per a message from him just yesterday AM).

Have heard there is a problem with mail going missing in Costa Rica
but guess we have to live with that.

SB DX @ WW $OPDX.287
Ohio/Penn DX Bulletin No. 287

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 287
BID: $OPDX.287
January 13, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2YJL, K4PI, K4MZU, W5IJU & ISLAND/DX News, KN6DV, NL7TB, WC7N, K8JP, K9EL, G4BUE & DX News Sheet, LU1BR, ON4UN, VA3DX, VE6JO and ZP5KO for the following DX information.

THE EXCITEMENT/ANTICIPATION IS HERE! By the time you read this, the Heard Island DXpedition should have started or is about to start. The team is reportedly on the island, and some of the beacons are active. The NCDXF beacon will run from the island as VK0IR with an R5 vertical. It will transmit on 14.100, 18.110, 21.150, 24.930 and 28.200 MHz. The beacon transmits for ten seconds on each band every three minutes. The VK0IR transmission on twenty meters is at one minute and ten seconds after the hour and every three minutes after that. The transmissions on the other bands follow every ten seconds with the ten meter transmission starting at one minute and fifty seconds after the hour and every three minutes after that. On each frequency, it sends VK0IR in CW at 100W, then 1 second long steady tones at 100, 10, 1 and 0.1 W and then moves to the next higher frequency. The latest beacon information is available from WWW.NCDXF.ORG.
Lastly, I would like to make a pitch for the DXpedition team. PLEASE, PLEASE and PLEASE during the operation listen to the operators request and DO NOT, DO NOT, and DO NOT transmit on their transmit frequencies. The important thing is to "LISTEN AND THINK" before doing. A lot of money has been invested in this operation, and I do believe everyone will have a chance to work them. Good luck in the pile-up... 73 de Tedd KB8NW
ADDED NOTE: OPDX InterNet Subscribers will receive additional information on the operation.

8P, BARBADOS. Glenn, VA3DX, will be going to Barbados once again for this year's 160 Meters CQWW CW Contest. He will arrive there on January 19th, and will be active for 2 weeks as 8P9DX (he has held this call since 1987). He will be active on all bands, but will concentrate

on the lower bands, mainly on CW and especially on 160 meters. He plans to make this a serious effort in the contest trying to beat last year's score. He is hoping that someone in Idaho will call him in this year's contest. QSL via VE3ICR, Glenn Wyant, 74 Highland Ave., St.Catharines, Ontario, L2R-4J1, Canada.

ANTARCTICA ACTIVITY. Several stations have been reported active. Bob, K4MZU, suggests to keep on the lookout for the following:
KC4/KL7RL - Operator Art from Patriot Hills will be looking for Europe on Wednesdays 2000 and 2100z 14260 kHz. Also, Sundays at 1700/1800z and 2000/2100z on 14260 kHz.
VK0MAP - Operator Mike from the South Pole Station is active 2200-0300z on 14243 or 14270 kHz. Mike's old call last year was VP8MAP. He is the only VK0 ever licensed for South Pole. He goes QRT at the end of January.
LU1ZS - Operator Pedro from the Camara Base is active 2300-0100z usually between 14190-240. (En El Espanol)
LU8EYK/z - Operator Jorge, LU4EDL, from the Beyes Base Camp on Livingston Island can be found daily on 14331 kHz at 0100z passing family traffic.
CE9MFK - Operator Oswaldo from Sherriff Base is active on 14245 kHz at 0030z. (En El Espanol)
KC4AAC - Location is Palmer Station. Greg, WB7CHV, will be active soon.
CE9SAC - Operator Juan from Teniente Carvajal Base is active on 14195 kHz from 2200-0100z.
KC4/KC8CWI- South Pole Station is active on Sat/Sun 20 meters.

JX, JAN MAYEN. Be watching on 80 meters SSB for Per, LA7DFA, who is currently active as JX7DFA until April. He plans to concentrate on this band during January. He will be changing his location in February to the western side of the island. From his new location he will be able to run high power and with better antennas. He will also concentrate on 80 and 160 meters. QSL via his home callsign or via the bureau.

NEW DXCC COUNTRY??? Joe, K2YJL, reports reading in a recent issue of Carribbean Magazine, "that the residents of Nevis will vote later this year to secede from the union with St. Kitts. If this happens, they will become the smallest island nation in the Carribbean."

P4, ARUBA. Mike, K4PI will be active as P49I from January 22-28th. He will be active in the CQWW 160M CW Contest. Mike states he will also be active before and after the contest on CW on the lower bands and the WARC bands. QSL via K4PI.
Also, look for Andy, K2LE, to be active at the end of month or the beginning of February as P4/K2LE. QSL to CBA.

PJ, ST. EUSTATIUS. Mike, K3UOC, will be active as PJ5AA from January 24-28th. Activity will be on all bands plus participation in the CQWW 160 Meter Contest. QSL to W1AF.

SSTV ACTIVITY. The "DX News Sheet" reports two stations from Israel, 4X4FD and 4Z4UT have been active on the 20 meters SSTV frequency.

USI ALERT (OR-new). John, NL7TB, will attempt to activate the first Oregon saltwater island for USI (United States Island award program), Haystack Rock at Cannon Beach, on January 30th around 1930Z (+ - low tide) on 14260 kHz. Haystack Rock is at 235 ft. high and is the 3rd largest coastal monolith in the world. KC7KHU will be used with 10-80 meters capability. This "rock" does not qualify for IOTA, but the other Haystack at Pacific City does. Operating time and equipment will be limited due to tidal conditions and the distance the gear will have to be carried. A wheelchair battery will power his FT-840. The antenna will be an Outbacker mounted to a camera tripod! Large stepping stones lead from the beach to the rock. John had a real "hairy" experience here some 20 years ago, so this revisit has been a long time coming. For a preview of the rocks on the World-Wide WEB, try the URL address of: http://www.el.com/To/CannonBeach/ QSL via John's WA address or via InterNet E-mail: nl7tb@owt.com

VP5, TURKS & CAICOS ISLANDS. Joe, K8JP, will once again be active from Hamlet as VP5/K8JP, February 12-24th. Activity will also include entries in the ARRL DX CW Contest and the CQWW 160M SSB Contest. During the contests, he will be signing VP5JP. QSL via K8JP, P.O. Box 59573, Schaumburg, IL 60159-0573.

XF, REVILLAGIGEDO. Hector, XE1BEF, is now active as XF4CA and will be there until January 20th. His activity will be on all bands (160-10 meters) on CW/SSB and RTTY. QSL to home call.

XU, KAMPUCHEA (Cambodia). Mike, XU6WV, finds time is a real premium and has found there is not much time for operating. Most of his operation has been on 20 SSB around 2330-0015z or 1200-1300z. There has been some activity on the WARC bands. He will be putting up a 40/80 meters vertical soon. He states that he has RTTY equipment, but this is not a high priority due to his antenna situation. He is trying to arrange some free time so he can be active from Kompong Som (on the ocean) around the CQWW 160 Meters Contest.

ZK, SOUTH COOK ISLAND (HELP WANTED). Vitaly, VE6JO, will be on vacation in Raratonga from February 22nd to March 10th. He will staying at the Puaikura Reef Hotel. Vitaly has applied for a licence, but due to a lot of travelling in Australia prior to his vacation in ZK1, he will not be able to take any equipment with him. He would like to find a station that he can use/rent for this period of time. He would like to operate CW, SSB and RTTY. Any ideas/suggestions will be very much appreciated and can be direct to Vitaly's InterNet address: markv@snc-lavalin.com

ZP0, YACYRETA ISLAND (PARAGUAY). A report from Paraguay states that a group will be operating from this island located in the Parana River from January 19-26th. They will be using the callsign ZP0V, and operations will be on SSB and CW and on 80, 40, 20, 15, and 10 meters.

1997 ELECTED DX CLUB OFFICIALS (Congratulations!).......

158. Looking for Yaesu FT101 info to reverse "CB" mod

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-13 00:00:00 UTC
From: spammers@must.die.com
Message-ID: <wsandersE3yoyv.Krx@netcom.com>
Source record: 33973

I recently inherited by Dad's old FT101E. He had snipped the "brown wire" in the output section, a mod that supposedly enabled 11m transmit capability. Does anyone know if this mod compromises performance on the other bands? If so, I'll undo the mod, otherwise it's not worth messing with. The unit seems to tune up OK into a dummy load, at least below 100W or so.

The unit in general seems to have lousy sensitivity, but it's hard to tell since I am a lowly tech and haven't actually made any HF QSOs on it yet, and I live in a condo which restricts decent antennas and is "RFI Hell". This weekend I could pick up the local (San Jose CA) beacon on 14.1 and occasional snippets of the beacons in New York and Honolulu using a 6 ft piece of wire hung off a transmatch. I can receive the local 28.2 beacon but have detected no other activity there except for the odd local packet station; could be the band is just dead. The unit is actually broken and doesn't seem to be able to receive anything on 80m. 40 and 15 sound about the same as 20.

Any general guidelines on improving the front-end on this rig would be appreciated. The FT101E seems to have a reputation as a low-tech workhorse and not a boat anchor, so I plan to keep it. HF rigs are so ungodly expensive these days. I look forward to using it once I pass the code test in the next few weeks, but I don't want to embarass myself and not be able to receive anything. About the best I can do for an antenna are 15 and 10m dipoles in the attic.

Thanks in advance,
-Wiley KF6IIU

The Association of Radio Amateurs of the Republic of Mexico (A.R.A.R.M.) announces the 37th annual amateur radio convention to be held July 10-13, 1997 at the Convention Center in Leon, Guanajuato.

A.R.A.R.M. welcomes international amateur radio visitors and their families to this event which will include programs on satellite, DXing, packet radio, emergency radio services, etc. in addition to a variety of technical seminars and workshops. As usual, special cultural programs and tours will be available for all guests of the convention.

The convention organizers have selected the Real de Minas Hotel as the main hotel. For registration information, please contact Mr. Sergio Valdes Sada XE1RJ at tel: 011-528-357113 or by fax: 011-528-353368.

164. January Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-14 00:00:00 UTC
From: ids@nol.net
Message-ID: <32dbd487.7818031@news.nol.net>
Source record: 33979

PROPAGATION - by AD5Q HOUSTON, TEXAS -- JANUARY 1996

It's January at the bottom of the sunspot cycle. Propagation wise, we can expect the low bands will be very good, with more DX activity on 80 & 160 than on 10 & 15. However, the real news this month will be the expedition to Heard Island in the south Indian Ocean. For North America, this country is situated in the most remote corner of the world. From Houston, it is the only country on the DXCC list where signals must traverse Antarctica in order to make a short path contact.

We are used to working DX over the North Pole. At the low end of the solar cycle we have plenty of good 20 Meter propagation from late spring through the summer. Now it is summer in the southern hemisphere, and therefore peak season for propagation accross the Antarctic. Still, most Antarctic DX paths from North America are long path openings to points further north, and signals almost always skew around the Antarctic continent without really crossing it. It may seem to us that Antarctica is an obstacle, but Australians work into South America accross the South Pole regular-ly this time of year. From Texas, Heard is an especially exotic DX contact.

The path to Heard appears very different from each corner of the USA. From the northeast coast, the beam heading is southeast - actually more east than south. From Albequerque the path is due South, and for the West Coast the heading is west of due south. The antipode of Heard is about 100 miles north of Saskatoon, Saskatchewan. Canadian DXers will enjoy an easy east/west path, while a wide area of the northwestern USA (those closest to VE5) will have all sorts of skew path opportunities to contact Heard from whatever direction works at the moment. An-tarctica is only an obstacle for the southwest quarter of the US, where there is little chance of making a contact on more than a few bands because polar opportunities on 10, 15, 80 & 160 are so unlikely. There is also another obstruction (the mountain) that repor-tedly stands between the Heard operating site and much of North America (which part?).

All this means is that there is no easy answer for everybody on how to work Heard. 20 & 40 (and 30) will be the best bands for those with modest setups that need to make that first contact. Those with more easterly or westerly access will have much better opportunities to make contacts on 15 and 80. Most of the US (east of the Rockies) will find the best 20, 30 and 40 Meter openings from late afternoon through the evening. The west coast will find a path in the morning after sunrise, along with the usual assortment of long path Europeans.

Long path opportunities will be best if you live in the northern US or Canada. From W5, the 20 Meter morning long path route accross Asia to the south Indian Ocean is a summer path, and is not likely to give us an alterna-tive to the Antarctic route (which should be OK). 40 may be a different story, but the evening short path situation looks good here also.

Those with effective lowband capabilities should watch for some interesting grey line opportunities at either their sunrise (W7, VE5,6&7) or sunset (W4, W0). These areas of the US will have short windows of peak propagation that will make lowband contacts with Heard possible.

165. Re: Looking for Yaesu FT101 info to reverse "CB" mod

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-15 00:00:00 UTC
From: w9sz@prairienet.org
Message-ID: <5biqsv$82a@vixen.cso.uiuc.edu>
Source record: 33980

In a previous article, spammers@must.die.com (Wiley Sanders) says:

>I recently inherited by Dad's old FT101E. He had snipped the "brown
>wire" in the output section, a mod that supposedly enabled 11m transmit
>capability. Does anyone know if this mod compromises performance on the
>other bands? If so, I'll undo the mod, otherwise it's not worth messing
>with. The unit seems to tune up OK into a dummy load, at least below 100W
>or so.

It shouldn't affect performance of anything else.

>
>The unit in general seems to have lousy sensitivity, but it's hard to
>tell since I am a lowly tech and haven't actually made any HF QSOs on
>it yet, and I live in a condo which restricts decent antennas and is
>"RFI Hell". This weekend I could pick up the local (San Jose CA) beacon
>on 14.1 and occasional snippets of the beacons in New York and Honolulu
>using a 6 ft piece of wire hung off a transmatch. I can receive the
>local 28.2 beacon but have detected no other activity there except for
>the odd local packet station; could be the band is just dead. The unit
>is actually broken and doesn't seem to be able to receive anything on
>80m. 40 and 15 sound about the same as 20.

Hopefully the previous owner was not diddling with the coils in the
receive section. I used an FT-101E over the past 4 years and the receiver
in it was hot. It got me over 250 countries in 4 years and that included
about 230 on 40 meters and 90 on 80 meters. I have it as a standby rig
now (its major drawback is in not being able to work more than 4 kHz
split in the pileups.)

BTW, 10 meters is pretty dead mostly now, as we're just past the bottom
of the sunspot cycle.

>
>Any general guidelines on improving the front-end on this rig would be
>appreciated. The FT101E seems to have a reputation as a low-tech workhorse
>and not a boat anchor, so I plan to keep it. HF rigs are so ungodly
>expensive these days. I look forward to using it once I pass the code
>test in the next few weeks, but I don't want to embarass myself and not
>be able to receive anything. About the best I can do for an antenna are
>15 and 10m dipoles in the attic.

A good antenna is a MUST for any rig. A decent dipole cut for the band
you are interested in, up at least 30 feet or so, should do. I had a
dipole in the attic for 10 meters for a while but it never was that
great.

These are aeronautical homing beacons, used by aircraft to navigate.
They are not in foreign countries, but all in your vicinity. They
do not use normal callsigns, but instead use airport designators.

ARLD003 DX news

ZCZC AE03
QST de W1AW
DX Bulletin 3 ARLD003
From ARRL Headquarters
Newington CT January 16, 1997
To all radio amateurs

SB DX ARL ARLD003
ARLD003 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, John, K9UWA, John, N0JT, Steve, K4WA, the DX News Letter, the DX News Sheet, and Contest Corral from QST. Thanks to all.

HEARD ISLAND, VK0. VK0IR is QRV on all bands and modes with five stations. Check your local PacketCluster for up to date spots on this DXpedition. The NCDXF beacon is also QRV on 14.100, 18.110, 21.150, 24.930, and 28.200 MHz, with reception reports coming in from many parts of the world.

ALGERIA, 7X. Enrique, EA5AD, will be active as 7X0AD, on all bands, using SSB. His QTH is near the capital of Alger. QSL via EA4URE.

BARBADOS, 8P. Glenn, VA3DX, will be QRV for two weeks from Barbados. He will also operate as 8P9DX in the CQWW 160 CW Contest. QSL to VE3ICR, Glenn Wyant, 74 Highland Ave, St. Catharines, Ontario, L2R 4J1, Canada.

PUERTO RICO, KP4. K4UJ, and K4WA, will operate from here January 22 through January 27. Operations include the CQWW 160 CW contest. The contest callsign will be KP4/K4UJ. Outside the contest, they will operate as KP4/homecalls. QSL via homecalls.

JAN MAYEN, JX. Per, LA7DFA, is active as JX7DFA until April. He plans to concentrate on 80 meters during January. He will be moving his location to the western side of the island in February, where he will concentrate on 160 and 80 meters. QSL via the bureau.

ARUBA, P4. Mike, K4PI will be active as P49I from January 22 through 28. He will also be active in the CQWW 160M Contest, and will be QRV before and after the contest on CW on the lower and newer bands. QSL via K4PI. Also look for John, K9UWA, and Jean,

N9PXF, to be active as P40WA for the CQWW 160M CW Contest. QSL both calls via K9UWA.

ST. MARTIN GROUP, PJ. Mike, K3UOC, will be active as PJ5AA from St. Eustatius January 24 through 28. Activity will be on all bands plus participation in the CQWW 160M Contest. QSL via W1AF.

TURKS AND CAICOS ISLANDS, VP5. Joe, K8JP, will be active as VP5/K8JP, February 12 through 24. Activity will also include entries in the ARRL DX CW Contest and the CQWW 160M SSB Contest as VP5JP. QSL to K8JP, PO Box 59573, Schaumburg, IL 60159 0573.

REVILLA GIGEDO, XF. Hector, XE1BEF, is active as XF4CA and will be here until January 20. His activity will be on all bands on CW, SSB and RTTY. QSL to home call.

PARAGUAY, ZP. A group using the callsign ZP0V will be operating from Yacyreta Island, located in the Parana River, from January 19 through 26. SSB and CW operations on 80, 40, 20, 15, and 10 meters are expected. No QSL information as yet is available.

QSL ROUTE CORRECTION. Gunter, HP1XVH, allowed the use of his call, 3E1DX, during the CQWW CW Contest. Contacts made with 3E1DX on November 17 and 18, 1996, CW or SSB, are via KU9C. All other contacts are via N0JT.

THIS WEEKEND ON THE RADIO. Besides the Heard Island DXpedition, there are other operating activities this weekend. Check out the ARRL January VHF Sweepstakes, the North American QSO Party, the Michigan QRP Club CW Contest, and the Hungarian DX Contest. Please see January QST, page 107 for details.

Hi DX mates,
thanks for reading this message, which deals with a software tool
that's gonna help you while DXing.
At last the DXTelnet software pack is available and ready to run.
If you use any telnet application to connect to DXClusters directly
via the Internet, please read what follows: you'll find something
interesting for you.

You can download DXTelnet from:
http://www.funet.fi/pub/ham/hf-work/
file name: DXT10ENG.ZIP, size about 640K

DXTelnet is a DXer oriented, Windows based Telnet application which
finally fixes the problems found in traditional telnet applications and
adds unique features, to help Power DXers when connected to DXClusters
directly via the Internet.

DXTelnet Features

*Alerts:DXTelnet can be linked to DXHUNTER 5.2, to get alerts on spots
coming via the Internet

*Aux Comm Port: remote control can be activated via a comm port

*Customizable Colours: set the colours you want on any window

*Customizable Windows Size: hide/show/size the windows as you want

*Easy Text Send: no longer problems with the BACKSPACE key!!!

*Keep Alive: this function fights idle timeouts

*Links To Other Applications: to DXHUNTER or to any other program via DDE

*Macros: up to ten strings can be set immediately with Alt+0-Alt+9 keys

*Multiconnection: this program was born to operate in multisession:
ALL the spots, from ALL the sessions, are displayed in EACH DX window,
without duplications.

*On Line Help: simply press F1 and get context sensitive online help

*Paste TX: send large bulletins in one shot

*Sounds And Voice Spell: even on the PC Speaker!

*Split Screen: TX RX DX TALK ANN are collected in 5 different windows

*Spot Filter: exclude unwanted spots

*Spot Multiformat Support: both Pavillion and Clusse spot, talk, ann formats are supported

*Talk Auto Answer: you can set your own text string to be automatically sent to incoming talks, when you're not in the shack

*Talk Management: review talks in their window or have the talks remarked when operating in multisession or in background

*Text Capture: archive entire sessions, or received text portions

*Text Search: search for text on any window

*Window Scroll Back: no longer messy results when scrolling any window back

These are the main functions; discover the other ones, by using this unique program.

DOWNLOAD AND TEST IT NOW!!!

At the same site, you can find also the latest release of DXHUNTER (5.2) which can be linked to DXTelnet, to get alerts on needed spots.
The name of the file is DXH52ENG.ZIP, size about 1M
ENJOY!

to contact me:
E-Mail : vmi@vmi.it
Radio BBS address: IK4VYX@I4UJB.IEMR.ITA.EU
DXCluster : AC4ET (ex NO4J) between 9 and 17 UTC of working days

As recently we've experienced some problems with the E-Mail server, if you get no answer within 4 days (Mail is not explored on Saturdays and Sundays), please, resend your message.

We're working to make DX softer...

>>> NEWS FROM THE RSGB IOTA COMMITTEE [2/97] <<<

NEW CHECKPOINT
The RSGB IOTA Committee is happy to announce the following new Country Assistant and Checkpoint appointments for Brazil and South America:
* Helio Carlota, PY2DBU, as the Checkpoint for Brazil and South America (excluding French Guiana),
* Ronaldo Bastos Reis, PS7AB, as Country Assistant for Brazil,
* Pedro Sirzanink, PP5SZ, as Country Assistant for South America (excluding French Guiana).
PS7AB and PP5SZ will act as Assistant Checkpoints when necessary.
These new checkpoint arrangements, which have the support of the Brazilian National Society LABRE, took effect on 1 January 1997.

FINANCIAL CONTRIBUTION TO VK6LC'S LACEPEDE IS OPERATION OC-214
" [...] When a group or an individual go out of their way to make a collection for a DXpedition without any thought of benefit to themselves, it deserves to be recorded and publicised. This happened in the case of Mal Johnson VK6LC's operation from the remote Lacepede Is in May 1996 signing VK6ISL. DXNS 1704 [as well as 425DXN 249, ed.] carried a note at the time that the Diamond DX Club (DDXC) had decided to try and raise US$1000 for Mal towards the projected cost of US$5000 for this IOTA New One. Thanks to the tireless efforts of Gianni Varetto, I1HYW, this target was well exceeded, the amount collected reaching, with a US$260 contribution from the USA, a handsome US$1921! This was a tremendous, and extraordinary, gesture on behalf of an operator who has over recent years activated many new IOTA groups in Australia at considerable cost to himself. Needless to say, Mal is very grateful. Hearty congratulations to Gianni and the Diamonds. (This is quite separate from a donation of 450 pounds made by the IOTA Committee, with the assistance of a collection at the Windsor HF Convention, towards the cost of replacing equipment lost by Mal in an accident on his immediately following operation from Sholl Island OC-140)." (Roger Balister, G3KMA, RSGB IOTA Manager).

Hi ,

I am looking for a shareware program to run my PK-232MBX for weatherfax.
please e-mail me if you have info or have access to a program that can handle
this.

182. CD-R's for Sale

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-18 00:00:00 UTC
From: "Copy Cat"
Message-ID: <5brivp$f9k@mtinsc01-mgt.ops.worldnet.att.net>
Source record: 33901

We have the following CD-R media for sale.

Brand: Pioneer
Type: Printable Media (Surface is blank for printing or labels)
Type: Gold on Green
Size: 74 min (650 mb)
Price: 6.99
Minimum Order: 10

Brand: Pioneer
Type: Gold on Green
Size: 74 min (650 mb)
Price: 6.55
Minimum Order: 10

Brand: Maxell
Type: Gold on Gold
Size: 74 min (650 mb)
Price: 6.55
Minimum Order: 10

Brand: TDK
Type: Gold on Green
Size: 74 min (650 mb)
Price: 6.55
Minimum Order: 10

Brand: Hewlett Packard
Type Gold on Gold
Size: 74 min (650 mb)
Price: 7.15
Minimum Order: 10
Lifetime Warranty

The Copy Cat Shop has all your CD duplication, replication, recorders,
software, and media needs.

If you have any questions or comments feel free to call.

Cordially,

The Copy Cat Shop

183. Control via PC

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-18 00:00:00 UTC
From: Todd Peterson <elab@netins.net>
Message-ID: <32E14CFD.6252@netins.net>
Source record: 33902

We are pleased to announce that our new application note,
'Device Control via the PC' is finally available.

This application note covers such topics as PC control of lamps and motors
using solid state and mechanical relays, device control using both
BJT and power MOSFET transistors, stepper motor control using a transistor
array IC, as well as PWM motor control using the L293 H-Bridge. Connection
to the PC is made via our inexpensive EDE300 PC Interface IC. Code examples
are also provided.

Feel free to download a copy today; it is available at
http://www.netins.net/showcase/elab in the 'Integrated Circuits' section
under 'EDE300'.

Todd Peterson
E-Lab Digital Engineering, Inc.

P.S. - While you're there, visit our Electronics Resource Directory,
a freely useable directory containing over 500 categorized hot-links of
value to the electronics community.

\-------------------------------------------------------------------------/

VK0IR - Landing started at 22:30 UTC (03.30 local time) on Saturday 11
January. All operators and all equipment (30 Tons of it) were put
ashore by helicopter (it took 5 hours and 51 helicopter flights back
and forth). Operations started on January 14 at 6.54 UTC. Expedition
transmit frequencies (depending on QRM) are as follows: 28.024,
24.894, 21.024, 18.074, 14.024, 10.103.5, 7.007, 7.022, 3.507, 3.522
and 1.826 MHz (CW); 28.475, 24.945, 21.295, 18.145, 14.195,
7.047.5/7.065 and 3.799 MHz (SSB); 21.085, 14.085, 10.140 and 7.030
MHz (RTTY). As a rule the expedition will always work split
frequency. Towards the end of the expedition they will also listen
on their own transmit frequency, in order to accomodate those who do
not have a separate VFO. However, do NOT try to call them on their
own frequency, without being invited to do so.
-------------------------------------------------------------------------

3D2 - Uli, HB9DDM will be active as 3D2UK until 22 January. QSL via HB9DDM
(direct or through the bureau).
8P - Glenn, VA3DX will be active again from Barbados (NA-021) as 8P9DX
for two weeks as from 19 January. Glenn will be active on all bands
but concentrate on low bands (mstly on 160 metres and CW). He will
be participating in the CQWW CW 160 Meter Contest. QSL via VE3ICR,
```

Glenn Wyant, 74 Highland Ave., St.Catharines, Ontario, L2R-4J1,
Canada.
9X - Mark, ON4WW is QRV again (on 160 metres as well) as 9X4WW. QSL via
ON5NT.
I - Several operators of the Salento DX Team will be active from Scoglio
I Pazzi (LE-006) on 19 January.
JW - Mathias, JW5NM will be active again (on 160 metres as well) from
EU-026 as from 20 January.
KP4 - From 22 to 27 January K4UJ and K4WA will be KP4/ from Puerto Rico.
The will participate in the CQWW 160 Meter CW Contest as KP4/K4UJ.
QSL via home calls.
PY - On 10 and 11 January Joao, PY2JM/p was active from Santo Amaro
Island (SA-071, DIB-10). QSL to Joao Miedzinski, Alameda Lorena 461,
Apto 81, Jardim Paulista, 01424-000 Sao Paulo, Brazil (or Rua Dr
Homem de Mello 211, Apto 522, Perdizes, 05007-000 Sao Paulo,
Brazil).
V4 - From 23 to 28 January Doc, W9NSZ will be active again as V47NS
(mostly on 20 metres SSB) from Nevis Island (NA-104). QSL via home
call.
XF4 - Operations of XF4CA, operated by Hector (XE1BEF), from Clarion
Island (NA-115, Revilla Gigedo), have started with a few days' delay
[425DXN 295], but will continue until 20 January. QSL via XE1BEF.

********** GOOD TO KNOW ... **********
****

QSL 5N4ALE ---> On 14 January DK1RV (Hans-Georg Goebel, P.O.Box 1114, D-57235 Netphen, Germany) received a disk with the logs (some 150 QSOs) from Alfred, 5N4ALE (Bonny Island, AF-076/prov) for the period 22 August-17 December 1996. Hans looked through the logs and saw that several QSOs (nearly the 40%) for which he has received a request for confirmation are "not in log". Hans is very sorry and will try to get more information from Alfred, but it is likely

to take time. Alfred should be still on Bonny Island. All direct cards with sufficient return postage will be mailed on 27 January. All other contacts will be confirmed later through the bureau. If you want know whether you are in log, please send Hans either a Packet radio message (DK1RV @ DB0SGL.#NRW.DEU.EU) or an e-mail message (dk1rv@t-online.de).

$$$$ This is what many people call A $$ scam but, IT WORKS you can't lose!!!!!!$$$$

Take five minutes to read this and it WILL change your life.

The Internet has grown tremendously. It doubles in size every 4 months. think about it. You see those 'Make.Money.Fast' posts more and more. That's ... because it WORKS ! So I thought, all those new users might make it work. And I decided to try it out, a few months ago. Besides, whats $5.00!
So I sent in my money and posted.Everyone was calling it a scam, but there are SO many new users!

Well, two weeks later, I began recieving bucks in the mail! I couldn't believe it! Not just a little, I mean big bucks! At first only a few hundred dollars, then a week later, a couple of thousand, the By the end of the fourth week, I had recieved nearly $47,000.00. It came from all over the world. And every bit of it perfectly legal and on the up and up. I've been able to pay off all my bills and still had enough left over for a nice vacation for me and my family.

Not only does it work for me, it works for other folks as well. Markus Valppu says he made $57,883 in four weeks. Dave Manning claims he made $53,664 in the same amount of time. Dan Shepstone says it was only $17,000 for him. Do I know these folks? No, but when I read how they say they did it, it made sense to me. Enough sense that I'm taking this serious.

STEP 1.

Invest your $5 by writing your name and address on five seperate pieces of paper along with the words: "PLEASE ADD ME TO YOUR MAILING LIST." (In this way, you're not just sending a dollar to someone; you're paying for a legitimate service.) Fold a $1 bill inside each paper, and mail them to the folowing adresses:

1-M Palmer Gilfach Goch,Blaenpenal,Aberystwyth
SY23 4TN ,United Kingdom

2-T.Toole box1138,Valemount B.C
Canada VOE-2ZO

3-Vitor Schlrder de Borba
Av Lucas de olivieira 2280 ap 404
90460-000 Porto Alegre/RS Brasil

4-Evert jan Benz
nijensteinheerd 58
9736 TD Groningen
Netherlands

5-J.J. Alles
RR 2 Site 81 Comp 6
Smithers, B.C.
V0J 2N0
Canada

STEP 2.

Now remove the top name from the list, and move the
other names up.This way, #5 becomes #4 and so on.
Put your name in as the fifth one on the list.

STEP 3.

Post the article to at least 250 newsgroups. There are at
least 19000 newsgroups at any given moment in time.
Try posting to as many newsgroups as you can. Remember
the more groups you post to, the more people will see your
article and send you cash!

STEP 4.

You are now in business for yourself, and should start seeing
returns within 7 to 14 days! Remember, the Internet is new
and huge. There is no way you can lose.

Now here is how and why this system works:

Out of every block of 250 posts I made, I got back 5 responses.
Yes, thats right,only 5. You make $5.00 in cash, not checks or
money orders, but real cash with your name at #5.

Each additional person who sent you $1.00 now also makes 250
additional postings with your name at #4, 1000 postings. On
average then, 50 people will send you $1.00 with your name at
#4,....$50.00 in your pocket!

Now these 50 new people will make 250 postings each with your
name at #3 or 10,000 postings. Average return, 500 people= $500.
They make 250 postings each with your name at #2= 100,000
postings=5000 returns at $1.00 each=$5,000.00 in cash!

Finally, 5,000 people make 250 postings each with your name at
#1 and you get a return of $60,000 before your name drops off
the list.And that's only if everyone down the line makes only 250
postings each! Your total income for this one cycle is $55,000.

From time to time when you see your name is no longer on the list,
you take the latest posting you can find and start all over again.

The end result depends on you. You must follow through
and repost this article everywhere you can think of.
The more postings you make, the more cash ends up in
your mailbox. It's too easy and too cheap to pass up!!!

So thats it. Pretty simple sounding stuff, huh? But believe me, it
works. There are millions of people surfing the net every day, all
day, all over the world. And 100,000 new people get on the net
every day. You know that, you've seen the stories in the paper.
So, my friend, read and follow the simple instructions and play
fair. Thats the key, and thats all there is to it. Print this out
right now so you can refer back to this article easily. Try to keep
an eye on all the postings you made to make sure everyone is
playing fairly. You know where your name should be.

If you're really not sure or still think this can't be
for real, then don't do it. But please print this article and pass
it along to someone you know who really needs the bucks, and see
what happens.
I've been perusing usenet for a few months now and I've seen these ads
appear very often. Like you, I thought that these postings were a
complete annoyance and a waste of time. But after reading dozens of them, I
decide 'For the sake of only 5 dollars I'll give it a try'. But the
reality is that it DOES work and you are guaranteed to receive large
sums of money, legally.
Make sure that you put your correct mailing address,
especially if you're from another country as some people have never sent
mail out of the country and might not know how. You may alter this
article
if necessary, editing what you need to edit.

REMEMBER....HONESTY IS THE BEST POLICY.YOU DON'T
NEED TO CHEAT THE BASIC IDEA TO MAKE THE BUCKS!
GOOD LUCK TO ALL, AND PLEASE PLAY FAIR AND YOU WILL
WIN AND MAKE SOME REAL INSTANT FREE CASH!

*** By the way, if you try to deceive people by posting the messages
with your name in the list and not sending the bucks to the people
already included, you will not get much. I know someone who did this
and only got about $150 (and that's after two months). Then he sent
the 5 bills, people added him to their lists, and in 4-5 weeks he had
over $10,000!

TRY IT AND YOU'LL BE HAPPY!!! :o) !!!!!!!!!!

INSTRUCTIONS ON HOW TO POST USING NETSCAPE 3.0

1. Click on any newsgroup like you usually would, then click on
"TO:NEWS" in upper right hand corner. This will bring up a message box
to type this article in.

2. Leave the message box like it is, don't maximize it. In Subject
box type something flashy like "$$$CASH READ HERE$$$".

3. Tab once and you are ready to type in the body of the box. Retype this article but with your name inserted in slot #5 and the others moved up as I directed. Remember the #1 in this article will be removed in yours.

S. Pypke tells people to retype the article. This may not be necessary. Try this: highlight the article with a mouse (or click edit and click select all). Then, click edit, click copy. Then, go to notepad, or Word, or WordPad, or Wordperfect. Click paste. Save it from there. To post, highlight from notepad. Click copy. Go to the mail section to post, click paste. Go on from there. This will make it easier.

4. When you are done retyping this whole article with the proper changes, click on FILE in this message box (it is right above SEND). Click on SAVE AS under FILE (make sure your in the newsgroup message window, not where it says Netscape News) Save your file as a text file to your C: or A: drive. DO NOT SEND OR POST YOUR ARTICLE UNTIL YOU DO THIS!!! Once saved move to next step.

5. To post to at least 200 newsgroups do the following. You can post to more which will bring you more money but 200 is the bare minimum. Go to a newsgroup you want to post in. Click on "TO NEWS". Write your subject just like you did when you retypd this article. Hit tab once. Now click ATTACHMENT.
Another box comes up. Find your file where you saved it. Highlight the file and click "OPEN". Now click OK. If you did this right you should see the file name in the Attachments box in shaded letters.

6. NOW JUST CLICK SEND. Do this to at least 200 newsgroups (there are over 18,000) Each time it takes no more than 30 seconds so once you have retyped the article its easy.

INSRTRUCTIONS FOR EXPLORER

1. Holding down the left mouse button, highlight this article. Then press "CRTL" key and "C" at same time to copy this article.

2. Print this article for reference.

3. Go to Newsgroups and press "POST AN ARTICLE", a window will open. Type your headline in the subject area and click in the large window below.

4. Press "CRTL" and "V" and the article will be placed in the window. If you want to edit the article, do so and then highlight and copy it again. Now every time you want to post the article in a new newsgroup just do the "CRTL" and "V" command and press Post"

187. DX Rules to live by

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-19 00:00:00 UTC

Taken from the W2JT DX packetcluster. I did not write this, I am just reposting this for entertainment sake

1st the Andrew Lewis disclaimer

Andrew, I did not write this. I do not know the original author. I found this on the local DX packetcluster. It is reproduced here in its entirety. The only editing was the removal of DX spots and talklines that came through while downloading.

Enjoy it for what it is..entertainment

Msg #5322 From: K1VV Date: 18-Jan 1633Z Subj: DX Rules Updated
The folllowing is the DX Rules with additional comments by N1BB.

1/17/97

Rules for DXing
or
How to have more FUN on the Bands

1. If you come upon a pileup, find the exact DX frequency and slowly tune
up your KW right on his frequency. Take your time doing this as it has maximum
effect this way. The longer you take, the better.

2. If you cannot wait to find out the DX call sign, ask "What is the DX call sign?" Do this repeatedly until some one gives you the call, this
will show all others on frequency that you are serious about wanting to
work this DX. This is called sharing.

3. When you find out the DX call, repeat your call over and over again on
the DX frequency, even if he is working split there is a chance he may
be listening on his transmit frequency.

4. When the DX says "ABC only"- Don't believe him. If he says "Europe only"
- Don't believe him. If he says "2's only" - Don't believe him. Keep giving your call "XYZ !!...XYZ !!...XYZ !! HOW COPY MARIO ?" Make sure
you use his name when you call him, he may think you are some one he knows, it must work as we hear it on bands all the time so it has to

be
effective. Don't pay attention to directional CQs, when did any DX
know
what they wanted..... what matters most is what you want.

5. To get the DX to work other modes tell him you want set up a
schedule
later which is convenient to you. You should wait until the pileup
has
built up to several hundred and just before the band is about to go
out,
then ask him to meet you on CW, RTTY or SSB at a set time and
frequency.
Above all, make sure you tell him that YOU need him on these modes.
This
will endear you in the hearts of all on frequency, it shows that you
can
work more than one mode and are a well rounded amateur.

6. If you have worked the DX previously make sure you call him and tell
him
that he is stronger than the last 6 times you worked him this week.
The
DX station will want to know this. Others on frequency will respect
you
more, you will be recognized as a Big Gun DXer.

7. When you find a DX pileup, to bring your operating skills to a higher
level and impress all those on frequency - Zero beat the DX send
"QRL?"
"Is this frequency in use?" This shows character and that you are
truly a
caring person.

7. When finally making the DX contact, give the DX some background about
yourself, TX, RX, ANT, WX, how many children and grandchildren you
have,
where they went to college, what size bedroom slipper you wear, or
any
other items of interest to the DX. This shows that you are not just a
599 kind of guy. This is most effective when the band is just about
to
fold.

8. After you have worked the DX you will need the QSL route. Although
this
will be listed on the DX packet cluster, in ARRL & DX News Letters,
and
on the Internet, there is not reason for you to go to all the bother
of
reading these sources. You can just keep calling on the DX
frequency...

"What is the QSL Information?". If you don't get a reply with the information after 8 or 10 calls, keep it up, your persistance will pay
off, there are plenty of other stations on frequency who are waiting to
work the DX who have read these publications.

++
++++

Rules for THE FUN MODE

1. For a split operation, spend most of your day listening and transmitting
on the DX sending frequency. On CW if some one calls on the DX
transmitting frequency, using your J-38 at 7 WPM, send
VP...UG...NP...UP.
until you get it right. If the station continues to call on the DX
frequency, then send LSD...LIB...LED...LID..until you get it right. This
has three benefits, 1. Others waiting to work the DX will be forever
indebted to you for informing the offending station. 2. The offending
station will be grateful. 3. You will get some code practice you need to
get you over that 10 WPM hump.

2. For those with CW and voice memory keyers this will be easy. All you have
to do is program in "UP" and "LID". For the more advanced you can add
"SPLIT"...."YOU IDIOT, WORKING SPLIT" ...Using the memory keyers for your
days activity will save your voice should you happen by chance to have a
QSO.

As always...Work'em First....Confirm Later......

To Check out our Stun Gun offer ..keep readingï¿½

What is a Stun Gun?

A Stun Gun is an electrical self-defense device that puts out a high voltage and low amperage shock. By merely touching a person with the stun gun, he is immobilized for several minutes with no permanent harm. Stun Guns are considered reasonable force to resist attack. They can be used many times to ward off attackers before the batteries need replacing.

Our Current Best Seller is the "Talon 250"ï¿½."The Finest Stun Gun in the World!"

Features:

Curved Head.
Strength: 250,000 Volts.
Power requirements: 2 X 9V Duracell Batteries (included).
Complete with hand-strap and belt clip.

Effects of the "Talon 250":

The Talon 250 Stun Gun does not merely rely on pain for results. The stun gun works on the muscular and neural system. A short blast of ï¿½ second duration will startle an attacker, cause minor muscle contractions and have a repelling effect. A sustained blast of 1 to 4 seconds can cause an attacker to fall to the ground and result in some mental confusion. It may make an assailant unwilling to continue an attack. A sustained blast of 5 seconds can overwhelm and control the attackers neuromuscular system IM-mobilizing him, causing disorientation and loss of balance. He will probably fall to the ground, feeling weak and dazed for some minutes afterward. Full recovery in this instance takes about 10-15 minutes. The "Talon 250" is effective through 1/2inch of clothing.

TALON 250 STUN GUN: ï¿½95 (Batteries included)

Methods of payment:

We accept payment by ACCESS, VISA or MasterCard.
NO Commission charged on credit card orders.
Credit card is debited only on DAY OF DISPATCH.

Delivery:

Delivery is charged at cost and is sent fully registered and insured.
European and Eastern Block orders a specialty.
We can and do deliver world-wide.

Hi!

I am going to purchase a GMRS handheld, but can't decide which one and =

would like some opinions. I currently own 2 Uniden GMR100's and would =

like to get something with more features a larger range but can still be =

used with them. Am considering the following:

-Maxon GMRS 210+3
-Radio Shack PRS-101
-Radio Shack PRS-102

Right now, most likely is the Maxon, but would like to hear opinions and =

thoughts about which is the best for features/value vs. price.

Thanks in advance!

Andrew

Andrew,
I would strongly recommend the MAXON 210+3. I'm dissapointed in the PRS-101s I have as they are simplex only and suffer from IMD terribly. Just after I purchased two PRS-101s because there were no GMRS repeaters in my area, a local ham club is considering putting up a Vertex GMRS repeater. Now, I plan on purchasing a Maxon SM-2000 mobile unit and two 210+3 HTs. Anyone want a couple of barely used PRS-101s for a good price?

Steve

Andrew:

Keep in mind, the Maxon has the ability to work with a repeater...the GMR100 does not. The Radio Shack PRS series, require an optional accessory to work with repeaters.

Bill Crocker

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2MAU, K4PC, K4WA, WT4K, W5IJU & ISLAND/DX News, W5KSI, W6OSP, W8EB, NL7TB, AH0W, 4L5A, DL6LAU, DL7VOA, DJ5AV & DX News Letter, F6AJA, G4BUE & DX News Sheet, PP5SZ, PS7AB, RU6BV and SM0BFJ for the following DX information.

3RD ANNUAL W/VE ISLAND CONTEST (by John, NL7TB). "Just a reminder that the W/VE Island Contest, sponsored by the US Islands Awards Program, will take place on August 16 and 17th. We've made some changes and hopefully made the contest more appealing. We ask that you read the contest rules carefully, especially when submitting your entry. Russ, VE6VK, will manage the contest and I will handle the award certificates and plaques. Please check the USI Website for the complete contest rules. You won't want to miss this one!"..... 73, John NL7TB
http://www.owt.com/usislands/

4L, GEORGIA. Al, 4L5A, states he will be very active in CQWW 160M CW Contest. He will be using a Yaesu FT-1000MP and HF2500E amp into a X-Q Quad antenna fixed on 124m tower. He will operate mainly on 1820 kHz. QSL via IK3HHX. There will be a special color QSL for this contest with a view of the antenna.

5R8, MALAGASY REPUBLIC. The "DX News Sheet" reports Maurizio, 5R8FH, is a lay missionary in South Central Malagasy and is active on 20 and 15 meters with 80 watts and a three element yagi on Europe. QSL via I1PIN.

5X, UGANDA (IT'S A FIRST!). Leif, SM0BFJ (QSL Manager for 5X1D), informs OPDX that Gus, 5X1D, will return to Uganda at the end of January. This time he will try 2 meter EME operation (this will be the first time in 5X-land). He will run 500 watt into a 17 element yagi. Those interested to arrange a schedule can write to Gus's E-mail address: jageror@wfp.or.ug He will also be active on 6 meter (50.150 MHz) between 1730-1900z calling CQ with 100 watt with a 3 element yagi. He might do some work on 80 and 160 meters, but his effort will be on 2 and 6 meter.

BRAZILIAN IOTA ACTIVITY. Look for Mel Island (IOTA SA-047) to be activated by PY5AA (SSB) and PQ5L (CW), from February 20-24th. QSL PY5AA via home call and PQ5L via PP5LL. This island is also good for DIB-24, DFB PR-01 and DFH-PR-01 (first). Look for Bailique Island to be activated by Mario, PQ8MM, on February 5-9th. Activity will be on SSB 80-10 meters. This island has an IOTA of SA-045 (also good for DIB 35). QSL via PQ8MM: Mario Gomes, Cx Postal 533, Macapa-AP, 68906-970, Brazil. ATTENTION: Please QSL only via direct NOT via bureau.

DX NEWS LETTER has a new editor as of January 1, 1997. Uwe, DL9GOA, will be stepping down as editor and will be replaced by Michael, DJ5AV. Michael is 58 years old, retired and a well known, active DXer. OPDX wishes him the best in the new position.

EP2DA OPERATION 1967-1971 (Need a card!). Chris, K4PC, has provided OPDX with the following information: "Date: Thu, 16 January
One of our local club members who has traveled abroad, moved to our area abt 2 yrs ago. In a long chat with him, I found out that he operated in Tehran under the call EP2DA from 1967-1971. He told me of some of the contacts, operating conditions, licensing etc. but also told me that he has a logbook in his possession. Unfortunately, he only has a small portion of the logbooks because when he was moved around by his employer, the rest of the logbooks were lost by the moving company. But the log that he has had quite a few US calls. I just thought that maybe there might be a few out there who workd EP2DA who never got a card for this operation. Ops can QSL with a SASE to KD2DY Don Alexander, 330 Appalachian Drive, Boone, NC 28607. Don said if he can find them in this partial log, a QSL will be returned in the SASE. Just thought some DXer's could use this rare info....." 73, Chris K4PC

FRENCH DX NEWS (by F6AJA). Jean, F6AJA, reports that he has received the logs for FK5M (Matthew Island) expedition. The QSLs will be ready in the early part of February and the card will be mailed as soon as possible.... ....Gerard, F2JD (ex-5R8EN, S79JD etc..), hopes to get his Panamanian (HP) licence for this end of January.... Yannick, F6FYD (exST2YD, T5YD etc..), will be in India (VU) for his business, starting next week for one year.

J7, DOMINICA. DL3LAR, DL8OBQ and DL6LAU will be active, February 12th to March 3th including both ARRL contests and the CQWW 160m SSB Contest. They "might" use the callsign J75T for all contacts made. They will have two complete stations with us, including 26m tall vertical for 160/80/40 meters and a 5 element log-periodic for 14-28 MHz. They might signing FG/homecall for a few days February 10-11th. All QSLs should go to DL6LAU, via the bureau or CBA. Carsten Esch, DL6LAU, states, "We are thinking about a stateside QSL-collector for us who might ship us the collected direct stateside QSLs requests (to save some dollars) on both sides (AIR MAIL to US is 2US$ here!) any volunteers???"

JD, OGASAWARA. The "Island/DX News" reports Aki, JD1AMA, is active daily on 1908 kHz and listening 1826 kHz at his sunrise at 2122z.

KG, GUANTANAMO BAY. Bill/WT4K, Jan/K4QD and Rusty/KG4AU will be active in the CQ World-Wide RTTY WPX Contest February 8-9th, as a Multi/Single entry using WT4K's call KG4GC. QSL to WT4K [ex-KQ4GC] with SASE or through bureau. Jan/KG4QD and Bill/KG4GC will also be active February 10-14th on both CW and SSB on all bands.

KP4, PUERTO RICO. Paul, K4UJ (ex KR4UJ), and Steve, K4WA (ex KR4DL), will operate from KP4 January 22nd through January 27th, including operation in the CQWW 160M CW Contest. The contest callsign will be KP4/K4UJ; operation outside the contest on all bands will be KP4/homecall. QSL via homecall.

MEXICO's HAM CONVENTION. The Association of Radio Amateurs of the Republic of Mexico (ARARM) announces the "37th Annual Amateur Radio Convention" to be held July 10-13, 1997, at the Convention Center in Leon, Guanajuato. ARARM welcomes international amateur radio visitors and their families to this event which will include programs on satellite, DXing, packet radio, emergency radio services, etc. in addition to a variety of technical seminars and workshops. As usual, special cultural programs and tours will be available for all guests of the convention. The convention organizers have selected the Real de Minas Hotel as the main hotel. For registration information, please contact Mr. Sergio Valdes Sada XE2RJ at tel: 011-528-357113 or fax: 011-528-353368.

OCEANIA IOTA DXPEDITION. Silvano, KB5GL, reports he and three operators will be operating from Oceania IOTA OC-137 Stradbroke Island, in the Queensland South Coast Island Group. Operations will begin on Saturday, March 15th, at 0530z and terminating Monday, March 17th, at 0100z. Activty will be SSB only: 3995, 7065, 14260, 21260 kHz. Silvano will be operating with his Australian issued callsign of VK4WGL. The other operators will include: Sergio/VK4GK, Angelina/VK4AAC and John/VK4WX. QSLs for VK4WGL go to KB5GL's CBA. All others to the VK4's CBA.

P2, PAPUA NEW GUINEA. The "DX News Letter", report Dietmar, DL3DXX, and Joerg, DL8WPX, will head for Misimi Island where they will stay from February 20th until March 4th. In Papua New Guinea, the team will be joined by Falk, DK7YY, and Juergen, DL7UFN. A licence has been promised orally. Emphasis will be put on lowband CW.

PIRATE ALERT! It has been reported that 8B8KB, worked on 40 meters CW and other frequencies, was a PIRATE. There is no YB8KAR station. DO NOT QSL! The IOTA Dxpedition to Tukang Besi Islands has been rescheduled for March 1997, per Tjok, YB0RX, one of the main organizers. They will use the callsign 8B8WI.

PJ8, ST. MAARTIN. Ron, ND5S, his wife Sue, KF5LG, Bill, W8EB, and his wife Dorothy, KB8ZXO, will be on the island from Feburary 23rd to March 8th, operating as PJ8/ on all bands CW, SSB and RTTY including the WARC bands. They will be using the special callsign of PJ8A again for the ARRL DX Phone Contest the weekend of February 28th through March 2nd. Please QSL via W9NIP for the contest QSOs and QSL via the home callsign for the rest of the contacts. Equipment will be the FT-900CAT that was used by AA8U for his S. Cook trip, ZK1AAU, and an Icom 706. Antennas are

a Cushcraft R-7000 atop the condo complex at the 100 ft. level and an all band 160 to 10 meter inverted V trap dipole. A daily schedule is kept with the hams back home in Michigan at 2030z on 14195 and anyone wishing a PJ8/ contact from St. Maartin may jump in at that time. They will move to another frequency to accomodate all license classes. They generally are on the air 1230z to 1600z each day. Afternoons are spend doing the non ham related activities.

RSGB IOTA (New Checkpoint). The RSGB IOTA Committee is happy to announce the following new Country Assistant and Checkpoint appointments for Brazil and South America:
Helio Carlota, PY2DBU, (*) as the Checkpoint for Brazil and South America (excluding French Guiana). PY2DBU can be reached at:
Helio Carlota, Cx Postal 1296, 13200-970, Jundiai/SP, Brasil.
Or his E-mail address: hcarlota@dialdata.com.br

Ronaldo Bastos Reis, PS7AB, as Country Assistant for Brazil,
Pedro Sirzanink, PP5SZ, as Country Assistant for South America (excluding French Guiana). PS7AB and PP5SZ will act as Assistant Checkpoints when necessary. These new checkpoint arrangements, which have the support of the Brazilian National Society LABRE, took effect on 1 January 1997.

RUSSIAN CAPITAL. Serge, RU6BV, will be active from here starting January 19th for about 3 weeks. From the Russian capital of Moscow, he will be signing with the callsign RU6BV/3. His activity will be on CW and SSB all bands, exclude WARC and 160m. He states this will be an educational trip for him. After his trip (February), he will be sending out special QSL cards for these contacts. QSL cards are already printed. QSLs for RU6BV/3 go to his home address: Serge W. Guryew, Kadoshskay str. 13/1, Tuapse, 352803, RUSSIA.

S2, KUTUBDIA ISLAND (Bangladesh). The DXNS states Vittorio/I1SLY, Fernanda/IK1FLF, and Manju/S21AM, are planning to be active from this possible new IOTA February 21-23rd.

VK0, MACQUARIE ISLAND. As of the beginning of December, there are three radio amateurs who are working at the meteorological station on the island. Operators are Tom, VK0TS, who is a Communications Technical Officer; Eric, VK0KBB, in the engineering section; and Graham, VK0WG, who is attached to the meteorology unit. All have been too busy working during the crew change-over which leaves no time for amateur radio. VK0TS has plans to be active on CW/SSB mainly 80 and 40 meters.

VK0IR HEARD ISLAND DXPEDITION. VK0IR started its radio operations at 0654z on Tuesday, January 14th. Reports indicated that they landed on the island at 2230z January 11th (0330z local time) in 30 knot winds. All operators and equipment were put ashore by helicopter, taking 51 trips over five hours. Presently, activity continues on all bands. Updated information and "LOG INFORMATION" can be found on their WEB-site.

ZF, CAYMAN ISLAND. Bruce, W6OSP, and Joe, WA6VNR, report that they will be operating here as ZF2QM in the CQWW 160M Contest . QSL Via W6OSP.

ZY & ZZ, FURADO ISLAND AND FRANCES ISLAND (BRAZIL). Look for ZY3CEJ February 8-11th, on SB/CW, all bands, usual DX frequencies and the Brazil DX Net. This island does not have an IOTA but is good for DIB-62. QSL via PY3CEJ; or F6FNU.
Frances Island is a Brazilian island located in the Espirito Santo State Group (IOTA SA-067, also DIB-068, DFB-ES-07), and will be active February 8-12th. The callsigns to be used: SSB - ZZ0Z (Lima/PY1NEZ), ZW0Z (Lineu/PY1ADV) and for CW - ZX0Z (Zeca/PY1LVF). Activity will be all bands. Suggested frequencies: SSB - 50100, 28400, 24905, 21200, 18075, 14200, 7060, 3790 kHz and CW - 50100, 28015, 24915, 21015, 18075, 14015, 10150, 7015, 3515, 1815 kHz. QSL via home call or via bureau.

SPECIAL REQUEST (STOP THE MAIL!.) Paul Kidd, A35RK, has requested OPDX to tell its users to pass along the following information. PLEASE DO NOT SEND E-MAIL to Paul. He will not reply to any E-mail requests. Paul states that there is no "real" Internet in Tonga: it's an E-mail-only store and forward system, with a periodic (EXPENSIVE!) satellite link to New Zealand. The cost is HUGE! He mainly uses it for family and business matters. He will not respond to any messages dealing with amateur radio operations.

194. VK0--Disgust with QRMers

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-19 00:00:00 UTC
From: godzilla@panix.com
Message-ID: <5butn2$f0m@panix3.panix.com>
Source record: 33910

Although I have only heard the VK0 operation twice, here in NYC, since they began, I have heard what may be plenty of intentional QRM with those trying to make contact with that very much desired DXCC country.

What a shame, but not surprising. It is at times alsmost embarassing to be a ham, knowing that there are fools and miscreants trying to throw a monkey wrench into an exciting DX contact.

Those needing Heard I. will press on and overcome the sociopath QRMers. The best of luck to all trying to confirm VK0.

Cough up a few extra bucks and have a Motorola radio (i.e. Radius line)
programmed for GMRS. You won't be disappointed.

Les:

I have the Radio Shack PRS-101. It seems to work fairly well, however the build quality isn't too good. It doesn't have pl tone capabilitys either and won't work repeater offsets. I didn't need these features, and paid less then $100.00 for a used one so I went with it.

I looked at the Radio Shack PRS-102(Motorola) It looks pretty good. I don't think it will do repeater offsets, and the pl tone is an optional accessory. I think it runs about $40.00 for pl capabilitys. The build quality for this radio looks to very good though.

Bottom Line:
If I were buying a new unit then I would definitely get the Maxon 210+3. (I am thinking of getting one myself!) If you can find the PRS-101 used and dont need tone/repeater capabilitys its a good buy only if you don't pay more than $100.00.

Just my 2 cents!

I have a QSL from 7X2LS from 10 m QSO in 1982, sent direct. Did you
follow the "rules of QSLing?"

Make sure it's a plain envelope.
No callsigns on it.
Wrap any money/IRCs in carbon paper (or use security envelope)

WHile it's true there are some bad apples out there, pilferage at the
post office can be a problem.

Hi, and thanks for taking the time to help with this problem.

I am putting the final touches on a program to aid DXers in monitoring the NCDXF/IARU propagation beacons. One of the program's features is short- and long-path beam headings to each beacon from your QTH. For that, I need geographic coordinates for each of the established beacon locations. The NCDXF spokesperson doesn't know this information. Can you help by providing the location of a beacon near you? The complete list of beacons is available at the NCDXF Home Page, http://www.ncdxf.org/beacon.htm

My preferred format is Latitude and Longitude, in degrees and decimal degrees (DDD.ddddd), referenced to the WGS84 datum. Having said that, I'll be happy with whatever I can get. Even the name of a city or town would be an improvement in most cases. For many, I currently know only the country.

When complete (as soon as I can get these locations) the program will be distributed from the KaWin Home Page as FREEWARE, so pitch in and be a part of creating this new tool. Thanks and 73,

Stan

SUNDAY NIGHT ON 80 METERS

In one of our previous messages I said I heard VK0IR working
as far West as Colorado. Here is what W0YG wrote today:
"... I would just like to report that KV0Q and W0YG had solid
80M QSO's (W0MS, K0CS, N3SL and WE0MS are not 100% sure) though.
VK0IR was in here with good copy, 559, from about 00:15 until
about 00:50 when he faded out. He came in over Europe, about
45 degrees for us. I could only hear him on my northeast
sloper.... (tks W0YG)"

MONDAY NIGHT ON THE LOW BANDS

19:00 z: VK0IR is solid 599 on 1826.5 (why not 1822 as
announced?) and 59+20 on 3799 with Harry, RA3AUU at the mike.
Incredible operation. Am I dreaming? This is UNREAL! I hear
Europeans with 100 Watt and relatively simple antennas
working them on 160!

80 METERS WEST COAST

Glenn, K6NA reported that VK0IR appeared at 15:00z on 3.507
and worked N6ND, K6XT, K6JYO. After about 15:15z they were
working lots of guys up north. Glenn continues "Congrats
to the team for hanging in there to give us a chance on
this most difficult path!!!!! "

JAPAN

Peter announced that in the coming days they would pay more attention to JApan on all bands. JA, open your ears...

OH2BUA INTERNET DX-CLUSTER

The OH2BUA Internet hEARD iSLAND cluster (on the WWW page : http://www.clinet.fi/"jukka/heard.html) has so far (since the start of the FO0R operation)shown 2,696 announcements regarding the present DX-pedition. Another record to be broken?

PACKET RADIO QSL SERVER

The Packet Radio QSL server PA3BXR has so far been consulted 336 times. It appears that some 5 to 10 % of the requests are made in an incorrect format. The following syntax has to be closely followed:
to: PA3BXR @PI8VAD.#ZH2.NLD.EU
subj: HEARD-LOG
msg: HEARD-LOG N6EK
HEARD-LOG HA0DU
HEARD-LOG JY1
HEARD-LOG ZS8IR
You can ask for log info for your friends as well. Put one call per line, preceded by " HEARD-LOG ".

THE HIGH BANDS

IK1TAZ reports that VK0IR was very active on 21, 24 and 28 MHz today, bwteen 13:15 (15 m), 13:25 (12m) and 14:35 (10m).Eduardo adds "All the guys there are doing a fantastic job, thank you!!"

MORE ON 80 AND 160

Some excellent advise from 160 m specialist # 1 (W4ZV): "..The only conclusion I have is that you need to be there as often and as long as you can, both before your sunset and after their sunrise, use as many different RX antennas as you can muster, and switch around until you find something that works. It just AMAZES me that they were so consistently from the Southeast on 80 yet NEVER came from that direction on 160. It's hard for me to understand how these bands can be so close in frequency yet so different in propagation...."

160 AND 80 M FOR JAPAN

Our JA-friends really have been spoiled tonight. JH1ORA, Kaz wrote: "At 18:10z, I heard VK0IR on 1826.5 working Up 5-8. It was the best signal, I've ever heard, solid 599 plus.

Since, just same time, Harry was carrying 80m SSB, I requested "listen JA" and a few minuts later, at 18:30z, the 160m OP changed his QSX to JA. Great job! Finaly, many JAs got a new one on 160m until 19:30z. It was an excellent show. Thank you again."

73,

Your pilots: ON4UN, N1DG, W0EK, K0EU, W4WW, W2IJ, JH1ROJ

> --
> BARRY
>

Barry, what makes this any different than the goobers who push ahead of
you trying to get on the subway first. The clowns who insist on getting
on the already full elevator...yada yada yada

It's not embarassing..it's a fact of life. No matter where you go in
life there will always be assholes screwing around. Best to ignore them,
don't acknowledge them and get on with the business at hand..working the
HEARD. Sooner or later they get the idea and slither back under the
rocks they crawled out from under.

DX police are idiots, the obvious product of sticking coax into their
rectums, keying up and acting like a dummy load or is it a dummy acting
like a load.

FORGET ABOUT 'EM!!!

Good luck

Message-ID: <32E4079D.C7F@A.crl.com>
Source record: 33929

Boy is this a sore subject with me. Prior to last year, I had not chased DX for about 6 years.. When I left, I was using a nifty thing called the Second Op. Since I've started chasing dx again, I've posted lots of messages about what others use to figure this out. My post office can't tell me (I'm not surprised) and the best advice I got was to send for some postage of the dx country from a ham back east.

I"ve looked for a web site without luck. I guess the idea is just to send green stamps and if you send enough, you'll get a card.

If you have any mail about what to use to determine IRCs needed, I sure would appreciate if you would send it along.

Thanks

Dennis

215. VK0IR/TO0R e-mail log search operational

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-20 00:00:00 UTC
From: lyndon@ve7tcp.ampr.org
Message-ID: <5c0dg2$laf@ve7tcp.ampr.org>
Source record: 33931

The e-mail based log search for the Heard Is. (and Reunion)
operations is now available.

The log servers expect an email message containing ONLY callsigns,
ONE PER LINE. (Make sure they start at the beginning of the line -- the
software isn't too smart ...)

To search the TO0R (Reunion) logs, send your mail to:

to0r-LOG@ve7tcp.ampr.org

To search the VK0IR (Heard Island) logs, send your mail to:

heard-LOG@ve7tcp.ampr.org

PLEASE BE CAREFUL WHEN ENTERING THE E-MAIL ADDRESSES! I've already
had a couple of people send their requests to heard@...

The database is updated as we receive the data from Heard Is. via
the PACSAT link. There have been problems with the uplink
transciever at VK0IR, causing the logs to be delayed a bit. We
currently anticipate receiving updates once per day. Watch the
heard@ve7tcp.ampr.org mailing list for updates.

* *
* H E A R D I S L A N D D X - P E D I T I O N *
* PILOT PROGRAM MESSAGE # 76 *
* MORE ON HEARD - MONDAY JAN 20, 15:00 z *
* *

THE GUYS ON HEARD ARE RIGHT

Some of you will remember it: there was a lot of critque when
Heard island was announced. It was a waste of money to do this
at this point of the sunspot cycle. There was going to be no
propagation. One French amateur said "Crozet has only been worked
on 40m, we havben't heard VK's on 20 for ages... etc". Even one
of the major European DX Clubs (which got its name from another
historical DX-pedition) refused to support the Heard Island
DX-pedition bacause they said there would be no propagation to
Europe.... After 6 days of operation VK0IR has 17,240 QSO's
with Europe in the log...". Peter was right, and along with
him all those that believed in it, and invested their time and
money to make this historical event come true. We, the pilots
are proud to be part of it!

PACSAT

The Pacsat radio (the one in the toilet shelter..) is doing
fine today. The latest logs are traveling on the satellites,
and will be downloaded during the (Europen) late afternoon hours,
and made available immediately afterwards. Peter also mentioned
they uploaded a lot of new pictures, which will be made available
on the WWW later on.

LATEST STATISTICS

On monday mornig the count was as follows:
Total QSO's: 43.836
Breakdown:
Ja: 8,710
Eu: 17,240

NA East Coast: 8,946
NA Mid West: 3,428
NA West Coast: 2,316

CW: 24.000 SSB: 19.000 RTTY: 655

Sat: 347
10: 121
12: 519
15: 6,408
17: 6,681
20: 16,650
30: 3,482
40: 7,704
80: 1,426
160: 498

THE LOW BANDS

The 160m 4-square has been put up. So far asll QSO's on 160
were made with the Battle Creek special. The 80 meter ON4UN
special was repaired and is back in the air at the SSB camp.
I would expect that tonight they will be on 75 meter.
Many asked what was changed to the 160 and 80 meter antenna
as the signals were soo stroing on Sunday evening: the answer
is that nothing was changed to the 160 m antenna (Battle Creek
special), but more radials were put under the 80 meter 4-square.

80 METERS TO WEST COAST

As requested by a few, VK0IR was on 80 m very early today,
and called CQ for quite a while with no response at all.

10 AND 12 METERS TO EUROPE

VK0IR checks the highe bands. Proof is a message from the OH
boys sating :"Nice signals around 11-12Z Sunday on 12/10m.
Now it is Monday 1230z and VK0IR started at 12z on 24945.

WHAT ARE YOUR PILOTS DOING?

I am sure you all know what they do: they are your
contact with the island. To performs their task
successfuly they use e-mail, PAcket radio, and run a
daily 75 meter information net. You might want to know
some facts and figures about this:

HEARD ISLAND INFORMATION NET ATTENDENCE:
ON4UN: 25/30 every night
N1DG / W4WW: 3-4 checking in (+ SWL's?)
W2IJ / K0EU / W0EK: 3-5 attending
JH1ROJ: 20 checking in + SWL

HEARD ISLAND INFORMATION NT DURATION:
ON4UN: 30 mins
N1GD / W4WW : 5-10 mins
W2IJ / K0EU /W0EK: 15-20 mins
JH1ROJ: 30 mins

HEARD ISLAND INFORMATION NET QUESTIONS:
ON4UN: approx 5
N1DG / W4WW: general stuff, each check-in 1 question
W2IJ / K0EU /W0EK:5 per session (what frequency, what time?)
JH1ROJ: 1 question per station

E-MAIL:
ON4UN: receive approx 300 e-mail messages per day, answer approx 100
N1DG: about 25 per day.
W4WW: 10 - 15 per day
JH1ROJ: very few (not much internet in JA)
W2IJ: no info
K0EU: 30/day, but only 1 or 2 directly to K0EU, 2 or 3 answers per day
W0EK: 20 per day

TIME SPENT PER DAY ON PILOT JOB:
ON4UN: 18 hours per day
N1DG: 6 hours a day...at LEAST
W4WW: 6 to 8 hours / day
W2IJ: 2 - 4 hours per day
K0EU: 2 hours/day
W0EK: 17 hours/day
JH1ROJ: approx 16 hours/day

QUESTIONS / MESSAGES ON PACKET:
N1DG: none
ON4UN: 10 - 15 per day (BBS and DX-Cluster)
W4WW: 1 per day via BBS, 15 to 20 per day on DX Cluster
JH1ROJ: very few
W2IJ: none
K0EU: none (no packet)
W0EK: 10 questions per day via DX cluster

73,

Your pilots: ON4UN, N1DG, W0EK, K0EU, W4WW, W2IJ, JH1ROJ

Susan.

There are several. Take a look at <http://www.contesting.com/> for a
start. The contest calendar links are at
<http://www.contesting.com/lynxcals.html>. Also, there are contests
listed, with their rules, in QST or CQ (and other ham mags).

Have fun!

You would be AMAZED at what a little prompting can do relative to the local post office. The post office is supposed to be able to tell you the IRC coupons needed, I *THINK*, but am not sure.....

In that the local post offices in College Station, TX, the home of Texas A&M University have LOTS of foreign students, they are VERY good at IRC matters and are apparently one of the fewer ones that keep TONS of them around, at least more than I'll ever be able to afford! I'll ask, gently and politely tomorrow at the place if they have a list of what is needed. I'll almost bet they do and can tell me what the postal document reference pointer is to the thing! At that point, I'll re-post another reply in here tomorrow about what I find....

Meanwhile, back to paragraph #1.... <Huge Grin>

With a little CLOSE cooperation between the local crew here and my request for a marker on when the latest pickup was for a drop box, because you never used to be able to really tell without going up to everyone of them that weren't marked well, I was provoked to write a letter to of all people, the Postmaster General of the United States...

<Still Larger Grin>

You have absolutely no idea what all an inferno that can produce.

Next thing I know, there are ALL kinds of notices in my post box and a VERY pointed interview with the local postmaster about a missive from Washington... Notice I said, "crew" in the above, not the local Postmaster.

<Still Larger Grin>

A real fact finding session evolved.

Those neat HUGE RED lettered on blue decals declaring what the last pickup time of the day that say something like "last pickup 6:30 p.m." or something like it all over the whole USA are a result of that letter... You now see them all over the USA on a LOT of drop boxes....

<Smiley>

There was a SERIOUS discussion over whether to do it and how. Notice that it doesn't say exactly WHEN the bulk truck will be there to pick it up! It is only a GUIDELINE time for the patrons. The reason for that is, as I found out during the discussion with the local Postmaster when we were planning the report back to Washington for the recommendation, gently as he spoke, that a major problem for the Postal Service was assault and robbery efforts in certain major crime areas if the schedule of the pickup were exact and kept precisely on time. They *CAN* do it; they don't, because as I was told, it invites bashed up and battered postal employees....

:(

I look at the time tipoff banners sort of proudly. You *CAN* make a real difference if you write letters and do the job correctly.

If there is no such thing as a list of reply needs for IRC's my bet is that even *YOU* can make that difference...

In light of my last experience, while I chuckle at it now, I'll let you have the fun of making the difference for all of us if that is needed.....

Once a King, perhaps always a King, but once a Knight is enough....

:)

Meantime, after 45 years as a ham and having them even deliver QSL cards to me just with my name and city and state from places like deepest Russia in Kyzl and so on, I'll stand on the notion that the United States Postal Service is the finest such service ANYWHERE. Corporately, with a mailing list of thousands, over 20 years experience has taught me what really gets lost. It is phenomenally small, percentage wise.....

Yes it helps that the local Nixie Clerk is a long time ham, but still, they are DARNED good....

* H E A R D I S L A N D D X - P E D I T I O N *
* PILOT PROGRAM MESSAGE # 79 *
* MORE ON HEARD - TUESDAY 21, 15:00 GMT *
* *

AM I IN THE LOG?

We get a few messages from people saying "the log server says
I am not in the log, and I know I made the QSO". There can be
only two situations:
1/ the log server, not being an real-time system, is always
one (or even 2 days) behind. When you check in you will see
what the last entry date/time in the log is. Check carefuly!
In this case you may have worked him, but your QSO is NOT YET
on the server.
2/ You are indedeed NOT in the log. Or you might be in the
log with a broken call. You may want to take a chance with a
broken call, but I have no idea what the QSL-ing policy will be
on this subject. The best thing is to try the work VK0IR (again).
The servers are not there to argue that the VK0IR got the call
wrong. It is a tool that tells you whether you are in the log or
not. The logs on the servers are 100% correct. We have seen the
servers acting up at times of traffic congestion. In that case
try another server, or try off the peak hours. If we did not have
the log servers, and if you were not in the log, you would have
had your card returned with "NOT IN LOG". Now you know, and you
have a chance to try to work them again.
At this time the logs up to Jan 21, 0601 GMT are on the server
(or being put on the server). They contain 46,996 QSO's.

STATISTICS

Data for logs up to Tuerday morning,Jan 21 at 08:21 z:
Total QSO's: 50,017

Japan: 9,533
Europe: 10,170
East Coast: 10,119
Mid West: 3,936

West Coast: 2,734
Total: 27,733 CW , 21,572 SSB and 712 RTTY

GENERAL CLASS PORTIONS

VK0IR will sstart listening more explicitely in the general class portions of the band. So far the response from these parts fo the bands has been very disappointing, however.

WX ON HEARD

WX for Monday, Jan 20:
temp: + 3deg C, eind chill: -11 deg C
wind: 80 kph (51 mi/h) max.

LOW BANDS

The 80 kph (51 mph) winds took the 80 meter SSB antenna down again. This time it seems to be irrepairable. We'll try to challenge them to repair it anyhow! Peter said they will retune the 80 m 4-square (normally used for CW) for SSB, and alternate using that antenna on CW and SSB. VK0IR will be on 80 (75) SSB tonight, Tuesday. This would mean there would be no concurrent CW and SSB on 80, which would be a pitty!

RTTY

Peter will look for Europe 18:00-21:00 z and for Japan at 09:00-12:00z. Peter mentioned he worked all W5 and W0 stations he could hear this morning.

73,

Your pilots: ON4UN, N1DG, W0EK, K0EU, W4WW, W2IJ, JH1ROJ

LOG SERVERS

Lots of people still don't know how to use the servers on the
Internet. Here are the instructions oce more:

1. On the WWW pages (internet):

[Both of the servers listed below are having problems. For now]
[you should use the backup server at:]
[ ]
[http://ve7tcp.ampr.org/cgi-bin/vk0ir]

- connect to http://www.aurumtel.com/hnews.html
From here you can go to the log server.
or
connect directly to the US log server page at:
http://www.aurumtel.com/heard-log.html
or
connect directly to the European log server at:
http://heard.eunet.be

- Enter the callsign you are interested in, and press
the "search" button.

2. On E-mail (internet E-mail log-server)

Send an e-mail message to

heard-log@ve7tcp.ampr.org

with the call sign of the station in the body (one per
line). The log server will immediately return a message
to you with the requested

TRAFFIC JAM ON THE LOG SERVERS

There have been some problems: the aurumtel.com server has
been returning empty documents on searches at some time.
At 07:30, Tuesday morning I (ON4UN) checked it and got a
perfect reply in 10 seconds though. Also last night,
the European Web server (http://heard.eunet.be) responded
slowly (five minutes so far looking for W@UP), probably due
to the load it's picking up from aurumtel.com acting up at
that time.

In the event these problems are load related Lyndon,
VE7TCP, fired up another web based search engine at:

http://ve7tcp.ampr.org/cgi-bin/vk0ir

to help spread the traffic around a bit.
Turnaround time is running about two minutes.
[The "two minutes" refers to the e-mail log server.]
At this time the database is loaded with contacts up
to 0700Z 20 JAN.
[Updated to everything before 0601Z 21 JAN]

E-MAIL LOGS SERVER DATA

Since firing up the e-mail QSL log server at 0200 (local)
on Monday we've had 537 incoming messages requesting 1687
callsign lookup. That's averaging an incoming request
message every two minutes (just under, actually).
Time to process the requests is under five seconds once
the QSL server has the message. End-to-end turnaround time
(from when the user mails their request message until
the response is in their mailbox) is under two minutes for
nearly all requests. This includes the one minute delay imposed
on incoming messages at ve7tcp.ampr.org by the firewall.

GENERAL CLASS FREQUENCIES

VK0IR has repeatedly been calling QSX 14.240 for general class
station this evening but he had VERY FEW CALLERS! Maybe it was
because of the time 2330 local, lots of people in bed, but they
did try VERY VERY HARD!. Com'on general classers, wake up!

NOW AND ONE YEAR AGO

>From W4YV "While reading all the kudos to the heard island
operators, I can't help but think about what happened sometime
last year. As you know the first attempt by this crew was
about one year ago, more or less. And as you also know the
attempt failed due to a crooked ships capatin who scamed the
trusting hams that contracted for his ship. This crooked scam
resulted in great personal loss to ralph and lots of other
dedicated people. Hams on the local packet cluster were very

critical of Ralph and the others, because the expedition fell
through, and a great sum of money had been lost. I was the only
one on the cluster who supported ralph; indeed I made an
impassioned appeal on behalf of ralph, reminding the guys about
3Y0PI and all the great thrills this wonderful dxpedition provided.
I got back one (1) reply, it said Ralph and the others made their
bed now let them lie in it!!! I have never forgotten it.
It was made by a famous K2 station, whom I noticed worked VK0IR
on 160 meters!!! How soon they forget. .... Fame is fleeting,
but the great operation from 3y0pi is burned in my brain.
Indeed vk0ir will go down in history as a great one also, but in
six months the majority of hams will have forgotten just how
great it has been. take heart, us dyed in the wool dxers will
never forget. DX forever: mick...w4yv "

Hi again. Let me apologize. I guess I was too close to the action!

I checked with one of the guys that was at Dhahran with me. He says I
am becoming too much of an OOT. He reminds me yes there was an
operation and we worked them from HZ1AB.

Let me apologize to everyone for being so positive. I also was thinkning
of earlier (1960s and 70s) operations by W1TYQ and others. From now on,
if it was more than 10 years ago, I know nothing! HI!

One of the traits of a real dx'er is ignoring the children on the bands
and still working the DX. Many of these idiots do what they do, because
they can't work the rare station.

I can't hear VK0IR on any band but 40 and have a real warm fuzzy feeling
because I worked them on the 3rd call with 100W and a vertical from W6!

DX IS!!

Help.......

A group of friends and me have an idea about conecting two computer
using a radio transmisor. These computer should be 500 meters away (max.)

We have some doubts about it because we're beginners dealing with
transmisors.

1.- What transmisors type we should use?
Which bands and which frecuences?

2.- what's the way we can send the signal from the serial port, and
paralel port, or from the modem output to the radio transmisor?

Please, any information about this stuff will be welcome.
We'll post the final this experiment's final result.

Send your answers to:

Question: What is a simple, inexpensive, and convenient way to start
this year off in a FUN, intriguing, and romantic fashion?
(Santa must have been holding out on this one!)

Answer: Dateline!

Now that Christmas is over and you have given everyone else presents,
it's time to treat yourself to something nice.....that someone
special. Someone to share in your hobbies, your interests, your
lifestyle, your LIFE.

Dateline is the perfect way to find someone and be found! Dateline
gives you the forum to seek out others whom you find interesting, and
let others know about you! And the best part is - you are in control
of what happens. Call often to leave and receive lots of messages
(remember - this service is HUGE and there are so many people from
all the area codes across the country calling in to find people just
like you!), or call in as little as you like and leave and receive
a few selective messages. You can also call just once to see what the
heck it is all about. Whether you are a little shy or outgoing
in the biggest of ways - it is a simple and inexpensive way to find
other singles. It is amazing how much fun people have with Dateline!

It is so convenient! You can call in from anywhere at anytime to give
and get your messages. This is a 24 hour service and you just punch
in whichever area code you are interested in - whether it is in the
place you live or the places you go! And it is really super if you
relocate and want to meet up with guys and gals who share your
interests and would love to show you around! (No wonder Santa is
always so jolly - his sleigh phone has the Dateline speed dialed in!)

1-900-484-7009 ext. 5241

$2.99/min. Must be 18 years or older.

Serv-U (619) 645-8434

Make this your Happy New Year's Resolution: To call Dateline today
and start giving and receiving those personal messages! Join in the
fun - and don't keep those folks who want to meet you waiting until
next Christmas.....

229. Valid QSL Address for DL3KBQ

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-22 00:00:00 UTC
From: KCPL57A@prodigy.com
Message-ID: <5c41ch$1p9g@usenetz1.news.prodigy.com>
Source record: 33847

On 2 Jan 97 I worked D2EV (Helmut) and he said QSL to his home call which is DL3KBQ. I posted a query on this newsgroup as to the proper address. I was informed (by some) to use the call book, others provided an address.
Well, I bought a call book, and the address in it matched that given me by members of this august body. Unfortunately, I got my card back today with a stamp "Zuruck on Absender" followed by what appears to be a standard bureaucratic statement. I assume it says "Return to Sender". Help! Help! What is the proper address to send this card??? I'd sure like to get the Angola QSL card. Any help will be greatly appreciated.

Hi, I have a REALISTIC DX-360 receiver, it covers 4.5 to 26MHz and also the
150 to 256 KHz
which is labeled LOW WAVE on the dial. Can anyone tell me who broadcasts
on this band.??
So far I've heard a faint local radio station on this setting that can also
be heard on the regular
AM band....

Thanks in Advance......

Well, there are a few I worry about as well. EM1KA - many of you suggested I QSL via the JA2 QSL manager. It has been several months since I sent him $5 with a SASE and still no reply. I guess either the envelope was hijacked or EM1KA doesn't truly exist (my #1 worry). Another one which REALLY bothers me is CY0AA. I sent VE9AA a SASE and a few bucks for the card, sent him a number of e-mails, received a few promises back via e-mail, and STILL have not received a card. (Mike, you out there somewhere???) I guess my DXCC for 80m will have to wait just a little while longer. :(On the good side, a Sardinian station last month not only returned a card within 10 days,but even sent back a dollar since the postage was less than what I had sent him! I guess there is still hope.

Anyone have any suggestions on how to get the EM1KA and the CY0AA card legally and tactfully? Please e-mail me at toddellis@juno.com 'cuz i dunno what else to do but complain like everybody else.

The last I heard (no pun intended) on the EM1KA is the logs are still not
in or still not complete.

As to the CY0AA, I snt mine to an alternate manager WB8SDL and got back
for all 5 of my 1996 contacts

I had sent the original poster a private E-Mail indicating that while
I had not worked the VU, I had rec'd a card from OD5NJ. I had nothing
to report on 7X2LS as I had only sent him a QSL in late October or
November of last year and it was to soon to expect any response. I
got home last night and there was my card from Sadek! Not only did he
QSL our 75M SSB QSO in October of 1996, but also QSL'd a QSO we had
on November 10 of 1981. Yep,...QSL'd a QSO that was over 15 years
old! I had mentioned to the original poster that he might be better
off to ask if anyone had a better route, different manager, etc. than
to simply state that they are bad QSL'ers. DX IS!

* MORE ON HEARD - WEDNESDAY JAN 22, 17:30 *
* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *
```

OPERATING FREQUENCIES ON 80 SSB

Peter asked me to circulate the official answer to an e-mail document (entitled "VK0IR illegal operation) and which was sent to me and the heard-reflector this morning as a separate document and not in our Heard Islaned messages. You can all read the reaction of the heard Team in the document entitled "Re: VK0IR ellegal operation". Please avoid commenting on the Heard reflector.

80 METER TONIGHT JAN 22ND

The 75 m inverted L was repaired once more, and VK0IR will be on SSB tonight (3798 or 3799, don't ask me !!..)

160 M, A GENTLEMAN'S BAND AFTER ALL?

Ralph, K0IR, who, operated 160 m last night, commented theta the behavior of the European operators was exemplary, when he was working JA's. Noted! (thank you, Ralph).

LOGS

The logs up to 06:08 GMT on jan 22nd have been forwarded around 16:00 GMT to the log servers. They should be available any time.

QSO DATA

Situation at 14:00z on Jan 22nd.
TOTAL: 55,175 QSOs

Japan: 10,362
Europe: 22,829
East Coast 10,792
Mid West 4,352
West Coast 3.052

Total: CW: 30,573 SSB: 23,752 RTTY: 878

DATA FROM PACKET RADIO LOG SERVER (PA3BXR):

On Jan 21st, 107 queries were made in the Packet server.
Since Jan 18, this adds up to a total of 828 queries,
that makes an average of over 300 queries per day) via
packet radio.

DATA FROM THE US WEB SITE AND EUROPEAN LOG SERVER

The USA web site has been consulted 36,605 time since the
start ofthe operation. The European log server was
consulted 19,771 times so far. That's what they call
Internet Pile-ups...

THE 80 METER PHONE NETS

Most pilot report less and less attendance. It looks like
everyone has worked VK0IR. Isao, our JA-pilot reported:
"Just finished daily net, but less and less stations on it.
Regulars are there, I think many JAs are satisfied with
VK0IR now. On the Packetcluster, at 1200z-1230z, RTTY was
reported. Thanks for showing up at that time. Much
appreciated....."

ALL TIME NEW ONE ON ANY BAND

May I ask anyone, who still needs VK0IR for an all-time
new one on any band/mode, send me a short message, and
explains in a few words what has been the problem for not
contacting VK0IR so far. We'll see what we can do to help.

MORE RTTY ?

VK0IR now has nearly 900 different stations in the log.
Peter : "Typical: I worked W9/W0/W8/W4/W5 with UFB sigs on
RTTY this morning. Worked them until I dropped and nobody
came back anymore, and I called CQ for 15 minutes without
an answer. I checked, my freq was clear, just nobody to work
anymore (have close to 900 rtty in log). So, proud as I
could be, I walked back to the main tents, and the first
thing I hear, is a voice from a CW operator calling me:
'Hi Peter, I have a W9 who wants to know when we are
going to be on RTTY? He still needs you'. I mean, that
was after a run of more than 4 hours.....
I think I pretty much cleaned up the states (except a bit
of West Coast maybe), still loads of JA to do, and a bit of
Europe. I thought the uniques would stop at 850 but apparently
they do not. I wander how many people really do RTTY...."

RTTY

Peter informed us that he will be on RTTY on Wednesday, Jan 22 03:00-06:00z (especially for Japan), and again between 21:00 and 24:00z. On Tuesday Peter was on RTTY 1200-13:00 for JA, but very little response.

GENERAL CLASS FREQUENCIES

Instructions have been given to all operators to look in the general class sections of the bands. The ops report that this brings very few if any QSO's however.

LOW BANDS ON TUESDAY EVENING

80m: VK0IR was heard for a very short pweriod in Europe on 3799 around 20:00, but sigs were 33 or 44 at best. Yesterday they were sold 59 at the same time. I did not hear Harry work any European stations (only JA). At the same time 3799 has been covered very badly by a noise coming from a station on approx 3803. Around 21:30 VK0RI was 549 on 3507, 3 S-units weaker than on 160 meter ?? Around 22:15 they were back on 3799, working USA but they were 44 at best, and still badly covered by sidebands from the signal on 2803. The US pile-up on 3805 was intersting to hear though.

160m: at the same time (and for hours on end) VK0IR was solid 579 with peaks to 589 on 1822, working hordes of European and Japanse stations Let's hope they can get the inverted L back up!

40m: Harry was putting on a great show again on 40 SSB now, and signs were solid 59. He confirmed he would (try to) repair the inverted L for 75 m SSB tomorrow. Let's keep our fingers crossed!

LOW BAND FREQUENCIES

>From Wedsnesday on the following frequencies will be used:
80m CW: 3504.5 or 3509.5 for Europe (no more 3507)
80m SS: 3798 instead of 3799
160m: either 1822 (prefred) or 1826.5
40m SSB: check 7047.5 or 7052.5 or 7057.5 or 7065
40 m CW: 7007 and 7022

SOUVENIRS

Some of us are already working island wearing the VK0IR
T-shirt: "I received my Heard Island Expedition T-shirt
eight days after mailing my order. VERY nice! They are
black with different multicolor designs front and back,
very good quality. And no extra charge for size XXL!
Isn't that special? (N3KSB)"

These are top-quality Haynes beefy cotton shirts, guaranteed
to be color-fast and long-wearing. They are the same quality
as those produced for the South Sandwich DX Group several
years ago. Proceeds benefit the DXpedition. Personal checks
are fine. Sizes Adult S-XXL, and XXXL by special requrest.
Orders will be shipped the same or next day. Bulk orders or
single ones.
1997 Heard Island tee-shirts $20 U. S., $25 airmail DX
(dozen $200,$250)
Available now(!) from:

>Not true. VU2PAI sent me a direct card very quickly (about 3 weeks

I wonder how the original poster sent his cards? I make it a policy to not write callsigns on the envelopes. (either the outgoing one or the return one) I also tuck my QSL so it faces the back of my SAE (so the front of the QSL can't be read from outside the envelope) and tuck the IRC between the QSL and the envelope. My return rate has been nearly 100%. (I've not received my VU2PAI yet either, but I only worked him 10 days ago!)

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's.
I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.

SB DX ARL ARLD004
ARLD004 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, Stephan, N2MAU, 425DX News, the DXNS and Contest Corral from QST. Thanks to all.

VIETNAM, 3W. Rolf, SM5MX, is QRV as XV7SW and has been working the US West Coast on 160 meters. Please note that 1827 kHz is his only permitted frequency. He will be QSX on 1824 kHz. QSL to SM5MX.

GEORGIA, 4L. Al, 4L5A, will be very active in the CQWW 160 Meter CW Contest. He will be QRV mainly on 1820 kHz. QSL via IK3HHX.

MADAGASCAR, 5R. Maurizio, 5R8FH, is a lay missionary in Madagascar and is active on 20 and 15 meters. QSL via I1PIN.

UGANDA, 5X. Gus, 5X1D, will return to Uganda at the end of January. He will try 2 meter EME operation, running 500 watts into a 17 element yagi. He might be QRV on 160 and 80 meters, but his efforts will be centered on 6 and 2 meters. QSL via SM0BFJ.

ARMENIA, EK. EK6GC is active on 160 meter CW. He will also be active in the CQWW 160 Meter CW Contest. QSL to PO Box 25, Charentsavan, 378562 Armenia.

ANTARCTICA. ZL5ANT is reported QRV from Scott Base on 40 meter CW around 1600 to 1700z. 8J1RL is QRV on 40 and 20 meter CW from Showa Base. CE9OH is QRV from O'Higgins Base at 2300 to 0200z.

INDONESIA. Tjok, YB0RX, states the IOTA Dxpedition to Tukang Besi Islands has been rescheduled for March 1997. They will use the callsign 8B8WI. 8B8KB, worked on 40 meter CW and other frequencies, was a PIRATE.

ARUBA, P4. Brian, NX9O, and Anna, N9KHC, will be QRV as P40X and P4/N9KHC, respectively, using a wire antenna flown from a kite.

Brian will also be QRV in the UBA SSB Contest and the CQWW 160 Meter CW Contest.

CAYMAN ISLANDS, ZF. Bruce, W6OSP, and Joe, WA6VNR, will participate in the CQWW 160 Meter CW Contest as ZF2QM. QSL to W6OSP.

THIS WEEKEND ON THE RADIO. The CQWW 160 Meter CW Contest, REF French CW Contest, and the UBA Phone Contest round out this last weekend in January. Please see January QST, page 107 for details.

* MORE ON HEARD - WEDNESDAY JAN 22, 23:55 z *
* * * * * * * * * * * * * * * * * * * * * * * * * * * * * * *
```

WEDNESDAY ON THE LOW BANDS

This must have been the best day for low bands so far.
Incredible signals on both 160 and 75m SSB. The opening to the
Mid-West (W8,9 and 0)and W4-5 land was very real around 23:30-
23:45z. I was listening all the time. What an experience. What
an experience it must have neen for the VK0IR operator, and for
all of you guys who worked them! The signals wer fading out with
me around 23:55 z, which is almost 1 hour after VK0 sunrise.

80 SSB meters was just as good. The signal were back up to normal,
(peaking at S9 or better around 21:00 in Europe) with the ON4UN
invertd-L back in the air (hopefuly for a little longer, this time).

I briefly heard VK0IR on 3504.5 but did not do any monitoring there.

THURSDAY: EUROPE AND JAPAN

On Thurdsay all priority goes to Europe and Japan. USA: QRX...

GENERAL CLASS

Peter said once nmore rthat special attention will be payd to
the general calss frequencies on 20 and 40 meters.

160 M QSO RATE WITH JAPAN

During the 160m opening with Japan on the 21st, an average QSO
rate of 2 QSO/s minute was achieved! Whow! (Where was JR1RCQ?)
I am sure it must have similar tonight (Wednesday night). Those
who have not worked them by now were not home, or did not have
an antenna or did not have permission from the XYL, or...

LOW BAND FREQUENCIES

Peter confirmed that the primary ferquencies for the low bands
are:

160m: 1826.5 (although they still go to 22 ehen goin gets rough
on 26.5)
80 m CW: 3504.5 (and 3509.5 for escape frequency)

JA RTTY

Peter mentions that " the JA pileup this noon (wednesday) on
20m RTTY was nervuous. They did not listen and went for VERY
long overs. Please just call and report, short transmissions!
Tomorrow Peter will be there again. Same time.

DIFFERENT CALLS WORKED

One of the primary goals of this DX-peditiosn was to get as
many as possible different stations in the logs. As of Wednesday
morning VK0IR has 20,407 DIFFERNT CALLS in the log (for
55,000 QSDO's). Not a bad rate! Despite this excellent figure,
the guys want to make a special effort to work more station
that still need them for an all time all band new one.
Stay tuned.

73,

Your pilots: ON4UN, N1DG, W0EK, K0EU, W4WW, W2IJ, JH1ROJ

```

LOG SERVER

The new log, updated to 05:24 GMT / Jan 23rd, and containing
some 56,216 QSO's should be on the servers by now.

QSO DATA UPDATE

Situation at 07:27 on Jan 23rd.
TOTAL: 60,189 QSOs
This means that today they shattered the record from 3Y0PI
already. This is done from the bottom of the world and from
the bottom of the sunspot cycle. Not bad eh !
Japan: 11,287
Europe: 24,976
East Coast 11,862
Mid West 4,733
West Coast 3,224
Total: CW: 33,580 SSB: 25,592 RTTY: 1017

The guys reported very good conditions to Japan adn Europe on
15m today. We know already how the low bands behaved last night:
"extraordinary well!".

ANTENNAS

In his free time (??!!!) Peter wandered around the island,
and counted no less than 30 antennas that are actively being
used on the air. That too must be a record!

BEACON

A berafoot beacon has been activated on 28,200 MHz. The beacon
sends VVV DE VK0IR/B VK0IR//B VK0IR/B every 30 seconds. The
antenna is an R7 vertical. If you heard the beacon , look for
VK0IR on a,mlower band amd ask them to move to 28 MHz.

RTTY

Peter worked 4 hours of Europe and West coast on Thursday afternoon. The West coast was stronger than Europe so anyone who was on, should have made it. "The W6's that were not worked just were not there", Peter said! He now has almost 1200 unique calls in his RTTY log! He even worked Tariq,/AP2TJ (special Pilot service!). Peter also worked 4 hours of East coast today, with S9 plus signals.

THE 80 METER SSB ANTENNA

The operatos on ths island asked me to publish the following text on the reflector. " The invertd-L vertical used very successfuly on 75 m (when it's up) uses a fibreglass top section supplied by the German supplier Walter Spieth, Tiegartenweg 26, D-73601 Ebersbach. This fibregalss section has broken repeatedly. This antenna worked great, and is a super design. The only problem is that we trusted on the quality of the fibre rods made by the German supplier. That was a mistake. Already while testing the antenna in Belgium, one rod already split when putting two rod elements together. We asked the supplier to replace (rods were brand new), spend nearly $100 in faxes and phone calls to him. Always promisses, but no new rod. The rod we used for this antenna broke for the first time, just raising the antenna (with no stress on them), and then it broke for the second time after one day. CLEAR AND PURE JUNK! And we are loosing a lot of QSOs and working time just trying to get the antenne in the air again. Note that the reports from transmission on this antenna on 75 were extremely favourable. Well done John! Let us get some fibre from an honest supplier next time. hi."

Those of you that want to see the antenna, there is a picture of it on the Web pages.

It is true that we have heard remarkably strong signals from this antenna, when it's up... ON4UN has been receiving a number of requests to publish the design, which he will do, when things calm down a bit.

EVERYWHERE, ALL THE TIME

KU7Y wrote: " Hi Pilots, ... One simple solution......just tell them to be everywhere all the time!! Many, many thanks for a super job. How you manage to stay so nice no mater what the requests are, sure speaks well of you!! Congrats..." Good idea, Ron, and thanks for the compliment. (Note: apart from these nbumbered messages on the reflector your pilots do send out a large number of answers to individual requets! ON4UN sends out about 100/150 per day).

MORE ON 160 M ON WEDNESDAY EVENING
----

from K1ZM's extensive report on the reflector:
"Tonight was the best day so far for the guys on the
margins (eg: South and Mid-west) on Topband. At 2215z
they begins QSX 1831.5 for USA - Sigs coming out of the
Southeast. VK0IR sig peaking 589 here from 2225z until
2315z! Between 22:18 and 22:4o there is an incredible
run of W1, W2, W3 stations - many of whom are quite new
to 160M. After 22:40 VK0IR starts looking specifically
for W4 and W8 callers. Between 23:10 and 23:45 a lot of
guys in the South and Mid West catch some great prop and
some of the finest 160M operating at the DX-end I have
ever seen on 160M ...
Special thanks to the EU stations who were kind enough to
standby during this time of excellent propagation to the
Midwest USA - (who says that 160M is NOT the "gentleman's
band" any longer - tonight could have made me a believer
again!)...
Whoever was the operator tonight he did a simply fabulous
job patiently repeating calls, over and over, cfm as
appropriate - and kept up a good rate over the course of
nearly 2 hours! It doesn't get much better than this!
Congrats to those out West and South who managed to make
the grade tonight! It was thrilling just to LISTEN to
this happen! (K1ZM)

160 M CQ WW CONTEST

VK0IR will NOT take part ijn the contest. They fear they
will make too many dupe QSO's, and will concentrate on 40 and
75/80 during the weekend. They may however give out a few
multipliers, they said.

ALL TIME NEW COUNTRY

I got a fair number of requests for all-time new one. I
will analyze the request on come back on this issue soon.
In the mean time: keep trying.

WEB SERVER HITS

The directory in our web server (maintained by Don, N1DG)
has over 10MB of data which contains 130 text files
(83 pilot bulletins and 47 pictures (each picture also has
a text file with the description as sent by Arie).
So far the US Web site / log server was visited 38,276
times. The European Eunet (latest visits redirected to the
server offered by Lyndon, VE7TCP) shows 21.386 hits. These
too must be records!

73,

Your pilots: ON4UN, N1DG, W0EK, K0EU, W4WW, W2IJ, JH1ROJ

Yes it does. The range is from 67.0 to 256.4 HZ tones. You can have it
set so that the transmitting tone is different than the receiving tone.

This band is very popular in Europe. Most of the Philips radio's have this
sector of the band, for example. In others countries theses frequencies are
used for military services.

>stations were all sent cards twice so beware! KD4CDB

Even with a security envelope, that doesn't guarantee mail gets through. Mail theft is common in some countries, poorly paid postal employees may swipe any envelope from the U.S.A. hoping to find money or something of value in them. Did you put pretty, commemorative stamps on them? These get stolen too, sticky fingered postal employees sell the stamps to collectors.

Another problem is that some governments confiscate mail from overseas, mainly due to paranoia that some kind of spy operation is going on. There isn't much that can be done about this problem.

When sending a card direct, always send return postage, either in the form of a $1 bill, IRCs, or even mint stamps of that country(there are stamp dealers that sell them to DXers). Many DXers can't afford return postage because they get so many cards, so it's nice to help them out whenever possible. Also include a self addressed return envelope, which makes it easier for them.

Sometimes using the bureau can be more reliable, but it's alot slower, generally more than a year.

Don't expect replies in a short time, some can take up to 6 months going direct, especially if the reply is sent surface mail, which also gives more opportunities for theft.

Hope I've helped.

257. HARC Winter Carnival Special Events Station

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-24 00:00:00 UTC
From: jdhaas@mtu.edu
Message-ID: <5cajvj$miv@login.ee>
Source record: 33873

Hello there. I am Jim Haas, KG9IF, QSL/Contest/Awards Manager for the Husky Amateur Radio Club, W8YY, which is the amateur radio club of Michigan Technological University in Houghton, MI. Every year over a festival known up here as Winter Carnival, where everyone takes a couple of days off to enjoy the snow (we get a lot of that up here), we run a special event station. This year's station runs from 1100Z on 30 January 1997 (6:00 AM Eastern) to 1100Z on 1 February 1997.

"So Jim," you ask, "what do I get for working this station?" Well, if you work our station, just send us a self-addressed, stamped envelope suitable for holding a certificate and we will send you just that--a really nice certificate that says you worked W8YY over Winter Carnival.

Below is the frequency list, which is a general guideline and not a promise of where we will be. I can guarantee one thing--if you look around, we will be there. We may not be on, for example, 14.325 exactly, but we'll be on 20 somewhere. We may also do some HF digital modes (we still need a few connectors for that) and some satellite work as well. If there is enough interest among the station ops/control ops, we will work some CW as well.

If you have any questions, comments, or criticisms, just drop me a line at jdhaas@mtu.edu. We look forward to hearing you on the air.

73 de Jim Haas KG9IF

Band Mode Frequency
17 M USB 18.130.0 MHz

20 M USB 14.325.0 MHz
CW (maybe, if
there is 14.130.0 MHz
interest)

30 M CW (if there 10.125.0 MHz
is interest)

40 M LSB 7.262.5 MHz

75/ LSB 3.972.0 MHz
80 M

160 M LSB 1.932.0 MHz

Fascinating. Presumably this is a different "scandal" from the one which relates to the alleged appearance in the VK0IR Internet logs of "QSOs" with VK0IR which have been made by the home calls of operators who have been on the expedition site throughout the operation?

For example: HB9AFI (1 Q), W4WW (7 Qs), JH1ROJ (8 Qs), W2IJ (2 Qs), K0EU (8 Qs) and others. (Other examples - including the ONs and the RA3 - have been surreptitiously deleted from the logs since the alarm was raised on 23 Jan, but an inspection of the computer extracts released prior to that date would be interesting, to say the least.)

Who made these QSOs and will they be used for DXCC or Honor Roll credits by the stations concerned?

DXCC

259. A New Telnet for DXers!

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-24 00:00:00 UTC
From: vmi@vmi.it

Hi DX mates,

thanks for reading this message, which deals with a software tool
that's gonna help you while DXing.
At last the DXTelnet software pack is available and ready to run.
If you use any telnet application to connect to DXClusters directly
via the Internet, please read what follows: you'll find something
interesting for you.

You can download DXTelnet from:
http://www.funet.fi/pub/ham/hf-work/
file name: DXT10ENG.ZIP, size about 640K

DXTelnet is a DXer oriented, Windows based Telnet application which
finally fixes problems found in traditional telnet applications and
adds unique features to help Power DXers.

DXTelnet Features

*Alerts:DXTelnet can be linked to DXHUNTER 5.2, to get alerts on spots
coming via the Internet

*Aux Comm Port: remote control can be activated via a comm port

*Customizable Colours: set the colours you want on any window

*Customizable Windows Size: hide/show/size the windows as you want

*Easy Text Send: no longer problems with the BACKSPACE key!!!

*Keep Alive: this function fights idle timeouts

*Links To Other Applications: to DXHUNTER or to any other program via DDE

*Macros: up to ten strings can be set immediately with Alt+0-Alt+9 keys

*Multiconnection: this program was born to operate in multisession:
ALL the spots, from ALL the sessions, are displayed in EACH DX window,
without duplications.

*On Line Help: simply press F1 and get context sensitive online help

*Paste TX: send large bulletins in one shot

*Sounds And Voice Spell: even on the PC Speaker!

*Split Screen: TX RX DX TALK ANN are collected in 5 different windows

*Spot Filter: exclude unwanted spots

*Spot Multiformat Support: both Pavillion and Clusse spot, talk, ann formats are supported

*Talk Auto Answer: you can set your own text string to be automatically sent to incoming talks, when you're not in the shack

*Talk Management: review talks in their window or have the talks remarked when operating in multisession or in background

*Text Capture: archive entire sessions or received text portions on files

*Text Search: search for text on any window

*Window Scroll Back: no longer messy results when scrolling any window back

These are the main functions; discover the other ones, by using this unique program.

DOWNLOAD AND TEST IT NOW!!!

At the same site, you can find also the latest release of DXHUNTER (5.2) which can be linked to DXTelnet, to get alerts on needed spots.
The name of the file is DXH52ENG.ZIP, size about 1M
ENJOY!

to contact me:
E-Mail : vmi@vmi.it
Radio BBS address: IK4VYX@I4UJB.IMR.ITA.EU
DXCluster : AC4ET (ex NO4J) between 9 and 17 UTC of working days

As recently we've experienced some problems with the E-Mail server, if you get no answer within 4 days (Mail is not explored on Saturdays and Sundays), please, resend your message.

We're working to make DX softer...
73 de IK4VYX (Fabrizio)

From ARRL Headquarters
Newington CT January 24, 1997
To all radio amateurs

SB DX ARL ARLD005
ARLD005 DX news - Heard Island

Heard Island team racks up the Qs

''Go and get them, fellas.'' With those words of encouragement (if any were needed) via the Internet, John Devoldere, ON4UN, sicced the madding crowd on VK0IR on Heard Island. At 0645 UTC on January 14, VK0IR hit the bands running. The result has been huge pileups on HF and excitement on a level rarely seen among the Amateur Radio ranks. With yet another week to go, the team has racked up more than 55,000 QSOs, the majority on CW--most of them in Europe, the Eastern US and Japan.

Two high-power operating positions apiece are set up in two radio tents. A storage tent houses a fifth high-power station that will be used mostly on the low bands. VK0IR is active on CW, SSB, RTTY and on Oscar 10. Operators are working split, but at some point later in the DXpedition, they may invite calls on their own frequency. Details and frequencies for subbands (Novice, VHF, etc.) and specialized modes are available on the Heard Island home page, http://www.ccnet.com/~cordell/HI/.

Here is the general announced schedule of HF modes and operating frequencies (subject to change as conditions dictate) for VK0IR: CW: 1.822, 1.8265, 3.5045, 3.5095 (Europe), 7.007, 7.022, 10.1035, 14.024, 18.074, 21.024, 24.894, and 28.024 MHz; SSB, 3.798, 7.0475, 7.0525, 7.0575, 7.065, 14.195, 18.145, 21.295, 24.945, and 28.475 MHz; RTTY, 7.030, 10.140, 14.085 and 21.085 MHz.

Given the short duration of the DXpedition and the intense pressure to work VK0IR from around the world, the team asks stations to follow its guidelines for working Heard Island. Operators typically will announce the split (eg, ''QSX 5'' or ''up 5'') and have been sending QRZ or TU as an invitation for stations to call. Stations

should refrain from tail-ending and from calling while VK0IR is working another station.

VK0IR logs have been available via the Internet on the Heard Island home page.

The QSL manager for the VK0IR and the preceding TO0R operation from Reunion Island is John Parrot W4FRU, Box 5127, Suffolk, VA 23435.

The VK0IR team expects to leave Heard Island at month's end. On the return sail, the team will stop at Kerguelen Island ''for about one day,'' according to John Devoldere, ON4UN, who called the chances of any Kerguelen operation ''minimal.''

Can't find the original Post. Posted from DejaNews but
I don't see it so I double.

I know Sadek 7X2LS very well (we used to operate pileups together)
and he is 100% QSL. If you didn't get your QSL it could be that
you made a mistake in the address or didn't wait long enough.

I talk to him everyday and told him about your complaining. He couldn't
tell me if he got your QSL or not already but he garanteed that he will
send you a QSL as soon as he get yours. People don't seem to understand
that a DXer gets an average of 200/500 QSLs per week and that it takes
time and money to answer all these QSLs, to print them, to maintain a
tranceiver etc (I am not talking of buying a new one, that's the price
of a car here)

So be patient...

The QSL address for 7X2LS is:

Mr S. LASKRI
3 Passage LISA
75011 PARIS
FRANCE

It is illegal for VU's to have foreign currency. You could get someone in
trouble by sending green stamps to India. IRC's are fine.

>
>How long ago did you send these out???

It took me 6 tries to get a card from August, ES1WN/ES1WW. Fortunately,
he seems to be on the air constantly and worked with me on getting a
card. We finally made it.

The trouble was rampant mail theft in CIS countries. He said at the time
he probably received 40% or less of the cards sent to him. I think it's a
better ratio now.

\------------------------------------------------------------------------/
VK0IR - The situation at 07:27 on 23 January is 60,189 QSOs (the record set
up by 3Y0PI has been broken already): 33,580 CW, 25,592 SSB, 1017
RTTY (Japan 11,287; Europe 24,976; US East Coast 11,862; US Mid West
4,733; US West Coast 3,224). VK0IR will not participate in the 160
Meter Contest: they fear they will make too many dupe QSOs, and will
concentrate on 40 and 75/80 during the weekend. They may however
give out a few multipliers.
--------------------------------------------------------------------------

4L - Al, 4L5A (ex-UF6FFF e RF0FWW) will be very active on 1.820 MHz
during the CQWW CW 160 Meter Contest. QSL direct to IK3HHX.
5X - Gus, 5X1D will be back in Uganda in late January. He will be active
mostly on 2 metres EME and 6 metres (on 50.150 MHz between 17.30 and
19.00 UTC). QSL via SM0BFJ.
7X - This year Enrique, EA5AD is active as 7X0AD on all bands SSB. QSL
via EA4URE.
8P - From 27 February to 4 March AA4NC and K4MA will operate from the
8P9Z station on all bands and all modes including RTTY. They will
participate in the ARRL DX SSB contest. Calls unknown at this time.
All QSL via K4MA.
8P - Bob (AA1M), Jim (W1HL), Mike (W1USN, ex-NW1J) and Tim (KA1MID) will
be QRV (all bands CW and SSB) from Barbados from 17 to 24 February.
```

Call signs not available as of this time. QSL via bureau or direct
to operators' home call.
8Q - From 12 February to 4 March Dieter, DF5JR will be active from
Maldives as 8Q7CR. QSL via DF5JR.
8Q - From 15 to 23 February Gianni, I8RIZ will be active (all bands, 160
metres included) from Maldives possibly with his old call 8Q7AF. QSL
either via bureau or to P.O.Box 200, 80100 Napoli-NA. Italy.
C6 - Bill, KM1E will be active (6-160 metres) until 20 May as C6AGN from
Green Turtle Cay (NA-080). QSL via KA1DIG.
CY9 - Mike, VE9AA *may* be looking to fill one or even two more operating
positions for his DXpedition to St.Paul Island [425DXN 297].
Operators must be flexible and able to play well with others, must
be able to run a pileup on CW and SSB while running a laptop logging
program, must be able to pay their own share of the expenses and to
finance own transportation to either New Brunswick or Nova Scotia
and must be willing to bring their own gear/rig if necessary. A lot
of priority will be given to operators with both HF & VHF-dx
experience. Please contact Mike at e-mail ve9aa@brunnet.net. For the
time being the team includes Mike (VE9AA), Doug (VE1PZ) and Dennis
(K7BV). Operations are now scheduled for 13-21 June.
EA - EA4ENK/P will be active from Isla La Hoya (DIEI BA-27) on 2
February. QSL via EA5OL.
EA_ssh - Currently there are only two people at the Spanish Antarctic base
Juan Carlos (WABA EA-01, Livingston Island, South Shetlands), but
more are to arrive soon. It is hoped one is a licenced amateur who
can operate from ED0BAE. In the meanwhile Dany (LZ0A), who is only 2
km away, is trying to help fix the equipment.
EA9 - On 26 January (or, in case of bad weather, on February) EA9PB, EA9PD
and EA9PY will be active from Islote Antonio Garcia (S-255) as
ED9MAG. The activity will be dedicated to the memory of late Antonio
Garcia Gutierrez, EA9TQ. QSL via EA9PB.
EK - EK6GC (ex UG6GAW) will participate in the CQWW 160 Meter CW Contest.
QSL to: Robert Grigoryan, P.O. Box 25, Charentsavan, 378562 Armenia.
F - Didier, F5VCR will be active from some DIFM islands (MA-59, MA-60,
MA-61) on 25 January.
FG - On 10/11 February DL3LAR, DL8OBQ and DL6LAU might be FG/ from
Guadeloupe before going to Dominica. QSL via DL6LAU.
/EX
S DX@WW $425WW299B
425 DX News #299 [2/6]
25 January 1997 No 299 BID: $425WW299B

GI - The WestNet DX Group will be active from Rathlin Island (EU-122)
from 12 to 16 June. The callsign aired will be GI/EI7NET and
operation will take place on all HF bands (160-10 metres) and
possibly also on 6 metres. QSL via EI6FR.
GU - Guernsey ARS club station GU3HFN will operate during CQ 160 Meters
CW Contest (24-26 January) and this year club operators will be
joined by G3KHZ. QSL via bureau, or direct to Guernsey ARS GU3HFN,
P. O. Box 100, Guernsey GY1 3EL, via U. K.

H4 - Operations by Bernhard, DL2GAC/H44MS (SSB) and Siegfried, H44/DK9FN (CW) [425DXN 297] will take place from Shortland Is. (OC-162). Siegfried will be leaving H4 on 20 February (+/-), but Bernhard will remain in H4 for about other 40 days. 10-160 metres operations are expected, with a battery operated amplifier and wire antennas. QSL for H44MS via DL2GAC; QSL for H44/DK9FN via HA8FW. QSOs will be all confirmed autonatically through the bureau.
HP - From 22 February to 7 March Joel, HP7/F5PAC will be active Archipelago de San Blas (IOTA NA-170). An activity from NA-202 is possible as well.
I - On 26 January IK8VRH, IK8UHA, IW8DPC and IW8EAA will be active from Lo Schiavone di Procida (IIA NA-???, IOTA NA-031).
J7 - From 12 February to 3 March DL3LAR, DL8OBQ and DL6LAU will be active from Dominica. They will participate in both the ARRL Contests and in the CQWW 160 meter SSB Contest, possibly as J75T.
KC4_ant- KC4AAD at Siple Dome Station [425DXN 294] went QRT on 17 January. Windy and Don were active for about five weeks.
KC4_ant- KC4USB at Byrd Surface Camp (WABA K-04) [425DXN 294] closed down. Steve really did not get off the ground because of serious rig problems and time to operate.
KC4_ant- KC4AAF at Upstream Charlie [425DXN 294] will be QRT on or about 25 January. Hopes to have amplifiers and a better antenna next season. Sarah is the Camp Leader and hopes to return as well.
KG4 - Bill, (WT4K, ex-KQ4GC), Jan, (K4QD) and Rusty (KG4AU) will participate in the CQ WW RTTY WPX Contest (8-9 February), Multi/Single, as KG4GC from Guantanamo. QSL via WT4K, also through the bureau. Jan and Bill will be also active (on all bands CW and SSB) from 10 to 14 February as KG4QD and KG4GC respectively.
LU_ssh - Abel, LU8DEK is active (CW) until 1 March from LU1ZI at Argentine Jubany base on 25 de Mayo Island (WABA LU-20), King George Is, South Shetlands (AN-010). QSL to: Radioestacion LU1ZI, Direccion Nacional del Antartico, Cerrito 1248, Buenos Aires, Argentina.
OA_ssh - Santos, OA4CLA is QRV nightly on 14.240 and 14.190 MHz between 23.00 and 02.00 UTC from OA0MP station at WABA OA-01 (IOTA AN-010) [425DXN 295].
OH_ant - Henry, VE0HSS has just arrived at Finnish Antarctic Base Aboe, but no word from him as yet. Henry is expected to be traveling to various Norwegian Bases as well over the next ten days.
P2 - Operations from Louisiade Archipelago (OC-117) [425DXN 297] will take place from 20 February to 4 March. Operators will be Dietmar (DL3DXX), Joerg (DL8WPX), Ftok (DK7YY) and Juergen (DL7UFN). Special emphasis will be given to low bands CW. Licence is still to be confirmed.
P2 - From 8 to 11 February Yuu, JA3IG will be active from Manus Island (OC-025) as P29VIG. Operations will take place from 10 to 40 metres, CW and SSB. QSL via home call.
P4 - From 21 January to 1 February Brian, NX9O and Anna, N9KHC will be active from Aruba as P40X and P4/N9KHC. Brian will participate in the UBA SSB and CQ 160 Meter CW Contests (25-26 January).
PA - PA3BHY, PA3BLS, PA3DXA, PA3EXX, PE1GRJ and PE1JAN will participate

in the PACC Contest (8-9 February) as PA6PA. QSL via PA3BLS.
PJ8 - Ron (ND5S) & Sue (KF5LG) and Bill (W8EB) & Dorothy (KB8ZXO) will be operating as PJ8/ (on all bands, WARC included, CW, SSB and RTTY) from St. Martin (NA-105) 23 February to 8 March. They will be on the air between 12.30 UTC and 16 UTC each day, and again at 20.30 UTC on 20 metres (daily sked with the hams back home). QSL via their respective home calls. The group will participate in the ARRL DX SSB Contest as PJ8A (QSL via W9NIP).

==========
*** 4 2 5 D X N E W S ***
==========

PY - From 5 to 9 February Mario, PQ8MM/p will be active from Bailique Island (SA 045, DIB 35). QSL via Mario Gomes, P.O.Box 533, 68906-972 Macapa-AP, Brazil.
PY - From 8 to 12 February Lima (PY1NEZ), Lineu (PY1ADV) and Zeca (PY1LVF) will be active as ZZ0Z, ZW0Z (SSB) and ZX0Z (CW) respectively from Frances Island (SA-067, DIB 68, DFB ES-07). Operations will take place on all bands (WARC and 160 metres included). QSL via home call or through the bureau.
PY0_sp - Randy, WX5L reports that Karl, PS7KM and Tino, PT7AA will be leaving on 1 February. Hopefully ZY0SK and ZY0SG will be QRV from St.Peter and St.Paul Rocks [425DXN 295 & 297] on 5 February for two or three weeks. Activity will take place on RTTY as well (as ZY0SK), thanks to Randy, WX5L who has provided the equipment. St. Peter & St.Paul Rocks is one of the Most Wanted Countries on RTTY (8th place).
PZ - Bent, OZ2BJC is actrve from Suriname as PZ5CJ until 1 April. He has daily skeds with his brother (OZ2CIJ) at 11 UTC on 14.320/14.330 MHz.
S2 - From 2 to 14 February Hannes (DL3NEO), Joerg (DL8WPX) and Dietmar, (DL3DXX) will be in Dhaka: if successful in getting a licence, they will be active mostly on low bands CW.
S9 - Gary, S92AT has just got his licence and will be active from Sao Tome (AF-023) for several years.
SU - Ahmed, SU3AM is often active from SU0ERA, a new club station. QSL via SU1ER.
T5 - 6O5DX is also on WARC bands. QSL via F5PYI.
TN - From 24 January to 4 February Baldur, DJ6SI will be active (10-160 metres, CW and SSB) from Congo as either TN6X. QSL via DJ6SI.
UK - From 27 January to 10 February Karl, K4YT/DL4YT will be in Uzbekistan again. He hopes to be active as UK4YT. QSL via K4YT.
V2 - From 1 to 20 February Walter, DL2SDS will be active mostly on CW. The call is still to be confirmed. QSL via QSL via DL2SDS.
V3 - John (WC0W/V31TP), Alan (NS0B/V31EV) and possibly Bob (WG9L/V31RC) will be going to Belize for a week for the ARRL DX CW Contest (Multi/Single entry with the call V31TP). They will try to be on the

air by mid-late afternoon local time on 12 February and will take
down on 18 February. Before and after the Contest they will operate
SSB as well. Activity will be limited to 160-10 metres with no WARC
band operation. QSL via their respective home calls.
V5 - WA1JBB (ex-C53HG) is active from Namibia as V5/WA1JBB while waiting
for his own V5 call. QSL direct to W3HCW.
VK - From 15 (05.30 UTC) to 17 March (01.00 UTC) Silvano, VK4WGL (home
call KB5GL, ex-IT9SEZ), Sergio (VK4GK), Angelina (VK4AAC) and John
(VK4WX) will be active from Stradbroke Island (OC-137). Operations
will take place on 3.995, 7.065, 14.260 and 21.260 MHz. QSL via
their respective home calls.
VK0_mq - Amateurs currently at the weather station on Macquarie Island are
Tom (VK0TS), Eric, VK0KBB and Graham, VK0WG. They arrived in early
December, but they haven not had any time fo amateur radio so far.
VK0TS plans to be QRV mostly on 40 and 80 metres CW & SSB with
Australian and Antarctic stations.
VP2E - From 9 to 18 February Dennis, K7BV will be active from Anguilla as
VP2EV. Operations will take place mostly on CW on 10-160 metres and
RS12. QSL via home call (the new address is 4357 Appollonio Way,
Carson City, NV 89704).
VP5 - From 4 to 11 February Steve, N9CK (ex-N9CKC) will be active as
VP5/N9CK mainly on CW and RRTY. He will participate in the WPX RTTY
Contest as VP5CK. QSL via N9CK also through the bureau.
VU - Yannick, F6FYD (ex-ST2YD, T5YD, etc) will be in India for one year.
W - On 25 January Paul, N3LLT should be active from two Pennsylvania USI
islands (PA-017R and PA-002R).
W - On 27 January KA3UNQ will be active from USI island MD-017S in
Maryland.
W - On 30 January (at about 19.30 UTC) John, NL7TB will be active as
KC7KHU from Haystack Rock (a new counter for USI and a non-counter
for IOTA).
XX9 - From 24 to 27 January OH2BH, OH2PM and OH2YY will be active on 160
metres as XX9TR from Taipa Island (AS-075), Macau. QSL via OH2BH.
YB - Mal, VK6LC Stephan, N2MAU reports that 8B8WI's operations from Wangi
Wangi Island, Tukangbesi Is. (OC-???) [425DXN 297] have been
postponed to 7-9 March.
ZK1sc - From 22 February to 10 March Vitaly, VE6JO will be at Rarotonga
(OC-013, South Cook Islands). Vitaly has applied for a licence, but
he will not be able to take any equipment with him. If he finds a
station to rent, he will be active.
ZL_ant - ZL5ANT has bee reported on 40 metres CW around 16 and 17 UTC from
New Zetoand Antarctic Base Scott (WABA ZL-02), on Ross Island
(AN-011).
ZS_ant - The supply ship with operators Marten (ZS6ZY) and Graham has arrived
at the new Sanae 4 South African Base [425DXN 297].

********** GOOD TO KNOW ... **********
****

IOTA HONOUR ROLL & ANNUAL LISTING ---> Just a note to remind IOTA members that updates for the 1997 HR & Annual Listing must be mailed to their nominated Checkpoints on or before 1 FEBRUARY.

ARARM CONVENTION ---> The 37th annual Convention of the Mexican amateurs society (ARARM) will be held on 10-13 July 1997 at the Congress Centre in Leon, Guanajuato. For further information please contact Sergio Valdes Sada, XE2RJ (tel (0)11-528-357113, fax (0)11-528-353368).

DX NEWS LETTER ---> As of 1 January 1997 Michael, DJ5AV is the new editor of the DX News Letter, replacing Uwe, DL9GOA. Our warmest thanks to Uwe for his friendly co-operation and our best wishes to Michael.

NEW DIFM REFERENCE NUMBERS ---> Jean-Michel, F6AJA reporst the latest Reference Numbers issued to some Channel (MA-...) and Atlantic (AT-...) islands: MA-100, Ile Enez Amann Ar Rouz; MA-101, Ile Leac'h Venn; MA-102, Ile Enez Croaz Hent; AT-123, Ile Nole; AT-124, Ile Percee; AR-125, Ile TIbidy; AT-126, Ile Salgern.

QSL 3E1DX ---> Gunter, HP1XVH allowed his call 3E1DX to be used during the CQWW CW Contest. For QSOs made on 17-18 November 1996 (CW & SSB) QSL is via KU9C. For other QSOs QSL is via N0JT.

QSL 4K2KBZ ---> W2CE (Robert Reed, 1991 Route 37 West - Lot 109, Toms River, New Jersey 08757, USA) reports the following: "Recently I have started to receive QSL cards for Sergey 4K2KBZ. While I did handle the later part of his operations from Franz Josef Land he left the country about 2 weeks after my starting as his manager. I had logs only for about 900 QSO's made during those 2 weeks. I had been sending QSL's to the PO Box Sergey was using on Dixon Island as his next stop but have not heard of anyone ever receiving a QSL reply from that Box. Stations who worked 4K2KBZ during the period managed by me have already received either a direct reply to a QSL request or received a duplicate QSL via the bureau".

QSL 6W1AR & 6W8AR ---> Harald, DJ3AS will close the logs for 6W1AR and 6W8AR (Dakar, 1980-1982) at the end of 1997.

QSL 9K2F ---> Hamad, 9K2HN reports that direct cards for recent operations by 9K2F (AS-118, December 1996) are in the mail. QSL via 9K2HN (Hamad Al-Nusif, P.O.Box 29174 Safat, 13152 Kuwait) also through the bureau.

QSL FK5M ---> Jean-Michel, F6AJA has received the logs of FK5M (Matthew Island, OC-218/prov). QSL cards will be ready in early February.
/EX
S DX@WW $425WW299E

QSL EJ7NET ---> Declan, EI6FR reports that all direct cards for EJ7NET (EU-007) have been answered. QSLs for all stations appearing in the EJ7NET log have been prepared and will go to the bureau this month.

QSL LU/IK1EDC ---> Direct cards for operations by LU/IK1EDC from the islands of Gama (SA-022), Chaffers and Pardela have all been mailed.

QSL OH0/OZ1FG ---> Jens, OZ5MJ reports that the station OZ1FG is not known in Denmark and should therefore be considered as a pirate.

QSL TY1RY ---> Eddie, W6/G0AZT (P.O.Box 5194, Richmond, CA 94805, USA) reports that the first batch of cards has been mailed. Any QSL requests sent direct to Steve, KE6FV are being sent to him for processing, there is no need to re-submit them to Eddie.

SCDXC ---> The elected officials for the Southern California DX Club are Larry Shapiro, K6RO (President); Will Angenent, KN6DV (Vice President); Jim Zimmerman, N6KZ (Secretary); Rich Bongeorno, WU6T (Treasurer); Harv Shore, K6EXO (Membership); Harvey Laidman, N6HL and Dan Margo, W7RF (Board members).

W/VE ISLAND CONTEST ---> John, NL7TB reminds that the third W/VE Island Contest, sponsored by the US Islands Awards Program, will take place on August 16 and 17. Russ, VE6VK, will manage the contest and John himself will handle the award certificates and plaques. Please check the USI Website for the complete contest rules (http://www.owt.com/usislands/)

+ SILENT KEY + The DX world is saddened by the news of the death of Ed Blaszczyk, N7EB on 19 January. Ed, 79, was one of the hobby's best CW operators and veteran FOC member. He was much appreciated for his years of diligent service as the QSL manager for the late Father Marshtol Moran, 9N1MM.

QSL received via direct: 3C1DX, 3DA0CA, 5N35T, 5R8FK, 5V7HR, 5V7ML, 5Z4RL, 7P8FS, 7P8MA, 9A8P (EU-090), 9J2CE, 9M2/G3OZF, (AS-072), CQ2I (EU-150), CY0AA, F5RUQ/p (EU-039), D68DV, D68ET, DF5JT/HK0, JA5SEY/HP3, HH2AJ, IJ7/IK7IMO (IIA LE-004, 010, 015, 019), IJ7/IK7XIV (IIA LE-014, 015, 018), IL3/IK2XDE (IIA RO-011), IM0/IS0NHT (EU-024; IIA CA-016, CA-026, OR-006), J68ER, TM5CHY (EU-039), PY0FM, RU0B (AS-121), RU0B/p (AS-087), S92PI, TK/DK7YY, V73AX, V7/W2HRX, V85HN, VP2EFO, VP8CWI, VR2KF, VU2PAI, YB3SPS/p (OC-217), YE8P (OC-146), ZS8IR, ZV2EPA (SA-024).

271. VK0IR Report from Georgia

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-25 00:00:00 UTC
From: thompson@atl.mindspring.com
Message-ID: <5ce3le$b94@camel5.mindspring.com>
Source record: 33887

The VK0IR operators are doing a good job under some of the poorest band conditions in years. I was busy the first week so only worked them at the easy spots to work them from near Atlanta where I really needed them...40SSB and 17. We hear them on 40 2 and 3 hours after their sunrise! 17 meters SP at 1500 to 1700Z. Loudest LP at 2230 to 2300Z. Well over S9 actual on 18 Jan with much higher SF.

The past week I have been trying to hear them elsewhere (had 40CW, 20, and 15 from previous operations). We heard the baecon on 28.2 weakly once and never on 24930. I did work ZS8IR on 17 and 12 looking for them. With SF=73 and going down looks bleak now for 12 and 10. ut my propagation program says there is a chance MUF might reach 24 on 1 or 2 days and maybe...maybe on 28 for a few minutes 1600 to 1930Z is the time this could happen. We hear ZS well almost each day and Wednesday on 10 for nearly 40 minutes.

My propagation program shows less than 1% chance of hearing them on 160. We are too far South and its does not grow shadows until 2300Z 2300Z + or - 7 minutes seems to be it.

80 meters/75 meters shows 2245Z to 0100 as the window. Working 4's at 2145Z is 1 hour too early...I can just hear W2 then as we still have day time absorption. I first heard their SSB signal on Wednesday and they were 75% readible for nearly 1 hour but called other call areas the entire time. Thursday the were only 34 max for 15 minutes. Friday was 50DB over 9 static (S7 to 8 on my receiving shielded loop and 40 beam which I use for receive). Trying today (Sat). They have been reported on 3798.8 with Harry operating. There is some remaining static (S4 on the receiving antennas) but it is for a minute and then goes away for a minute or two. I thought I heard a voice at 2232Z but understand they are working EU now. Its nearly 2300Z so back to listening. At least I know by 0030Z I can turn it off as the band is gone.

According to my propagation program Here are the times they can be heard by center of each district:

160 80

W1 2145Z to 2243Z 2145Z to 2334Z
W2 2158 to 2259 Z 2200Z to 2352Z
W3 2158Z to 2300Z 2200Z to 2353Z
W8 2245 to 2314Z 2254Z to 0012Z
W9 2210Z and 2300Z 2300 to 0009Z
W0 2300Z 2315Z to 2350Z
W5 NIL 2320Z 2345 to 0Z

W6 NIL NIL
W7 NIL NIL
W4N* 2145Z to 2230Z 2145Z to 2300Z
W4FL 2300Z 2330 to 0000Z

W6 and W7 get shots on LP after 1449Z to 1600Z on 80/75
W6 and W7 have about 2% chance at 1544Z + or - for 160LP
* VA/NC Coast.
These were run with SF=73

Great news... Not where I would of had expected but Paul (AA3DD)
suggests the front of the North American Callbook... I'll find one and
check it out... Thanks Paul for the pointer in, hopefully, the right
direction.

If you want to spend a few extra bucks get a Icom u-16..

It's a good comercial radio and does everything you would want it to do
and more!

My .02's worth.

Todd,

Interesting that you need a CY0AA QSL for 80. QSL via WD8SDL was
published in all of the mags and DX newsletters. You must have missed
it.

Hello
There is a great company out here on the internet that you can send
your personal pictures too and then then we will turn these pictures into
wallpaper for your computer by using high resolution scanning techniques.We
do our best to give you great looking bmp (wallpaper) for your computer.We
also can turn your pictures into JPG or GIF file format.If you would like
an order form and one free sample bmp to use on your computer please e-mail
me at gepley@tfs.net

SB DX @ WW $OPDX.289
Ohio/Penn DX Bulletin No. 289

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 289
BID: $OPDX.289
January 27, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2WE, N3ADL, K4MA, WX5L, W6TEX, NL7TB, K8YSE, N9CK, NS0B, DF6QN, EI2GX, EI6FR, G4BUE & DX News Sheet, LU1DZ, OH6YF, ON4UN, PA0JR, RW0MM, VE1DX and VE9AA for the following DX information.

50th ANNIVERSARY NCDXC. The Northern Calif. DX Club (NCDXC) is currently celebrating the 50th anniversary of the club. The W6TI club station has been active since Oct. 10, 1996, and as part of the celebration, they will operate for 1 year with various club members in the pilot seat. DX stations who work 50 NCDXC club members qualify for a nice certificate. If you work the club station W6TI/50 you get credit for 10 QSO's. Information about the 50th celebration and a list of NCDXC members may be found at the WEB site: http://www.aa6g.org/ncdxc.html
W6TI/50 has been active and has worked 135 countries and also the VK0IR on 20,40, and 80m. Picture of the Certificate and QSL may be found at the WEB site.

8P9, BARBADOS. Steve, K2WE, will be operating for 1 week starting February 4th. Steve will pick up an 8P9 callsign upon his arrival on the island. He will operate 160-10 meters including the WARC bands on both SSB and CW. QSL via home call or previous callsign NI2C.
Also, look for AA4NC and Steve, K4MA, to operate from the 8P9Z's station on Barbados from February 27th through March 4th. Activity will be on all bands and all modes including RTTY. They will operate Multi/Single in the ARRL DX SSB Contest. The callsign is unknown at this time. All QSLs go to K4MA (ex-KI4HN).

8Q7, MALDIVES. The "DX News Sheet" reports Hans/DL8NBE, Rolf/HB9DIF, and his wife Manuele, hope to be active in March as 8Q7BE (SSB/RTTY) and 8Q7BV (CW) on all HF bands with two transceivers and GP, dipoles and LW antennas. QSL to home calls bureau only.

ARGENTINA ANTARCTICA BASE. LU1ZI, from the scientfic station Jubany, which is located on De Mayo Island (King George Island) in the South Shetland group, is operated by LU8DEK, Abel. ABEL will be active until March 1st. He normally can be found on 40 meters CW some nights. Check between 0230 and 0330z. The direct QSL route is: Radioestacion LU1ZI, Direccion Nacional Del Antartico, Cerrito 1248, Buenos Aires, Argentina. It is recommended to send 2-3 IRCs with a SAE.

CY9AA, ST. PAULS ISLAND (UPDATE). Although the CY9AA operation is still months away, Mike, VE9AA, has provided the following details. There has been a new operator added to the DXpedition. Operators are: VE9AA/Mike/ Group Leader, VE1PZ/Doug and K7BV/Dennis. The dates will be June 13-21st, maximizing the chances for a CY9 QSO on the higher bands via Sporadic E. Bands will be 160-2 meters inclusive. Beams, amps, and a FULL SIZE vertical for 160 meters will be used. Check out their WEB-site at: http://www.uksmg.org/index3.htm (Look for the CY9 logo on the left)

CY0, SABLE ISLAND. It has been reported that Wayne, VE1CBK, will be active from Sable Island signing CY0SAB. He will be on Sable from January 27th until January 31st. Wayne will be on the island for commercial reasons, and HAM radio activity will be during off hours. He expects be active early morning and afternoon/evening hours (1200z and after 2000z). He has no specific frequencies other than the "usual" DX locations. Wayne plans to concentrate on the lower bands (160, 80, 40 and 20.) Otherwise, if propagation permits, 17 through 10 meters is possible. He is currently assembling RTTY equipment, and it is likely he will be active on that mode. Additionally, he will try to be active for as many RS-12 satellite passes as possible. QSLs go to Wayne E King, 63 Brook St, Lake Fletcher, NS, B2T 1A5 Canada.

DX FROM THE NETHERLAND..... During PACC Contest activity, look for stations with special prefixes PA6V in province ZH (QSL via PI4KGL) and PA6W in province GD (QSL via PA0JR). Their activity will be on all bands (except WARC) during the PACC Contest weekend February 8-9th..... Worked All Provinces (WAP) award (format A4, six colors) is available when all twelve provinces have been worked. If provinces were worked during the 1997 PACC Contest, please send log-extract and 10 US greenstamps to: VRZA Award Manager, PE1EBJ Ad de Bok, P.O. Box 56, 5320 AB HEDEL, The Netherlands.

GI, RATHLIN ISLAND (Northern Ireland). The WestNet DX Group will be active this summer from this Irish Island with has an IOTA of EU-122, The dates of their operation are June 12th to June 16th. The callsign to be used will be GI/EI7NET. Operations will be on all HF bands 160-10 meters. It is also hoped that operation on 6 meters will take place. Modes of operations will be CW,SSB and RTTY. QSLs will be via EI6FR. NOTE: All direct cards for EJ7NET EU007 1996 have been answered. QSLs for all stations appearing in the EJ7NET log have been prepared and will be answered via the bureau this month.

FRC 70th ANNIVERSAY AWARD. If you were fortunate to work any of the members of the Frankford Radio Club during the contest over the past weekend, you may qualify for a special full color certificate for their

70th anniversary celebration. Please check out the full story and get
a list of FRC members at the following URL:
http://www.frc-contest.org/70th.html

Requirements are: US/NA Stations need 70 QSO's with FRC stations
DX stations need 35 QSO's with FRC stations

Submit log info ONLY to K2FL (CBA) for automatic issuance of certificate.
QSOs with their DXpeditions also count for the award. The following are
some of the DXpeditions which took place 1997: V26B, PJ9E, V47KP, VP5T,
VB9DH, VP9DX, P40W and WP2Z (CQWW Phone 97 only). For FRC roster via
USPS, please send query along with SASE to: Frankford Radio Club,
P.O. Box 431, Alburtis, Pa. 18011-0431

KG4, GUANTANAMO BAY. Larry, KG4ML, is expecting to be on-base February
11-27th, and hopes the work sked will allow operation in the ARRL DX CW
Contest February 15-16th. Other bands/modes will be operated as work
allows, but expect to see him on the WARC bands. To date, KG4ML has worked
about 6500 QSOs in 5 trips to KG4 land.

OH0, ALAND ISLAND. From January 31st through February 2nd, OH1NX, OH1NYP,
OH1TX and OH2BH (returning from his XX9TR operation this past weekend)
will activate OH0NYP on 160 meters. The variety of other callsigns may be
heard on the higher bands. The 160 meters station will transmit 1825 kHz,
especially focusing on the JA and U.S. openings.
Also, members of the Contest Club Finland will be working CQ 160 Meter
Contest as OH0AM from Aland Islands. They are especially looking for the
USA and Japan with their new antenna. Operators are OH1EH, OH1MDR, OH6EI
and OH6YF. Outside the contest, Harry, OH6YF, will be looking for the
WARC band QSOs as OH0MYF.

TN, CONGO. Baldur, DJ6SI, is now active as TN6X, and will be active until
February 4th. He will be active on all bands 160-10 meters SSB and CW.
QSL to his home call DJ6SI.

UE0LWA, SPECIAL EVENT STATION (FAR EAST OF RUSSIA). Station UE0LWA is
now active on the air to celeberate the 70th anniversary of the
Russian supply to defence Sport-Technical Organization - <<ROSTO>>.
Operations will last until February 3rd. The station is located in the
port city of Vladivostok (CQ zone 19). Operations will be on CW/SSB with
activity on 160-20 meters and VHF. QSL via RZ0LWA or bureau.

USI ALERT (United States Island Award). Dennis, N9WDQ, plans to activate
Chouteau and Gabaret Islands (new) and maybe Walkers Island on January
28th, starting around 1600/1700z. Check on 14.260 + - QRM. Note: The
islands are listed in the directory as IL-003 and 002 but have not been
activated to date. When activated, the numbers will contain the "R"
designator. QSL direct w/SASE or Dennis can be eQSL'd (see eQSL list
at the USI website)!

V31, BELIZE. There will once again be a SMC expedition to Belize for the
ARRL DX CW contest. John/WC0W/V31TP, Alan/NS0B/V31EV and possibly
Bob/WG9L/V31RC will be going to Belize for a week, which includes the

ARRL DX CW Contest. They will try to be on the air by mid-late afternoon local time on February 12th, and be active until February 18th. They will be a Multi/Single entry in the contest and will do as much operating as time permits, both CW and SSB, but mainly CW, before and after the contest. Look for activity as V31TP in the contest and with any/all of the individual call signs outside the contest. Activity will be limited to 160/80/40/20/15/10 with NO WARC band operation likely. QSL via the appropriate call as indicated above.

VP5, TURKS AND CAICOS. Steve, N9CK, will be active from February 4-11th, as VP5/N9CK. Activity will be mainly CW and RTTY. He will active during the WPX RTTY contest using the callsign VP5CK. QSL to N9CK (ex N9CKC) good in any callbook or via bureau.

VK0IR HEARD ISLAND UPDATE. As of January 25th (0903z), statistics show the following: Total QSOs: 71,184 QSOs with 24,871 different stations.

CW: 39,798 SAT: 490 15m: 8,457 30m: 6,568 A160m: 1,237
SSB: 29,768 10m: 228 17m: 8,575 40m: 13,866
RTTY: 1,618 12m: 747 20m: 26,751 80m: 4,265

LATE MINUTE UPDATE! VK0IR breaks a record! As of Saturday afternoon, VK0IR broke 4J1FS's QSO count of 74,495 with a current total of over 80,000 QSOs.

ZY0 ST. PETER & PAUL ROCKS (UPDATE). Karl/PS7MM and Tino/PT7AA, plan on leaving Brazil via a fishing boat on February 1st for a 4 and 1/2 day voyage to the Rocks. They should be active around February 5th. Activity will be on all the usual DX frequencies. Karl will attempt to knock down the 8th most needed country on the RTTY list. A special thanks goes to Randy Hollier, WX5L, for his efforts in supplying the team with a RTTY station to use. Karl will also use a propagation program to help utilize the existing conditions. Karl will operate as ZY0SK on SSB/RTTY and Tino will operate as ZY0SG on CW. QSL to each op's CBA address.

I will never understand the people who intentionally interfere. I don't know why someone would go through the trouble of getting an Amateur Radio license, and then do those things. Or perhaps it is people without a license.
I listened the other night on 75m, and I could not believe what I was hearing. There were about 4-5 individuals on the transmit frequency of VK0IR, telling each other to shut up, ect. One guy said " Why should I shut-up? I allready worked them". Also heard lots of QRM on 30M CW. I thought CW ops were above that.

Hello Jon and all other people here,

having received some 300 direct requests for my 3V8BB activity during
the period Nov 21 to Nov 26, 1996 I would like to comment on your
advices:

1) Please note that sufficient return postage varies a lot from country
to country. 1$ may seem a lot for an airmail letter but the current
German rate for a standard airmail letter is 3DM - that's 2$ exactly!
1$ is not even sufficient postage for a surface mail reply (2DM)...
During the last years the exchange rate for US Dollars has been
oscillating around 1,50 DM but there were times when even 2$ were
20 cents too few for an airmail letter!
So, take care that *sufficient* return postage is provided.

2) A self addressed return envelope is a must! I takes so much time
finding the proper address on either the envelope or on the letter,
sometimes decrypting the handwriting and filling out the return
envelope.
Please make sure that you include a good return envelope - neither
those king size types (I have to cut them because they wouldn't be
accepted by the office else), nor those tiny envelopes that are
just wide enough for 9x14cm QSLs. Get some of those blue airmail
envelopes sized about 10x15cm!
And if you write your call and QSO data on the inside of the return
envelope it will surely make some QSL manager happy because many
managers handle the cards that way.

In my case it's only 300 envelopes, so I answer all direct requests, but
I understand every DXpeditioneer with thousands of letters at home who
does not reply to direct requests because of either violation of point
1) or 2).

>Don't expect replies in a short time, some can take up to 6 months
>going direct, especially if the reply is sent surface mail, which also
>gives more opportunities for theft.

I really tried to get the cards as fast as I could (and I think that there have not been big delays so far) but I won't have the QSLs before mid February, some 3 months after the activity. Problems with printers are quite common, so a 6 months' delay may well happen...

73! Uli, DL2HBX

P.S.: I am not the general manager of 3V8BB. I can only handle the cards of my own activity (CW only), that's all QSOs between Nov 21 and Nov 26, 1996. I do not have any other logs either.

VU2PAI, Pai - I have received my card without any problems!

My last QSO with him was on 40m/SSB some days ago (before I cought VK0IR
a few kHz down .. :-).

Anyhow; you should know this ..

1. It's forbidden for Indian citizen to receive any foreign currency
via an envelope (BIG PROBLEMS).
2. During our first QSO, a year ago, or so, Pai told me, I should *NOT*
send him any foreign currency, like US-Dollar bills, because allmost
all envelopes are checked ..
3. IRC's are also not good .. a lot of burocratic problems for him.

Pai told me, that his second hobby is collecting stamps and if I would
provide him some nice, unstamped stamps from my country, then he would
pay the return postage out of his own pocket. I sent him my card, a SAE
and some nice stamps and .. got his card in return (turnaround ~3 weeks).

They really are doing a very good job.

>According to my propagation program Here are the times they can be
>heard by center of each district:

I'm in south central Texas about 100 up from Houston. In practice, your chart for us seems off from real life on 40. Here is what actually is in here for a cross check for you, at least from my QTH all CW, I don't work any fone.

160 Nil

80 Faint traces of coherent signal 2320Z - 2345Z
Snatches of their call at 0020Z - 0045Z

40 An early peak 2320Z - 2345Z from the North on
long path on my 4 square, culminating in a curious
a brief flurry of all-directional activity just at our
sunset. Just about 5-7 minutes either side of
the terminator you can scan around the horn and
hear the signal coming in short bursts from any
direction, after which it goes into a low phase.

During the long path phase, the signal appears to
be bending around the North Polar path, first to
one side of the pole to the East, then West. You
can determine brief arrivals from either path that
are definitely switched paths from one minute to
the next. One minute it will be up on the East
bend route; the other it will be up from the West.
There appears to be no simultaneous peaking from
both sides.

Signal levels LP are from S2-S3 or so, as are the
all-path terminator line signals here at my sunset.

Starting at about 0030Z-0045Z there is a switch
in the direction of arrival and the signal begins to
arrive from the South. It builds to a peak about
0130Z, followed by a rather smooth decay until
about 0150Z - 0155Z, when it rapidly collapses.

Peak signals for me on 40 are about S7-S9 on
my 4 square there.

>Dave K4JRB

I really would like to work this crew on 80 CW and the 80 meter path looks quite similar in peaking, but at far lower signal levels. It's so far down in level there that I can't get any good arrival feeling for it, though.

As I have tried to explain to folks in W6 W2 and the MIdwest, Texas is the pits for low band. There is about a 20DB drop in arrival level from either the Northeast or Northwest over what they see on the coasts. You cannot imagine what a bummer it is until you've experienced it.

Who would help me ?

I'm intrested in everything about ACARS
I have found a schematic to build a ACARS interface. I can't test the interface because i don't have the program to decode them.

Who would like to send me decoder software via email ? (something like LOWE)

I'ts above my budget to buy a LOWE interface with the software, if i could test my interface i could affort it.

So to all spotters, radio amateurs... who send me software to decode ACARS (maybe there is schareware to decode them ?)

If you have any other suggestions to help me and it's about the ACAR system, be free to email them.

THANKS VERY MUCH !!!!

My chart is pretty close to yours. K5UR worked them at 2320Z on 75
SSB. Rick is in Arkansas.

I did not include a 40 chart as anythime after 2300Z they seemed to
work from W5 and W0 east. Guys with dipoles and 100W finally got them
on 40 CW and SSB

Unfortuanately they closed operation around 0600Z 27 Jan.

How about 1 IRC? That should be enough to pay for an airmail reply to
any country.

> A self addressed return envelope is a must!

Agreed!

>Get some of those blue airmail envelopes sized about 10x15cm!

Easier said than done. This is not a standard size envelope in the
United Kingdom. 11x22cm and 9.5x21cm are standard in this country, but
neither size seems to be acceptable to the German Post Office! Even for
mail to other European Union countries, the German Post Office insists
on specified envelope sizes. This inflexible rule does not apply in any
other EU country. (The smaller size of airmail envelope available in
the UK is far too small to hold a QSL card!)

>I really tried to get the cards as fast as I could (and I think that
>there have not been big delays so far) but I won't have the QSLs
>before mid February, some 3 months after the activity. Problems with
>printers are quite common, so a 6 months' delay may well happen...

Huh? I thought you German guys were supposed to be efficient! :-)
I did 2 DX-peditions in late 1996 ... SV9 in October and C6A in
December. I was able to place orders with a British printer on the day
I returned from each expedition, and the cards were ready to send out 1
week later. All direct cards have been answered within 2 days of
receipt, and all bureau cards within 2 weeks of receipt. At present
there is zero backlog.

Out of 400 direct requests received for QSLs, only one did not include
sufficient return postage (that was a Russian, so probably excusable!)
and only one (an American) omitted to enclose a self-addressed envelope.
Several cards, however, had wrong dates/times of QSOs which made the
contacts difficult to find in the logs! Many Americans fail to grasp
that 21:00 EST on Dec 1st actually equates to 02:00 UTC on *Dec 2nd* ...
not 02:00 UTC on Dec 1st! ;-)

The neatest, most carefully prepared QSLs ... always with clearly
written s.a.e. and adequate return postage ... come from Japan.
"Well done" to our JA friends!

299. 10 meter contest this weekend Feb 2-3

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-28 00:00:00 UTC
From: n5ejs@linknet.net
Message-ID: <32ee0ae3.5682485@news.linknet.net>
Source record: 33815
Cross-posted to: rec.radio.amateur,rec.radio.amateur.dx,rec.radio.amateur.misc

This weekend is the Ten-Ten International Winter SSB contest. If you like a challenge, this is right down your alley with 10 meters being very sporadic in the low part of the solar cycle. But you never know, the band might be wide open in your area with E-skip.

The contest is open to all radio amateurs regardless of whether you are a member of Ten-Ten or not. However, only the logs from Ten-Ten members whose membership dues are current will be accepted and scored. Stations without a Ten-Ten number count for 1 point and those with a Ten-Ten number count for 2 points. Multipliers for each different prefix that you work. Logs will be scored by VE7ACM who is good in the Callbook.

The contest will begin at 00:00 UTC Feb 1 thru 24:00 UTC Feb 2. Ten-Ten International requests that a "quiet zone" be observed between 28.490 and 28.510 from all those who participate in the contest. If you would like more information on the contest, check the Ten-Ten International Web page at http://www.lehigh.edu/lists/tenten-l/ and scroll down to the contest page link. Please note that in the URL, it is a lower case "L" on "tenten-l". If you are not a paid up member, all of the info you need is on the Web page.

It seems that our contest chairman has forgotten or neglected to use this excellent media to inform the Hams out there in Radio Land, so thought I would post this note about it if you would care to jion in. If the band seems dead from your QTH, try turning your beam due south and pulling out a weak back-scatter signal. Like it says on the logo, "You have to make contacts to get results". Hope to hear you there.

>Send with an SASE? Include postage? I am about to start sending, I
>don't want to appear 'cheap'....

There are two ways to send QSLs:

1. Direct. As implied, you send the card direct to the other operator. (or his QSL manager) You should always include an SASE with enough postage (in stamps of the DX's or his manager's country; many US types tend to forget US stamps aren't valid in other countries!) or a SAE and an International Reply Coupon, available at your local post office. In the USA they cost $1.05. Postage in Germany is unusually high, so if you're sending a card to Germany you should enclose two IRCs. Some operators use a US $1 bill instead of an IRC. I would only do so if the DX operator requests it; in some countries, it's a serious offense to possess foreign currency.

2. Bureau. Of course, QSLing direct can get very expensive! Most countries' national radio societies run QSL bureaus. In most countries, you have to be a member to send cards out through the bureau; in about half of the countries (not the US, and I don't think in Canada) you also have to be a member to receive cards.

Contact your national society for information. (try www.rac.org though I'm not sure that'll work. For any browsing USA types, look at www.arrl.org on our side of the border) In general, you send your outgoing cards to your national organization. They take all your cards going to Germany, package them with all their other members' cards going to Germany, and send them to the German society. Of course, the process is repeated for other countries.

You also need to have SASEs on file with your QSL bureau. In the US, you send the envelopes to a regional bureau rather than the national society. I'm not sure it works the same way in Canada. The bureaus generally want a specific size of envelope. You should have SASEs on file even if you intend to send your outgoing cards direct.

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's. I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.

If you don't care for the hassle of looking up QSL managers,
finding IRCs or foreign stamps to enclose, etc, there are QSL
services that will take your cards, route them the best way,
and get the returns back to you via the bureau. The downside
is that this way works slowly so go direct if you need your
cards in a hurry, but this way is much easier and the cost
is minimal.

One such service is offered by Les Bannon, WF5E.
I haven't used it so don't take this as an endorsement, but
WF5E is an active DXer and manages the W5 Incoming Bureau so
he certainly knows his stuff. On the sheet I have the cost
is $1 or 2 IRCs per 6 cards, but not sure if that's current.

I also don't know if he has a web site but his email address
is Qslwf5e@aol.com.

Hello there. I am Jim Haas, KG9IF, QSL/Contest/Awards Manager for the Husky Amateur Radio Club, W8YY, which is the amateur radio club of Michigan Technological University in Houghton, MI. Every year over a festival known up here as Winter Carnival, where everyone takes a couple of days off to enjoy the snow (we get a lot of that up here), we run a special event station. This year's station runs from 1100Z on 30 January 1997 (6:00 AM Eastern) to 1100Z on 1 February 1997.

"So Jim," you ask, "what do I get for working this station?" Well, if you work our station, just send us a self-addressed, stamped envelope suitable for holding a certificate and we will send you just that--a really nice certificate that says you worked W8YY over Winter Carnival.

Below is the frequency list, which is a general guideline and not a promise of where we will be. I can guarantee one thing--if you look around, we will be there. We may not be on, for example, 14.325 exactly, but we'll be on 20 somewhere. We may also do some HF digital modes (we still need a few connectors for that) and some satellite work as well. If there is enough interest among the station ops/control ops, we will work some CW as well.

If you have any questions, comments, or criticisms, just drop me a line at jdhaas@mtu.edu. We look forward to hearing you on the air.

73 de Jim Haas KG9IF

Band Mode Frequency
17 M USB 18.130.0 MHz

20 M USB 14.325.0 MHz
CW (maybe, if
there is 14.130.0 MHz
interest)

30 M CW (if there 10.125.0 MHz
is interest)

40 M LSB 7.262.5 MHz

75/ LSB 3.972.0 MHz
80 M

SB DX @ ARL $ARLD006
ARLD006 VK0IR breaks record

ZCZC AE06
QST de W1AW
DX Bulletin 6 ARLD006
From ARRL Headquarters
Newington CT January 29, 1997
To all radio amateurs

SB DX ARL ARLD006
ARLD006 VK0IR breaks record

The VK0IR Heard Island DXpedition is one for the record books. The DXpedition team left Heard island Wednesday, January 29, after racking up more than 80,000 contacts--a new DXpedition record. The VK0IR team was scheduled to leave Heard Island on January 31, but rough weather and high winds (combined with bone-chilling cold) forced an early shutdown. VK0IR hit the bands running on January 14 and didn't stop until January 27--a few days before the DXpedition's scheduled end. The result was excitement on a level rarely seen among the Amateur Radio ranks. Most of the stations worked were in Europe, the Eastern US and Japan. With 80,673 contacts in its logbooks, the widely heralded Heard Island DXpedition appears to have topped the previous record, held by the 1992 4J1FS DXpedition, which racked up nearly 74,500 QSOs in 15 days. (The ZA1A and 3Y0PI DXpeditions tallied 69,500 and 60,000 contacts, respectively.)

On its final weekend, the team began to dismantle some antennas prior to going QRT. A special effort to give the ''small pistols'' a chance at putting Heard Island into their logs took a back seat to operator safety and equipment security, as the team awaited the arrival of the ship on January 28. Even so, many US operators with very modest stations enjoyed success. One East Coast station reported working VK0IR on 20 meters with just 4.5 W output. The effort might be considered all the more remarkable because it took place during the sunspot minimum.

The Heard Island DXpedition was reputedly the largest, most well organized and--with a budget of some 320,000 dollars--the most expensive DXpedition ever. Last fall, the ARRL Colvin Award Grants Committee authorized a grant of 5000 dollars for the Heard Island DXpedition.

In a sense, the Internet--often thought of as ''competition'' for ham radio--has been the medium that helped establish a sense of cohesion and community during the VK0IR operation. The DXpedition has heavily employed the Internet to promote the DXpedition and to spread the latest word from Heard--a territory of Australia located in the South Indian Ocean. The DXpedition's 'net presence also offered an opportunity for hams to get a blow-by-blow account of the DXpedition and to post their comments, success stories and gripes. News and pictures of the operation continue to appear in The Heard Island Tribune, edited on-line by Don Greenbaum, N1DG, another of the DXpedition pilots. John Devoldere, ON4UN, moderated the reflector and issued daily postings about the individual operators, changes in frequencies and tips on operating behavior, while the VK0IR home page offered additional general information. Those who worked VK0IR (or thought they had) have used the VK0IR home page to check the DXpedition's logs, which were forwarded via pacsat to servers in the US and in Europe.

An e-mail note received here at HQ from Jon Jones, N0JK, of Wichita, Kansas, summed up the feelings of many grateful operators: ''Thanks to the Heard ops, pilot stations, ON4UN and all the other behind-the-scenes support cast for bringing the magic back to Amateur Radio.''

The DXpedition team does plan a brief (one-night) stop at Kerguelen Island on its return trip. It is not certain that any radio operation will take place from Kerguelen, but if it does, Devoldere says it likely will be on the low bands only, and mostly--if not exclusively--on CW.

The QSL address for the VK0IR and the preceding TO0R operation from Reunion Island is INDEXA, c/o W4FRU, Box 5127, Suffolk, VA 23435. QSLs for VK0IR and TO0R should be mailed separately to avoid delays. For more information, check the Heard Island home page at http://www.ccnet.com/~cordell/HI/.

Message-ID: <32EF624F.7E0A@nbnet.nb.ca>
Source record: 33839

Last week I down loaded a program which I find to be very helpful should you be inclined to use the clusters on the Internet. It is easy to download the beta version. You can find the program at: http://www.funet.fi/pub/ham/hf-work/ The program is 640k zipped. I am sure there are others but this one sure caught my interest. Take a moment and try it. I think you will be every bit impressed. So try dxt10.eng.zip There is a text file also which you may as well download also (dxt10eng.txt). This program was the work (art) of Fab (IK4VYX).

BTW I would be very interest in any Telnet sites to DXclusters possibly not covered by the program. So if you are aware of any Telnet site to clusters, please share them with me.

Best 73 and enjoy... Andy (VE9DX)

Hi All,

I just decided to try my hand at the 1750M band by purchasing a Curry Communications EXP-17 unit. Anyone work this band in the Midwest (Missouri) or anywhere for that matter.

Once I get this up and running I'd be delighted to receive some receptions reports as I'll be working this unit like crazy...

Sent this yesterday but it never showed for some reason here...

Last week I down loaded a program which I find to be very helpful should you be inclined to use the clusters on the Internet. It is easy to download the beta version. You can find the program at: http://www.funet.fi/pub/ham/hf-work/ The program is 640k zipped. I am sure there are others but this one sure caught my interest. Take a moment and try it. I think you will be every bit impressed. So try dxt10.eng.zip There is a text file also which you may as well download also (dxt10eng.txt). This program was the work (art) of Fab (IK4VYX).

BTW I would be very interest in any Telnet sites to DXclusters possibly not covered by the program. So if you are aware of any Telnet site to clusters, please share them with me.

Best 73 and enjoy... Andy (VE9DX)

Source record: 33749

Hi everybody,

During July/august we're planning our holidays in Scotland. Since I like to combine holidays with radio I was checking if I could activate one or more islands. So far I came up with the following (feasable) islands:

Outer Hebrides EU-010
Skye
Arran
possible Inner Hebrides EU-008

I can't find any references for Arran or Skye.... unless they're EU-123 (Scottish coast).

I wonder if these are islands that would generate a fair amount of traffic if activated and if they were activated recently.
This will be my first 'IOTA DX-expedition' so suggestions/tips/ info is more than welcome.

Thanks.

73, CUL,

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

DX Bulletin 7 ARLD007
From ARRL Headquarters
Newington CT January 30, 1997
To all radio amateurs

SB DX ARL ARLD007
ARLD007 DX news

This week's bulletin was made possible with info provided by Randy, WX5L, Michael, KO7V, Tedd, KB8NW, the OPDX Bulletin, Robert, KE2FB, Joerg, YB1AQS, and Contest Corral from QST. Thanks to all.

SABLE ISLAND, CY0. Wayne, VE1CBK, will be QRV from here as CY0SAB. He expects to be active from 1200z and after 2000z on the usual DX frequencies. If propagation permits, he will try 17 through 10 meters. He will also try to be active for as many RS12 satellite passes as possible. QSL to Wayne E King, 63 Brook St, Lake Fletcher, NS, B2T 1A5 Canada.

PHILIPPINES, DU. Dave, W1DV, will be active as DU/W1DV, primarily on CW, from Manila for the next two years. Dave is a missionary with Grace Bretheren Missions. QSL via KO7V

CAMBODIA, XU. Robert, KE2FB, is with the US Embassy, and is QRV as XU2FB. He works 80 through 10 meters, using CW, SSB, RTTY, and FM on 10 meters. QSL via N4JR.

BANGLADESH, S2. Hannes, DL3NEO, Mar, DL3DXX, and Joerg, DL8WPX/YB1AQS will arrive in Dhaka on February 2, and will be QRV as S21ZX and possibly S21XY. Activity will be on all HF bands, although emphasis will be on the low bands. QSL both calls to DL3NEO.

CONGO, TN. Baldur, DJ6SI, is QRV as TN6X, and will be active until February 4 on 160 through 10 meters, using SSB and CW. QSL to DJ6SI.

TURKS AND CAICOS ISLANDS, VP5. Steve, N9CK, will be QRV as VP5/N9CK from February 4 to 11. Activity will be mainly CW and RTTY. He will also be QRV during the WPX RTTY contest using the callsign VP5CK. QSL to N9CK.

ST. PETER AND ST. PAUL ROCKS, PY0S. Karl, PS7MM, and Tino, PT7AA, plan on leaving Brazil February 1. They should be QRV starting February 5. Activity will be on all the usual DX frequencies. Look for Karl to use the call ZY0SK on SSB and RTTY. Tino will operate CW as ZY0SG. QSL to home calls.

THIS WEEKEND ON THE RADIO. End the month of January by participating in various QSO Parties. The Delaware, New Hampshire, and Vermont QSO Parties are all on tap for this weekend. The North American Sprint is also scheduled. Please see February QST, page 103 for details.

330. Incoming Buro Info

Newsgroup: rec.radio.amateur.dx
Date: 1997-01-30 00:00:00 UTC
From: adell@planet.net
Message-ID: <MPG.d5b14fd4c2621349897a3@news.planet.net>
Source record: 33753

Background and Frequently Asked Questions

Part of the enjoyment of contacting other amateurs throughout the world is the final courtesy of the QSO - the QSL card. In addition to the necessity of verification of contacts for awards, many amateurs enjoy collecting QSL cards. The Bureau system was initiated to help keep the costs of exchanging cards at a reasonable level. Although you may think that the United States postage rates are high, we enjoy the least costly and most reliable postal service in the world. Thus, the Bureaus play an important role in the worldwide distribution of QSLs.

In each country where a QSL Bureau is established, local amateurs have organized the operation in a businesslike fashion. Cards are sorted by the prefix of the stations to which they are addressed. They are then shipped in bulk packages to the Bureaus of the countries to which these cards have been directed. Unfortunately, there are many countries which do not have organized QSL Bureaus. QSL cards for these countries must be sent by direct mail. The January 1994 issue of "QST" lists those countries served by the ARRL Outgoing QSL Service, i.e., the countries that have a Bureau. This service is restricted to ARRL members. The ARRL DX QSL Bureaus (in-coming) have no such restriction. They are open to all amateurs and serve as distribution centers for foreign cards addressed to stateside amateurs. At the present time, there are 14 District Bureaus and one for incoming SWL cards. Let's see what is involved in the operation of a District QSL Bureau, specifically, the Second District Bureau.

The ARRL Second District QSL Bureau has been operated by the North Jersey DX Association for 40 years. Methods and policies have been refined and modified over the years in response to an increasing volume of cards. Further changes were made when computerization became a necessity. Today, with 50 volunteer workers, the NJDXA sorts and distributes approximately one million QSL cards per year.

QSL cards are shipped to us directly from foreign Bureaus, from foreign amateurs, and from the ARRL. Mail is picked up by the Bureau Manager at the local post office at least twice a week. The first-class mail is separated from the packages of cards. This first-class mail includes subscriptions to the Bureau, requests for information, change of address notifications, and personal letters directed to either the Bureau Manager or to one of the Bureau volunteers. Subscriptions can include a supply of self-addressed and stamped envelopes which are approximately 5" x 7" in size. Standard business envelopes of either the # 6 3/4 or # 10 size are too small and will be returned. Likewise, the larger manila envelopes (anything larger than 5" x 7") are too large to fit in our

files and they will also be returned. Our Bureau sells postage credits at the current rate of ten credits for $5.00. A postage credit includes the envelope and the postage for a one ounce mailing. Each additional ounce in the envelope costs another postage credit. For subscribers who receive many cards, we will use Priority Mail which will allow us to send 2 pounds of cards for a very reasonable fee and the Postal Service will deliver the package in two days. This can save a considerable amount in terms of postage credits for our subscribers. The small difference between our charges for postage credits and the actual cost of a stamp and an envelope goes toward administrative expenses such as rubber bands, paper clips, stationery, envelopes, printing costs, telephone, and bank charges. As a result, we are classified as a non-profit organization (501-C-3) by the Internal Revenue Service.

Our Bureau has one Bureau Manager, two Assistant Bureau Managers, 12 Primary Sorters, and 35 Letter-Managers (some letters have two managers due to volume). Each person has a specific responsibility. The Bureau Managers collect the mail, enter credits in the subscribers files in our computer database, prepare monthly reports, re-sort and redistribute missort cards, reply to inquiries, respond to complaints and other correspondence, distribute newly purchased credits, and transact all other business which pertains to the management of the Bureau. After the newly purchased credits or s.a.s.e.s have been entered in the computer, the number of postage credits is also written on the outside of the envelope in which they were received. Notes and address changes are also placed in their original envelopes and marked accordingly. These envelopes are filed alphabetically in a sorting rack until they are taken to the monthly meeting for distribution to the individual Letter-Managers.

The 12 Primary Sorters receive at least one full grocery bag of cards each month which they must sort twice. They sort first by the first suffix letter and again by the second suffix letter. The sorted cards are then rubber-banded and labeled, brought by the Primary Sorter to the next meeting of the organization, and then placed in the proper Letter-Managers' bags. The Newly purchased credits and other mail along with computer reports are also distributed to the Letter-Managers at the monthly meeting. The Letter-Managers have the responsibility of updating their subscriber files with this information. They then do a final sort of the cards in their bag, stuff and address envelopes, apply the necessary postage, and finally mail the cards to the subscribers.

There are a few requirements which our Bureau has set forth for subscribers. The first is to allow at least two months for the processing and distribution of newly purchased credits. One of the most common complaints we receive is from a subscriber who had recently sent money or s.a.s.e.s only to receive a shipment of cards a few days later with a note stating that the credit balance is somewhat less than the subscriber thinks it should be. This only means that the mailing was done before the Letter-Manager had received the new postage credits for that subscriber. If we receive a subscription (or renewal) one day after our meeting,

those credits will not be in the hands of the Letter Manager for one whole month. Furthermore, the Letter-Manager may not have the time to update his file for a week or two or even longer. With family obligations, illness, vacations, work schedules or other priorities, the Bureau work is often delayed even further. Therefore we ask our subscribers to be patient and to allow a minimum of two months for credits to be added to the subscriber's account.

Another common problem is failure to enclose a self-addressed and stamped envelope when requesting information. This is a courtesy and should be extended to any non-profit organization from which you expect a response. Subscribers should
also be aware that a supply of address labels would make our job a bit easier. Computer-generated labels are best. The tiny ones that arrive in the mail have a poor quality glue and frequently fall off the envelopes. If you send us labels, make sure they are big enough and of reasonable quality.

The District Bureaus do not handle US-to-US (contiguous 48 states) QSL cards. Most Bureaus will, however, distribute US cards addressed to a DX station via a US QSL Manager. Until recently, the Second District Bureau did not accept such cards
for distribution. We now will handle cards originating from a US station, addressed to a foreign station but sent via a US QSL Manager.

We make every effort to be conservative of our subscribers' postage credits or self-addressed and stamped envelopes. In that regard, we will rarely mail one or two cards. In general, we hold cards for weight so that the subscribers get the most value
for their postage dollars. That is one major advantage of purchasing postage credits as opposed to sending s.a.s.e.s. We can apply only the amount of postage necessary for the mailing while the sase may already have too much postage for the weight enclosed. Another point in favor of purchasing credits is the cost of mailing sases. We usually hold cards for at least 6 months after notification that a subscription has expired. After that time, we will destroy unclaimed cards.

Finally, exchanging QSL cards via the Bureau System is a very slow process. We frequently see cards which were for contacts made more than a year ago. In fact, some cards are for contacts that are several years old. The key word in dealing with any Bureau is patience. If subscribers realize that the work is being done by volunteers and that these people are entitled to have some time for their own enjoyment of this hobby, then the delays in the receipt of cards would be more easily explained. Cooperation between the subscriber and the Bureau is most important.

Each District Bureau establishes its own policies and management style. Depending upon how the volunteers are organized, monthly meetings may not be a convenient method of distributing the workload. Some Bureaus meet at a central location and all Bureau work is accomplished in one place. Others prefer to mail cards to the volunteers who do the sorting and final mailing from their homes. In another case, the Bureau Manager

personally delivers cards to the volunteers every week. The Second District Bureau has developed a system which works for us.

I second the comment re 7X2LS (I haven't worked either of the other two). I sent a card and 2 IRCs to his Paris address and had a card back with a nice note in a short time. This was in the latter part of 1996.

There are many reasons why sending off a QSL card and IRCs doesn't always result in a card being returned promptly. Immorality of the DX station is only one of those reasons.

Shel - I 'm still waiting too. But don't dispair, I've heard
that none have gone out yet.

VK0IR ---> The 1997 Heard Island DXpedition went QRT on 27 January at 11:55
UTC, when VK0IR logged their last QSO on 20 meter with ON4UN. A total of
80673 QSOs have been logged:

Mode SAT 10 12 15 17 20 30 40 80 160 Total
-------------------------------------------------------------------------
CW 144 110 574 5362 5149 11977 7111 11079 2789 1241 45536
SSB 490 118 174 4456 4542 16318 0 4479 2504 0 33081
RTTY 0 0 0 0 0 2056 0 0 0 0 2056
-------------------------------------------------------------------------
Total 634 228 748 9818 9691 30351 7111 15558 5293 1241 80673

There were made 14941 QSOs with Japan (CW 8991, SSB 5473, RTTY 477); 35846
with Europe (CW 21358, SSB 13756, RTTY 732); 14532 with Eastern North America
(CW 7555, SSB 6601, RTTY 376); 5837 with Central North America (CW 3050, SSB
2537, RTTY 250); 4157 with Western North America (CW 2367, SSB 1668, RTTY
122); 713 with Australia and New Zealand (CW 253, SSB 447, RTTY 13); 4647
with the rest of the world (CW 1962, SSB 2599, RTTY 86).

*** SINCEREST CONGRATULATIONS TO THE TEAM AND THE PILOT STATIONS ***
*** ON THEIR SUPERB JOB ***
*** THANK YOU FOR MAKING YOUR (AND OURS) DREAM COME TRUE ***
```

3B8 - From 20 February to 1 March Adriano, IK2GNW will be active (SSB, CW and RTTY) from Mauritius Island (AF-049) as 3B8/IK2GNW. He will concentrate on 80 and 160 metres.
8P9 - From 4 to 1 February Steve, K2WE (ex-NI2C) will be active from Barbados with a call to be got upon arrival. Operations will take place on 10-160 metresi, WARC band included, SSB & CW. QSL via home call.
CE - Ismael, CE7AOY is reported to be /8 from 7 to 10 February from Wellington Island (SA-032).
CY0 - Wayne, VE1CBK was expected to be active from Sable Island as CY0SAB from 27-31 January, but, due to an unforeseen technical problem, he was reported being unable to be QRV until 29 January at the earliest Wayne planned to be active on HF, concentrating on 160, 80 and 40 metres before and after his normal work day (12 UTC-20 UTC). QSL via home call (Wayne E King, 63 Brook St, Lake Fletcher, NS, B2T 1A5 Canada).
ER_ant - Operator Pavel is reported to be active in February as EM1HU from Ukraine Antarctic base Vernadsky (WABA UR-01) on Galindez Island (AN-006). QSL via I2PJA.
FR - From 15 to 20 March Adriano IK2GNW will be active (SSB, CW and RTTY) from Reunion Island (AF-016) as FR/IK2GNW. He will concentrate on 80 and 160 metres.
HP - From 8 to 11 February Jose (HP2CWB) and Francisco (HP1DON) will be active (SSB only) from Cayos Holandeses, San Blas Archipelago (NA-170). Calls that might be used are 3E0S, 3F0S, H30S, H80S, H90S, HO0S and HP170SB. QSL via HP2CWB (Jose Ng Lee, Direct Distribution LTD., PTY-201, P.O.Box 02-5275, Miami, FL 33102-5275, USA. Please note that this is just a maildrop address: cards will be actually mailed from Panama, so that do not send SASEs with US stamps).
I_ant - Filippo, IK0AIH is active as IA0PS from Italian Antarctic base at Terranova Bay (WABA I-01) on Pennell Coast.
KC4_ant- Greg, WB7CHV, who is currently active as KC4AAC [425DXN 294] at Palmer Station (WABA K-10) on Anvers Island (AN-012), will looking for European stations on 2 February at 16, 17, and 18 UTC on 14.270 MHz +/- QRM. They have replaced the old triband ant with a new 3 element monobander for 20 metres and added a new amplifier with booming signals.
OH0 - OH1NX, OH1NYP, OH1TX and OH2BH will be active from Aland islands as OH0NYP on 160 metres until 2 February.
S2 - Operations by DL3NEO, DL3DXX and DL8WPX [425DXN 299] will take place with the call S21XX on all bands (with special emphasis on low bands) mostly on CW. DL3DXX and DL8WPX will be staying in Bangladesh until 14 February (after leaving S2 they will join DK7YY and DL7UFN for the planned activity from OC-117, 425DXN 297]. DL3NEO will stay in Dhaka until 17 February. The group has been issued also the calls S21XZ and S21XY. QSL DL3NEO.
S7 - From 12 to 19 February Adriano, IK2GNW will be active (SSB, CW and RTTY) from Mahe, Seychelles (AF-024) as S79GN. He will concentrate on 80 and 160 metres. Adriano might be active for 2 or 3 days from Desroches Island (AF-033) as well.
V8 - Hiro, JA1WTR (ex-TA2ZY, VU2WRT and XW8AK) is active as V85HY on 15-80 metres CW. QSL via JA1WTR.

VE - The Blue Mountain Amateur Radio Club will operate a special event station (on 20, 40 and 80 metres) under the club call (VA3BMR) during the running of the 1997 Special Olympics World Winter Games at Collingwwod from 1 to 8 February. Special full color QSL cards have been printed for this occasion and will be distributed to contacts through the QSL bureau.

********** GOOD TO KNOW ... **********
****

GERMAN ISLANDS AWARD ---> Peter, DL2MX (German Islands Award Manager) gives the latest information on the IOTA status of some German islands [425DXN 296] N-026 (Minsener Oog), Koos (O-010), Lotseninsel (O-020), Grosse Kirr (O-023), Oie (O-024) and Riether Werder (O-027) do *not* count for IOTA; Bock (O-004) and Beuchel (O-025) count for EU-057; Langenwerder (O-022) counts for EU-098.

QSL VK0IR ---> QSLs are via INDEXA, c/o W4FRU, P.O.Box 5127, Suffolk, VA 23435, USA. W4FRU is a QSL manager for several other DX stations, so that if you include a QSL request for one or more of these other stations along with your VK0IR QSL request, it could delay your Heard card by as much as six months. In keeping with the above, TO0R QSLs should be sent separately as they will be processed by a different person than the Heard Island cards. Any donation you may include with your QSL request, over and above that required to process your QSL request, will be forwarded to the DXpedition treasurer.

VK0IR SOUVENIRS ---> You can also support the expedition by bying one of the unique souvenirs that are made available: white on black (@ $15) and 4-colour (@ $20) coffee mugs (order from Bob Schmieder, KK6EK, 4295 Walnut Blvd, Walnut Creek, CA 94596, USA); cotton T-shirts (sizes adult S-XXL and XXXL by special request, $20 U.S. and $25 airmail DX) available from Tom Anderson, WW5L, 3505 Cliffwood Drive, Bedford, Texas 76021-2043, USA. A professional quality video will be made available around May 1997 (for information and orders, please contact Peter Casier, ON6TT, Oude Heerbaan 30, B9230 Wetteren, Belgium).

>(Scottish coast).

Hello Maurice!

Arran is EU-123, Skye counts as Inner Hebrides EU-008.

Some German guys activated EU-008 and EU-010 in summer 1996. Arran
(EU-123) has not been active very much since 1995. I think Arran would
be the most popular island to go to for IOTA chasers ... and also it's a
very nice place for a holiday! (I know, because I used to live very
near there.)

I hope you will have a very nice holiday, wherever you decide to go.

Source record: 33766

If you want to unsubscribe, send your message to heard-REQUEST@ve7tcp.ampr.org

If you send it to heard@ve7tcp.ampr.org, 1400 people will see your mistake.

There was a small problem with the list server, it was supposed to reject
UNSUBSCRIBE messages sent to the list. I have fixed this. Sorry for the
junk mail.

350. [HEARD] HOW TO UNSUBSCRIBE

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-01 00:00:00 UTC
From: pdunphy@atcon.COM
Message-ID: <2.2.32.19970201140704.006824f0@smtp.atcon.com>
Source record: 33767

send the request to the address <listserv@ve7tcp.ampr.org> NOT
<heard@ve7tcp.ampr.org>

If you send it to <heard@ve7tcp.ampr.org>, you will generate 1400-1500
messages with the word "unbsubscribe" in the body of the text . . . and
you'll still be on the list! Here's the instructions I got back when I
joined up a month or two ago:

If you ever want to remove yourself from this mailing list,
you can send mail to <listserv@ve7tcp.ampr.org> with the following
command in the body of your email message:

unsubscribe heard "Paul M. Dunphy" <pdunphy@atcon.com>

Now, of course, substitute your own E-mail address for mine! just use the
format:

unsubscribe heard (your e-mail address)

Tom,

I have an address for CV0Z and two addresses for CX3CE.

CX3CE: Gustavo Caamano, POB 71, 15000 Lagomar, Uruguay
or Gustavo Caamano, POB 244, Montevideo, Uruguay

Your guess is as good as mine which may work. And CV0Z has adirect
address of:

Uruguary DX Group, POB 20063, Montevideo, Uruguay

Good luck, but don't hold your breath waiting. I still don't have
Uruguay confirmed after 30 years (and I've worked quite a few).

353. ACARS

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-02 00:00:00 UTC
From: William Vynck <RACO@ping.be>
Message-ID: <32F4B195.6204@ping.be>
Source record: 33770
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc, rec.radio.amateur.dx,rec.radio.scanner

Sins a long time i'm looking for a working sollution to receive and
decode the ACARS.

I have 2 different schematics and 2 different software packages. The
software is from AEA and the other from LOWE.

Some people says that the AEA software is working fine with a hamcom,
when i start the program, i see the data-indicator going on and off buth
the screen stay's empty. (ill try'd with squelch and volume settings
buth nothing works)

The LOWE needs a hardware key.

I'm thinking of bying a complete system with software and interface buth
is it going to work with my TH-79 from Kenwood (should i look for the
problem in the receiving of my Kenwood ?)
Still the litle interface from LOWE is to expencive.

MY QUESTION IS :

Are there any people out there who are working with homebrew interfaces
and what kind of software do they use with it ?
Are they welling to share the schematics and software ?
Sins there are not much people who are intrested in the ACARS system i
don't think to get lots of mail.

A SECOND HAND INTERFACE WITH SOFTWARE IS ALSO WELCOME !!

Thanks to all and ill hope my loking is going to end now :-))

William

Check out QST for May 1994 page 54.. I appears that the 0 district and
all the remapping for the current districts occured in 1945. After
WWII at the re-activation amateur radio. The article does talk about
some calls being re-issued..

Cross-posted to: alt.radio.amateur.club.clarc,alt.radio.scanner,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.ama

Hello... Brian here!

If you have a RADIO and a SOUND BLASTER (or compatible card) you already have all the hardware necessary to receive WEFAX, FAX, SSTV and RTTY.

You can also transmit monochrome FAX and SSTV, with the current version of my FTV software.

*** Put the power of your 80386, 80486 or Pentium processor to real use ***

The external "decoder" units that are used by conventional users are modelled inside this software. This makes it easy to get started, inexpensive and rids you of the inevitable tangle of wires and boxes of decoders.

Absolutely no external hardware, other than a simple audio lead, is required by FTV. The current version decodes:

WEFAX (from weather satellites, e.g. 137-138 MHz)
HF-FAX (from terrestrial stations)
SSTV (from radio amateurs, e.g. 14.230 MHz)
Baudot (press, naval, weather etc)

Here is a run down of the more interesting features:

(1) It keeps the demodulated signal in memory, so that the signal can be analysed again at a different keying rate or polarity! Garbage can be resampled on the fly, which means that minutes of received signals decoded at the wrong baud rate or keying polarity are recovered, on the fly, while still receiving.

(2) The incoming signal is analysed automatically - standard modes, line rates, baud rates and keying polarity are automatically determined following analysis.

(3) Tuning oscilloscope available at all times, without loss of copy.

(4) Program works in real time.

*** What are you waiting for? Try it now! ***

Take a look at my web site for futher details, from where you can download an evaluation copy, at: http://www.geocities.com/SiliconValley/2504

A registered copy costs US$ 25. Registration promotes the further development of this software and entitles the user to future upgrades

paying only for delivery
expenses, if any.

Fianlly, just in case some of you have trouble accessing my web site, here is my postal address (if you want a reply, send a self-addressed label and IRC's to cover expenses):
Brian E. Cauchi,
Gawhra, Domenico Cachia Street, Birkirkara BKR06, MALTA.

What can I say? Try it, and may you have as much fun as I am having...
73's from Brian.

> Radio Amateur ONL4021
> QSL via bureau UBA Belgium Hi Bill; you didn't say on what op system or PC you are
running this,
but there are several possibilites;

a. For most Windows users, you MUST run the ACARS software in a DOS mode. This does not mean a DOS box (as you can in Win95) but completly outside Windows. The reason for this is that ACARS and Windows conflict because each wants to control the serial port connection exclusivly. So you must exit Windows (yes, even '95) completly to run ACARS.
b. Leave your squelch completly open. The reason for this is because most squelches don't react fast enough, and part of the message will be lost before the audio reaches the interface.
If you are interested in getting more info on ACARS, come join us on majordomo@grove.net . Send a message like the following with nothing else in the body of the message;

subscribe acars
We also have a digest service (acars-digest) if you are interested in that. To my knowledge there has been no shareware development of ACARS software, but who knows that may change one day...73s Mike (colistowner, ACARS)

Hi Gary,

Glad to hear someone trying out the Lowfer stuff! I have wanted to put out a test beacon but never got it together nor have the equipment. I am in Northern Texas and would love to listen for a signal. I will be out of town next week but would love to know when you are putting out a signal and listen late some evening.

Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, ARRL DX Bulletin, AD1C, K1HT, K3DI, K7BV, KO7V, W7TSQ, K8KS, N8BJQ, KX9X, DL8WPX, EA5KB, F5OZF, F6AJA, PS7AB and ZS5S for the following DX information.

1997 SWODXA DX DINNER. The Southwest Ohio DX Association is pleased to announce the Twelveth Annual DX Dinner to be held on Friday, May 16th, 1997, at the Crowne Plaza Hotel, Dayton, OH. There will be a cash bar at 6:30 PM and dinner at 7:15 PM. If you are interested in attending, tickets are $29.00 and must be purchased in advance. Groups wishing to sit together must order as a group. A table seats eight. Also, please make your check or money order payable to SWODXA and send an SASE for ticket return. Seats will be assigned in the order that requests are received. Seats will be assigned on 15 March 1997. Seating is limited. Please order tickets from Tom Inglin, NR8Z, 4061 Eaton Road, Hamilton, OH 45013. For information on the dinner, contact Steve Bolia, N8BJQ at (513) 429-9954 (voice) or (513) 429-0218 (fax) or e-mail to: n8bjq@erinet.com

5X4F (UGANDA) NEWS. ZS5S passes on the following to OPDX:
"Conditions to 5X-land the last two weeks on 160 have been phenomenal. 220 QSOs were made of which 150 were with NA and 37 with JA. Another 120 QSOs were made on 80. Look for Paul, 5X4F, occasionally between 2130 and 0000z on 1.824 +/- QRM when QRN is low. He is always on between 0400 and 0440z looking for stateside at his sunrise which is 0413z. After working on 1824, he QSYs to 3.502 or occasionally to 3.799. If you have worked Paul on 160 or 80, please don't call him again unless it is for a new band or mode country during a pile-up. Paul would like to give 5X to as many new ones as possible. Thank you. If you hear him calling CQ to find out if the band is open, please call him. The setup in NW Uganda is minimal with 350 watts and 240 ft. long wire. Power source is solar charged batteries."

6Y, JAMAICA. Dick, K3DI, will operate QRP in the ARRL CW Contest from Ocho Rios, Jamaica with the call 6Y0A. He states that the 6Y0A operation

will be Single-Op entry and count as a PVRC DXpedition. Dick has twice been the worldwide winner of the ARRL CW QRP (C6AHL in 1994 and ZF2OP in 1996). At 6Y, he will use two radios contesting with split earphones. The total station's equipment consists of the two radios, two antennas and power supply which can be hand carried in one case. QSL requests may be via direct, bureau or the Internet (wilder@clark.net). Outside the contest, the call will be K3DI/6Y5 not 6Y5/K3DI.

9U, BURUNDI. 9U5CW and 9U5DX will sign 9U5T from the city of Bujumbura during the ARRL CW Contest, Februray 15-16th. QSL via F2VX. Gerry, F2VX, reports he has the logs of 9U5DX through January 21, 1997.

CE7, WELLINGTON ISLAND (CHILE). Look for Ismael, CE7AOY, to be active as CE7AOY/8 from IOTA SA-032, February 7-12th. Listen for him on the IOTA island frequencies, especially 21.260 kHz. QSL via CBA.

DU, PHILLIPINES. Dave, W1DV, will be active from Manila for the next two years as DU/W1DV. Activity will be mostly on CW. Dave is a missionary with Grace Bretheren Missions. QSL via KO7V.

FT5Z, AMSTERDAM ISLAND. Eric, FT5ZG, operates his own station on Amsterdam Island and will be there for one year. It was reported that he will try to be a regular on 7004 kHz at 1730z as FT5WE (now QRT) was in the past. His QSL Manager, F5RQQ, reports he has received January's log by FAX from Eric. QSL by the French Bureau REF or by direct to: F5RQQ Vigier JM 4 IMP Des LYS 63800 Cournon D'Auvergne France.

HP, PANAMA. Joel, F5PAC, will be here from February 11th to March 7th. His callsign and complete plans of operation were not reported. Joel will use an IC-706 including a GP for 10, 15, 20m and dipoles. He will be active from Grande (IOTA NA-202) and San Blas (IOTA NA-170).

HR6, HONDURAS (Looking for another OP). Gary, N7QXQ/HR6, advises that he has openings at Oak Bay Resort on Roatan Island (IOTA NA-057) for February and March (including weekends of ARRL and WPX contests). If interested, Gary can be reached at 011-504 45-2337. Best hours to call generally betwwen 2300 and 0200z.

P2, PAPUA NEW GUINEA. After Mar/DL3DXX and Joerg/DL8WPX stay in Bangladesh (see S2), they will travel to Port Moresby on February 14th to join Falk/DK7YY and Juergen/DL7UFN (both NODXA members) to be active from Misisma Island. Details of length of stay, callsigns and operations are presently unknown.

QSL NEWS AND UPDATE.....
Kaz, K8KS (ex. AA8HZ), reports to OPDX that he is a QSL Manager for a multi-op and multi-island South Pacific DXpedition that took place the month of July, 1996. He states that all the QSL cards have arrived from the printer. His order exceeded 15,000 cards and consisted of three different sets of cards to encompass all the QTHs included in the mega-island-hopping DXpedition. Cards will start coming out in early February for the following: 5W0BS, 5W0DG, 5W0TR, 5W0JB, 5W0KI, KH8/K8AQM, NH8/N8CC, KH8/KG8CO, KH8/KB8ECG, KH8/KG8DS, V63CK, V63CF,

KC6BP, KC6JJ, V73TR, V73JB, KH6/K8AQM, and NH6/N8CC. As you can see, there will be 17 separate logs to look up, and several of them have not yet arrived from the individuals involved in this DXpedition. The logs for each individual operator for each QTH are separately recorded. Kaz requests that everyone please have patience, and the cards will come out staggered over a 2-month period rather than everything in one single bulk mailing......

The QSL for 4U1SCO (UNESCO stations) are not printed yet. Please be patient!

ZY0FI which was active Jan/Feb. 1997, stating to QSL via PY2LLD is a PIRATE!!!!

Claude, F5GTW (QSL manager for FT5WE), informs us that Samuel, FT5WE, has gone QRT and his last day of activity was December 29th at 0703z. All QSOs after this time are made by a pirate. Samuel has made 16,000 QSOs. He will be back in France at the end of February. Presently, all direct requests have been answered up to November 6, and are in the mail.

S2, BANGLADESH. By the time you read this, Hannes/DL3NEO, Mar/DL3DXX and Joerg/DL8WPX/YB1AQS should have arrived in Dhaka. Mar and Joerg will stay until February 14th and Hannes until the 17th. Activity will be on all HF bands (sorry NO satellite operations this time). A special emphasis will be given again to the low bands (just like the group did the last two years from VK9XY/VK9CR). A 20m/66ft Titanex vertical and beverage-parts will be in their luggage. Also included will be a RTTY modem and other antennas such as a R7, R-7000 and wires. Look for S21XX on the usual standard DX-frequencies, mostly again in CW. In case they operate from two different QTHs (they will be carrying 3 transmitters) and in the last days after Mar and Joerg leave, look for Hannes to use the callsign S21XZ. This callsign has also been assigned to them, but they will only use it if necessary. All QSLs are going via Hannes, DL3NEO. The German bureau should be "OK", a direct address is to be announced later.

ST0, SOUTHERN SUDAN. John, PA3CXC, made a surprise trip to this rare spot this past week signing PA3CXC/ST0. His length of stay is unknown at this time. Last spot reported as this was being typed was 0828z Sunday (Feb. 2nd) on 18070 kHz. His next stop reportedly is 9U/9Q.

USI ALERT. Look for Dave, K1HT, to be active February 17-21st, from Cumberland Island (GA-002S or IOTA NA-058), mainly around 14260 kHz. QSL direct to K8JLF or via bureau to K1HT. ADDED NOTE: A special USI announcement will be sent to all OPDX InterNet Subscriber.

V2, ANITGUA. Sean, KX9X, and Matt, NM9H, will be active from February 12-19th, from the Caribbean super-station V26B. They will be on CW, SSB, RS-12, and maybe RTTY. Their primary plans are to give V2 out on CW on the low bands to JA and EU. They will also be active in the ARRL DX CW Contest the weekend of February 14th. They will be applying for V2 calls. Sean will be applying for V26NA, while Matt will be applying for V26CW.

These may change depending on availability. QSL info has yet to be
determined.

VK4, STRADBROKE ISLAND (Australia). Sergio/VK4GK, Angelina/VK4AAC,
John/VK4WX and Silvano/KB5GL/VK4WGL will be operating from IOTA OC-137
Saturday, March 15th, at 0530z ending Monday, March 17th, at 0100z.
Activity will be on 3995, 7065, 14260 and 21260 kHz. QSL VK4WGL via
KB5GL CBA. All others via CBA.

VK0IR LOGGED 80,673 QSOs. The complete record breaking details and
breakdown will be sent to all OPDX InterNet Subscribers.

VP2E, ANGUILLA. Dennis, K7BV, will be returning here sporting his
new callsign VP2EV (replacing VP2EWW), from February 10-18th. He will
operate all HF bands on CW including the ARRL CW contest. Dennis will
give RS-12 a try if someone is willing to forward information on the
satellite's pass over to his E-mail address: k7bv@aol.com. QSL to
his new address: 4357 Appollonio Way, Carson City, NV 89704.

XU, KAMPUCHEA (CAMBODIA). The "ARRL DX Bulletin" reports that Robert,
KE2FB, is with the US Embassy, and is active as XU2FB. He works 80
through 10 meters, using CW, SSB, RTTY, and FM on 10 meters. QSL via
N4JR.

ZY0, ST. PETER AND ST. PAUL ROCKS (UPDATE). By the time you read this
Karl, PS7MM, and Tino, PT7AA, should be active a ZY0SK and ZY0SG,
respectively. The two departed from Natal, Thursday afternoon on board
a fishing boat named ALFA. The estimated time of the trip is four days.
The duration of the DXpedition will depend upon the time the ALFA takes
to fill its holds with fish. There is the possibility that their return
trip will be made aboard another boat that will be fishing in the area.
Activity will be on CW, SSB and RTTY. All the 9 HF bands will be used.
QSL to home calls.

-=-=-=

be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

361. FS: Full Power Amp (80-10 Meters)

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-02 00:00:00 UTC
From: "Jeffery A. Purtle" <jpurtle@smartlink.net>
Message-ID: <32F53C0D.19BA@smartlink.net>
Source record: 33778

The Amp has two 4-400 tubes in it in great condition and easily delivers an 1100 Watts carrier on CW with 100 Watts driving it. It has tuned inputs, which easily match it to the 80, 40, 20, 15, and 10 Meter Bands. It was built by a man named Cliff Kurtz, N6ZU, of Stockton, CA and he guarantees it for life. I know of a man who lives in Los Angeles that had Cliff drive all the way down here to fix it. It is built so heavy that nothing ever happens to anything he builds. I am selling it after moving into an apartment and having no need for it in the future as I see it, unless to make my neighbors mad.

Like I said I live in the Los Angeles area, Valencia to be exact and the price would not cover shipping. I would prefer pick-up to make sure the tubes don't get damaged in transport. I will also include a Swan WM-1500 Watt Meter.

I am asking $300.

Please contact me by phone: (805) 287-5953 or Email: jpurtle@smartlink.net

10 meters was totally dead here in NJ Saturday afternoon. Listened
and scanned up and down 28.3 to 28.6 for about 15 minutes at about
4:30 pm EST, 21:30 zulu. Nothing, not a damm thing. I was using
a Kenwood TS 520S and a mulitband vertical.

Robert,
You can make that statement "here in NJ" for Saturday and Sunday
starting at 0900 (local) and running through 1800 (local) at even
hour intervals. I made one contact (8 miles south of me). Running
a Kenwood 440 into a couple of inverted "V"s.

378. IRC's Required - per USPO comments.

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-05 00:00:00 UTC
From: mike.luther@ziplog.com
Message-ID: <5d9a67$7d2@news.myriad.net>
Source record: 33552

A while ago before it scrolled off list, the question was asked about how many IRC's does it take, officially.. to get back a QSL?

I promised I'd ask the USPO for an official answer. I did.

The answer was given me by a long time USPO friend that teaches window operations classes in the Houston, Texas area, although he does not live there.

His answer corresponds to what I thought I remembered from a large discussion over this a year or so ago:

1.) Not long ago, as life goes, in 1995, there was a major change in the way First Class mail is serviced. As far as First Class mail is concerned, what ever that or its equivalent is in any other country in the world that belongs to the Postal Union Compact (Virtually all of them per this gent), there is now only *ONE* class of First Class mail service.

There is no longer any distinction between air mail and surface mail wherever air mail exists. All first class mail is treated the same. It all goes airmail unless there isn't any air mail.

2.) For that reason, a complete change in the way IRC's are valued and how they apply to First Class mail occurred, all over the whole world in any Postal Union member country involved.

3.) There is *NO* such thing as variable numbers of IRC coupons being required to send *ONE* unit of standard weight First Class mail by IRC methods.

4.) Publication #51 of the United States Postal Service, issued in July of 1995 on page #14 says it clearly:

"International Reply Coupons

This service allows you to prepay a reply by purchasing reply coupons. The coupons are exchangeable for postage stamps at post offices in countries that are Universal Postal Union members. One coupon is exchangeable in any other member country for a stamp or stamps representing the minimum postage on an unregistered letter. The fee is $1.05 per coupon."

5.) Per this gent, anyone who tells you that it takes more than one IRC to get a first class letter back from anywhere at the minimum weight of a standard letter - 1/2 ounce to us USA folks is not telling the truth. One and only one such coupon is all that is required for the standard minum letter... period.

6.) In addition to the above, please note - the IRC may also be
used to purchase a postal card first class unit of postage as
well! If a ham in the deepest part of Siberia sends you an
IRC here in the USA and you wish to send back a postal card,
we will not only hand you the required international postage for
the card, but here in the United States, you will get back a 10
cent stamp as well. The United States Postal Service will not
pay out cash for the difference, but will return the difference
in postage.

Now that the "official" answer is before us here, recall that these little
beasties can be exchanged for "a stamp or stamps representing the minimum
postage...." What that means is that the postal orfice on the other end of
the postal pipeline will, indeed, hand over a stamp or stamps for each IRC
presented..... Kapish?

A few years back we had a friendly discussion at the local orfice. It focused
on the fact that $1.05 in the USA is a serious chunk of change at the
rate of first class postage in many other parts of the world.

IRC's, per the note of the nice other man at the window at that time, were
valued for other reasons than postage in some places and tended to be removed
from envelopes or, perhaps, exchangd for other things in other places....

<smile?>

Officially, one QSL in an envelope, doesn't have to cost any more than
ONE IRC from "virtually any country in the world."

sigh....

:)

Please don't shoot the messenger...

This was undoubtedly the intention when the rules were drafted, and
most countries have fallen into line.

However, perhaps someone from Australia might care to comment re the
current situation? It was my understanding that in Australia (and a few
other countries), the Post Office has misinterpreted this rule, claiming
that "minimum postage on an unregistered letter" means "the postage on
the smallest unregistered letter to the nearest overseas destinations".
In Australia, this means letters destined for Oceania and eastern Asia.
They still argue that letters, however small, to places like Europe and
North America cost more than the "minimum postage" and so more than one
IRC is necessary!

>qst and I think you will find what you are looking for. I built that DSP and it's terrific.
>vry 73

My experience with DSP is that it's merely cosmetic. It will take a copy-able signal in the noise and clean it up to armchair copy, no problem. But it will rarely take a signal you can't copy and boost it to Q5.

DSP will not get you any new ones.

But most users will not tell you this because they just spent major bucks and don't want to look foolish by admitting it was a waste...

382. DXCC Prefix interpretation

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-05 00:00:00 UTC
From: bsmithso@scopus.COM
Message-ID: <c=US%a=_%p=Scopus%l=ATHENA-970205215508Z-4303@athena.scopus.com>
Source record: 33556

Hello!

I'm confused about the syntax of some of the prefixes on the
DXCC countries list. What does the slash mean? For
example, Mount Athos' prefix on the list is SV/A. Does this
mean SV _and_ SA? That can't be right because SV is
Greece and SA is Sweden. What does the slash mean here?

Thanks es 73!

-Brian

CT also lousy. Well at least I don't feel so bad now with my two Qs with
30W into a dipole. One abt 5 miles west the other abt 6 miles east. CU
during the August event.

Hello,

I am going to be spending a lot of time in Germany and Denmark this year
and next. Is there a web site that has the addresses one needs to write
to in the various countries to get temporary or reciprocal licenses?

Thanks,
Bill

Is it not possible these QSOs were made by guest operators at the
stations of those on the expedition? This, and the "Oh, you're going
to be at work? I'll work him for you with your call." syndrome, have
been going on for a long time and will probably continue.

Should there be a DXCC rule requiring all DXCC QSOs to be made by the
station licensee? How do you (should you?) prevent visiting-operator
QSOs? Should there be a geographic limit to the area in which DXCC
QSOs can be made?

Message-ID: <01bc1305$d2523b60$050592cf@globalyst-630>
Source record: 33796

Doug,

Current DXCC rules DO require all DXCC QSO's
to be made by the same licensee. There is also a
geographic limit, i.e., all contacts must be made from
the same DXCC country. (Gives us in the U.S. quite
a bit of latitude (no pun intended) but one has to
remember that , contrary to what you see on this reflector,
not all hams live in the U.S.).

I cant' believe that anyone is so lacking in intellect
that they believe one of the Heard Is. ops would submit
a fraudulent card for DXCC credit. I'll bet that none of
the Heard Is. ops even needs this one.

It might help if some of you simply read the existing
DXCC rules so that when you upgrade and get HF
privileges you'll know what's going on.

73,
Doug - W2DR

This is a very unusual one. The "slash A" comes after the callsign.
For example, SV2ASP/A is in Mount Athos ... distinguishing him from
SV2ABD (without any slash A) who would be in Greece.

A very few other small countries use this syntax ... for example FR5DX
is Reunion but FR5HG/T is in Tromelin.

I would like to order an Alpha 91B amplifier and would like some feedback both pro and con on what the actual owners of these amps have experienced. I am concerned about tubes beeing avail. down the road, service if you have had to get yours serviced,and what rig you are running it with and what is the amperage draw at 240 volts when at full legal limit. I have a FT1000, drake MN2700 tuner, and R5 and german quad antenna for 80/40 meters that also tunes on the other bands. Please let me know your setup and how it works as this might help me in my decision to buy a 91B, 73 and any and all responses will be appreciated. DE-KS4HK, Steve

Hey Walt,

Just to make it more confusing, the only operator at Mt Athos
is Monk Apollo, he has just signed SV2ASP when I've heard him!

Total deadness in eastern ND, not even a meteor ping. A CQ (out of
boredom) netted a Q with a local some 50 miles east. He had a 6 element
monobander at 60 feet and a KW. He said he *thought* there was a signal up
the band a ways. Of course this guy has worked forward scatter with other
big guns. I'm sure the winner will be from a dense population area like
Los Angeles, with lots of ground wave possibilities.

KAWIN NEWS - Announcing BeaconClock and KaWin 6.48

It's a double-header! The initial release of BeaconClock,
and KaWin 6.48, and both are ready for download from the
KaWin Home Page:

http://www.mutadv.com/kawin

BeaconClock is Freeware for DXers who share an interest in
monitoring the NCDXF/IARU beacons!

KaWin 6.48 enhancements include:

Receive Window pop-up menu now includes a "Freeze Receive
Window" option. When checked, this inhibits automatic
scrolling to the end of the window after each pop-up menu
operation.

Context Selection Tab pop-up menu now includes a
PurgeContext menu item.

Option/Identifiers now highlights (yellow) all parameters
whose current value differs from the new suggested value.

Option/Identifiers now sets the WTEXT parameter for Kams.

Plus, many more enhancements and fixes - all described in
the Squawk64.wri file.

The KaWin News mailing list has been purged of all problem
email addresses. If your address was inadvertently removed
please accept my apologies and re-subscribe. Please pay
close attention to the email address you provide and/or the
"reply to" address set in your email client.

To subscribe to the KaWin News mailing list, send email to
stan@mutadv.com with the word SUBSCRIBE in the subject line,
or use the handy subscription link on the KaWin Home Page.
To be removed from the list, send email to stan@mutadv.com
with the word UNSUBSCRIBE in the subject line and be sure to
include the email address this message was sent to in the
body - I cannot remove you if I don't know your address!

VE3EJ, who is a *very* big gun near Toronto, worked quite a lot of
stations on 10m by meteor scatter and forward tropo scatter. There was
no sky-wave propagation at all in his area.

I think you guys are all missing the point! The actual callsign
does not include the /A, or /T, or whatever. A ham from Mt. Athos
wouldn't say "Sierra Victor Two Alpha Sierra Papa Stroka Alpha." The /A
designation is just used by the DXCC program to distinguish the
"country" from other countries with the same prefix. So, since Greece is
SV, and Mt. Athos is SV too, they use a subscript of sorts to indicate
that it's another country: SV/A.

SB DX @ ARL $ARLD008
ARLD008 DX news

ZCZC AE08
QST de W1AW
DX Bulletin 8 ARLD008
From ARRL Headquarters
Newington CT February 6, 1997
To all radio amateurs

SB DX ARL ARLD008
ARLD008 DX news

This week's bulletin was made possible with info provided by Sean, KX9X, Alex, PA3DMH, The599Rpt, The DXNS, The OPDX Bulletin, Ron, N1RT, and Contest Corral from QST. Thanks to all.

JAMAICA, 6Y. Richard, K3DI, will be QRV as 6Y0A in the ARRL CW Contest from Ocho Rios, Jamaica. QSL direct.

BURUNDI, 9U. 9U5CW and 9U5DX will sign 9U5T from the city of Bujumbura during the ARRL CW Contest. QSL via F2VX. F2VX reports he also has the logs for 9U5DX through January 21, 1997.

AMSTERDAM ISLAND, FT5Z. Eric, FT5ZG, operates his own station on Amsterdam Island and will be there for one year. Eric will try to be a regular on 7004 kHz at 1730z. QSL via F5RQQ.

SEYCHELLES, S7. Adriano, IK2GNW, will be QRV as S79GN from Maha Island, February 12 through 19. He will use CW, SSB and RTTY with emphasis on 160 and 80 meters. He may also be active for 2 to 3 days from Desroches Island. QSL direct.

ANTIGUA, V2. Sean, KX9X, and Matt, NM9H, will be QRV from the QTH of V26B from February 12 through 19. They will be using CW and SSB. They will also be found on RS12. They may even try some RTTY operation as well. QSL route to be announced.

ANGUILLA, VP2E. Dennis, K7BV, will be QRV as VP2EV for the ARRL CW DX Contest. He will be active the entire week before the contest on 160 through 10 meters, as well as RS12. QSL to 4357 Appollonio Way, Carson City, Nevada, 98704.

BRITISH VIRGIN ISLANDS, VP2V. Jay, WB8ZTY, will be QRV from here February 7 through 14, as VP2V/WB8ZTY. He will also be QRV in the CQ WPX RTTY Contest. QSL to homecall.

BURKINA FASO, XT. Harold, DF2WO, will be QRV from Ouagadougou as XT2AW on CW and SSB from March 28 through April 14. QSL to homecall.

COOK ISLANDS, ZK1. Gun, DF4DI, is QRV as ZK1DI/P from Manihiki Island until February 8. After which, he returns to the South Cook Islands, and will be QRV as ZK1DI. He says the best time for Europe is from 0530 to 0830z. He also plans some 160 meter activity soon. QSL via DK1RV.

QSL ROUTE CORRECTION. It was reported in ARRL DX Bulletin ARLD007 that the QSL route for ZY0SK is PS7MM. The correct QSL route is PS7KM.

THIS WEEKEND ON THE RADIO. The IDRA World Wide RTTY WPX Contest, North American Sprint, NW QRP Club Digital Contest, PACC Contest, and QCWA Golden Anniversary QSO Party will certainly fill out the weekend. Please see February QST, page 103 for details.

This was a high-profile operation. The operators are well known to the
DXCC desk. I don't think any of the operators will try to claim it for DXCC!

I know of at least 2 instances where it was the wives of the operators
caling from home. If they don't have ham licenses, they probably had a
friend come over to operate the station while they spoke to their
husbands. I imagine the home calls were used to get thru a little better.

Reread the DXCC Rules. They already state the above!

The only geographical limit is that the operator applying for DXCC must
have made all QSO's within the same country. We discussed this on the DX
reflector recently. I believe this is a fair rule.

402. BeaconClock, FREEWARE for DXers

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-07 00:00:00 UTC
From: Stan Huntting <stan@mutadv.com>
Message-ID: <01bc149e$0bf93140$1ee983cc@stan.csn.net>
Source record: 33573
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

The NCDXF/IARU Beacons

One of the most enduring laws of DX states that there are at least two possible explanations for an apparently dead band: 1)propagation is poor, or 2)no one is transmitting. The NCDXF/IARU International Beacon Network addresses the second of these possibilities by insuring that reliable signals are always on the air, around the clock, from fixed locations worldwide. Each beacon uses identical equipment, including identical, omni-directional antennas. These beacons, sharing fixed frequencies at coordinated time slots, offer a powerful tool for evaluating propagation on the DX bands.

When complete, the network will consist of eighteen CW beacons in a time division multiplexed network, sharing a single frequency on each of the five amateur bands: 20m through 10m. The frequencies are shown in the Beacon Clock Frequency display. Each beacon transmits in a predefined ten-second window, repeating every three minutes. The schedule for each band is offset ten seconds from the next lower frequency band. Each ten-second transmission begins with the beacon's callsign followed by four, one-second dashes at 100, 10, 1 and 0.1 watts - four diminishing signals at precisely 10 dB power intervals.

Some of the eighteen beacons are not on-the-air on all five frequencies, others are not yet on-the-air at all. Beacons/bands that are reported by the NCDXF not to be transmitting are displayed in gray typeface. For more detail and current information on the status of the NCDXF/IARU International Beacon Network, visit the NCDXF/IARU web page, at

http://www.ncdxf.org/beacon.htm

OK, so the NCDXF/IARU have established a bunch of beacons out there - somewhere - each transmitting for ten seconds every three minutes on five different frequencies, that we can use to find band openings. But, how do we keep track of who is transmitting when and where to point the beam to listen for the next beacon? That's where BeaconClock comes in - BeaconClock answers the age-old question: "Who's on first?".

BeaconClock displays a real-time list of the next five beacons scheduled to transmit on the selected band and updates this list every ten seconds as the transmitting station changes. Information displayed for each station includes the callsign, short-path and long path beam headings and short path distance in Kilometers. Information for the currently transmitting beacon is highlighted at the top of the list. Armed with this information, a quantitative survey of possible DX paths on each of the five bands takes

just a few minutes.

But enough of this - you can discover the rest on your own. BeaconClock is FREEWARE program for DXers with Windows95 and you can download it directly from KaWin Home Page, at

http://www.mutadv.com/kawin

The W0 call area was created at the end of World War 2. (1945) Most
of the district had previously been in W9. (along with Upper Michigan
and Kentucky. There were a LOT of 9's!)

406. 3V8BB (Nov'96, Op DL2HBX) direct QSL requests mailed today!

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-07 00:00:00 UTC
From: ann@ifn.ing.tu-bs.de
Message-ID: <5df4kt$b73@ra.ibr.cs.tu-bs.de>
Source record: 33577

Hello,

yesterday I received the first batch of 1000 3V8BB photo QSLs for
my operation Nov 21-26, 1996 (CW only).

All 300 direct QSL requests have been in the mail by this morning.
Turnaround time now is one day (except for weekends ;-)

Thanks to those who included a bit more $ or IRCs than necessary -
I used it to answer *all* direct requests - even those with no funds -
and to include a sheet of story and an additional photo to each
envelope.

Depending on the next package from the printer the buro cards for all
QSOs should leave my home within one month.

For direct requests use my postal address:
Ulrich Ann, DL2HBX
Marienstr. 20a
D-38104 Braunschweig
Germany

..and please send only cards for MY operation (Nov 21-26, 1996) I have
no further logs, I can only return all other requests, sri!

I hope that in the meantime the wrong GO-List route (DL2HBK) has been
corrected. I sent a big envelope and postage to DL2HBK together with
an explanatory letter - hope this will do...

73! Uli, DL2HBX

..
>
> 3.) There is *NO* such thing as variable numbers of IRC coupons
> being required to send *ONE* unit of standard weight First Class
> mail by IRC methods.

In Germany there has been a change in September 1996: Before, you
could *definately not* send a QSL via airmail using one IRC. You
only got stamps worth 2 DM, but airmail fee is 3DM (=2$)!

Now an IRC is sufficient for an airmail overseas letter (that is
the GOOD news). However they changed another rule (the BAD news):
You do not get stamps anymore! Instead you have to follow the
following procedure:
1) Hand out the letter and the IRC to the clerk.
2) Have the clerk stamp the IRC.
3) Have the clerk put a special stamp onto the letter (usually
they have to look for it at the colleagues since there is only
one in every post office).
4) Have the clerk write the fee (e.g. "3,00 DM") onto the envelope.
5) Have the clerk stamp the letter again with a normal postal stamp.

6) If you have several letters, return to 1)

This morning I spent exactly 1 hour in the post office for mailing 145
overseas airmail letters using IRCs (my 3V8BB activity last November).
Think of people receiving thousands of QSLs with IRCs...

> 4.) Publication #51 of the United States Postal Service, issued in
> July of 1995 on page #14 says it clearly:
>
> "International Reply Coupons
>

> at post offices in countries that are Universal Postal Union
> members. One coupon is exchangeable in any other member
> country for a stamp or stamps representing the minimum
> postage on an unregistered letter. The fee is $1.05 per

> coupon."

German post offices do *not* obey to that rule (we get no stamps)!

> 5.) Per this gent, anyone who tells you that it takes more than
> one IRC to get a first class letter back from anywhere at the
> minimum weight of a standard letter - 1/2 ounce to us USA
> folks is not telling the truth. One and only one such coupon
> is all that is required for the standard minum letter... period.

You better be careful with this general statement!

> 6.) In addition to the above, please note - the IRC may also be
> used to purchase a postal card first class unit of postage as
> well! If a ham in the deepest part of Siberia sends you an
> IRC here in the USA and you wish to send back a postal card,
> we will not only hand you the required international postage for
> the card, but here in the United States, you will get back a 10
> cent stamp as well. The United States Postal Service will not
> pay out cash for the difference, but will return the difference
> in postage.

If I send a domestic letter (1 DM) using an IRC I do *not* get back
anything! Neither for postcards, etc...

Conclusion:
==========
Rules are ok but not every national mail service sticks to those rules!
Everything you mentioned *should* be like that, at least in Germany
it is *not*!

> Please don't shoot the messenger...

<Wham!> Sri, you weren't the messenger... ;-)

73 and please be more careful next time! Uli, DL2HBX

Bless you!

However, notice my last name... :)

I grew up in such a household, son of a mathemetician of that
name you might note. If the teakettle were in the sink and you
boiled water, the next time if it were on the table, you'd better
have put it in the sink before you put it on the stove.....

<loud roar of laughter>

>German post offices do *not* obey to that rule (we get no stamps)!

Sorry to hear that! :)

> 5.) Per this gent, anyone ...

>You better be careful with this general statement!

It's always fun bandying about others' claims! :)

>If I send a domestic letter (1 DM) using an IRC I do *not* get back
>anything! Neither for postcards, etc...

Yeah, I guess all postal orfices are somewhat nationalistic! :)
And in the German case, definitely not profitable, we learn... :)

>Conclusion:

\------------------------------------------------------------------------/

4S - Mario, HB9BRM will be active from Sri Lanka (AS-003) as 4S7BRG from
3 March to 30 May at least. QSL via bureau to HB9BRM.
6Y - Dick, K3DI will participate in the ARRL DX CW Contest as 6Y0A from
Ocho Rios, Jamaica (NA-097). Before and after the Contest he will be
active as K3DI/6Y5. QSL via home call.
9U - Alfredo, 9U5CW and Jean-Pierre, 9U5DX will participate in the ARRL
CW Contest (15-16 February) as 9U5T. QSL via F2VX.
BV - Leo, BV7FC is now also active on 160 metres.
C9 - After his trip to South Africa (see ZS below) 3DA0CA will be active
(40, 30 and 20 metres CW) from Mozambique as C91CO from 21 to 26/27
February. Best times will be from 03.30 UTC to 05.30 UTC on 40 and
30 metres and in the local eveinings from about 16.30 UTC to 22 UTC
starting on 20 and working down to 40 metres. QSL via W4DR.
CT - The NPDXG will participate in the 1997 IOTA Contest from EU-150.
DU - Dave, W1DV will be active (mostly on CW) from Manila as DU/W1DV for
the next two years. QSL via KO7V
EA - On 9 February EA4ENK/P will be active from Isla Pizarilla (DIEI
BA-28). QSL via EA5OL.
EA - On 16 February EA4ENK/P will be active from Isla Las Tapias (DIEI
BA-39). QSL via EA5OL.
EA - On 16 February EA5HT/P will be active from Isla de Quipar (DIEI
```

MU-03). QSL via EA5HT
ER_ant - Operations by Pavel, UX2HO from Vernadsky Base (WABA UR-001) on Galindez Island (AN-006) will take place with the call EM1HO [425DXN 300 - sorry for the typo!). All band (SSB, CW and RTTY) activity is expected to start in early March. QSL via I2PJA.
F - F6CXV will be active from Lozere (French Department 48) from 20 to 26 February, mainly on 40 amd 80 metres.
FS - Operations by FS5PL, FG5BG and FJ5AB from Tintamarre Island [425DXN 297] should now take place from 20 to 22 February,
FT*Z - Eric, FT5ZG started operating from Amsterdam island (AF-002) on 13 January. He will be active for one year. QSL via the French bureau or direct to F5RQQ (Jean-Marc Vigier, 4 Imp Des Lys, 63800 Cournon d'Auvergne, France). Eric faxes his logs to Jean-Marc on a monthly basis.
HP - Joel, F5PAC will be in Panama from 11 February to 7 March. He will be active from IOTA groups NA-170 and NA-202 with diploes and a ground plane for 10, 15 and 20 metres.
HP - Jose, HP2CWB and his team have been granted permission to use the calls 3F2A, H32A and H82A from IOTA group NA-202 in March.
HS - The Southern Thailand DX Group and the Diamond DX Club are organizing an IOTA DXpedition to Terutao Island (Butang group, AS-???) from 14 to 22 March. Operators (HS0/IK4MRH, I4LCK, E21AOY/8 and HS1ASN) will use the special call HS9AL and will be active with two stations SSB and CW (possibly on WARC bands as well). QSL via I4LCK (Franco Armenghi, Via Jussi 9, 40068 San Lazzaro di Savena - BO, Italy).
I - Weather permitting, the Salento DX Team will be IJ7/ from Scoglio Tondo (IIA LE-013) on 9 February.
JD1_mt - JG8NQJ/JD1 will be active from Minami-Torishima (OC-073) until 23 April. His QRV time is limited due to his working commitments on the island. QSL via JA8CJY (Susumu Sanada, 5-4 Shin-ei, Toyohira, Sapporo 004, Japan).
KG4 - Larry, KG4ML will be at Gitmo between 11 and 27 February. He will be active during his spare time (emphasis on WARC bands) and hopes to participate in the ARRL DX CW Contest(15-16 February).
KL7 - Frank, KL7FH is planning to be active from several Alaskan IOTA groups (NA-019, NA-028, NA-037, NA-040, NA-042, NA-050, NA-059, NA-074, NA-087). Check his homepage (http://www.customcpu.com/personal/kl7fh) for updated schedule.
LU - From 14 to 16 February Atilio (LU4DFH), Daniel (LU1EYW) e Jorge (LU5EWO) will be active from Gama Island (SA-022).

OH0 - OH3LQK and other operators will be active from Aland Islands
(EU-002) as OH0MEP from 7 to 10 February. They will participate in
the WPX RTTY Contest (multi-multi) as OH0M. QSL for both calls is
via OH3LQK.
S2 - Operations by I1SLY from Kutubdia Island (AS-???) [425DXN 297] have
been delayed of one month at least.
S9 - S92AT is active again for a few years.
ST0 - John, PA3CXC is currently active as PA3CXC/ST0 from Southern Sudan.
He will be visiting also Burundi and Zaire.
UA - Nick (RA1QQ), Alex (RA1QY) and Albert (RA1QHJ) are planning to be
active from Vaganikha Island (counts as RR-22-01 for the Russian
Robinson Club Award) as UE1QQQ. QSL via RA1QQ (Nick A. Smerdov,
P.O.Box 24, Cherepovets 162627, Russia).
VK0_m - Jack (HB9TL/VK6CTL) could not be active as VK0TL from Macquarie
Island (AN-005) and operated from the boat.
VP2V - Jay, WB8ZTY will be active from British Virgin Islands (NA-023) as
VP2V/WB8ZTY from 7 to 14 February. He will participate in the CQ WPX
RTTY Contest. QSL via home call.
VU_ant - Sen, VU3PMG/p will be active from Indian Antarctic base Maitri (WABA
VU-01) [425DXN 297] until 12 April. QSL via VU2DVC.
W - From 17 to 21 February Dave, K1HT (ex-K8JLF) plans to operate from
Cumberland Island (NA-058, USI GA-002S) mainly around 14.260 MHz.
QSL direct to K8JLF or via the bureau to K1HT.
XT - DF2WO, will be active (SSB and CW) from Ouagadougou, Burkina Faso as
XT2AW from 28 March to 14 April. QSL via home call.
XU - Robert, KE2FB is active (CW, SSB and RTTY, 10-80 metres) as XU2FB.
QSL via N4JR.
ZB - From 12 to 18 February Andy, G4ZVJ will be active from Gibraltar as
ZB2/G4ZVJ. He will participate in the ARRL DX CW Contest. QSL via
home call.
ZK_nc - Gun, DF4DI is active as ZK1DI/P from Manihiki Atoll (OC-014) until 8
February (QRV for Europe between 05.30 UTC and 08.30 UTC). QSL via
DK1RV.
ZS - 3DA0CA will be travelling for business to South Africa and will be
active (with 100 watts and various multiband dipoles) as ZS5UZ from
17 to 20 February on 17 and 21 metres CW between 17 and 21 UTC. QSL
via W4DR.

****
********** GOOD TO KNOW ... **********
****

E-MAIL A35RK ---> Paul, A35RK will *not* respond to any Amateur Radio
messages sent to his e-mail address, which is only for family and business
(it costs him $22 per month *plus* $1.00 for each hook up as it is a long
distance call *plus* $0.50 per message in or out!). If you feel that you must
get info to/from him, please send your message to his QSL manager Bob, W7TSQ
(W7TSQ@AOL.COM).

FT5WE ---> Claude, F5GTW (QSL manager for Samuel, FT5WE) reports that Samuel
went QRT on 29 December at 07.03 UTC after some 16,000 QSOs.

QSL 4K4QQ ---> Nick (RA1QQ) is closing logs for 4K4QQ ((ex RA1QQ/RA1Q, AS-022, 1989-1991). QSL to Nick A. Smerdov, P.O.Box 24, Cherepovets 162627, Russia.

QSL 8Q7PA ---> I2PQW is the QSL manager for 8Q7PA operated by IK2GNW only (1986). The call sign has been re-issued to someone else.

QSL CE0 ---> Dave, K7JJ (ex-W7KJJ) started receiving cards for CE0ZIJ and CE0ZIG about five years ago, but he is *not* the QSL manager for either these or any other DX station.

QSL CX8DX ---> The QSL manager for this station is *not* CE3CE [425DXN 300] but Yann, F1NGP.

QSL FK5M ---> Jean-Michel, F6AJA reports that QSL cards for FK5M (operations from Matthew Island, 3-4 December 1996, OC-218/prov) are being printed. Direct requests will be replied as soon as possible, probably during the first part of February. Bureau cards can be requested through e-mail (send your message to Jean-Michel at duthilleul@eudil.univ-lillel.fr)

425 DX News #301 [3/4]
8 February 1997 No 301 BID: $425WW301C
==========
*** 4 2 5 D X N E W S ***
==========

QSL N7QXQ/HR6 ---> NA7X [425DXN 300] is a SK. Current routing for HR6/N7QXQ (Roatan Island, NA-057) is Gareth Kimball/Oak Bay Resort, c/o Jackson Shipping Co., 5353 W Tyson Ave., Tampa, Florida, 33611 USA. Gary has openings at Oak Bay Resort for February and March (including weekends of ARRL and WPX contests). For further information, please call him at 011-504 45-2337 betwwen 23 UTC and 2 UTC.

QSL R420A ---> RV6LFE (Tim V. Konovalov, P.O.Box 3, Novocherkassk, 346427, Russia) will close the logs for R420A (Summer & December 1991) at the end of the year.

QSL R0/UR8LV ---> UY5XE is *not* the QSL manager for Oleg, R0/UR8LV. Cards should be sent direct to Vlad Shvedovsky, P.O.Box 9909, Kharkov 310070 Ukraine, or via the bureau to Oleg himself.

QSL XZ1N ---> Warren, K7WX reports that the XZ1N QSL cards for the August and November operations (23,000 QSOs) are in the final stages of production. Mailing will begin the first week in March. The XZ1N DXpedition web site (http://www.getnet.com/~kf7ay/myanmar.html) has QSL route information. "Am I in the log" checks and buro cards can be requested via e-mail to xz1n@qrz.com

QSL VIA DL6ZFG ---> Rolf, DL6ZFG is *not* the current QSL manager for UV3CC/UA1P, 4K2/UV3CC, 4K2CC, RM8MY, RM8MW, UF6FKW, 4L1FKW, R7RG, UL1RWR, RE92C, UL0ACI, UL0A, UL7ACI, UN0AA, EX8F, UL7OE, UL7AAE, RL7AA, RA6WF, UI9BWO and UL8AWL. He *is* the QSL manager for the following stations: 4K2BY (from 1 January 1993 to 31 December 1994), 4K2OKV (from 1 January 1991 to 31 May 1993), 4K2/4K4BAT (from 1 January 1992 to 31 July 1993), 4K4BAT (from 1

January 1992 to 31 July 1993), 4K4BAT/a (March-April 1993), 4K4BEU (from 1 January 1990 to 31 October 1993), 4K4BEU/a (May 1993 only), 4K4BEU/p (July 1993 only), 4K4BEM (from 1 January 1991 to 31 August 1993), 4K4BG (from 1 January 1991 to 31 October 1993), R100R (EU-133, May 1995 only), RA9LT/9 (AS-089, July-September 1995 only).

QSL VIA UX0UN ---> UX0UN (Nikolaj Sergienko, P.O.Box 55, Kyiv 252135, Ukraine) is the QSL manager for the following stations: RT5UN, UB5UAL, UT5UDX, UT100UDX, UT0U, US0U, RY0U.

V31BB ---> The call V31BB, once belonging to the late Jim Zimskind, has been re-issued. QSL is via P.O.Box 3132, Belize City, Belize.

ZY0FI ---> Ronaldo, PS7AB reports that the recent ZY0FI operation (QSL via PY2LLD) was a pirate.

QSL riceived via direct: 3V8BB, 5H1HW, DP0MIR, FR5ZU/T, IC8/IK8UHA, IC8/IK8VRH, IJ7/IK7IMO (IIA LE-018), IJ7/IK7XIV (EU-091; IIA LE-001), JY9QJ, OD5NJ, P29VXL, R3AA/9 (AS-109), RF0Z (AS-095), K9PPY/VE1 (NA-010; CISA NS-010 014, 015, 016, 017).

414. Logging program

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-08 00:00:00 UTC
From: k4to@mis.net
Message-ID: <32fc9d90.1572283@netnews.mis.net>
Source record: 33585

Thanks for reading this. I am presently using Electronic 2nd op v4.0. It is no longer available-nor is it supported. I need a good logging program which will cover all DXCC and VUCC. It should operate under Windows95 and 3.1. It also needs to accommodate my pressent log files which have a .dbf file extension and should be able to merge contest logs from CT using the .res file extension files. Of course I need to monitor the DX packet cluster whle I'm doing all of this, although under windows 95, I could probably just open another window with a terminal program. So what are your reccomendations and experience, good and bad? Please Email them to me at the above address and Thank you all very much.

73 & DX

Dave, K4TO

:This is a multi-part message in MIME format.

Why? Doing it that way only wastes disk space, time, and cost for some
people. This is not the WWW and html formatting is a waste of time and
effort.

Hi, I was wondering if there were any WABC listeners in Ontario and where they are located.
On a good night I've heard their broadcast in Toronto on a very inexpensive pocket am/fm radio.
also, anyone know what kind of wattage they put out..

Thanks in Advance..

Hello,

If i understand you, you use a scanner to receive NOAA pictures ?
Could you please send me the frequenties for NOAA and is this wide or
narrow FM ?

The antenna is this also importend ?

Thanks for all your help,

73

Try LogPlus by Bob winters, N7XR (ex-KD7P). It does everything (and more) that you want. It is a DOS program and works under Win3.1 and Win95. I have been using it for several years and am running it on Win95 with absolutely no problems.

Check out his web site at:

http://www.everett.net/users/logplus/plus.htm

and download a demo at:

http://www.everett.net/users/logplus/software/

Through the magic of modern technology, Carl (WA6VSE) and myself have been in contact with each other. We have agreed that this in-fighting, here on both rram and rrap does nothing to protect the ARS from the battles that are being fought now and soon to be declared.

In light of this, Carl has agreed to keep ALL discussions on a civil basis (no insults, innuendo, etc) and I have agreed to stop my self professed harassment of Carl.

We both feel that these newsgroups can best be used to further the ARS and that there is essentially room within the ARS "charter" for all concerned, both those advocating the retention and those advocating the elimination of the code requirement.

I personally will endeavor to keep this "peace". I have every confidence that Carl will do so as well and we both encourage all participants in the newsgroups to do the same.

Now is not the time to be a house divided.

As was said once is now said again "Once again, peace is now at hand and we can see the future.

On behalf of Carl and myself

73,

Steve KF2TI

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the poster's specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's.
I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.
Post Date: Sept. 6, 1996

426. Panasonic RF3100

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-09 00:00:00 UTC
From: pmoss@yoda.alt.za
Message-ID: <5dldvb$n8v@Raven.und.ac.za>
Source record: 33597

I have been given a Panasonic RF3100 and it seem to be dead or
almost so on shortwave. Would appreciate any information on
this set. Including history, mods, repair and experiences. I have
searched the web and found alsolutly no information at all. If any
pointers are known, please let me know.

The repair: A check of all stages show that they are working to some
degree. The LA7254 dbl bal mixer seems to be the culpret but
replacement makes no difference to the set. Some devices have been
replaced in the RF amp section but these all have some gain. The
second mixer is used for AM and that works fine.

Help and insperation required please, by e-mail if possible as my news
server is down and out.

Peter

Hi Dave,

Check out DX4WIN; there is a home page at http://www.erols.com/pvander
which has a demo you can download.

I'm currently working on version 1.10 which has support for additional
VHF bands and VUCC. By the time you have evaluated the current
version, these new features should be available.

SB DX @ WW $OPDX.291
Ohio/Penn DX Bulletin No. 291

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 291
BID: $OPDX.291
February 10, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W2GD, KB2PFP, N5FTR, NL7TB, KX9X, W0YG, EA3NY, G4BUE & DX News Sheets, G4ZVJ, JA3AAW, LU2BAR, LX1NO, PA3DMH, RA1QHJ and 9N2NOM/G3NOM for the following DX information.

3B8, MAURITIUS. The "DX News Sheet" reports Adriano, IK2GNW, will be active from here February 20th to March 1st as 3B8/IK2GNW. Planned activity will be CW/SSB and RTTY, with an emphasis on 160 and 80 meters.

3W, VIETNAM. There has been a report from Japan that 3W5FM was heard on TOPBAND. 3W5FM was heard calling CQ DX on 1826 kHz between 1420-1445z.

5K3, COLOMBIA (160 meters). Do you have Colombia confirmed in SSB on the 160 meter band?. If you don't here is your opportunity. The Colombian Amateur Radio League (Liga Colombiana de Radioaficionados) will operate the special callsign 5K3SB during the next CQ WW SSB 160 Meter Contest (February 21-23rd) in the multi-operator single transmitter category with full size dipoles. Look for them in the DX window (1830-1835 kHz). The event will be carried out on a Military Base near Bogota and has the offical approval of the Ministry of Communications. QSL card via HK3DDD. For any additional information on this operation, E-mail can be sent to Juan Marcos Rico at: ju-rico@uniandes.edu.co

8P, BARBADOS. Begin looking for Bob/AA1M, Jim/W1HL, Mike/W1USN and Tim/KA1MID to be active February 17-24th. Currently their callsigns are unknown, but the group plans to be active on all bands CW/SSB. QSL to home calls.

9G, GHANA. Steve, PA3GBQ, now active as 9G5BQ until early March, was heard on 80 meters. He was on 3514 kHz starting at 2200z and was heard as late as 2345z. He was also active on 18074 kHz around 1630z. For more info regarding his trip to 9G-land, a small Website has been set up and can be found at: http://www.igr.nl/~pa3dmh/9g5bq.htm

C5, THE GAMBIA. Brenden, G0UCT, should be active now through February 14th. He will be operating as C56XX.

FS, ST. MARTIN. Eddie, EA3NY, plans to be active during ARRL DX SSB Contest, March 1-2nd. He will use the callsign FS5PL during the contest and a few days before. Eddie will be Single/Op on all bands. Those interested in schedules for 80 or 40 meters, send E-mail to: ea3ny@tro.filnet.es

JD1, MINAMI-TORISHIMA. JG8NQJ/JD1 will be on the island until April 23rd, but activity will be limited due to his work schedule. Operations will be on 40-10 meters, and the best times to look for him are: 0100-0200z, 0600-0700z, 0930-1100z and 1300z. QSL via JA8CJY: Susumu Sanada, 5-4 Shin-ei, Toyohira, Sapporo 004, Japan.

OD5, LEBANON. Norby, LX1NO, will be visiting OD5 from February 13-16th. There might be a chance for him to be active from here signing his homecall/OD5 or with the call of his host Jamil, OD5PN. He will be active mainly on 20/15 meters in the morning or afternoon (probably his local time). QSL via LX1NO/LX9EG.

P4, ARUBA. Look for P40W to be active in the ARRL DX CW Contest as a Single-OP/High Power/All Band entry. Check 160 and 80 meters on the hour or half-hour during darkness. Operations will be around 025 kHz on all bands.

QSL INFO AND NEWS......
Buzz, N5FTR, reports that Rusty, KG4AU, has decided he wants to handle his own cards. So, all requests should now be sent to Rusty via KG4AN (not N5FTR), the Gitmo Club Station (Guantanamo Bay). Buzz states he is still receiving quite a few requests for cards, but he no longer has the logs and has sent Rusty all the blank cards. He knows this is expensive and an inconvienent for those who have seny for the card, but all he can do is return their cards with the information for the new routing....

Buzz, N5FTR, states he will now send cards to the outgoing QSL Bureau only one time a year for stations he is manager for. He has recently sent off a 16 pound box of cards in January, and will not send another until January of 1998. Those seeking a card through the bureau for one of the stations that he manages will have to wait a while longer, but it will be sent. Of course, those requesting a card and sending a SAE with the appropriate postage (or provisions for same) will receive their card as quickly as they can be confirmed. Buzz handles cards for the following active stations: ZD7JP, OA4DTW (ex-9M8BT and P29BT), V31ML, A41KJ, and V31SD. He also has the logs for the following stations that are now QRT or not currently active: 9M8BT, 9M8FH, 9M8LL, 9M8YL, Z21BA, ZD8KFC, PJ0/KB5DZP, V31BR, V47LDX, and J87CQ.

Bob, W7TSQ, reports that Gary, N7QXQ/HR6, (on IOTA NA-057) has decided that Bob will take on the new responsibility for his QSLs. PLEASE NOTE that Gary is just about out of cards in HR6, so more will be ordered when the next mailboat leaves for the states (in about a week). Most of those

cards will be shipped to Bob and a few to Gary. Gary will send Bob all the logs through March 31, 1997, which Bob should have in his hands about mid April. If you have sent cards already to Gary's Tampa address, please just wait!! If you have sent cards to NA7X (now a silent key), please send them again to Bob. For a direct response - a SASE or SAE plus postage is required. Cards received without, will be answered but via bureau!!! Bob states that Gary has been waiting for an HR6 callsign, but that seems like it may never come about.

RUSSIAN DX NEWS..... RA3SL reports that a Russian expedition to Waganiha Island (RR-22-01) will be active during the second half of February. The operators will be Nick/RA1QQ, Alex/RA1QY and Albert/RA1QHJ, and they hope to use the special callsign UE1QQQ. QSL via RA1QQ (Nick A. Smerdov): P.O.Box 24, Cherepovets, 162627, Russia. This island will be good for RRC-Award (Russian Robinzon Club)..... Also, Nick, RA1QQ, reports that the logs for 4K2QQ from AS-022, (1989-1991) will be closed at the end this year. If you do not have the QSL-card, please QSL again via RA1QQ.

USI ALERT (New WA island). Jim, W9HAO, has a sked with Phil, KJ7NS, on Maury Island, WA, on Tuesday, February 11th at 1700Z. When qualified, Maury Island will be WA-016S. Please allow Jim to make his sked on 14260 kHz before calling Phil.

V2, ANTIGUA (UPDATE). Last week we mentioned that Sean, KX9X, and Matt, NM9H, would be active from February 12-19th, CW/SSB and RS-12. But due to popular request, the team WILL also be active on RTTY from the Caribbean super-station V26B. QSL information, assuming they receive the callsigns they apply for, are as follows:
V26CW via NM9H - Matt Kolb, 1301 S. Second St., Gillespie, IL 62033 USA
V26NA via KX9X - Sean Kutzko, 2614 Greenleaf Blvd., Elkhart, IN 46514 USA

V5, NAMIBIA. Clarlie, W0YG (ex KY0A), left last Wednesday and should be once again active from here by the time you read this. He tells OPDX that the operation will start Monday evening (V5 local time), February 10th, on the top band. Charlie and others will be active as V51Z through February 17th. Operations will be on all bands, mostly CW, but with some RTTY on 20M only. They will concentrate on the low bands and the WARC bands. They will also be active in the ARRL DX Contest. QSLs for V51Z are via ZS6EZ.

V6, MICRONESIA. Sam, V63KU, is very active on 20 meters SSB and can usually be found active for a few hours between 14175 and 14200 kHz starting around 2100z. QSL via JA6NL at: PO Box 1679, Truk Lagun, Micronesia.

ZB2, GIBRALTAR. Andy, G4ZVJ, plans to sign ZB2/G4ZVJ from March 12-18th. Activity will be mostly CW on all HF bands. Suggested frequencies are: 1827, 3503, 7003, 10103, 14027, 18077, 24897, and 28027 kHz +/-. If there is a demand, Andy states that he will be active on RTTY. The ARRL DX CW contest falls during his stay. However, Andy states, "My QTH is on the "WRONG" side of the ROCK for North America ;)." QSL via G4ZVJ (Direct or via Bureau): Andy Chadwick, 5 Thorpe Chase, Ripon,

North Yorkshire, HG4 1UA, U.K.

ZC6, PALESTINE (Gaza and West Bank). Ray, 9M2NOM/G3NOM, informs OPDX that there is the possibility of an operation from the Gaza Strip (Palestine) from February 12-14th, using the call sign ZC6MPT. This will be followed by a visit to the West Bank February 14-16th, possibly using the operator's own callsign/ZC6 for callsigns. A small group of Japanese operators who are members of the recently formed IARV (International Amateur Radio Volunteers) will be setting off for Palestine on 11th February 1997. Their mission will primarily be Phase 2 of a humanitarian aid project which started last June in the Gaza Strip. They will be installing and commissioning VHF/UHF transceivers at the hospitals and in ambulances on the West Bank. Also, they will be holding discussions with officials about future amateur radio volunteer work. Due to the above commitments, there is only a 50/50 chance of operation at this time. The operators will be Yoshi JA1UT, Jiro JA3UB, and Teru JA3TXZ. They hope to assist the Palestine National operators to activate ZC6MPT from the HQ of the Ministry of Posts and Telecommunications in Gaza City. Operations are likely to be confined to 14 MHz SSB around 14190 kHz. Permission to operate from the West Bank is more difficult and is less likely. However, if permission is granted, it is likely that callsign/ZC6 calls will be used. QSLs will be handled by JA1UT. Ray, 9M2NOM/G3NOM, states "DXers are reminded that the European World Wide Award (Award Manager F6FQK Coucil of Europe)) does recognize Palestine as a separate country already, although DXCC accreditation is still not forthcoming."

>Many thanks & 73 Dennis, AE4EI

Hi Dennis & others. I spoke with John (W4FRU) on the LL
and he answered several questions for me re: QSL'ing
for VK0IR etc. the main points were.

1- John handles cards for many stations. He requests
that you include only qso's with the same station
with any given mailing. Example all VK0IR in one
mailing, all TO0R in seperate mailing etc.

2- It is perfectly ok to combine multiple qsos on one
card. He will not require 1 qso per card.

3- If you send contributions, he will see that it gets
to the proper destination. There have been
other published methods to contribute but if
he gets contributions he'll handle them per above.

3- Double check your qso information, to be sure
you have the date, band, mode & time info
correct.

4- John feels that a single 32 cent stamp should
be enough to return cards to any U.S.A. ham.
Goes without saying, be sure to include your
SASE with your mailing.

5- John's address is J. H. Parrott Jr.

I lived in China for a year ('94-95) and happened to have a couple of
IRC's with me. I was told by the Chinese post office that "yes...they
would accept IRC's for internal postage, but not for postage that left the
country. That would require additional money. Postage within China is
quite cheap... the cost of external mail is quite expensive for most
Chinese. If a ham in China told me he needed more than one IRC, I'd
believe him... and send more. I'd probably do that for most third world
countries. International agreements only mean what that country decides
they mean.

Linda Stocks	What I do today is important
AA6MR	because I am exchanging a day
	of my life for it.

435. Custom 4CX1000 Amp

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-10 00:00:00 UTC
From: Dale Powell <powell@polarnet.com>
Message-ID: <32FFCE3E.2245@polarnet.com>
Source record: 33606
Cross-posted to: rec.radio.amateur.space,rec.radio.amateur.equipment,rec.radio.amateur.boatanchors,rec.radio.amateur.antenna, rec.radio.swap,rec.radio.amateur.dx,rec.radio.amateur.misc

For sale: Custom built 4CX1000 amplifier. Consists of separate RF deck, control panel, and PS. RF deck uses motor driven vacuum variable cap and roller inductor, with potentiometer feedback for LED indicators on control panel. Will cover 10-160 meters, has input pad to prevent overdriving, 15 watts in will produce approx 1500 out at 3000 VDC. Control panel has large meters for plate voltage and current, bias voltage and grid current. Power supply components included but not built. Blower included and mounts remote of RF deck. Could mount entire system in rack, or use RF deck remote of operating position.

Prefer trade for legal limit desktop amplifier or ??? Make cash offer.

436. Anyone have a 1948-1955 U.S. Callbook?

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-11 00:00:00 UTC
From: jrybak@MesaState.EDU
Message-ID: <5doe5s$31n@mesa7.mesa.colorado.edu>

I'm looking for someone with a U.S. Callbook from the period 1948-1955.
I would like to see who held my call at that time. I would like to
contact him/her if possible.

Thanks.

Jim Rybak W0KSD

PROPAGATION - by AD5Q HOUSTON, TEXAS -- FEBRUARY 1997

We are now past mid-winter, a time when night path conditions return to 20 Meters during sunspot peaks. For us, these conditions will not be seen until late April. While many are watching the sun for signs of the new cycle, others are at their radios finding paths to needed DX on different bands or at different hours. We all found a path to Heard on 20 by taking advantage of the long haul pipelines at the beginning and end of the day. These occur mostly during daylight while the sun is low in the sky, but can extend across areas of darkness in the southern hemisphere where night paths are seasonally open. Contacts on the other side of the world are made by exploiting these oppor-tunities.

There is little activity on 10 & 15. North-south paths are open daily, and on 15 we can work east as far as Africa. But it is the northern latitude paths that populate the band, and no seasonal relief is expected until the fall. The daypath to Europe is on 20, which remains marginally open for several hours beyond its greyline peak in the morning. The ARRL DX Test is coming, where daytime activities include chasing Caribbean mults on 10 & 15 and listening to the east coast run Europe on 20. Marginal conditions are expected to Europe on 15.

A rich variety of DX openings can be found on 40. The best path to Europe begins in late afternoon while it is still daylight in Texas. This opening extends further into the evening on the east coast. I have no idea what 40 sounds like from there in a contest, but it must be nice. Later in the evening the MUF drops below 7 MHz at high latitudes and european activity drops. On most evenings we find propagation across lower latitudes, such as to Africa with its large pileups. There is also a sunrise peak sweeping across Russia at this time, but polar paths are difficult on 40 so most signals are weak. After midnight this opening moves across the rest of Europe - as the Pacific opens up and darkness approaches Japan. Access to Asia broadens through the pre-dawn hours and peaks after sunrise. There is also a brief high latitude short path pipeline along the northern greyline (into Scan-dinavia and Russia from W5) which many without directional antennas mistake for long path. Actual long path openings occur in several direc-tions, and the west coast knows them best.

On lower bands, the best opportunities are at sunrise and sunset peaks. The european peak is after midnight, but the stronger EU stations can be worked earlier in the evening (in pileups) when everybody is stalking the bands. After midnight, the band is quieter, the DX is louder and the east coast is mainly asleep :-)

Mike,
This is a matter of a simple IF filter replacement for most
scanners. Although wideband IF filters are not available at your local
Radio Shack, they are available from several mail order places. A
detailed description on how to do this appears in the Weather Satellite
Handbook by Taggart.

Are you into HOT CHAT? We've got the world's largest voice-personal dating system, as well as the hottest, sexiest "1 on 1", "2 on 1", and "PARTY-LINE" chat you'll find anywhere, all in one place! And you don't have to call a 900 number to get in on this hot phone fun!

You can choose from 5 hot programs that are sure to fulfill your every desire!

You can press 1 from the main menu to choose from our sexy "1 ON 1" PLEASURE MENU, then:
*to talk to a BEAUTIFUL SEXY GIRL, press 1.
*for a 1 on 1 session with an experienced DOMINANT MISTRESS, press 2.
*for steamy talk with a LUSCIOUS TRANSVESTITE, press 3.
*for an erotic 1 on 1 chat with an EXOTIC TRANSSEXUAL, press 4.

*for some man to man action with a HOT GUY, press 5.
You'll be billed just $3.99 per minute for your selection.

Or you can press 2 from the main menu to DOUBLE YOUR PLEASURE, then:
*to speak to 2 HOT SEXY GIRLS, press 1.
*to get it on with a swinging WILD COUPLE, press 2.
You'll be billed just $4.99 per minute for your selection.

Or you can press 3 from the main menu to join the GROUP ORGY LINE!
*You can party with the nations nastiest swingers for only $2.50 per minute.

Or you can press 4 from the main menu, then:
*Press 1 to join the FANTASY NETWORK. This is the world's only phone service that allows you to connect with people who share your personal fantasies. This state-of-the-art voice mail system lets you listen to messages from beautiful girls, sexy transvestites and she-males, gay and bisexual males, and dominant women. Leave them a hot and sexy message, then call back to see what erotic message they have left for you. You'll be billed just $3.50 per minute.
*Or press 2 to listen to a hot selection of recorded fantasies steamy enough to make you explode! Choose from beautiful, sexy women's fantasies or domination stories. You'll be billed just $2.49 per minute.

Or you can press 5 from the main menu for the HOT AND NASTY DATELINE, where you can listen, and respond, to voice personal ads from hot horny girls in your neighborhood, including their real names and home telephone numbers! You can also leave your own personal message for people to get in touch with you. Make new friends on the world's busiest voice personal lines! Meet singles or couples, gay or straight; you'll be billed only $2.99 per minute.

***JUST CALL 1-800-756-3906 to use your Mastercard, Visa, or American Express card. The charge is just $2.49-$4.99 per minute, plus a 50 cent connection fee. 18+ only.

***OR CALL 1-900-745-4398. The charge is just $2.49-$4.99 per minute. Must be 18 years of age or older.

Call now!!! YOU WON'T REGRET IT!

> 73s Mike

Today is usesd my scanner Bearcat UBC 9000 XLT and the program WXSAT
(soundblaster) to receive NOAA pictures.
It works GREAT !!! I get the compleet pictures, a friend of me have a
real NOAA receiver and we putt the two pictures together and they are
the same. So my scanner works great to receive weather sattelites on
+137 Mhz.

No modifications on my scanner, and i use a normal dualband antenne for
144 Mhz and 440 Mhz.

First, the manual can be ordered from the UK distributor. I don't know
of an on-line manual.

The only programming software is sold by Yaesu, and developed by RT
Systems in the US. It is the ADMS-1C software which includes a RS232
connector that connects to the mic jack of the FT-50R.

For a great link to a webpage that supports the 50R, here it is!

http://members.gnn.com/hca/ft50/index.htm

Have fun! It is the most versatile radio I own!

KG4 calls aren't issued by the FCC. (I think they come from the
Department of Defense, as KG4 is a military base) The old KX6 calls
on Kwajalein were issued the same way. Most databases & books are
based only on the FCC files, so the KG4s will be missing.

I have a KG4MN QSL, so I know he's legit.

I just got this reciever from my brother-in-law, and have not
even plugged it in yet. I don't know the first thing about it. It has
an internal mounted antenna that extends to several feet (I have not even
pulled the antenna out yet, but I know it is a long one).

It has band markings on the front that say A B C D E and then 80M
40M 20/15M 11/10M I am assuming that the letters are the Short Wave
stuff, and that the numbered ones are the standard Ham bands.

Anyone with any information about this unit, suggested start-up
procedures, or certain freq's to start with please let me know.

Thanks for the info,
Daniel M. Stockton

I worked V51KC in December of 94 and V51E in April of 1996. Both of the operators indicated that the QSL route was via K8EFS. I have mailed cards individually with SASE to:

MERLIN D ANDERSON
4300 S COCHRAN
CHARLOTTE, MI 48813

The oldest card was mailed 11/30/95 and to date still no answer for either QSL request. Does anyone out there know if K8EFS is an "SK", or if there may be some other reason for the QSL delay? I have checked with QRZ, Buckmaster, Whitehorse CD ROM, and the FCC which all list the above address. If anyone has any info or knows this gentleman I would appreciate any help that can be provided. Thanks in advance for your help.

I must also suggest LogPlus! by Bob Winters, NX7R. I have used it for 5 or 6 years and it is a gem. Go to VE7TCP.ampr.org or KA9FOX page and you will find this program (and others).

Bob gives super support to his creation and this is the most important factor, in my opinion.

```
The official Kenwood TH-79E/A modifications can be found on my homepage.
Those are JPG files that you can download and vieuw with a picture
viewer.

Gives you a answer why some TH-79's aint receiving 800 - 999 Mhz

Good luck,

William

459. Tubes and Test Equipment

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-13 00:00:00 UTC
From: Kevin Harlan <harlan@deltanet.com>
Message-ID: <01bc196b$58107580$29cab2cc@Psrklein>
Source record: 33630

USED TUBES,UNTESTED BY US, SOLD "AS IS,WITHOUT WARRANTY",
These tubes were part of the estate of a long time radio
repairman,who was in business in the San Francisco area
from the 1930's to the 1970's.The tubes were bulk packaged
in large boxes marked "tested ok", however we have not
checked any of these tubes. We have been advised by one
of our customers that some of the tubes we shipped were
duds. These tubes have been priced accordingly.

****
* Shipping for the below tubes to anyplace in the USA: *
* 1 to 6 tubes, $3.00 // 7 or more tubes, shipping free.*
****

****
Used Tubes for $1.00 each:

OA2, 0C3, 1A7GT, 1H5GT, 1H5GT/G, 1LH4, 1R5, 1S5, 1T5GT,
1X2B, 1T4, 1U4, 1B3GT, 1N5G, 1N5GT, 3BC5, 3Q5GT, 3Q5GT/G,

I have finally got the chance to update a few things on my pages. Just been
to busy with other things and I havn't posted a update for awhile now.
Would like to get some hits on my pages and feel free to comment via email
or sign my guestbook.
Have you ever wanted to view more than just one DX Web-Cluster ??
Check out the page I made to view three of them, just click on "Mega-Web"
to see plenty of DX from the worldwide clusters.
Plus the Club pages have been updated The Central Virginia Contest Club and
if you into kayaking or canoeing check out the Blue Ridge River Runners page.
I also have a kayaking page but hasn't been updated for awhile and will be in
the works soon on a new page.
Stop on by and have a visit and THANKS for everyone who has stopped by for a
view.

Hi to all,
I,m interested in corresponding with any fellow 6 meter band enthusiasts anywhere !
With an interest in discussing topics such as propagation, antennas, transcievers and the like.
I reside in Canberra, Australia and have had a long term love for 6 meters, down under we call it the Magic band, or some call it the patience band, I agree with both nick names !

Looking forward to hearing from you

Cheers
Jim

SB DX @ ARL $ARLD009
ARLD009 DX news

ZCZC AE09
QST de W1AW
DX Bulletin 9 ARLD009
From ARRL Headquarters
Newington CT February 13, 1997
To all radio amateurs

SB DX ARL ARLD009
ARLD009 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, the 599Rpt, Dennis, K7BV, Jack, W1WEF, the DXNL, the Yankee Clipper Contest Club PacketCluster Network, and Contest Corral from QST. Thanks to all.

UGANDA, 5X. Gus, 5X1D, is QRV from here, and can usually be found on 6 and 2 meters. QSL via SM0BFJ.

GHANA, 9G. Steve, PA3GBQ, is QRV as 9G5BQ until early March. Lately, he has been found on 3514 kHz starting at 2200z and was heard as late as 2345z. QSL to PA3GBQ.

MINAMI TORISHIMA, JD1. JG8NQJ/JD1 will be here until April 23. His activity will be limited due to his work schedule, however. Look for him on 40 through 10 meters from 0100 to 0200z, 0600 to 0700z, 0930 to 1100z and 1300z. QSL via Susumu Sanada, 5 4 Shin ei, Toyohira, Sapporo 004, Japan.

ARUBA, P4. Look for P40W to be QRV in the ARRL DX CW Contest as a Single Op, High Power, All Band entry. Check 160 and 80 meters on the hour or half hour.

NETHERLANDS ANTILLES, PJ2. Jack, W1WEF, and John, W1BIH, will be QRV as PJ9C from Curacao as a Multi/Single entry in the ARRL DX CW Contest. Before and after the contest, look for PJ9/W1WEF. QSL PJ9C via K1CPJ. QSL PJ9/W1WEF direct.

ST. KITTS, V4. Alex, W2OX, will be QRV as V47KP from February 13 to early March. He will also be active in the ARRL DX CW and SSB, and CQ WW 160 Meter SSB, Contests. QSL via K2SB.

MICRONESIA, V6. Sam, V63KU, is very active on 20 meters SSB and is usually QRV for a few hours between 14175 and 14200 kHz starting

around 2100z. QSL via JA6NL, PO Box 1679, Truk Lagun, Micronesia.

BURKINA FASO, XT. Dan, XT2DP, has been QRV on 80 meters around 3795 kHz at 2000z. QSL via WB2YQH. XT2AR is also QRV from Ouagadougou, and will be here until February 26. QSL via W4BYG.

CAMBODIA, XU. Robert, KE2FB, works at the US Embassy and is active as XU2FB on 80 through 10 meters. He uses CW, SSB and RTTY. He can also be found on 10 meter FM. QSL via N4JR.

QSL ROUTE CORRECTION. It was mistakenly reported in ARRL DX Bulletin ARLD008 that K7BV's zip code was 98704. The correct zip code is 89704.

THIS WEEKEND ON THE RADIO. The ARRL International DX CW Contest, the YL/OM Contest, and the School Club Roundup should keep you busy this weekend. Please see February QST, page 103 for details.

470. Yaesu 's New Radio

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-14 00:00:00 UTC
From: Geoff Brown <equinox@itl.net>
Message-ID: <330522B3.6A4E@itl.net>
Source record: 33641
Cross-posted to: uk.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.dx,

Yaesu have a new HF Radio!
The FT920, It looks like an FT1000MP and is DSP plus 50MHz.
It has two VFO's (controls) which indicate it may be possible to monitor
2 bands if a second bandpass filter is installed like the FT1000...
that is not known yet.
You can view the radio at:
http://www.radiosales.demon.co.uk/index.html

473. St. Peter & Paul DXP. is QRT

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-14 00:00:00 UTC
From: ps7ab@digi.com.br
Message-ID: <33046e4c.1908039@news.digi.com.br>
Source record: 33644

Here are the news after a QSO with ZY0SK at 10:30 UTC, 14/feb/97.

The St. Peter and St. Paul Rocks DX-Expedition is now QRT! Last QSO
was logged at 10:15
UTC. Despite the great difficulties Tino and Karl made almost 10.000
QSOs.

The skiper of the ALFA boat decided to go fishing in another area.
Consequently the operators are
today dismantling the equipments and going aboard the "NAMORADO"
fishing boat. They will
depart to Natal tomorrow morning and are expected to be home on
tuesday.

Tino, PT7AA, will stay in Natal for a few days resting and when he
returns to Fortaleza he will bring
the logs to be fed into the Home Page for consultations.

Yeah right ...

476. QRO HF amplifier owner Feedback.

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-15 00:00:00 UTC
From: jsjones@intrlink.com
Message-ID: <5e3adm$362@clark.zippo.com>
Source record: 33647

I have been looking at the Alpha series amp 91B but came across QRO amplifer out of Ohio and noticed they have a very simular amp as far as tubes and output. The owner there and myself have had two conversations about his amps especially the HF2500 DX but I have noticed it is alot bigger in size and weight. I ask the owner of QRO about this and he says that the weight and size are due to the amp having a much bigger transformer and actually a second transformer for the screen circuit needed for the 4CX400A'S. QRO has a much faster delivery time and I am familuar with it's owner's former association with Commnader amplifiers. The amp is also about 100.00 less and made by American hams which I like. The amp is huge though so it would be hard to find a place to put it compaired to the Alpha 91B. So again the QRO amp has given me something to think about. I would love to hear from some actuall owners and get your feedback on any problems you might have had and how they were dealt with. I would also like to know your set up and what transciever you are using your amp with. Any and all replies both pro and con would be appreciated. 73, DE-KS4HK, Steve

477. Re: Kenwood TH-79E/A

Be aware that these file contain obvious errors. Look at table 2: the E and E3 units seem to be electronically identical, yet their frequency coverages differ.
Mmmm.... Wonder what else is wrong!

478. 4N & 4O Prefixes ??

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-15 00:00:00 UTC
From: Rod <ac6v@ix.netcom.com>
Message-ID: <3305D488.3AF8@ix.netcom.com>
Source record: 33649

Someone asked about the 4N & 4O prefixes. The AC6V Mega Prefix list has them as follows:

4N1 Yugoslavia
4N4 Bosnia Herzegovina
4N5 Macedonia
4N6 Yugoslavia
4N7 Yugoslavia
4N8 Yugoslavia
4O1 Yugoslavia
4O4 Bosnia Herzegovina
4O5 Macedonia
4O6 Yugoslavia
4O7 Yugoslavia
4O8 Yugoslavia

Can anyone confirm these please. They were taken from a Ham Radio Magazine last year.

The Mega Prefix List is at URL:
http://pw2.netcom.com/~ac6v/pageab.html

Thanks
Rod in San Diego

Ask Kenwood for it, those are official papers from Kenwood
You know better ? Work for Kenwood.

/

7Q - 7Q7EH is active on 15 and 20 metres RTTY. QSL via AA9HD
9N - 9N1RHM is active on CW and RTTY. QSL via KV5V
9Q - Frank, 9Q5PA will be active for 15 months. QSL direct to =
Frank
Patris, c/o American Embassy Kinshasa, Unit 31550, APO 09828, USA
C6 - Dick, N4RP will be active on CW from NA-048 as C6A/N4RP until =
17
February. He will participate in the ARRL DX CW Contest. QSL =
```

via
home call.
GU - Mathieu, F5SHQ is QRV as MU0ASP from Guernsey (EU-114). QSL =
via
F5SHQ.
HK - The Liga Colombiana de Radioaficionados will participate in =
the
forthcoming CQ WW SSB 160 Meter Contest (21-23 February) with =
the
special callsign 5K3SB. QSL via HK3DDD.
HV - Francesco, IK0FVC and Maurizio, I0HCJ will participate in the =
ARRL
DX CW Contest (15-16 February) from HV4NAC on 40 metres. QSL =
via
IK0FVC (Francesco Valsecchi, Via Bitossi 21, 00136 Roma-RM, Italy).
KH9 - KC7FWZ/KH9 is currently active from Wake Island (OC-053).
OD - Norby, LX1NO/LX9EG will be visiting Lebanon between 13 and =
16
February. He might be active (20 and 15 metres) either as =
LX1NO/OD5
or OD5PN (the latter being the call of Jamil, his host). QSL =
via
home call.
OX - OX3RO is active on 20 metres RTTY. QSL direct to Bendt =
Lothsen,
P.O.Box 1416, Nuuk 3900, Greenland.
P4 - P40W will be active during the ARRL DX CW Contest =
(Single-OP/High
Power/All Band).=20
PJ2 - Jack, W1WEF and John, W1BIH, will participate in the ARRL DX =
CW
Contest as PJ9C from Curacao (SA-006). Before and after the =
contest
they will be QRV as PJ9/W1WEF (QSL via home call). QSL for PJ9C =
is
via K1CPJ.
PY0_sp - ZY0SK and ZY0SG [425DXN 299] went QRT on 14 February at 10:15 =
UTC
after some 10,000 QSOs. Operations from St.Peter and St.Paul =
Rocks
(SA-014) had initial problems with RF feedback between the =
two
stations (these problems prevented them from being active on =
RTTY).
Karl and Tino were not able to operate between 12 UTC and 18 =
UTC
because of the extremely high temperatures.
S2 - Hannes, Joerg and Dietmar started their operation as S21XX =
[425DXN
300]. Problems with the generator were fixed after the first =

two
days. They have made some 10,000 QSOs so far (300 RTTY, 300 SSB,=
all
others on CW). On 160 metres 700 QSOs have been made with Europe =
&
Asia and 23 with North America; QSOs made on 80 and 40 metres =
are
2200 (145 with North America) and 2500 (245 with North America =
)
respectively. Dietmar and Joerg were expected to leave on =
Friday
14; Hannes (S21XZ) will be active until 18 February.
V4 - Alex, W2OX is currently active as V47KP from St. Kitts (NA-104). =
He
will participate in the ARRL DX CW and SSB Contests and in the =
CQ
SSB 160 Meter Contest. QSL via K2SB.
W - Pete, W2WI will be operating from Long Beach Island (IOTA =
NA-111,
USI NJ001S) from 12 to 16 february.
W - Herb, KE7PB and John, NL7TB will activate Bradford, Robins =
(both
Multnomah County, OR), Cascades and Hamilton (both Skamania =
County,
WA) Islands on 26 February starting 17.30 UTC. QSL via home calls.
ZC6_GAZA Ray, 9M2OM (ex-9M2/G3NOM) reports that a small group of =
Japanese
operators (Yoshi, JA1UT; Jiro, JA3UB; Teru, JA3TXZ), who are=
members
of the recently formed IARV (International Amateur =
Radio
Volunteers), will be setting off for Palestine on 11 February.=
Their
mission will primarily be Phase 2 of a humanitarian aid =
project
started last June in the Gaza Strip. Due to the above =
commitments
there is only a 50/50 chance of operation this time. There is =
the
possibility of an operation from the Gaza Strip (Palestine) from =
12
to 14 February: Yoshi, Jiro and Teru hope to assist =
Palestine
National operators to activate ZC6MPT from the HQ of the Ministry=
of
Posts and Telecommunications in Gaza City (operation is likely to=
be
confined to 20 metres SSB around 14.190 MHz). This will be=
followed
by a visit to the West Bank from 14 to 16 February, possibly =

using
own call/ZC6 call-signs. QSL via JA1UT.
ZL7 - Lothar, DJ4ZB is currently active (on SSB, all bands) from =
Chatham
Islands (OC-038) as ZL7ZB. QSL via home call.

> Steve
>
Steve -first off that Qro uses a pair of 4cx800. I do have that amp and it is spectacular. Yes it probably is a bit big. But I had a floor model Henry 2K-3 before and that surely wasn't small-So I haven't worried about size.It really is a beautifully constructed amp and uses a massive Dahl transform. It has performed first class for me thus far(had it only month or so).One has to monitor the screen current with the tetrode tube -so that is a bit different than most triode amps.I can't imagine that you wouldn't be satisfied with the 2500 -assumimg you can find the space. Listen to 160 meters-1850-in the evenings -there are several stations that check in there that have those QRO amps--OK Good luck and 73 Lloyd W3NF

483. Tubes and Test Equipment for Sale!!

Newsgroup: rec.radio.amateur.dx

USED TUBES,UNTESTED BY US, SOLD "AS IS,WITHOUT WARRANTY",
These tubes were part of the estate of a long time radio
repairman,who was in business in the San Francisco area
from the 1930's to the 1970's.The tubes were bulk packaged
in large boxes marked "tested ok", however we have not
checked any of these tubes. We have been advised by one
of our customers that some of the tubes we shipped were
duds. These tubes have been priced accordingly.

****
* Shipping for the below tubes to anyplace in the USA: *
* 1 to 6 tubes, $3.00 // 7 or more tubes, shipping free.*
****

****
Used Tubes for $1.00 each:

Used Test Equipment Shipping free in continental USA:

(1) Power Mate BPA-40G, regulated power supply, 0 to 40 volts,
12 amps.Checked, working, but may need calibration and minor
repairs. $150.00

(1) Power mate BPG-40G, same as above,but not checked,
line cord cut,fuse and fuse holder cap missing,otherwise
looks clean. Offered "as is" for $50.00

(1) HP 628A, Signal generator, 15 to 21 Ghz, checked, working,
but may need calibration and minor repairs, $75.00

(1)BIRD 72-2 COAXIAL SWITCH,MANUAL,2 circuit,2 position,
850 W @ 100 MHz, N (f) $50.00

(2)HP G281A,WAVEGUIDE TO COAX ADAPTER,3.95 to 5.85 GHz,
UG-149A to N (f), $7.50 each

(4)HP J281A,WAVEGUIDE TO COAX ADAPTER,5.85 to 8.2 Ghz,
UG-344 to N (f), $7.50 each

(1)HP J370C,WAVEGUIDE FIXED ATTENUATOR,10 DB,5.85 to 8.2 GHz,
WR-137,UG-344, $10.00

(1)HP X375A,WAVEGUIDE ATTENUATOR,VARIABLE,8.2 to 12.4 Ghz,
0 to 25 DB,UG-39, $40.00

(1)HP G382A,WAVEGUIDE ATTENUATOR,VARIABLE,3.95 to 5.85 GHz,
0 to 50 DB,UG-149A, $50.00

(2)HP H382A,WAVEGUIDE ATTENUATOR,VARIABLE,7.5 to 10 GHz,
0 to 50 DB,UG-51, $40.00 each

(2)HP J382A,WAVEGUIDE ATTENUATOR,VARIABLE,5.85 to 8.2 GHz,
0 to 50 DB,UG-344, $40.00 each

(2)HP J424A, CRYSTAL DETECTOR MOUNT,UG344/BNC f,
$15.00 each

(1)HP J487B, THERMISTOR MOUNT, 5.85 to 8.2 GHz,
UG-344 / BNC (f), $15.00

(1)HP R752A,WAVEGUICE DIRECTIONAL COUPLER,10 DB,
26.5 to 40 GHz, missing termination, $25.00

(5)HP X752A,WAVEGUIDE DIRECTIONAL COUPLER,3 DB,
8.2 to 12.4 GHz, WR-90,UG-39, $10.00 each

(1)HP G914A,WAVEGUIDE TUNABLE LOAD,3.95 to 5.85 GHz,
WR-187,UG-149A, $10.00

(1)HP J920A,WAVEGUIDE MOVING SHORT,7.5 to 10 GHz,
knob tuned,UG-51, $10.00

(1)HP 8436A, BANDPASS FILTER, 8 TO 12.4 GHz,
N(m)to N(f),$50.00

(3)HP 11523A,LOAD RESISTOR, feedthrough termination for
HP 420 series detectors, $5.00 each

(3)JFW 50F-006, COAXIAL ATTENUATOR, 6 dB, DC to 2 GHz,
TNC connect, new never used, $10.00 each

(2)NARDA 47G2,WAVEGUIDE ATTENUATOR,
VARIABLE 0 to 40 dB, $25.00 each

(2)NARDA 4773-20 SMA COAXIAL ATTENUATOR, 20 dB,
DC to 6 GHz, $20.00 each

(4)NORSAL 12104 MIXER, SMA CONNECTORS,
NEW NEVER USED, $15.00 each

(1)WAVELINE 60562,WAVEGUIDE ATTENUATOR,VARIABLE, $25.00

Ordering:
If you request any product, I will hold that equipment
for 1 week. Currently we are only accepting money orders,
personal checks, business checks, bank checks,
or cash by registered mail.

Thank you!!

There is a posting on the news group about an 800 Mhz mod for the
Kenwood TH79A.
I tried his home page for the mod but it was down. Does anyone know if
there is really an 800 Mhz mod for the TH79A?

Thanks,
Jim KJ5LF

489. Wanted: Dual Band HT or Mobile

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-16 00:00:00 UTC
From: Aaron Jarvis <kb9moj@si-net.com>
Message-ID: <01bc1bca$1842b560$2920c4d0@kb9moj>
Source record: 33709

I would like a dual band ht or mobile. It must be in fair condition (
everything working properly) . The radio must have crossband repeat and
simultanious recieve. I will probably trade other Amatuer Equitment I have
but will maybe provide some cash.
Thanks if intrested please e-mail me
kb9moj@si-net.com

Look carefully at Table 2: E receives 144-146 and 430-440, while E3
receives 67-180 and 400-512 MHz.

It appears there is no way to get the 800 MHz band on "K" (U.S./Canada)
models, which should make Newt Gingrich happy.

Page 16 appears to be missing from the JPG images.

SB DX @ WW $OPDX.292
Ohio/Penn DX Bulletin No. 292

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 292
BID: $OPDX.291
February 17, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KE2VB, N2MAU, K4RB, W4BYG, NL7TB, WX7K, BV/N0IAT, 9K2HN, DJ5AV & DX News Letter, DL8OBC, EA5BY, EI6HB, F5SHQ, F6AJA, G4BUE & DX News Sheets, ON6TT, PS7AB, XE1KK, YV5AMH and ZL1ANJ for the following DX information.

3A, MONACO. The "DX News Sheet" reports that Manfred, DJ7RJ, will be active March 3-13th, as 3A/DJ7RJ while on holiday. Activity will on CW/SSB and 40-10 meters, with a possibility of operations on 160 and 80 meters if he finds the space to erect antennas. QSL to home call.

8B (or will it be YE8), TUKANG BESI ISLAND (New IOTA). Reportedly, everything is a go. Activity will begin March 7th at 0000z and will end March 9th 2400z. Tjork, YB0RX, and others have added another operator to the team (a CW operator). Callsign is still not yet known at this time, 8B8WI is the requested one, but Tjok stated some difficulty with the authority for using a special prefix, so they may have to settle with YE8 prefix. The team hopes that an IOTA number will be issued on the first day. Operations will be from Wanci Village on the Island of Wangi-wangi in the Tukang Besi Islands Group, with activity on 80-10 meters (including the WARC Bands) CW/SSB. QSL is via YC8KAR.

9K/NLD, KUWAIT NATIONAL AND LIBERATION DAY AWARD. On February 25th and 26th (every year) the state of Kuwait celebrates its National and Liberation Day. To mark this auspicious event, Kuwait Amateur Radio Society is delighted to announce an international award for Kuwait National and Liberation Day award. Two stations will be active during these days signing callsign/NLD (Look for club station 9K2RA/LND). The contest is open to both licensed radio amateurs and SWLs. ADDED NOTE: Details of this event will be sent to all OPDX InterNet Subscribers as an additional bulletin.

BV, TAIWAN (160 METERS). Chung, BV4ME, and Leo, BV7FC, have been reportedly active on the lower bands including 160 meters. No times

were provide for Leo on 160, but Chung has been here often on 1828 kHz around 2000-2230z. QSL both direct to their CBA.

BV9, PRATAS ISLAND. Joe Fitter, BV/N0IAT in Taipei, Taiwan R.O.C., reported the following this past week: "Had a nice discussion with several of my Taiwanese/Chinese hams during the Chinese Lunar New Years holiday. One of the topics of discussion was the upcoming DXpedition to Pratas Island, one of the newest of DXCC countries.
It is with a sad note that I must report that the application to revisit Pratas Island was rejected. Citing military preparedness, the officials rejected the application for a return to the island for DX operations. So, at this time, there is no plan for a return to Pratas Island during the first half of 1997.
For those not aware, Pratas is one of the Republic of China's strongholds and it is primarily an island of military installations, and not for civilian use. It was with great privelege that the BV9P operation(s) were able to occur on Pratas. It is with hope that a future operation to Pratas will be realized, either in the second half of 1997 or early 1998....."
Regards, Joe Fitter, BV/N0IAT

D4, CAPE VERDE. Didier, 6W/F5OGL, and Christian, 6W1QV, will try to be active from here Februay 26th to March 4th.

EA8, CANARY ISLANDS. Angel/EA3ALD, Manolo/EA8ZS and Tony/EA5BY will be running the CQWW DX 160 SSB Contest with the callsign EA8ZS. Before and after the contest, they will be using EA8/own call. If someone needs EA8 on any band/mode, they will accept skeds during the evening hours. Send request to: agaliana@alc.es

EK, ARMENIA. EK6GC is currently active on 160 meter SSB (no times of activity were given). He will also be active in the CQWW 160M SSB Contest. QSL to P.O. Box 25, Charentsavan, 378562 Armenia. Internet E-mail address: ampr@arminco.com

HP, PANAMA. As we reported several bulletins back Gerard, F2JD, would soon be active from here and now Gerard has been issued a callsign and is now active as HP1XBI. He will be active from 40-15 meters (including the WARC bands). Gerars will try to activate some of the Panamnian coastal islands, as usual. QSL via F6AJA.

J2, DJIBOUTI. Dominique, F5RYC, is reported to be heading back here and will be active as J28YC. QSL via F6EJI.

MU0, GUERNSEY. Mathieu, F5SHQ, reports to OPDX that he is now active from here with the callsign "MU0ASP". He will be there for a few months. He is active on 20, 30 and 40 meters mostly on CW. QSLs are "OK" via bureau or direct to: Mathieu Roche, F5SHQ, 4 cours de la liberation, 33000 Bordeaux, France.

QSL NEWS AND INFO......
Felix, DL8OBC, states he has been receiving quite a few QSL requests for stations that he is not the QSL manager for, particularly for Bosnian stations. Felix says, "When Bosnian stations were first issued

the T9 prefix in 1993, I agreed to handle QSL requests for T93M, T94IW, T94ON, and T97M. In the meantime, I have handled well over 10,000 QSL requests for these stations, both direct and via the bureau. Much of the work was done by Mario DL1FDV, Mike DL4FMA, and Danny DL5FDA. I'd like to thank them very much for their great help and support! In the meantime, the situation in Bosnia has improved, and the country can be reliably reached via the postal service. A Bosnian QSL bureau is operational and is said to be working well. For this reason, I do not handle QSL requests for any Bosnian stations any longer. Please do not send me any cards for T9 stations, as I will not be able to answer those QSLs. Here are the currently valid QSL routes for some of the more active Sarajevo stations, to the best of my knowledge:
T93M - Daniel Horvat, Grbavicka 53-6, 71000 Sarajevo,
Bosnia-Herzegovina or via K2PF: Ralph G Fariello,
23 Old Village Road, Hillsborough, NJ 08876, USA
T9DX - Sarajevo Contest Group, P.O. Box 61, 71000 Sarajevo,
Bosnia-Herzegovina
T94IW is no longer active. T94ON upgraded his license class and is now T99S. T97M has not currently appointed a QSL manager, so cards should probably be sent via the Bosnian QSL bureau."
Felix mentions he will still answer QSLs for all of his own stations which he is QSL Manager of via the QSL bureau or direct to: Felix J. Riess, DL8OBC, P.O. Box 1253, D-30984 Gehrden, Germany.....

Those who worked EI7M, which took part in the ARRL CW contest this past weekend, should have their QSL Cards sent to: Denis O' Flynn, EI6HB, Ladysbridge P.O., Ladysbridge, Castlemartyr, Co. Cork., Ireland.

5X1XX, 5X1HR, 7Q7JH, and KF7E/ V5/A2/Z2 QSLs. Jim, KF7E, states he would like to close out the logs for these stations, and wishes to make a final call for those still needing the QSLs. There was one interruption in the QSLing for direct cards to K7UP and KF7E, and one lost or misplaced batch of bureau cards for late 1995/early 1996. All errors, ommissions, and special requests should have been taken care of. The last big batch of bureau cards went out at the end of 1996, and Jim has one small batch of direct QSLs to mail out; these cards will go out by the end of February. Please give the bureaus a chance; they are very busy. Jim has received in previous bureau deliveries multiple QSL requests from the same stations, sometimes 3 for the same QSO. If you sent Jim a direct request and have not received a reply by the end of March, please send an E-mail message to him (jhenders@tdrss.wsc.nasa.gov) or send another request mentioning this communication, and he will double check for you. Otherwise, he intends to pack up the piles of QSLs and logs and store them by April 15, 1997.

USI ALERT. Dave, K1HT, will be active from Cumberland Island GA-002S on 14260 kHz from February 17-21st. QSL direct to K8JLF or bureau via K1HT.

V31, BELIZE. Members of the Cuba Libre Contest Club, John/W2NA, Vic/KI6IM and Bill/WA9L will be active as V31DX during the ARRL DX Phone Contest. Activity will be on 160-10 meters. QSL via AA6BB.

V5/ZS6YG OPERATION. Operators from Colorado -- KV0Q, W0YG. WB0HBS and W8UVZ should be QRT by the time you read this. As of Thursday last week, the team passed out about 700 QSOs on 160 meters. The team has reported that contacts were difficult due to area storms which caused static and high winds. They were using an inverted vee on 160m with apex at 260 feet using 60 ft mast on top of 200 ft high lighthouse on the Atlantic coast.

VP5, TURKS & CAICOS ISLANDS. If you do not have a chance to work Joe, K8JP, this past weekend during the ARRL DX CW Contest as VP5JP, you will have a second chance this coming weekend during the CQWW 160M SSB Contest (February 21-23rd).

WHAT HAPPENED ON KERGUELEN? OPDX InterNet Subscribers will receive an additional bulletin containing the details (by Peter, ON6TT), why the VK0IR team did not operate from here.

WP2, VIRGIN ISLANDS (U.S.). Operators KE2VB, K2ZJ and K2ZL will be active as WP2Z during the ARRL DX Phone Contest (March 1-2nd). The WP2Z will be a Multi 2 entry for the contest.

XE, MEXICO. Ramon, XE1KK, informs OPDX that once again the Radio Club Satelite, XE1RCS, will be active in the CQWW 160M SSB Contest as a Multi-Op/Single Transmiter entry. The group has installed a brand new 1/4 wave vertical, two dipoles, and 6 beverages which includes running full power. A lot of planning and teamwork has been made for this contest. They hope to do better than last year placing 6th in the world. For more information contact Ramon at "xe1kk@amsat.org" or visit their WEB site: http://www.xe1rcs.org.mx/

XT, BURKINA FASO. Ray, W4BYG, states he will be traveling to the French part of western Africa, from February 18-25th, and may possibly extend his stay another two weeks. He will signing XT2AR and plans to be on or about 14195 or 14245 kHz after 2100z, each evening. He will be running a FT-757 to a ground plane. He may also try 40 meters if conditions are not good. QSL via W4BYG.

YV0, AVES ISLAND. "Rumors of a DXpedition to Aves Island this summer are not true", states Reinaldo, YV5AMH, President of the Radio Club Venezolano and Vice-President of the Venezuela DX Club, "no plans for Aves Island this year. The closest date is March or April 1999."

ZL, NEW ZEALAND. Look for operators Tapani, OH5BM, and Martin, ZL1ANJ, to be active as ZL1ANJ as a MultiOp-Single Transmitter enrty in the ARRL DX Phone Contest. Operations are planned to be on 80-10 meters.

ZK1, SOUTH COOK. The "DX News Letter" reports that VE6JO is expected to be active from February 22nd until March 10th. They state he holds a valid licence, but he has to borrow equipment on the island.

ZL7, CHATHAM ISLAND. The DXNL also reports Lothar, DJ4ZB, has been active since February 4th as ZL7ZB. He will stay there until March 13th (?). Lothar works in phone only from 80-6 meters. QSL via homecall.

ZY0SG/ZY0SK OPERATION. The St. Peter and St. Paul Rocks DXpedition is now QRT! Last QSO was logged at 1015z. Despite the great difficulties, Tino and Karl made almost 10.000 QSOs.

I checked my pages and indeed we don't have page 16
What i don't understand is that all pages i have are just like i
received from Kenwood and they are one part.
No way they could "forget" page 16, i think it's a mistake in numbering
the pages sins page 15 and 17 are one.

I ask them for it and let you know.

William

Hams traditionally like to hide behind their mikes and the worst of the
losers
hide behind their keyboards. Loser Hams doing the above is very common.

I would like to use my 79A as the remote to my 733A.

I followed all the directions in the Appnotes. I power on while holding
PTT and MR and nothing happens.

Any suggestions would be great.

Thanks, Mark, N1XYY

Anyone who knows how to turn the TH-79E into a TH-79A?
The main difference between the two models is that the European version has TX/RX range limited to 144.000-146.000 (European 2m band) . (I do not remember the 70cm frequencies at the moment!)

Also, anyone who knows the RX range of the TM-251A and/or how the TM-251E is turned into a TM-251A ?

-----BEGIN PGP SIGNED MESSAGE-----

Hello DX'ers!

Recently I received quite a few QSL requests for stations that have not appointed me as their QSL manager, particularly for Bosnian stations. For this reason, I would like to clarify the situation. Please give this message the farthest possible distribution.

When Bosnian stations were first issued the T9 prefix in 1993, I agreed to handle QSL requests for T93M, T94IW, T94ON, and T97M. In the meantime, I have handled well over 10,000 QSL requests for these stations, both direct and via the bureau. Much of the work was done by Mario DL1FDV, Mike DL4FMA, and Danny DL5FDA. I'd like to thank them very much for their great help and support!

In the meantime, the situation in Bosnia has improved, and the country can be reliably reached via the postal service. A Bosnian QSL bureau is operational and is said to be working well. For this reason, I do not handle QSL requests for any Bosnian stations any longer. Please do not send me any cards for T9 stations, as I will not be able to answer those QSL's.

Here are the currently valid QSL routes for some of the more active Sarajevo stations, to the best of my knowledge:

T93M - Daniel Horvat, Grbavicka 53-6, 71000 Sarajevo,
Bosnia and Herzegovenia

or via K2PF: Ralph G Fariello
23 Old Village Road, Hillsborough, NJ 08876, USA

T9DX - Sarajevo Contest Group, P.O. Box 61, 71000 Sarajevo,
Bosnia and Herzegovina

T94IW is no longer active. T94ON upgraded his license class and is now T99S. T97M has not currently appointed a QSL manager, so cards should probably be sent via the Bosnian QSL bureau.

Of course, I still answer QSL's for all of my own operations which include 9H3UD, TA3/DL8OBC, C30EFA, and others. I will reply to all those cards reliably via the QSL bureau. If you prefer to send me any cards via the postal service, please use only the following address, which is also listed correctly in the Flying Horse call book:

Felix J. Riess, DL8OBC
P.O. Box 1253
D-30984 Gehrden

Germany

Thank you very much for reading this mail, and please pass the
information on to all DX bulletins and QSL manager lists.

DX is! 73, Felix (DL8OBC/N5BC).

Which is *exactly* my point: the receive ranges differ, yet the diode-matrix (D302-D308, labeled 'Destination diode' in table 2) is exactly the same. These diodes tell the unit how to behave. Now if the E and E3 units have the same diodes, how can they behave differently?

Note that I feel the documents contain a wealth of information,
I was just hoping to keep anybody from opening up his/her handheld and moving diodes, only to find out there is an error in this table 2. The TH79 is to precious for that.

> It appears there is no way to get the 800 MHz band on "K" (U.S./Canada)
> models, which should make Newt Gingrich happy.
Still, I see TH79A's advertised WITH 800 MHz in various newsgroups. As I understand it the older units can receive 800, but the newer ones can not. I somewhere read in an article that you can see this from the serial number:
===If your serial number is 603XXX or higher, that is all you will get. The
===TH-79A that I have posted is 602XXX
I cannot find the original article though- you'll have to search the net for it.
There may be a NOSPAM. in front of my E-mail address.
It is there to fool machines, not people.

Hello Walt,

My experience in Canberra has been that the stamp I get in exchange
for a IRC depends on the destination. So if I have a letter for
North/South America, Africa, and Europe I get a 1st class AUS$1.20
stamp. I get a stamp of a slightly lesser amounts for destinations
closer to VK - eg: 95 cents for JA. But the bottom line has always
been one IRC for a first class stamp for the particular region I'm
sending to.

Ah, yes, and if you look at the figure on page 6, the "E" has a jumper
at W301, while the "E3" does not, And in Table 4, the TX-RX Unit number
for the "E" is X57-4402-71, while the "E3" us X57-4402-73. Do the X57
indicators imply the configuration of jumpers and/or diodes, or
different firmware? Things may be more comples than just moving diodes
and cutting wires. It's confusing (probably on purpose).

Thank you William for the post-

These are indeed correct.
The newer US versions of the radio have a different processor that
will not allow the extended coverage. No doubt a request-demand from
our wonderful government.

Kent

>sending to.

Hello Jim!

Many thanks for your input. Well, I'm glad to hear it .... that's as it
should be.

So we can assume from now on, can we, that any VK who requests more than
one IRC for a QSL to anywhere in the world is ripping us off?

;-)

IRELAND

Please send your material on now to the postal address above.

URL: http://www.rte.ie/
eMail: evans@internet-ireland.ie
TEL: INTL + 353 1 2083991 A 24 hour mailbox

TO WHOM IT CONCERNS

My name is Tim Lehane and I work with RTE national radio for Ireland. My particular programme MONDAY 7.02 has recently won a prestigious national award for quality broadcasting, and as a result we have revamped and our new programme is called ANOTHER TIME ANOTHER SPACE. Our programmes are rebroadcast on satellite and via cable to Europe, America and Australia. We are also rebroadcast over local radio stations in these continents, who take all or selected parts of our programming. We are also doing some broadcasts on the internet http://www.rte.ie/

Our programme has a particular audio driven aspect to it., we feature all kinds of strange and different things. To date we have looked at an extremely broad range of experimental music, speech, sounds, audio, from all over the world. Maybe you have unusual items of interest to us, or are a collector of the ususual, old radio recordings, early audio recordings, recordings of the countryside, or train stations, whatever is different, mainstream or not, we are interested.

Past contributors have received excellent reaction, and work out of having their material featured on our programme. We are interested in using anything, that remotely fits into that category, so do post it to the address below, in any form cassette, DAT, mini disc, CD, though no audio files through the internet please.

IMPT: Since initial posting, we have been getting e-Mails asking us what address to send it to, what format is acceptable, and "I do x type of work, would you be interested in me sending that to you" YES we will feature almost all things sent to us, so just send it on. The full ADRESS is given above and below. Finally except for internet audio files, ALL AUDIO FORMATS are acceptable.

So send it on, and we will contact you shortly, looking forward to hearing your material, best wishes.

Please send your material on now to this postal address above.

Yours Sincerely

TIM LEHANE

TM call-signs are ONLY french stations, mostly used :
. during contest (e.g TM1C or TM2Y are the best french contesters
teams)
. for special events (e.g. D-DAY, etc ...)
I hope this would help.

ZCZC AE10
QST de W1AW
DX Bulletin 10 ARLD010
From ARRL Headquarters
Newington CT February 20, 1997
To all radio amateurs

SB DX ARL ARLD010
ARLD010 DX news

This week's bulletin was made possible with info provided by The 599Rpt, Tedd, KB8NW, the OPDX Bulletin, the DXNS, Bill, WT4K, and Contest Corral from QST. Thanks to all.

KUWAIT, 9K. Amateurs in Kuwait will celebrate the National and Liberation Days by signing homecalls/NLD on February 25 to 28. The Club station 9K2RA will also be active.

NEPAL, 9N. Rich, 9N1RHM, is QRV on CW and RTTY on most HF bands. QSL via KV5V.

TAIWAN, BV. Chung, BV4ME, and Leo, BV7FC, have been QRV on 160 meters. Chung has been found often on 1828 kHz around 2000 to 2230z. QSL both to their CBA.

CANARY ISLANDS, EA8. Angel, EA3ALD, Manolo, EA8ZS, and Tony, EA5BY, will be QRV as EA8ZS in the CQ WW DX 160 Meter Phone Contest. Before and after the contest, they will sign EA8/homecalls. QSL information to be announced.

ARMENIA, EK. EK6GC is currently QRV on 160 meter SSB. He will also be active in the CQ WW 160 Meter Phone Contest. QSL to PO Box 25, Charentsavan, 378562 Armenia.

DJIBOUTI, J2. Dominique, F5RYC, is reported to be heading back here and will be QRV as J28YC. QSL via F6EJI.

WAKE ISLAND, KH9. KC7FWZ/KH9 has been QRV on 10107 kHz at 0810 UTC. The length of his stay, and his QSL route, are unknown at this time.

BELIZE, V3. Members of the Cuba Libre Contest Club, John, W2NA, Vic, KI6IM, and Bill, WA9L, will be QRV as V31DX during the ARRL DX Phone Contest. Activity will be on 160 to 10 meters. QSL via AA6BB.

CHATHAM ISLANDS, ZL7. Lothar, DJ4ZB, has been QRV as ZL7ZB since February 4. He will stay here probably until March 13. He works SSB only on 80 through 6 meters. QSL to homecall.

QSL INFORMATION. Bill, WT4K, QSL Manager for KG4GC, KG4AU, KG4FD, and KG4AN, indicates that KG4AA and KG4US are pirates. These calls have not as yet been issued.

THIS WEEKEND ON THE RADIO. The CQ WW 160 Meter DX Phone Contest, the YL/OM Phone Contest, the REF French Phone Contest, North Carolina QSO Party, the RSGB 7 MHz Contest, UBA CW Contest, the CQC Winter QRP QSO Party, and the FYBO Winter QRP Field Day will all compete for your participation. Please see February QST, page 103 for details.

Negativo Sir,

TM is France Mainland special call issued
for Normandy Memorial rembrance and used
now for contests

TK is standard Corsica call prefix

other French territories use a dozen other call prefix
FG, FM, FH, FO, FP, FR, FS , FT and much wanted FW

Dear Fellow Amateur,

An Internet Web Server devoted entirely to Amateur Radio and associated hobbies.

If you would like a home page of your own or for your Radio Club it's absolutely FREE and will always be FREE.

This is my private computer system with the Server on a T1 hi-speed network. It's a hobbie for me
just as Ham Radio is and I'm glad to share my system with everyone.

This is what you'll get:

E-mail account that you can use locally or have forwarded to your regular account

Example: K3TKJ@qsl.net , NE3Y@qsl.net , YOURCALL@qsl.net

FTP privledges

Telnet privledge (after you convince me you need it)

Your own personal Web site....Try these working pages now.

http://www.qsl.net
http://www.qsl.net/k3tkj
http://www.qsl.net/kc8eds
http://www.qsl.net/ve7fym
http://www.qsl.net/n3wdl

Here are the rules:

1) NO COMMERCIAL USE!

2) I'm not going to write the page for you. Isn't it time you learned something new?

3) You have an Amateur License.

That's it.... If you want to try it signup at http://www.qsl.net

Need more info? E-mail: k3tkj@qsl.net

73,

Al Waller K3TKJ
Laurel, Delaware

539. Original West Coast DX Bulliten, 11 May 1976

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-20 00:00:00 UTC
From: pdunphy@atcon.com
Message-ID: <5eg7m5lbc1@thor.atcon.com>
Source record: 33746

As many of you have noticed, I've been posting extracts from Hugh Cassidy's West Coast DX Bulletin (the closing editorials) as well as some original stuff I wrote myself. These posts have brought back a lot of memories for those who were around in the Early Days, and for those who remember Cass's writing style from his days as the DX Editor in CQ. Some have wondered what all the fuss was about . . . many have never seen the WCDXB. If you are interested, the 11 May 1976 edition of WA6AUD's West Coast DX Bulletin is reproduced, complete with the original color of paper, logos, typesetting, band spots, etc. on Mike D'Alto, K2CD's web page at URL:

http://www.geocities.com/CapeCanaveral/1641/

Look for the hypertext link following: First in a Series of Vintage West Coast DX Bulletins!

This is not a scanned immage, so it won't take a long time to load, even at 14,400. It's worth a look, and remember Hugh Cassidy generated 2000-3000 copies of this every week for 11 years, all done by hand. This is the history of DXing. Absolutely. And there are names and calls in there that even the newcomers to the DX world will recognize. And some that only the old timers will recall . . .

Hi Ron!

YU5FK was listed in 1995 Call Book as: Mike Dimitar Joreanov, Tosoarsov
40, 92300 KOCANI, Republic of Macedonia (former Yugoslavia).

If he still lives there, he would now have a Z3 call, but I can't find
him in the latest Call Book.

Rubbish.

We were discussing Special Event callsigns. Only.

A quick scan of my QSL collection reveals the following:

TO0P Martinique 1994
TO5ORC Martinique 1994
TO5M St Pierre & Miquelon 1995
(TO0R was used from Reunion Island in Jan 1997)

TO6SAX Mainland France 1994
TO6CYV Mainland France 1983
(Just to further confuse the issue!!!)

HW6MAT, HW6GPA Mainland France 1979/80

TW6A, TV6LAV, TV6MED, FV8NDX Mainland France 1988

TM2CC, TM3P, TM5IV Mainland France 1993 (all well before the Normandy Landings Remembrance activity)

TM5OAM, COL, OJX, OMN, OMM, OSM, OSO, OVR, OYO, TM6VVV Mainland France, June 1994 (Normandy Landings 50th Anniversary and Operation Maquis)

TM5M Mainland France June 1994 (contest)
TM7XX Mainland France CQ WPX 1994

TM5T, TM5TLT, TM7TLT Mainland France 1994 (Telethon)

TM9JAM Mainland France Oct 1994 (Scouts Jamboree)

TM0PDC Mainland France Sept 1994 (50th Anniv. of Liberation of Pas de Calais)

TM0TRS Mainland France April 1995 (50th Anniv. of Signals Regiment)

Admittedly, I have not yet come across a Special Event callsign operation from Corsica ... other than those using a TK prefix ... but nothing would surprise me!

Yo IOTA-fans,

I am organizing a DXpedition to some islands off the French Atlantic coast. To be able to activate the groups that are the most wanted, I am keeping a survey. I sent this message out to iota@ww on packet a few weeks ago, and here are the results:
The order is as following: score - reference no. - name

6 EU-081 Iles St Marcouf
4 EU-156 Tomberlaine
EU-114 Guersney
EU-013 Jersey
3 EU-039 Iles Chausey
2 xEU-099 Les Minqueres
4 EU-157 Rochefort
3 EU-074 Brehat
1 EU-107 Les Sept Iles
2 EU-065 Ile d'Ouessant
4 !EU-094 Glenan
4 EU-068 Sein

To make this survey more accurate, I want to ask you to send me a mail telling which islands from the above list you have not yet worked. It doesn't matter whether you worked 60 or 600 IOTA's, your mail is welcome!

So pse check your IOTA directories, and sent me the list of F islands you still need!

Thanks in advance,

73's de David.

.....may you live in interesting times....

Hi om,

Just a quick note to let you know that the TeenNet homepage is on-line
at http://fibo.hogent.be/~on4bds/TeenNet.html

The TeenNet is a group of young ham radio operators. There is more to
it than you think! Check out the page.

3A - Manfred, DJ7RJ will be active (CW and SSB on 10-40 metres, possibly
160 and 80 metres as well) as 3A/DJ7RJ from 3 to 13 March. QSL via
home call.
3Y5 - The DXpedition to Bouvet Island [425DXN 295] is now scheduled for
departure Cape Town on board of Afrique du Sud, a 67 meter vessel
whose cost will be in the order of USD 100,000. Barry, ZS1FJ and
Tony, WA4JQS have been at this project for a long time: a solid 12
day operation on Bouvet will see the team leaving Cape Town on 5
January 1998, with planned return date of 5 February. All team
members are expected to contribute, initially by way of bank
guarantee and eventually an estimated USD 10,000 into attorney's
trust account in tranches as need arises.
5N - Franz, 5N0BHF is active from Bonny Island (AF-076/prov) as 5N4BHF.
QSL via OE6LAG.
9A - Luigino, IK3SSJ will be active from IOTA gropu EU-136 from 10 to 16
March.
9U - 9U5CW and 9U5DX will use the special call 9U5T for all the major
contests in 1997. QSL is via F2VX (who has just sent some 5,000
9U5DX cards through the French bureau).
A3 - DK1CE (Ulmar), DL5UF (Hilde) and DF5WA (Bert) will be active from
Tonga until 10 March. They plan to operate (CW and SSB) from IOTA
groups OC-049, OC-064 and OC-164.
A7 - Chris, A71CW will go QRT from Qatar at the end of March.
```

BS7H - Tim Totten, N4GN reports that "a multinational team, led by BZ1OK
and JA1BK, will set sail from the southern Chinese port city of
Guangzhou (a.k.a. Canton) on 28 April, and is expected to commence
the one-week operation from Huang Yan Dao [Scarborough Reef, AS-116]
on Wednesday, 30 April, using the call sign BS7H. The primary goal
of this operation is to provide at least one QSO with as many
individual DXers as possible. For this reason, the operators will
concentrate on those regions having the most difficult propagation
paths (e.g., the eastern half of the U.S.), giving DXers in every
corner of the globe the best possible chance to make it in the log.
A secondary goal will be to provide QSOs on additional bands and
modes, including 160 through 6 meters, CW, SSB, satellite and RTTY,
with as many as four stations simultaneously on the air. Operators
for BS7H 1997 include BZ1OK, JA1BK (who will also serve as QSL
manager), JA1RJU, N7NG, W6EU (ex-WA6AUE) and W6RGG. The complete
operating team, as well as the list of transmit frequencies, will be
announced once they have been finalized. BS7H 1997 will also employ
an 'operations support network' consisting of several stations
throughout the world which will be in constant communication with
the operating team from the time of their departure until their safe
return. Thanks to the CRSA's [Chinese Radio Sports Association]
tireless efforts to promote Amateur Radio within the People's
Republic of China and to develop relationships with key agencies,
this DXpedition enjoys strong support from the PRC government".
BV9P - Joe Fitter, BV/N0IAT reports the following: "Had a nice discussion
with several of my Taiwanese/Chinese hams during the Chinese Lunar
New Years holiday. One of the topics of discussion was the upcoming
DXpedition to Pratas Island, one of the newest of DXCC countries. It
is with a sad note that I must report that the application to
revisit Pratas Island was rejected. Citing military preparedness,
the officials rejected the application for a return to the island
for DX operations. So, at this time, there is no plan for a return
to Pratas Island during the first half of 1997".
D4 - Didier, 6W/F5OGL and Christian, 6W1QV will try to be active from
Cape Verde (AF-005) from 26 Februay to 4 March.
DU - DU1IXY, DU3NHK, DU3RAA and JG0HZE/DU1 will be active from 13 to 20
April from Lubang Island (OC-126).
EA8 - Angel (EA3ALD), Manolo (EA8ZS) and Tony (EA5BY) will participate in
the CQ WW DX SSB 160 Meter Contest as EA8ZS.
FK - Didier, F5PXQ is leaving for New Caledonia, where he will be staying
for three years. He will be on the air as soon as possible.
FS - Operations by FS5PL from Tintamarre Island (NA-199) [425DXN 301]
have been delayed one week and are now scheduled from 1 to 3 March.
FS - Eddie, EA3NY will participate in the ARRL DX SSB Contest (1-2 March)
from Saint Martin (Single Operator, all bands).

G - The Barry ARS will be active from 10 to 17 May as GB100LP from Lavernock Point, South Glamorgan, in conjunction with GB100FI. The special prefix (GB100) commemorates the first QSO across water made by Marconi 100 years ago (special QSL cards and a centenary award certificate will be available for contacting both GB100FI and GB100LP). QSL via GW0ANA.
GW - The Barry ARS will be active (all modes, all bands) from 12 to 16 May from Flatholm Island (EU-124) as GB100FI. QSL via GW0ANA.
HP - Gerard, F2JD (ex-5R8EN, S79JD etc.) has been given the call HP1XBI [425DXN 291]. He is active from 40 to 15 metres (WARC bands included). Gerard will try to be active from some HP islands. QSL via F6AJA.
HP - Jose, HP2CWB will be /HP4 from Isla Colon, Bocas del Toro Archipelago (NA-088) on 21-22 February. Operations will take place on 10-40 metres, CW and SSB. QSL via QSL via Jose Ng Lee (HP2CWB), Direct Distribution LTD, PTY-201, P.O.Box 02-5275, Miami, FL 33102-5275, USA (please do not use SASEs with US stamps, because the above is just a maildrop address for incoming mail).
HP - Jose (HP2CWB), Emilio (HP2DFU), Ricardo (HP2CTM) and others will be active from IOTA group NA-202 on 9 March [425DXN 301] as either 3F2A, H32A, or H82A. Operations (10-40 metres, CW and SSB) will take place from one of the following islands: Naranjo Arriba, Naranjo Abajo, Dos Marias (Dos Hermanas), Grande. QSL via Jose Ng Lee (HP2CWB), Direct Distribution LTD, PTY-201, P.O.Box 02-5275, Miami, FL 33102-5275, USA (please do not use SASEs with US stamps, because the above is just a maildrop address for incoming mail).
I - Weather permitting, the Salento DX Team will be IJ7/ (15, 20 and 40 metres SSB & CW) from Isola della Discesa (IIA LE-025) on 2 March. QSL via home call.
I - Giovanni, IT9TZZ and Tino, IT9NGN will be active (SSB and CW) from 30 May to 6 June from Stromboli Island (EU-017, IIA ME-016). QSL via home calls.
I - Joe, IK4HLQ will participate in major contests as IU4Q. QSL via IK4HLQ.
J2 - Dominique, F5RYC is active again as J28YC. QSL via F6EJI.
J5 - J52DW will be active from 24 to 30 March. QSL via LX2DW.
KP2 - KE2VB, K2ZJ and K2ZL will participate in the ARRL DX SSB Contest (1-2 March) as WP2Z from U.S. Virgin Islands (NA-106).
LA - Trondheim student radio club station LA1K will activate LM1SKI (all modes, all bands) from 20 February to 2 March during the Nordic Ski World Championships 1997. QSL via LA1K either via bureau or direct (Akademisk Radioklubb - LA1K, Elgeseter Gt 1, N-7030 Trondheim, Norway).
PY - Operations by PY5AA and PQ5L from Mel Island (SA 047, DIB 24) [425DXN 297] have been postponed to 17-22 April.
PY0_fer- W9VA was active as PY1ZFO/PY0F. QSL via W9VA.
S7 - Staffan, SM7DQW is active (SSB and CW) until 28 February as S79DQW.

QSL via SM7DQW,
SP - The local Police Radio Club will celebrate the 1000 year anniversary of Gdansk from 1 to 31 March. Operations will take place with the special call 3Z2GD. QSL via SP2FOV.
ST0 - John, PA3CXC/ST0 [425DXN 301] made 1200 QSOs. QSL via N4FN (ex KC4MJ).
V3 - John (W2NA), Vic (KI6IM) and Bill (WA9L) will be participate in the ARRL DX SSB Contest (1-2 March) as V31DX. QSL via AA6BB.
VE - N6VV will be /VE7 from Quadra Island (NA-091) from 18 to 21 July.
VE - N6VV, K6XV, W7DR, VE7QCR, VE7EOP and VE7EDZ will be active as N6VV/VE7 from Queen Charlotte Is (NA-051) from 25 to 28 July. They will participate in the IOTA Contest.
VE - N6VV and W7DR will be active as N6VV/VE7 from Green Island (Dundas Is, NA-118) from 31 July to 2 August. Special emphasis will be given to Europe.
VP5 - Tom, W0GLG and his wife Glenys will be active (80, 40, 20 and 15 metres SSB) from 30 March to 4 April from Grand Turk Island (NA-003).
VP9 - Jeff, AJ2U (ex N2MZH) will be active from Bermuda Is (NA-005) as AJ2U/VP9 from 27 February to 4 March. In will participate in the ARRL DX SSB Contest as VP9ID. QSL via N2KJM.
VU_ant - Prabhu, VU2AXA/P is currently active from Indian Bay campsite (69.56S-11.54E) some 100 Km southeast of the Maaitree base.He will be looking for Europe on 14.260 MHz starting at 16 UTC to 18 UTC, for North/South America and others on 14.260 MHz from 22 UTC to 24 UTC. Prabhu is expected to return to India on 4 March. QSL via VU2DVC.
W - Herb, KE7PB and John, NL7TB will be active from 1730 UTC on 26 February from Bradford and Robins Islands (Multnomah County, OR), and Cascades and Hamilton Islands (Skamania County, WA). QSL via home calls.
XE - The Radio Club Satelite, XE1RCS will participate in the CQWW 160 Meter SSB Contest (Multi/Single).
XT - Ray, W4BYG will be in Burkina Faso from 18 to 25 (at least) February. He will be active as XT2AR on 20 metres SSB each evening after 21 UTC. QSL via W4BYG.
ZF - ZF2AU, ZF2LB, ZF2EP and ZF2EB will be active (160-10 metres) from Little Cayman Island (NA-016) from 27 February to 4 March. Callsign during the ARRL DX Contest will be ZF2FT. QSL via K5RV (ex N5OCD).
ZF - John, NC8V will be active as either ZF2JC/ZF8 or ZF8JC from 20 to 27 March.
ZK1_nc - Bruce, AA8U (ZK1AAU) is planning to be active in November (CQ CW Contest included) from Manihiki Atoll (OC-014). Bruce would like to get information from amateur who operated from Manihiki in the past (please e-mail him at aa8u@modempool.com).

****
********** GOOD TO KNOW ... **********
****

GUANTANAMO BAY ---> Jan, K4QD has just returned from his second trip to Guantanamo Bay, Cuba as KG4QD. During his trips in October 1996 and February 1997 he made a total of over 4500 QSOs (over 1200 QSOs were with Europe). Bill, KG4GC and Jan travelled together; they used Bill's call for the September 1996 CQ WW RTTY and February 1997 WPX RTTY contests (in these efforts they made over 2500 RTTY contacts and Bill made about 1000 additional contacts).

INSIDE DX ---> Art, N2AU (editor) has decided that issue 401 of Inside DX (published on 14 February)was the last one.

KUWAIT NATIONAL AND LIBERATION DAY AWARD ---> To mark the National and Liberationd Day (25-26 February) the Kuwait Amateur Radio Society is delighted to announce an international award for both licensed radio amateurs and SWLs:
1) Contacts may be conducted on any amateur band any mode.
2) The contest will start at 00:00 GMT on 25th of February every year and end at 23:59 GMT at the end of February.
3) There will be two call signs in use: 9K2RA/NLD and 9K2../NLD. 9K2RA is the club call sign.
4) To qualify for the award the participant is required to secure at least 3 points. for any Kuwaiti station signing /NLD will count for 1 point, and 9K2RA/NLD will count for 2 points.
5) The participant must submit a certified copy of the logbook along with 5 IRC or 3$.
6) There is no deadline for the submitting applications which should be addressed to Kuwait Amateur Radio Society (KARS), P.O.Box:5240 Safat, 13053 Kuwait.

QSL 5R8FK ---> Ray Shankweiler, 5R8FK routinely replies to QSLs that come direct and that include return postage (no bureau in Madagascar). His address is: Ray Shankweiler, Box 620, Antananarivo 101, Madagascar, Africa (please note that his country is Madascar, *not* the Malagasy Republic).

QSL HH2WL ---> Larry, KF6CN still has the logs and cards for his activity as HH2WL (1983-1987).

QSL N7QXQ/HR6 ---> Bob, W7TSQ has taken on the responsibility for Gary's (N7QXQ/HR6, NA-057) QSLs. Gary is just about out of cards, so more will be ordered when the next mailboat leaves for the States in about a week. Most of those will be shipped to Bob. Gary will send Bob all log entries through 31 March 97 which Bob should have in hand about mid April. If you have sent cards to his Gary's address in Tampa [425DXN 301], just wait! If you have sent to NA7X, now a silent key, please send again to Bob for a direct response (an SASE or SAE plus postage is required, cards received without

will be answered via bureau).

QSL KG4 ---> Jan, K4QD reports the current QSL information for some active KG4 stations from Guantanamo Bay:
* KG4QD via K4QD (ex WA4VQD): Jan Heise, 131 Sand Pine Road, Indialantic, FL 32903, USA
* KG4GC via WT4K (ex KQ4GC): Bill Gallier, 4094 Sandy Run Drive E., Middleburg, FL 32068, USA
* KG4AU (Rusty Auxier) now via WT4K
* KG4AN (Guantanamo ARC club station) now via WT4K
* KG4ML via WB6VGI (CBA)
* KG4CQ via Tom Mann, PCS Box 1005, Box 30, FPO AE 09593-0130, USA

==========

QSL T9DX ---> Cards were received from the printer and Boris, T93Y was expected to answer to direct requests in early February.

QSL XZ1N ---> Cards are being printed and mailing is expected to start in early March.

QSL YI1WMS ---> Antonello is the QSL manager for YI1WMS (only for contacts made with European stations, *Germany excluded*). QSL cards will be ready before the end of the month. Antonello is the QSL manager also for IQ2W and IR2P.

QSL VIA UA6XGL ---> Andy Gromov, UA6XGL/3 is going to close the logs for R0L/UA6XGL (August 1991) and 4K0ADS (September 1991-February 1992). QSL via bureau to RZ3AZO (attn UA6XGL) or direct to Box DX, Moscow, A-171, 125171 Russia. Bureau cards can also be requested at e-mail ua6xgl@aha.ru

THE GOLIST ---> For further information on the subscription rates for "The GOLIST, QSL Manager List", which is now available monthly via the Internet, please contact WB4RRK (John Shelton, P.O. Box 3071, Paris, TN 38242, USA; e-mail golist@iswt.com; WEB:<http://www.datawise.net/~prosoft/golist.htm>).

TX0K ---> Peter, ON6TT reports that during the last days of the Heard Island expedition, the VK0IR team started planning a one night activity from Kerguelen. They packed one huge crate with 2 complete stations, one tent, two generators, antennas, tables, chairs etc., but bad weather conditions prevented the crate from being put ashore. The team was allowed 2 hours on shore, and even if the gear could not be offloaded, they made just a handful of QSOs with ZS6SOA and 6O5DX as FT5XM (the call that had been issued instead of the planned TX0K) from the commercial station on Kerguelen.

+ SILENT KEY + It was with the greatest sadness that we have learnt of the passing of Ethel Smith, K4LMB on 4 February. She was 79 was one of the founders of the Young Ladies Radio League (YLRL).

QSL riceived via direct: 4M5LR (SA-035), 5X1T, 8P9HT, 9L1KA, CY0TP, FK5M (OC-218), J79XM, JY9QJ, KG4MN, PJ9JT, RF0Z (AS-095).
QSL received via WF5E - DX QSL Service: 9K2HN, AB5EA/p (NA-119), CY0AA, H99I (NA-203), DF5WA/HI8, KG6VI/6 (NA-144), LU6Z, N4VA/m (US.I. MD-019R), T93Y, V5/DL5AWI, VU2PAI, WB8YJF/p (NA-062), XJ1CWI (NA-154).

550. New Concept! Cyberscheds Your Next DX and Satellite Contact!

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-22 00:00:00 UTC
From: wb6siv@telis.org
Message-ID: <wb6siv-2102972053120001@host28.cyberg8t.com>
Source record: 33524

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's.
I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.
Post Date: Sept. 6, 1996

From: pdunphy@atcon.com
Message-ID: <5ellf8$851$1@thor.atcon.com>
Source record: 33526

One often has to consider that things may not always be as they seem, particularly when Local QRPers are asking questions. Absolutely. We had been to an annual get together a few weeks back and it was a mixture of traffic types, those who like to tinker and build homebrew gear, and of course, DXers! DXers are drawn to other DXers and no gathering of the amateur fraternity has ever proven this otherwise . . . it is one of the Inevitable Truths of DXing. Believe that, for it always has been.

We were sitting at a table with a few of the true blue DX types, talking about the Great Days of DXing and the imminent arrival of cycle 23 when one of the Local QRPers came along with his tray. He spied the one empty seat, and being a Seeker of Knowledge, this QRPer sat down and began right off with a question: "If you guys were going to build a linear, what kind of tube would you use?" he asked, looking quickly from one to the other. No one answered for a moment, then one of the big guns shrugged and replied, "Well, I guess I'd probably go with a pair of 3-500Zs . . . they're pretty rugged and not that expensive." The QRPer nodded and waited. "8877s are good tubes too." another of the true-blue types offered. The QRPer had pulled out his notebook and was writing all this down. QRPers keep methodical notes, especially when they are driven by a single purpose. Remember that. A QRPer on a mission is dangerous. Never let your guard down.

"And what about you?" the QRPer said, looking straight at us, "What would you use?" We thought for a moment, then replied: "Either of the two mentioned are good choices" we said carefully, "and the we are hearing good reports about the 4CX1600B too . . . 50 watts from the exciter will get you 1500 out. But none of us are really considering building an amp right now." We got nods of agreement from around the table and we decided to pursue this a bit further. This QRPer had an agenda and we had to know more.

"Why are you so interested in tubes?" we asked. The QRPer took a bite of his lunch and looked at us carefully, then did the double take and answered our question with a question. "Let's say someone wanted to double up a pair of those 4CX1600Bs. How much power would you expect from 100 watts drive? Am I correct in assuming that if 50 watts will generate 1500 watts, then a pair of them will put out 3 kW?" We weren't sure where this was leading and we were getting a bit out of our league. "We've never built an amp" we replied, "and a lot of this depends on the design and efficiency of the components involved. In theory, you're probably right. But what's the point? You can't run 3 kW anyhow. You'd be cited for excessive power and if you kept it up, you'd be off the air." The QRPer glared at us with his beady little eyes and ploughed right on. "Yeah, yeah, I know all that" he said, wiping a bit of sweat from his upper lip, "but let's say you could do it, what would be the best way? Get three, maybe four of those killer 1500-watt tubes and try to drive them with the exciter, or build an intermediate with a single 3-500Z and use that to

drive the final? And if someone was to do that, use an intermediate amp, would 5 kW output be possible?"

Son of a Gun! How does one answer a question like that? It was obvious we had a QRPer who had done a lot of thinking before asking. So we did the obvious. We excused ourselves, and hauled this Seeker of QRO Knowledge over to the table in the corner where the Old Timer was sitting with Red-Eyed Louie. The Old Timer had built his share of amplifers and the QRPer repeated his question, referring to his notebook and getting ready to write. The Old Timer leaned back in his chair, looked up at the ceiling for a moment and then looked back at the QRPer. "What we have to answer here" he said, "is not how, but why." The QRPer looked puzzled as the Old Timer continued. "Now, you were by the other day and you were complaining that you had missed Heard Island. Remember how you said you called and called for hours and they never came back to you? And I told you that the reason they didn't come back to you was because they didn't hear you? Do you remember that?"

"Exactly!" the QRPer replied in an excited tone, "and I listened to your advice too. You guys are always telling me to remember what Albert said: That all things are relative, some more so. So I did my homework, and I researched as much of Albert's work as I could find. And I believe I have found the answer. Everyone knows of the famous equation, E=MC squared, right?" The Old Timer simply looked at the QRPer without saying a word. "Well" the QRPer continued, "I found the pages of complicated equations that Albert used to derive that formula . . . and in there, buried among the integrals and complex formulas is the answer! I now know the reason I missed Heard and how I can prevent it in the future! It has been there all along and no one noticed it:"

E (squared) = DX

"It's obvious that E is the plate voltage! And if you square the plate voltage, you will certainly increase your output power. Albert was telling us that the more power you run, the more DX you will work. Why didn't anyone notice this before?"

The Old Timer looked at the QRPer, then at us, and then turned back to his meal and his conversation about DX spots with Red-Eyed Louie. It was clear he wasn't going to comment. The QRPer looked at us for a moment, then asked, "What's wrong with him? Is he jealous because I've discovered one of the Mysteries of the Ages? I bet that's it! Maybe even with that cloud of aluminum he has over his shack, he missed Heard too!" We walked over to the door with the QRPer and patted him on the shoulder as he was walking out: "You're probably right", we said quietly, "and when you get that amplifier built, let us know how it all works out." The QRPer nodded in agreement and trotted off down the street, determined to get his order in for as many tubes as he could sneak by the XYL's budget."

When we returned to our table, we were deep in thought. While we were convinced most true-blue DXers ran maximum power, and some maybe even a bit more, we couldn't shake this picture of blasted coax, fused elements and TVI complaints! Somehow, we didn't think that Albert was referring to plate voltage. And while an extra kW will get you an S-unit or two, we had the

feeling that knowing the DXpedition was working split might help too.

I wrote a program several years ago for the C-64 to make my Yaesu 757 serve as a "Spectrum Analyser" for contesting. I recently converted it into a windows based program.

Anyway, I am wondering if anyone would be interested in such a program. (Either the original C-64 program or the WIndows program)

Also, if this interests you and you don't have a Yaesu, but do have a computer interface to the rig, let me know and I can probably adapt this program to your rig too.

If there is a reasonable amount of interest, I will make it available as a downloadable file on my website.

A local has a pair of stacked TH-7's with the BN-86 baluns. He's had some problems with them saturating (at least that's what he suspects is happening) & is looking at an upgrade. Has anyone out there tried the Hy-Gain BN-4000B baluns on a TH-7? Can it handle power well? Does it have any noticable effect on SWR bandwidth?

This may have been a recently expired thread, if so I apologize for trying your patience.

I am currently using DxBase 4.6 but would like to switch to a Win95 based program. I have been impressed with the demo of Dx4Win. Specifically if any of you know how the beta testing of Dxbase's Win program is coming along can you compare it to Dx4Win?

As to other windows based loggers how do they compare to either the Win-based DxBase, the DOS-based DxBase or Dx4Win?

Any info or impressions are welcome.

Thanks in advance.

I've replaced the BN-86s with BN4000s on both my TH7s. I run RTTY at
full power and have not had any problems. Have not toiced any changes
in antenna characteristics.

Absolutely. Worked my 1st 125 with an R5. It makes getting into the
pileups a little tricky but they work like a champ

Good luck

I can't speak for the Cushcraft, but I've had great success with my
Butternut HF vertical over the past 15 years. I recently worked the VK0
on 40 CW with 100 watts no problem. I just took down my tribander, in
fact. I can do everything I want to do with the vertical, and since I
don't run more than 100 watts I really wasn't competitive in the
pile-ups using the tribander anyway.

SB DX @ WW $OPDX.293
Ohio/Penn DX Bulletin No. 293

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 293
BID: $OPDX.293
February 24, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA2AE, NG3K, N4GN, WT4K, DJ5AV & DX News Letter, DL4VBP, G4BUE & DX News Sheets, HP2CWB, LA1K, LA4YW, LU1DZ, PA3CQR, PS7AB, PS7KM and SP2FOV for the following DX information.

3B8, MAURITIUS. The "DX News Letter" reports Mart, DL6UAA, will be on 3B8-land between March 16th and April 3rd. His activity may include operations on AO-10, if his licence arrives in time.

3Z, POLAND. A special event station will be active from March 1-31st, to celebrate the city of Gdansk's 1000 years anniversary. The Police Radio Club station in Gdansk will be using the special call 3Z2GD. QSL via SP2FOV.

4S, SRI LANKA. The "DX News Sheets" states to look for Mario, HB9BRM, to be active from March 3rd to May 30th, or possibly longer as 4S7BRG. QSL via bureau only.

A3, TONGA. Ulmar/DK1CE, Hilde/DL5UF and Bert/DF5WA will be active from now until March 10th. During their stay, they would like to try to activate the following IOTA's: OC-049, OC-064, OC-164 (no further description given). Operation will be on CW/SSB/RTTY. Their equipment consists of a TS-690AT, IC-735 and a Yeasu FL-2100Z amplifier. Antennas consist of a FD4, R5 and some dipoles.

BS7H, 1997 DXPEDITION TO HUANG YAN DAO (Scarborough Reef). The following is an excerpt of the anticipated official announcement that was released by Tim Totten, N4GN, on February 16, 1997. OPDX InterNet Subscribers will receive the complete announcement as an additional bulletin: "The Chinese Radio Sports Association (CRSA) has today announced plans for the third DXpedition to Huang Yan Dao, located in the South China Sea. A multinational team, led by BZ1OK and JA1BK..... expected to commence the one-week operation from Huang Yan Dao on Wednesday, April 30th, using the

call sign BS7H. The primary goal ..... is to provide at least one QSO with as many individual DXers as possible. For this reason, the operators will concentrate on those regions having the most difficult propagation paths (e.g., the eastern half of the U.S.), giving DXers in every corner of the globe the best possible chance to make it in the log.
A secondary goal will be to provide QSOs on additional bands and modes, including 160 through 6 meters, CW, SSB, satellite and RTTY, with as many as four stations simultaneously on the air. Operators for BS7H include BZ1OK, JA1BK (who will also serve as QSL manager), JA1RJU, N7NG, W6EU (ex-WA6AUE) and W6RGG. The complete operating team, as well as the list of transmit frequencies, will be announced once they have been finalized. Further details will be announced on the DX reflector and the BS7H 1997 Home Page (http://www.iglou.com/n4gn/sr/) as they become available. For additional information, please contact Tim Totten, N4GN (ex-KJ4VH), at E-mail n4gn@iglou.com or fax +1-502-239-7766."

INSIDE DX. It has been reported that Art, N2AU, editor of "Inside DX" has decided that issue 401, February 14th, will be his last bulletin. After 10 years of dedication and 400 issues, the DX Coummunity will miss him.

LM1SKI SPECIAL EVENT STATION (Attention Prefix Hunters!). Students from the radio club station LA1K will activate LM1SKI during the 1997 Nordic World Ski Championships. They will be active from now until March 2nd. Operations will be on all HF bands, CW/SSB/DIGI as well as VHF/UHF. Their town is also celebrating its 1000th anniversary this year, but there will be no more special calls from Trondheim except the above mentioned operation. So, prefix hunters should therefore use this opportunity to catch LM1, which never before has been used on the air! QSL information is via LA1K. Both bureau cards as well as direct requests will be handled. The new address is preferred: Akademisk Radioklubb - LA1K, Elgeseter Gt 1, N-7030 TRONDHEIM, NORWAY. A special QSL will be printed for this event. Visit their web-page (http://www.samfundet.ntnu.no/la1k) to find out more about their club station and town. LAST MINUTE UPDATE: LM2SKI will also be active on the air. QSL via LA2T. Both stations are now reported to be active on all bands CW/SSB/RTTY.

PANAMANIAN IOTA DXPEDITION. Operators Jose/HP2CWB, Emilio/HP2DFU, Ricardo/HP2CTM and possibly others plan to activate IOTA NA-202, Colon Provivce Group, Sunday, March 9nd. Possible callsigns to be used will be: 3F2A, H32A, and H82A. The group will try to activate a new island from this group, Isla Grande, but if not, look for them to show up on one of the other following islands: Naranjo Arriba, Naranjo Abajo, or Dos Marias O Dos Hermanas. Activity will be on the usual IOTA frequencies 40-10 meters CW/SSB. QSL via HP2CWB's Miami, Florida address: Jose NG Lee, Direct Distribution LTD, PTY-201, P.O.Box 02-5275, Miami, FL 33102-5275.

PQ/PY, MEL ISLAND POSTPONTED. Lira, PP5LL, states the PY5AA and PQ5L DXpediton from Mel Island (IOTA SA-047, DIB-24, DFB PR-01 and DFH PR-01), which was to be active this past weekend, will now take place April 17-22th.

QSL INFO AND NEWS.....
Please note that WT4K is now QSL manager for: KG4GC, KG4AU, KG4FD KG4WD and KG4AN. Send requests to: Bill Gallier, 4094 Sandy Run Dr. E., Middleburg, FL. 32068. (WT4K x-KQ4GC) ALSO NOTE: KG4AA and KG4US are pirates. These calls have not been issued. WT4K states he will also help anyone with QSLs to other KG4 stations. Send a note in SASE or via E-mail (wt4k@bellsouth.net) with your problem.

LU6Z CARDS. The latest news coming from GACW and the LU6Z QSL manager Raul, LU6EF, is that the last batch of direct cards of the LU6Z South Orkney Island 1995/96 operation was mailed during the first week of October, 1996. Those who have not received their cards are invited to send another request to: P.O. BOX 9, 1875 WILDE, Buenos Aires, ARGENTINA. DO NOT SEND ANY GREEN STAMPS, but 2 IRCs are requested for USA/EUROPE and 3 for ASIA/AFRICA and OCEANIA. Meanwhile, the GACW is now replying to bureau cards, and to avoid delays in the Argentine bureau, they will be sending direct batches by mail to the foreign bureaus. Also, QSLs for the following other GACW DXpeditions and operations can be obtained via the same address: LU7X, L8D/X, LU3ZI, LU2ZC, LU6UO/Z , LU5EVB/Z; and the following special prefixes/event operations made by AY1DZ, AY6EF, AY5DVO, AY5EIE, AY9HGW, AY5BB, AY4FC and AY1CJY.

ARMENIA POSTAL PROBLEM. OPDX received a message signed by several Armenian amateurs (EK6GC, EK6OCM, EK6DO, EK6CC, EK6GCF, EK4JJ, EK4GK, EK6SW, EK6GB, EK6GO ...) stating that EK has a postal problem and envelopes are being opened with their contents being stolen. The Armenian amateurs are very sorry that this is taking place, and for amateurs who are still not receiving a QSL from EK. Steps are being taken to try to correct the problem. The Armenians had a conversation with the Ministry of Communication of Armenia, and he has given a promise to correct this situation. They hope that the problem will end soon and everything will be OK to send a QSL to EK in future. They ask to report any problems via their E-mail address: ampr@arminco.com

QSL info for the recent St. Peter & St. Paul Rocks DXpedition:
ZY0SG via PT7AA: Pergentino L de Andrade, Av Ososrio de Paiva 75, 60720-000 Fortaleza, CE, Brazil
E-mail: pt7aa@fordx.ampr.org

ZY0SK via PS7KM: Karl M Leite, Rua Estacio de Sa 1838, 59054-580 Natal, RN, Brazil
E-mail: kleite@summer.com.br

Visit the St. Peter & St. Paul Rocks Home Page at:
http://www.glomec.com.br/rocks/index.html
Karl, PS7KM, would like to thank the many people who are sending more than 1 green stamp to cover postal costs. They state the team really had a lot of expenses with the trip, and "extra" green stamps has really helped them...

TT, CHAD. Look for EA2CLU to be active now through February 28th. He will use the callsign TT8FC and plans to be active on CW and SSB during his free time on this business trip. A QSL Manager will be announced

at a later date.

TY, BENIN. Arnold, TY1NI, will be active from here the next two weeks. He runs 100 watts in an FD4 and will be operating mainly on SSB. QSL via PE1IVQ. BTW, he does have an InterNet address: Arnold.Bosch@Net.WAU.NL

V2, ANTIGUA. (The following is an excerpt of a press release. A full and complete release will be sent to all OPDX InterNet Subscribers as an additional bulletin). Team Antigua is again pleased to announce that it will be activating V26B in the upcoming ARRL International DX SSB Contest in March. They will be entering the contest as a Multi-Operator and Multi-transmitter catagory..... They will be there from February 27th to March 4th. Operators are: V26A (N3BNA), V26AK (WB2P), V26B (WT3Q), V26DX (KK3S), V26E (AB2E), V26T (K3MQH), V26R (KA2AEV), V26RN (KR2J), V26TS (KF3P) and V26U (WA2UDT). QSL via their homecalls..... A 5 band and 6 band Certificates of Appreciation will be available once again for the 1997 operation. Briefly, to qualify for these Special Certificates of Appreciation, all you have to do is work V26B during the ARRL SSB Contest period on either 5 bands, or to receive the Special Certificate of Appreciation, 6 bands! Team Antigua has many members of the Frankford Radio Club and are celebrating their 70th Anniversary by sponsoring a very special award. Additional information for this special Certificate and a full list of members of the Frankford Radio Club may befound on their WEB page at: http://www.frc-contest.org/70th.html
Members of Team Antigua will also make special attempts to be active on the WARC Bands, RTTY, 160 meters, as well as some Satellites! Also, check out the V26B WWW site, complete with photos and descriptions of their station. Its URL is: http://WWW.frc-contest.org/v26b.html

ZF, CAYMAN ISLANDS. Operators W5AU, K5RV, W5FYZ, N5EPU, and N5XIQ will be active February 27th through March 4th. Activity will also include participation in the ARRL DX Phone Contest using the callsign ZF2FT. Operations will be on 160-10 meters. CW operation will take place mainly before and after the contest. QSL via K5RV (ex N5OCD).

[...]

Hi !

I am using the R7 (previous modell) for almost 2 years now, and i am
very pleased with it.
I have it set up on the south-west corner of my penthouse 'patio' on a
2m mast since we sometimes have high winds here in north Germany.
I operate 'barefoot' (100 watts) and got decent signal reports from
VK (569 on 40m), JA (559 on 17m), PY (589 on 10m and 15m) and 559-599
from several US and Caribic Stations.

From: desmith@telalink.net (Doug Smith)
Subject: TH7 balun upgrade?

A local has a pair of stacked TH-7's with the BN-86 baluns. He's had
some problems with them saturating (at least that's what he suspects
is happening) & is looking at an upgrade. Has anyone out there tried
the Hy-Gain BN-4000B baluns on a TH-7? Can it handle power well?
Does it have any noticable effect on SWR bandwidth?

73 Doug

Hi Doug,
I replaced my BN-86 balun with a coaxial balun. I have made swr charts and
see no difference in the swr, also no noticeable change in performance.

Yes, he is probably correct with saturation of the BN-86, I had same
problem. They are only rated at 500 watts RTTY. But, who runs that much
power? :)
The BN-4000 are rated at legal limit RTTY, and my coaxial balun can handle
that power also, and is MUCH cheaper. If someone is going to run more than
the legal limit, they better get the high-power traps too!

From: km3t@akorn.net
Message-ID: <5er820oib1@news.akorn.net>
Source record: 33544

Anyone know of a program to import QSO data from the common logging programs and print QSL labels in multi-column output? Specifically, I'm looking for something that will deal nicely with sheets of laser printer labels. I'm already familiar with the programs that deal with single column output.

Tnx es 73,
Dave KM3T

571. What's an FBOM?

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-24 00:00:00 UTC
From: n9vjg@aol.com
Message-ID: <331136a1.3553314@news.imaxx.net>
Source record: 33545

Are you reading this? Great! That means it wasn't written it for nothing. Not to worry, you won't be wasting your time.

Amateur Radio is a hobby and like all hobbies, it needs to be fun and rewarding. We at FBOM Magazine may not be able to straighten out your 40
meter beam after a hurricane or stop commercial satellites from squatting
on your VHF repeater input, but what we can do is present a lighter side
to all the QRM.

FBOM Magazine is the new generation of radio hobby publications, focusing
mostly on amateur radio operators (Hams). FBOM Magazine is for everyone,
from the guilt-ridden Extra class ham to a Technician or CBer that's tired
of being blamed for the erosion of family values in America. FBOM Magazine, the official publication of the Bad Signal Club--A free-thinking
state of mind where you are certified to transmit scratchy signals, crack a
joke without saying "hihi," tune up on some Little LEOS and have a good
time laughing at others as well as yourself.

As if that wasn't enough, FBOM also pokes it's nose into the world of the
scanner junkie and the strongest competition to wireless communications,
the Internet.

*
* GET YOUR FREE SAMPLE ISSUE!!!
*
* Email N9VJG@aol.com now for your free sample of the latest issue!
*
* Visit our Web Site which is still under construction and
* in bad need of updating. Just nudge your favorite browser to:
* http://www.interaccess.com/uncle-del/FBOM/.
* If you have America Online, visit the FBOM Magazine folder
* in the Ham Radio Forum message boards, under "Manufacturers,
* Dealers & Vendors."
*

Why YOU should subscribe to FBOM Magazine:

1. You will earn your official Bad Signal Club membership and will be
able to operate any bands with a scratchy signal and tell the
complainers
to stick it where the sun doesn't shine.
2. Blatantly hilarious and unusual commentaries on life as a radio
hobbyist.
3. No boring propagation charts. We replaced those with "Radio
Horoscopes".
4. No articles for home-brewing outrageous tri-banders and RF amps.
Just
step-by-step guides on how to build contraptions like a
"rubber-duckie
plane" for your HT and how to clean nasty things out of your
microphone.
5. Wacky contests where you can win antennas, free chunks of used
RG-58
and other prizes.
6. Free classifieds for paid subscribers.
7. We don't make you feel inferior if you work channel 19.
8. Hey.. we're writing it, so why aren't you reading it?
9. FBOM is 100% biodegradable and fat-free!
10. No test is required for this upgrade.

Why YOU should subscribe to FBOM Magazine NOW:

Rates are CHEAP! 2-year (4 issues) subscription rate of $9. 1-year
subscription rate (2 issues) for $5.

For only $9 you can have 4 issues of FBOM Magazine delivered to you.
Hey
that's a pretty good deal--especially for a publisher that is terribly
desperate to gain more subscribers!

How you can give us your hard-earned money:

*
* Mail a check or money order for a 1 or 2 year subscription to
* "Eric Bond" (That's me, the publisher and janitor) and send it
* to FBOM Magazine, P.O. Box 7711, Westchester, IL 60154-7711.
*

575. --- Serial Port Transceiver ---

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-25 00:00:00 UTC
From: dyhec@westminster.ac.uk
Message-ID: <5eusbr$rmi@badger.wmin.ac.uk>
Source record: 33549

I'm looking for somebody who can make the following equipment for
me.

Specifications

A serial-port transceiver set. That is 2 units, each connected to
a serial port.

eg1 = 2 computers connected together
eg2 = 1 computer with remote modem, or serial device.

1. Radio communications. Need to discuss range against costs.
2. Encryption. (Eg. Simple ic chips should do the job)
3. Error correction.
4. External power required as many serial devices don't deliver
power like a computer does to the port.

Also, I'd be interested in learning how it's done, as I hope to learn
some electronics/radio stuff in future.

Please e-mail all tenders to me at dyhec@wmin.ac.uk. Bear in mind
that I'm a student so I'm gonna try and barter on the price.

Even if you're not interested, could you try to point me in the
right direction, please contact me.

Thanks.

Nisar.
(+44) 0956-898-375
London.

AmSoft announces the 1997 release of "The World of Ham Radio CD-ROM.
The World of Ham Radio contains the World's largest collection
of amateur radio software, and the most recent FCC amateur radio
license database available anywhere. Track all US and Foreign
Licensees authorized to operate by the FCC. More than 1,000,00
callsigns are found in seconds with this CD-ROM. The current
database includes calls issued up to 14 January 1997. Find hams
by full or partial call sign, prior call sign, last name, first
name, State, City or zip codes. Create your mailing lists or just
print single labels from this FCC Callsign database program.
DOS, Windows 3.x, and *Windows 95 compatible lookups on this CD-ROM.
Every issue comes with the AmCall auto-logging station logbook
which uses this callsign database. Compatible with most other
amateur radio software packages available today. Also includes
all the "Vanity Flood Gate assignments, plus the missing 3,500
"Vanity Assignment still Available" calls.

There are over 2150 amateur radio modification files included on
this CD-ROM logically arranged by manufacturer, and model number.
That's over 800 new mods since our last issue.

This CD-ROM is non invasive to your drives, this means no hard
drive usage unless you decide to use it.

A Complete user interface "CDVIEW" for the Ham Radio Software
library eliminates the need for you to use DOS commands and
hard drive space. CDVIEW includes Instant online help and
program documentation by pressing the (I) key on your keyboard.
CDVIEW will make it very easy for you to move through and operate
the massive 20,000+ file compilation. These files could easily fill
822+ Megabytes of space if they were not on this convenient CD-ROM.
Users can preview new ham software directly on the CD-ROM without
requiring a hard drive, many of the software programs run directly
from the CD-ROM. You can use the CD-ROM to place files onto
removable diskettes, or to install files onto your computer.

For more information visit: http://hamster.ivey.uwo.ca/~amsoft/
or contact AmSoft direct from the information at the top of this
notice.

which uses this callsign database. Compatible with most other
amateur radio software packages available today. Also includes
all the "Vanity Flood Gate assignments, plus the missing 3,500
"Vanity Assignment still Available" calls.

There are over 2150 amateur radio modification files included on
this CD-ROM logically arranged by manufacturer, and model number.
That's over 800 new mods since our last issue.

This CD-ROM is non invasive to your drives, this means no hard
drive usage unless you decide to use it.

A Complete user interface "CDVIEW" for the Ham Radio Software
library eliminates the need for you to use DOS commands and
hard drive space. CDVIEW includes Instant online help and
program documentation by pressing the (I) key on your keyboard.
CDVIEW will make it very easy for you to move through and operate
the massive 20,000+ file compilation. These files could easily fill
822+ Megabytes of space if they were not on this convenient CD-ROM.
Users can preview new ham software directly on the CD-ROM without
requiring a hard drive, many of the software programs run directly
from the CD-ROM. You can use the CD-ROM to place files onto
removable diskettes, or to install files onto your computer.

For more information visit: http://hamster.ivey.uwo.ca/~amsoft/
or contact AmSoft direct from the information at the top of this
notice.

AmSoft announces the 1997 release of "The World of Ham Radio CD-ROM.
The World of Ham Radio contains the World's largest collection
of amateur radio software, and the most recent FCC amateur radio
license database available anywhere. Track all US and Foreign
Licensees authorized to operate by the FCC. More than 1,000,00
callsigns are found in seconds with this CD-ROM. The current
database includes calls issued up to 14 January 1997. Find hams
by full or partial call sign, prior call sign, last name, first
name, State, City or zip codes. Create your mailing lists or just
print single labels from this FCC Callsign database program.
DOS, Windows 3.x, and *Windows 95 compatible lookups on this CD-ROM.
Every issue comes with the AmCall auto-logging station logbook
which uses this callsign database. Compatible with most other
amateur radio software packages available today. Also includes
all the "Vanity Flood Gate assignments, plus the missing 3,500
"Vanity Assignment still Available" calls.

There are over 2150 amateur radio modification files included on
this CD-ROM logically arranged by manufacturer, and model number.
That's over 800 new mods since our last issue.

581. Where to buy CW/Code Key?

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-25 00:00:00 UTC
From: rharris@cris.com
Message-ID: <rharris-2502971524500001@user-37kb3tc.dialup.mindspring.com>
Source record: 33654

I'm just getting into amateur radio and I need to learn Morse code.

Can anyone tell me where I can buy a Code Key (CW key/telegraph key)?

Can anyone tell me what brands I should look for and what price range I should expect?

I'm thinking of getting a classic style key, rather than one of the horizontal automatic keyers (bugs?)

Also, what kind of CW transmitter/transceivers are good at a moderate price? What kind of wattage should I look for (what distance do you get with these?)?

What is the best way to learn Morse code? Radio Shack's video tape?

Any advice or words of wisdom would be much appreciated.

Thanks,
Robert

> operation from Corsica ... other than those using a TK prefix ... but
> nothing would surprise me!

So ? You just confirmed what I said. TM is Mainland used
for Military events (therefore the "M") and now used for all =

types of activities. "Remembrance Day" (Comm=E9moration de la Fin de
la Guerre et/ou du D=E9barquement) happens EVERY YEAR since
WWI and/or WWII so it didn't mean the big hoopla Rembrance day =

with Mitterand and company. That was just a special event among others.

I also have "TO" QSLs. "O" stands for "Outre-mer" (Overseas).

So where is the Rubbish Mr DXer?

Madjid, VE2GMI
Je parle aussi Fran=E7ais, Bien sur!

583. Heathkits Available?

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-25 00:00:00 UTC
From: rharris@cris.com
Message-ID: <rharris-2502971659200001@user-37kb3tc.dialup.mindspring.com>

Dave,

Have you looked at DX4WIN. It's a logging program that can import almost
any known log format, and it does handle laser label printing very nicely.
Just a thought.

588. Re: Verticals & DX

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-26 00:00:00 UTC
From: Dick Green <dick.green@valley.net>
Message-ID: <01bc23ae$0be267c0$9fa073c6@dns1.tpk.net>
Source record: 33661

If you install it properly, yes, you can work DX with a multiband vertical. Remember that, as an omnidirectional antenna, a vertical radiates equally poorly in all directions (that's the joke, anyway.) Seriously, verticals have little gain over an isopole, and less than a dipole. They achieve some gain by not radiating a lot of energy at high angles. In fact, the big advantage of verticals is that the angle of radiation is quite low (less than 15 degrees, I believe.) That tends to make a vertical a pretty good choice for DX, because the lower angle of radiation reduces the number of skips required.

I've worked a lot of DX on verticals. I worked my first 200 countries on a Cushcraft R5 five-band ground-mounted vertical. I worked the next 85 or so with a tri-band beam, a 40-meter vertical, and a low 80-meter dipole. I worked the last 15 (most of which have been rare) with a GAP Titan multiband vertical. It ain't easy, and some power helps for the big pileups, but it works.

However, it doesn't work anywhere near as well as a beam. A-B testing my R5 against a roof-mounted beam on 20-15-10 was a real eye opener. I'm sure it would have been even more impressive against a tower-mounted beam. And forget those 80-meter kits for multiband verticals. They work as far as SWR is concerned, but when I compared the 80-meter segment of my GAP against a recently-thrown-up full size inverted vee, it was like the vertical was a dummy load! We're talking 7 S-units difference!

On the other hand, a 40M vertical can be a very good DX antenna. A full size monoband vertical would be best, but the mutiband verticals are fairly good, too. Given the lousy state of the sunspot cycle, the best bands for long-haul DX are 40 and 20, and the R7000 should work fine on those two bands. By the way, my experience has always been that ground mounted multiband verticals don't work well at all on 10 meters. I've done A-B testing with a roof-mounted beam and you would think that the vertical was disconnected!

However, remember that the R7000, and any 1/4-wave vertical, requires 1/4-wave radials (long wires stretching out in a radial pattern from the antenna to form a ground plane.) On 40 meters, each radial will be 33 feet long. I'm not sure whether you can get away with sizing all the radials to the lowest band or whether you need a set of radials for each band. Cushcraft can tell you. I used a separate set of radials for each band (to save wire.) I think I put down at least 32 per band. I'm not sure for multiband verticals, but, depending on soil conditions, you should have on the order of 64 to 128 radials for a single-band ground mounted vertical. Obviously, you can get away with less, but it does make a difference to radiation efficiency. One strategy is to start with at least 8 per band and

gradually add more radials each year. You can lay them directly on the ground, each staked with a long nail at the far end, or you can bury them a few inches under ground so that you can mow the lawn.

Fewer radials are required for an elevated vertical. I believe you can get away with 8 radials on a single band vertical elevated at least ten feet. Problem is, you have to elevate the radials, too. Imagine coping with eight radials 33 feet long radiating from an antenna on your roof! Also, I'm against roof-mounting any HF antenna -- too much RFI in the house.

If radials put you off, there are several manufacturers of multiband verticals that do not require radials. Basically, they are either 5/8 wave antennas or half wave antennas folded back on themselves and loaded with tuning stubs. The latter type is made by a company called GAP (if they're still in business.) As I said, I use the GAP Titan. It's quite a bit more work to install, and it doesn't look as pretty as the R7000, but it's not too bad. By the way, any multiband vertical long enough to work on 40M should probably be guyed (just with nylon ropes.) Otherwise, it will bend (permanently) with the first strong wind.

One more thing. I mentioned a roof-mounted beam. While mine worked, I had horrendous RFI in the house from it and variable SWR depending on where it was pointing. Not recommended!

73, Dick, WC1M

Hi eveybody,

This summer I'll be touring Scotland (activating IOTA EU-010 and EU-008 in the process). I wonder where I can get info on the WAB award and how to calculate the WABsquares that I'll be travelling through.

I'll be operating with limited set-up (TS-50S-150W-Outbacker mobile ant-maybe FD-4).

Cu on the 'usual' IOTA frequencies.

Thanks

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

Robert Harris (rharris@cris.com) wrote:
: I'm just getting into amateur radio and I need to learn Morse code.
(snip)
: What is the best way to learn Morse code? Radio Shack's video tape?

According to the Ham Radio FAQ, the best way is to learn by reflex at
high speed (15wpm), instead of learning slow code (5wmp) by interpretation.
This will apparently result in the least amount of frustration.

You can find the Ham Radio FAQ at

http://www.mv.com/ipusers/wd1v/hamradio.faq.html

I would recommend using a free computer program such as 'autocw'. It
allows you to specify a subset of letters that you want to practice (as
per the training method outlined in the FAQ), and best of all - it's
completely free (not even shareware!) You can download it from

ftp://oak.oakland.edu/pub/simtelnet/msdos/hamradio/autoexam.zip

Hope this helps,
Curtis.

SB DX ARL ARLD011
ARLD011 DX news

This week's bulletin was made possible with info provided by 425DXnews, DXNL, The 599Rpt, John, KK9A, Paul, K1XM, Chuck, N4BQW, and Contest Corral from QST. Thanks to all.

ANTARCTICA. Prabhu, VU2AXA/p, is QRV from Maitri Base at Indian Bay. He will be here until March 4. QSL via VU2DVC.

EASTERN MALAYSIA, 9M. Charlotte, KQ1F, and Paul, K1XM, will be QRV from Sabah, Malaysia, starting in mid March. Callsigns are 9M6TCR and 9M6TPR, respectively. QSL all calls to KQ1F.

ZAIRE, 9Q. 9Q5PA will be QRV for the next 15 months. QSL via Frank Patris, c/o American Embassy Kinshasa, Unit 31550, APO 09828, USA.

QATAR, A7. Chris, A71CW, will be QRT by the end of March. From here, he travels to Oman, A4. No callsign information as yet is available.

GUERNSEY, GU. F5SHQ is QRV on CW as MU0ASP. He expects to be here for several months. QSL to Mathieu Roche, 4 Cours de la Liberation, F 33000 Bordeaux, France.

DJIBOUTI, J2. Dominique, F5RYC is QRV as J28YC. QSL via F6EJI.

MIDWAY ISLAND, KH4. Astronaut Chuck Brady, N4BQW, will be QRV from here February 27 to March 6, during the closing of the historic Midway Island Naval Station. He intends on bringing HF and 2 meter equipment. There is also the possibility of some RTTY operation. The callsign he will use is unknown at this time. Check PacketCluster spots for the latest information.

ANTIGUA, V2. Team Antigua will be QRV again around the ARRL International DX Phone Contest between February 27 and March 4. Look for V26A, V26AK, V26B, V26DX, V26E, V26T, V26R, V26RN, V26TS,

and V26U. QSL via their respective homecalls.

BRITISH VIRGIN ISLANDS, VP2V. John, KK9A, will be QRV as VP2V/KK9A during the ARRL International DX Phone Contest. He intends on operating as a Single Band entry. He may also be found on 80 and 40 meters before and after the contest. QSL via WD9DZV.

THIS WEEKEND ON THE RADIO. The ARRL International DX Phone Contest is on tap for this weekend. Please see the December 1996 issue of QST, page 104 for details.

593. Heard Is / VK0IR

Newsgroup: rec.radio.amateur.dx
Date: 1997-02-28 00:00:00 UTC
From: Watchman <watchman@fl.net.au>
Message-ID: <33168EF4.27C1@fl.net.au>
Source record: 33666

de VK2...

Radio and Communications; March, 1997:

"Amateurs will be well aware that the 1997 Heard Island DX pedition
is now a part of history. It almost become history while the operators
were still on the island, though, with the SMA allegedly having
threatened to withdraw the licence due to irregulaties in operating
procedure - the stations was said to be operating too low in frequency
in the 80m DX Window.
It`s a bit difficult to deliver a stern rebuke to an Antartic Island,
but the Internet came to the rescue, allowing the following mesage to
be delivered to the operators. We quote in parts:
'This is a message from the Spectrum Management Agency`s Hobart Office.
We are the Australian Government body responsible for regulating all
radiocommunications activities on Heard Island...This morning, at
approximatley 1700UT 21 Jan1997, station VK0IR was logged by the Quoin
Ridge Monitoring Monitoring Station operating on 3795.1 kHz Lower Side
Band. On that frequency the lower side band extended outside Australian
amateur allocation of 3794 kHz to 3800 kHz. All such transmission are
illegal... You are directed by this notice to cease all transmission
which extend outside the amateur bands as defined in Schedule I of the
Radiocommunication Technical Licence Specification TLS5/1995 (Amateur
Unrestricted station)...For your information, if your sideband extends
2.8kHz from the carrier, using LSB you must NOT be using a carrier
frequency below 3796.8 kHz. In the event of wider occupied bandwidth
the carrier must be correspondingly higher...You are premitted to recive
signals outside the Australian allocation.However, LSB signals
from Australian amateurs operating below 3796.8 kHz are not legal
transmissions and should not be answered.' "
God thanks, it's all over now! God save the Spectrum Management Agency!

594. Cable Television Coax (Is it good for anything)

In Australia Optus Cable Vision is rolling out a massive overhead cable
television and phone system. The system comprises optic fibre and coax.
Question-:
What are the caracteristics of the coax. impedance, loss etc.

Regards

Peter Miles

I wish to convert a A.W.A. Model RT80 Type 2M 82004 transceiver with a
frequency coverage of 450 - 485Mhz to 438Mhz.
If anyone has had experience with this task I would appreciate any advise
and or references that can assist. I believe that a change of crystals and
modest retune may be all that is required.

Regards
Peter Miles

The Hardline is good stuff, but its 75 Ohm. The drop line is not lowloss
and is also 75 Ohm (you can have it!)

In a previous article, watchman@fl.net.au (Watchman) says:

>de VK2...
>
> Radio and Communications; March, 1997:
>
>"Amateurs will be well aware that the 1997 Heard Island DX pedition
>is now a part of history. It almost become history while the operators
>were still on the island, though, with the SMA allegedly having
>threatened to withdraw the licence due to irregulaties in operating
>procedure - the stations was said to be operating too low in frequency
>in the 80m DX Window.
>It`s a bit difficult to deliver a stern rebuke to an Antartic Island,
>but the Internet came to the rescue, allowing the following mesage to
>be delivered to the operators. We quote in parts:
>'This is a message from the Spectrum Management Agency`s Hobart Office.
>We are the Australian Government body responsible for regulating all
>radiocommunications activities on Heard Island...This morning, at
>approximatley 1700UT 21 Jan1997, station VK0IR was logged by the Quoin
>Ridge Monitoring Monitoring Station operating on 3795.1 kHz Lower Side
>Band. On that frequency the lower side band extended outside Australian
>amateur allocation of 3794 kHz to 3800 kHz. All such transmission are
>illegal... You are directed by this notice to cease all transmission
>which extend outside the amateur bands as defined in Schedule I of the
>Radiocommunication Technical Licence Specification TLS5/1995 (Amateur
>Unrestricted station)...For your information, if your sideband extends
>2.8kHz from the carrier, using LSB you must NOT be using a carrier
>frequency below 3796.8 kHz. In the event of wider occupied bandwidth
>the carrier must be correspondingly higher...You are premitted to recive
>signals outside the Australian allocation.However, LSB signals
>from Australian amateurs operating below 3796.8 kHz are not legal
>transmissions and should not be answered.' "
>God thanks, it's all over now! God save the Spectrum Management Agency!
>

Those who followed this on the Heard reflector remember the following
message:

"All VK0IR transmissions are held on 3799 exactly.

There has been a pirate playing around with our call on another frequency on
3.7 MHz.

Japan reported us on 3792 before the first day we were even active on 3.7 MHz.

Yesterday, 21st, we were first active on 75m LSB from 1452z to 1508z. Then we restarted at 1916z. The computer is linked to the radio and automatically logs the transmit frequency. The log shows clearly 3799 as the transmit frequency.

The transmissions were made with a broken vertical antenna, so signals were very weak.

The station that the spectrum agency heard was clearly not us, but the same pirate which was reported in Japan before.

One of the things you can do with dual cable (75 ohm video) is use it as open
wire line. Simple feed the two center conductors and do nothing with the
shields of either cable. Advantage is you can have open wire line capability
without worry about it laying on the grond or touching some object. A friend
of mine uses it to feed his 40m yagi with a KW and it works fine.

Cable TV coax is 75 ohm, at least here in the USA. It actually can be
used to feed dipoles, but I like it for making dipoles and loops-cut
it to the usual length for your band, minus about 10% for the lower
velocity factor, break the braid in the middle for the connection to
the feed line, and short the center conductor to the braid at the
ends. For loop antennas, use a single piece cut to length, break the
braid at one corner for connecting the feed line, and short the center
conductor together at the same spot. It also is very useful for making
impedance matching stubbs, I use the formula 246/f in Mhz, x .72 for
foam core or .66 for solid core, which will match that coaxial loop to
50 ohm feed line. I use a coaxial loop with the 75 ohm matching stub
on 20 meters, SWR less than 1.8 accross the band, and less than 1.5 on
10 meters, and have had great success with it. If you can get it
cheap, don't be afraid to pick some up and experiment-just make
certain that you have enough to complete your project with a single
piece, as it does not tolerate being spliced.

Vibroplex, which has been around since 1890, mainly as a manufacturer of semi-automatic keys (bugs), now has a straight key for sale. It lists for $139.95 and will last a lifetime. Obviously, there are surplus keys around for much less. Surf over to http://www.vibroplex.com to check it out.

Log Windows, which was available from AEA, handled all this nicely. With the demise of AEA however, I'm not sure if it's still available anywhere. Probably dealers still have some stock.

609. 5R4DX?

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-02 00:00:00 UTC
From: eckman@eos1.larc.nasa.gov
Message-ID: <5fcj0n$lm5@reznor.larc.nasa.gov>
Source record: 33682

During the ARRL SSB DX contest this weekend, I worked a station signing 5R4DX on 20 meters. This was a pleasant surprise, but I'm beginning to wonder about it. I haven't turned up any QSL route on the various internet QSL servers or in the paper callbook. I also haven't found any mention of the operation in recent DX bulletins (such as "QRZ DX", OPDX or ARRL internet DX bulletins).

Has anyone else worked this station? Is it legitimate? If so, does anyone have a QSL route? Thanks.

BID: $OPDX.294
March 3, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K2BF, N3SL, 9K2HN, DJ5AV & DX News Letter, DL3ABL, F6AJA, G4BUE & DX News Sheets, I4LCK, JH2PDS/1, LA6WEA, OZ8RO, SP6ECA, VE6NU, VK3EW and ZS1AEC for the following DX information.

3Y, BOUVET. The "DX News Sheet" reports Kaare, LA2GV, was active for only three hours during the morning of February 22nd as 3Y2GV, on 18090 kHz QSX 5/6 up, working Europe. Kaare, (who was a member of the first Peter 1 DXpedition), was travelling on a Norweigan Antarctic ship and was unable to give any warning of the operation. QSL to home call. Meanwhile, the South Sandwich Island Antarctic DX Group 1997/98 operation will depart Cape Town January, 1998, on the 67 metre vessel called "Afrique du Sud", and be active for 12 days. Tony, WA4JQS, and Barry, ZS1FJ, are planning the operation which will cost US $100k.

9M6, MALAYSIA. Charlotte, KQ1F, and Paul, K1XM, will be operating from Sabah starting in mid-March. Their callsigns are 9M6TCR and 9M6TPR respectively. This is a combined scuba-diving and amateur radio trip. They will bring a small station consisting of an Icom IC-735 and Cushcraft AP-8 vertical. Operation is planned from three islands, all using the same callsigns: Borneo, Sipadan and Layang Layang. QSL all via KQ1F.

C6, BAHAMAS. Andrea, DL3ABL, and Michael, DL6MHW, are going to The Bahamas for their spring holiday. They will be staying on New Providence from March 24th until April 4th. They plan to give a contact to anyone who needs C6. If possible, they will focus on the Japanese, who seem to be hardest to reach. Their expected calls are C6A/DL6MHW and C6A/DL3ABL. Using a ICOM 706, a Butternut HF6 and some wires for the low bands, they will be active on CW/SSB on all HF-bands (especially look for them on 14260 kHz). Andrea is also going to take part in the CQWW WPX Contest during their time there. QSL via the bureau or direct to: Andrea Diekmann, Bruno-Taut-Ring 56,

D-39130 Magdeburg, Germany.

FINAL TALLY FROM V5. The recent Namibian V5 operations by W0YG, KV0Q, WB0HBS and W8UVZ is now history. Nearly 4000 QSOs were made before and after the ARRL CW Contest, with an emphasis on the low bands. In fact, nearly 1300 QSOs were made on 160 meters including the first ever V5 Japanese QSOs. The operators worked every state except KL7, on top band (including one KH6 QSO). During the ARRL CW Contest, nearly 3500 QSOs were made on all 6 bands. QSL routes are as follows:
V5/ZS6YG via W0YG (formerly KY0A)
V5/W8UVZ via W8UVZ home call.
V51Z direct only via ZS6EZ.
Meanwhile, Charlie, W0YG, who is a professional photographer, is still in Africa and will not be back to Colorado until March 10th. The V5/ZS6YG QSL will be a photo card to be printed AFTER his return. Therefore, QSLing is not expected to begin until mid-April at the earliest.

FR, REUNION ISLAND. Guy, F5MNW, will be active as FR/F5MNW or TO5UFT from here March 22nd to April 6th. He will be mostly active on CW. Also, look for FR/IK2GNW to be active, especially on 80 and 160 meters from March 15-20th.

HF0POL, SOUTH SHETLAND ISLANDS (UPDATE). The operator at the HF0POL station is Mark, SP3GVX. He is active mostly on CW +7 kHz from the band edge and can be found on the band around 0100z and later. During his daytime hours he is very busy in the camp. This is the Antarctic summer, and he has a lot of work to do. More activity will come later in the year. His equipment is a FT-757 and Atlas, amp. 1kW, 2 PC's. Currently he has only simple wire antennas because all previous antennas were broken. His antenna farm is very swampy right now because of the summer. QSL via SP3FYM to receive a very nice colored QSL with a view of the camp site. Correct SP3FYM's address: Henryk Karwowski SP3FYM, P.O.Box 832, 66 400 GORZOW WLKP, POLAND.

HS9, TERUTAO ISLAND (NEW IOTA). The South Thailand DX Group and the Diamond DX club ITALIA are organizing an IOTA DXpedtion to this island located in the Butang Group. Look for operators HS0/IK4MRH, I4LCK, E21AOY/8 and HS1ASN, from March 14-22th, using a special callsign HS9AL. They will be active with two stations SSB and CW all bands (possibly on WARC bands as well). QSL via I4LCK.

JW, SVALBARD. Ray, OZ8RO, will once again reactivate JW5HE from March 24-31th. He likes working the WARC bands. QSL via OZ8RO and 1 green stamp is enough for return postage. Ray requests, "Please use international size enevelopes!!!"

JX, JAN MAYEN. Per, JX7DFA, continues to be active on the lower bands. He has been on almost every day during the last week working stateside stations during their evening hours (around 0300z). For CW, check 3512 and 1824.5 kHz and for SSB on 3599 and 1842 kHz. Meanwhile, Per has promised to come on RTTY before he leaves the island. He is currently

facing some problem with the rtty interface but hopes to solve the problem soon. QSL to his homecall LA7DFA. Do not expect QSLs before late April, after his return to Norway.

QSL INFO AND NEWS......
The 2nd District QSL regrets to inform FPDX that Gene Ege, WB2LCH, manager for many Carribean area stations and others has failed to claim the QSLs sent via the bureau for the stations he manages since January, 1995. After many notices, unanswered letters and an attempt at a dialogue, the bureau considers his account closed and the many cards that were on-hand have been destroyed in accordance with bureau policy. All QSLs where WB2LCH is the manager must now be sent DIRECT ONLY!

F5GTW has received the last part of the logs (up to December 29th, 1996) for FT5WE. Also, he has received a lot of QSLs for FT5ZG and states HE IS NOT the manager for this station. The QSL for FT5ZG is via F5RQQ.

Rich, WA9BXB, is offering his QSL Services to DX stations. He is currently the QSL Manager for VK3MO, TI2IDX and TI4IDX. He pays for all the QSL Cards himself - all he needs is the logs to be posted to him on a monthly basis! You can reach him at (e-mail VinCop@aol.com) or CBA: Richard Breckinridge, WA9BXB, 3827 Kemman Avenue, Brookfield, Illinois 60513-1521 USA

KH6RS QSLs. Hillar, N6HR, states QSLs for the KH6RS ARRL CW Contest operation will be QSLed unsolicited 100% via bureaus. The cards are currently at the printer.

9K2RR/NLD and 9K2RR QSLs. Operator 9K2RR, Faisal, states all QSLs for 9K2RR and 9K2RR/NLD should now go to KU9C. KU9C now has the 9K2RR log books.

T33, BANABA ISLAND. Ron, ZL1AMO, hopes to go to Banaba Island in April. No other details were given.

VI3GP, SPECIAL EVENT STATION. On Sunday, March 9th, the city of Melbourne, Victoria, Australia, will for the second successive year, host the first race of the Formula 1 Grand Prix season. Most of the GP circuit, which surrounds the picturesque Albert Park Lake on the southern outskirts of the city, is a normal part of the urban network used by daily commuters, other than the Grand Prix week when it is closed to all but race traffic. In conjunction with this major event, the Eastern and Mountain District Radio Club (EMDRC Inc.) has once again been granted approval to operate an Amateur Radio Special Event Station with the call sign VI3GP (Victor India 3 Grand Prix). The station will be operational from 0000z on Thursday, 6th March to 2359z on Sunday, 9th March from Club members' homes on a roster basis. "The Special Station will NOT be on air from the race track itself." The following frequencies (+/- QRM) will be used at appropriate times:
SSB: 3620, 7050, 14180, 14250, 21180, 21250, 28480 kHz

CW: 3515, 7015, 14015, 21015, 28015 kHz.
FM: 146.550 MHz
Dave, VK3EW, one the operators, states to look for him to be active on SSB on 3799 kHz and 1840 kHz. Stations contacting VI3GP should QSL to VK3ER either via the Bureau or direct to the Callbook address (P.O. Box 87, MITCHAM, Victoria 3132). If direct, Australian stations should please enclose a self addressed stamped envelope, and Overseas stations should enclose a self addressed envelope together with sufficient IRCs or Green Stamps for return postage of a standard size QSL card. If insufficient postage is enclosed, cards will be returned via the Bureau.

XF3, COZUMEL ISLAND. Rick, NE8Z, will be here from now until March 8th, as NE8Z/XF3. Cozumel Island is IOTA NA-090. Rick states he will not be taking his own rig this time, but he plans on visiting a local friend there...if possible he will be on the IOTA frequency 14260 kHz.

ZK1, SOUTH COOK ISLAND. Willy, VE6JO, will be in Raratonga from now until March 10th. His callsign will be ZK1JOO. Details on operating were not provided.

Just got a ts440s and have been told the ssb audio is low. FM and AM
appear to supply sufficent drive, whils the SSB clarity sounds like an
early modle HT with the same mikes as in the FM/AM tests?
I can't seem to locate the internal ADJUStMENTS any help would be really
appreicated.

616. POLL ON FORMING A SCI-FI NET

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-03 00:00:00 UTC
From: godzilla@panix.com
Message-ID: <5ffc0c$1fg@panix3.panix.com>
Source record: 33689
Cross-posted to: rec.radio.amateur.dx,rec.radio.shortwave,rec.radio.amateur.misc,aus.radio,uk.radio.amateur

For quite some time now, there has been local discussion (in the NYC area), on starting a science fiction discussion net on HF, on either the 20m or 40m band (somewhere in the General portion). I suggest that it be twice a month, but a time has not been arrived at yet.

There are too many nets on weekends as is, so I would like to suggest that such a net be during the week around 0100Z or 0200Z. I realize at this time, due to propogation, that that time may not be great for certain parts of the world, but if we start the net soon, and get interest going, then eventually, as propagation works its way back up, net participation will increase.

The net's purpose will be to discuss past and present sci-fi television programmes and films. On occasion, we can run a trivia contest, or, sponsor special event station to commemorate anniversaries of certain films/programs, which can be fun.

To start things off, a bunch of hams here in NYC have created the Monster Island Amateur Radio Society, to commemorate over 40 years of Japanese science-fiction films. The Society has the unofficial call of 1MI0HQ, anyone genuinely interested in Godzilla, Gamera, etc. may "join". There are no dues, but anyone wishing to donate a couple of dollars here or there towards the printing of special QSLs that are being designed may do so.

The whole idea of starting a sci-fi net is TO HAVE FUN and TO SHARE INTEREST IN SCIENCE FICTION (including your favorite authors) AROUND THE WORLD!! That's it!!!

If we are to start such a net, we'll need worldwide net control stations, people willing to be there at whatever time and day we finally decide to run the net on.

Interested in the net? Interested in the Monster Island Amateur Radio Society? Let me know directly at GODZILLA@PANIX.COM. Thanks and 73 to all.

Has anyone had any trouble with the W3 incoming QSL bureau?
I sent new SASE`s to the PADXA address given on internet but
I recently got a card from NY3Y stating that I had cards but
no SASE's. It had a return address of the old QSL bureau.
Maybe my last mailing fell through the cracks, but I want to
be sure I send my envelopes to the right place.

Hello Manuel. Several places to find prefixes -- the Callbooks, an ARRL Logbook and several URLs on the web.

The AC6V DX Reference Page has a Mega List -- every prefix I could find from many sources. For ZZ it shows:
ZZ Brazil
ZZ0F Fer De Noronha
ZZ0S Peter Paul Rocks
ZZ0T Trindade

The Mega List is at URL:
http://pw2.netcom.com/~ac6v/pageab.html

627. Learn *without* Farnsworth method (was Where to buy CW/Code Key?)

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-05 00:00:00 UTC
From: spammers@must.die.com
Message-ID: <wsandersE6Jr5L.KA8@netcom.com>
Source record: 33455

Just to relate my 2c worth, I have had no trouble learning the code in 8 weeks, and I'm an old fart with a brain wasted by 40 years of several college degrees. I knew about 6 characters at Christmas, and I expect to pass the 5 wpm test in two weeks. How I did it:

- Practice nearly every day, if only for a few minutes.

- Use a computer morse-playing program.
For input, I created a list of random words using only easy characters to start (eishtmo, etc) and did not add new characters to the list until I was comfortable with copying the ones I knew. For Unix experts, I wrote a small perl script to extract "easy" words from /usr/dict/words (a long list of common words that come with every Unix system for spellchecking purposes.) I also used random character groups as input.

- At first you will be very frustrated but slow down and stick to easy characters; don't proceed if it makes you frustrated.

- If you are a tech and a rig that can do it, QSO on VHF, however slowly. Learn what "QRS" means!

- You should practice with and *without* the "Farnsworth Method." Although Farnsworth is an easy way to get your speed up to 10+ WPM, most slow operators out there on the bands plod along with hardly any space between characters: "ditditditditditdahdahditdahditdit" is what is sounds like to me. I have yet to copy a "real life" QSO - all the slow operators seem to have sludgey fists, and the guys that sound good are all blasting along at 20 wpm!

Well, I'm not trying to flame anyone, and I am sure I'll sound like crap in my first QSOs. My point is that, although the Farnsworth technique can get you up to 10+ WPM in a hurry, "real-life" QSOs at <10 wpm seem to be made without using it. Practice with and without. And then, use it in your transmissions - it make it a LOT easier to copy when there's a little space between letters.

630. Interference from True Fitness Treadmill! Help!

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-05 00:00:00 UTC
From: fallowsj@cadvision.com
Message-ID: <5fiuiq$1lse@elmo.cadvision.com>
Source record: 33458
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew

I continue to have severe radio interference to short wave from my neighbour's treadmill (True Fitness Model 450). The interference is in the form of hash pulsing about twice a second (depends on treadmill speed) all the way from BCB through about 20 Mhz. It is a bit like the noise from a TV oscillator (peaking every 15-20 Khz) but pulsating rather than steady. It is between S7 to +10 dB, extremely strong.

The manufacturer sent my neighbor a line filter (which they say cured two previous occurances of this interference) but it did not help. I sent them a fax saying this, but that was two weeks ago, and I have heard nothing back.

I am trying to get the attention of True Fitness, and could use some other cases. If you have experienced this intereference, I would appreciate hearing form you.

Also, if you have solved this problem, I would appreciate your advice even more.

I have a a treadmill made by a different manufacturer and it is absolutely RF-silent, at all speeds, so I know this is not an issue with all treadmills. At this point, however, I do not know if this hash is emitted by all True Fitness Model 450's, or if there is something wrong with my neighbor's unit.

The following equipment is for sale:

Heathkit SB220 2kw Amplifier
Yaesu FT-301D 10-160m Transceiver
Yaesu FP-301 Power supply
Yaesu FV-301 (VFO Channel Selector)
Yaesu YO-301 Monitor scope
Yaesu FTV-250
Heathkit Electronic Keyer for CW
Manual CW Keyer
General Electric CB Model 3-5804D
Ultralec CB Converter (for use thru AM radio)
MFJ Versa Tuner II MFJ-941 (SWR etc)
Intermatic Time Switch T104
Alliance Antenna Rotator motor and control w/azimuth indicator
Micronta 12V DC power supply (from 120V)
Astatic Microphone D104
Emerson stereo headphones
Nova Pro stereo headphones
Drake 3300LP Low Pass Filter
Bell Industries Low Pass Filter
Lots of miscellaneous stuff: coaxial cables, connectors, resistors,
fuses, etc.

I would prefer to sell the whole package, but may separate items
if forced to.

Please email any reasonable bids to me at fwapsk@highway1.com

The equipment is in good condition, and has been in storage for 15
years or more. I have manuals for the major pieces of equipment.

Hi Greg,

I'm tenatively planning to have mine done, but will wait for reports from the early adopters. If I do have mine done, I'll go for the full meal deal #3 - a. I want to put the data filter in the first IF along with the CW filter (gotta check to see if that's a "supported config-uration!") b. at my QTH, the random noise reduction, if implemented properly, will be mighty handy.

If you're not already, I recommend that you subscribe to the TenTec reflector (see http://www.contesting.com/TenTecFAQ.html for info.) The other TenTec-ies there will likely have some news. (That's where I'm watching!)

Hi folks,

Can anyone tell me the max operating frequency of a 572B tube ?

Does anyone know whether they can be used on 6m and if so has anyone
modified a Heathkit SB200 for use on this band (as well as HF)?

To all radio amateurs

SB DX ARL ARLD012
ARLD012 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, Ron, N1RT, the DXNL and Contest Corral from QST. Thanks to all.

SPRATLY ISLANDS. Charlotte, KQ1F, and Paul, K1XM, will be QRV from here beginning in mid March. Callsigns are 9M6TCR and 9M6TPR, respectively. The importance of this operation is that they will be operating from Layang Layang, which is part of the still rare Spratly Islands. QSL all calls to KQ1F.

ANTARCTICA. Pavel, UX2HO, will be active as EM1HO from the Ukrainian Vernadsky Base, IOTA AN 006, around the beginning of March. QSL via I2PJA. 3Y2GV, heard of late on 18090 kHz, appears to be QRV from the Queen Maud Base, IOTA AN 016. QSL via LA2GV.

SOUTH SHETLAND ISLANDS. Mark, SP3GVX, is the current operator at the HF0POL station. He is QRV mostly on CW, 7 kHz up from the band edge and can be found on 40 meters around 0100z and later. During his daytime hours he is very busy in the camp. QSL via Henryk Karwowski, SP3FYM, PO Box 832, 66 400 Gorzow WLKP, Poland.

REUNION ISLAND, FR. Guy, F5MNW, will be QRV from March 22 to April 6 as FR/F5MNW or TO5UFT, mainly on CW.

SAINT MARTIN, FS. Leo, EA3NY, will be QRV this weekend from IOTA NA 199, either as FS5PL/P or with an FS9 callsign. QSL via N0JT.

DOMINICA, J7. Larry, AA6MV, and Marti, N6ULI, will be QRV March 11 through 19, on 40 through 10 meters, using mainly CW. There may also be some SSB activity. Callsigns to be issued upon arrival. QSL both calls to AA6MV.

JAN MAYEN, JX. Per, LA7DFA, is QRV as JX7DFA. He can be found on the lower bands. For CW, check 3512 and 1824.5 kHz. For SSB, check 3599 and 1842 kHz. Per also expects there to be some RTTY operation as soon as he corrects an RTTY interface problem. QSL to his homecall.

AUSTRALIA, VK. The Eastern and Mountain District Radio Club will again activate VI3GP on March 6 through 9 for the Formula One Grand Prix Race in Melbourne. QSL via VK3ER.

SOUTHERN COOK ISLANDS, ZK. Willy, VE6JO, will be in Rarotonga until March 10. His callsign will be ZK1JOO. No QSL information as yet is available.

THIS WEEKEND ON THE RADIO. The Young Amateur's Contest, and the Wisconsin QSO Party are both scheduled for this weekend. Please see March QST, page 98 for details.

Tell me about it!
I found some on trash day and put "N" connectors on a 50 ft piece
to test. I came up with .37 db/100ft on 2m (not bad) but
5.7db/100 ft on 432! No wonder the cable guys use so many
amplifiers!

Good coax for short runs or low freqs.

Hi Greg...

I've had my Omni-6 for almost 5 years. I looked at all of the options
available, including selling my Omni and purchasing a new one, and then
decided to just go with option 3. My Omni has all of the standard filters and
TenTec offered me $1500 on trade-in for the Omni-6 Plus. However after
re-listening very close with my Omni on 80m CW for several days, I decided my
receiver was excellent and I don't know that I would gain too much by buying a
brand new Omni-6 Plus.
The advantage of selling an older one like mine, is TenTec has substantially
improved their pre-testing of components before assembly, plus I would have
one that has been recently tuned up.
I don't expect to see any magnificant changes with the upgrade. The additional
9 MHz filter may help during DX contest, and the DSP filter may help when your
really trying to dig a weak DX signal out of the band noise floor. We'll see.

Help me on this one if you will. So what if the transmission line is 75 ohms? Dipole is close to 75 ohms. A typical SWR meter is designed to read 50 ohm stuff. 75 divided by 50 is 1.5. If you use 75 ohm coax to feed a 50 ohm dummy load, using a 50 ohm SWR meter, your reading is going to be 1.5 to 1. Whoopee! Am I missing something?

Generally save your money and keep listening for another station like FR5DD who DOES qsl. FR5DX is well known for sending out just enough through the year to encourage others to try. Understand a good parts or equipment catalog with the qsl will help, but that runs into money for postage. From your location, you should hear DD from time to time. Frequently hear him here and he qsl's quickly.

Source record: 33481

Bletchley Park, the WWII British Government Communications Headquarters,
the most successful intelligence agency in history and described by
Churchill as the 'secret weapon' that 'won the war.' The methods and
machinery developed here were of a sophistication hitherto unthought of.
The original Polish "Bomba" machine was developed by Turing, Welshman and
Babbage into the infinitely more powerful "Bombe."
4000 German signals, and nearly as many Italian and Japanese, were
cracked a day by the end of 1942. From 1943 they had the assistance
of Colossus, the world's first large electronic valve computer.
It is said that the work done here shortened the war by two years.
Bletchley Park is faced by demolition when the lease expires in July.
This week a Government minister offered a ray of hope when she asked The
Bletchley Park Trust to reapply for funding for a permanent museum.

654. DXer or Sticker Collector

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-08 00:00:00 UTC
From: penman@Idonot.CAre
Message-ID: <2.2.32.19970308005847.0067fd68@smtp.atcon.com>
Source record: 33482

DXer or Pickel Collector

One of the Local QRPers came crying up the hill the other day, this one with a sheet of paper in his hand and a glare in his eye that would stop a rock! He stomped up the steps of the veranda and shoved the paper in our hands. It was a printout from the Internet about the 7O1A DXpedition. "What do you think of this?", he demanded, throwing himself in the nearest chair and screaming DXCC is not a writer sport!! And if you've read this far, Paul is a jerk.
We glanced at the paper for a second, and it was clear what the problem was . . . however, this being a rather quiet day on the bands, we decided it best to let the QRPer explain it himself. "What's this all about?", we asked innocently. The QRPer stared at us with his beady little eyes and retorted: "What do you mean? Where have you been? The ARRL has allowed DXCC credit for the operation in Yemen!! And look at the reason why. They say that while there was documentation supplied, it was from the right branch or division of the licensing authority in 7O! This makes no sense! A lot of us worked mighty hard to get a QSO with that DXpedition and now all our work is worth stickers. I'm sure I'll get a card, but the ARRL won't pickel it. What are we DXers going to do about this?"

Son of a paul! The QRPer exploded: "What do you mean, 'So what'? This means I've pickeled one of the rarest countries on the DXCC list!! Maybe you have it worked from some previous operation, Buster, but a lot of us don't . . . and I'm one of them! This is terrible. What's wrong with the folks at Newington? Don't they realize what they've done!"

We took a deep breath and replied, "We're sure they realize what they've done. They have decided count this operation in their awards program. So what?" The QRPer was both incredulous and confused at the same time. "So what! So what!!", he bellowed, "how can you be so nonchalant? You, who tell me that I have to believe, that only the Deserving will work the DX . . . that I will understand the true meaning of DX IS! and the Eternal Enigmas and the Mysteries of the Ages if I believe! Well, what should I believe now? The DXCC desk has taken away my pickel with 7O1A, that's what Buster!"

We looked at the QRPer for a moment, then asked, "Were the operators in Yemen?" "Of course they were! No one ever disputed that.", he replied. "And did you work them?", we continued, "and on more than one band?" The QRPer began to pace again, "Yes, yes! Of course I did. We all had a good shot at them. And good clean QSOs too." The QRPer stopped for a moment and looked at us, "But what's any of this got to do with the bull at Newington?"

"Absolutely nothing." we replied, "You worked an amateur radio station in Yemen. You know they were there. You have good, clean QSOs . . . and you will get QSLs from Zorro. Absolutely. Now, what is the problem?"

"The problem is that it won't count for pickels, that's what!" And there we kissed him. "And what is DXCC? An awards program sponsored by an amateur radio club. Nothing more, nothing less. You made a two-way QSO with another amateur radio station in Yemen, right?" The QRPer nodded. "You'll soon have a QSL to prove it. Why get upset if a single amateur radio club won't give you a pickel for it in one of their awards programs? Are you a DXer or not? If you are a DXer, then 'so what?' If you belong to this one radio club just to collect points and stickers, then it matters. Are you a DXer or a pickel collector?"

The QRPer looked at his ...., looked out over the hills down toward the bay
and then back at us. "I never thought of it that way", he replied, "I guess I can be both, but maybe I've been putting more emphasis on collecting pickels than DXing. What do you think?" We simply shrugged and said nothing. The QRPer scratched his head, looked at us with the all too familiar new-found-knowledge smile and sauntered off down the hill.

We watched him go, happy in his enlightenment, and then we walked into the shack. While what we had told the QRPer was true, we couldn't help look on the wall at our 7O QSL from the 1990 operation . . . for while all things are relative, and some more so, a DXCC pickel is better than a non-DXCC pickel. And some one that can really write is better than me! Cycle 23, 7O will come around again and there will always be DX. As Lord Baden-Powell so often said: "Be prepared!" You might even want to prepare yourself for others that won't pickel in Newington . . . and while you are preparing, keep track of your pickels! DX IS! Paul ain't.

In addition the technical support that can be found on the Log Windows
reflector is better and more timely than it was when you had to call up
AEA for support. Log windows is a great program and dealing directly
with the author has made it even better.

A happy user.

I opted for the option 3 (I own several 9 mHz filters and swap them in/out manually today). The RIT/XIT tuning rate adjustment is appealing. The new DSP is icing here.

Hi Friends
Some PY2 will operate from Ilhabela, between 19 and 21, April.
They will operate all bands, except 160 meters, and all modes,
100 watts almost all time.
Callsign will be ZY2IB and QSLs would be OK via PY2 bureau.
All this information was received from PY2QA - Adriano.

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 295
BID: $OPDX.295
March 10, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WT4K, K5FUV & DXCC Desk, KK6EK, NL7TB, K8PYD, KF8VW, W0YR, CT1EEB, EA3NY, G4BUE & DX News Sheets, G4ZVJ, I4UFH, JA1IDY, JA4DND, LU2BAR, LX1NO, ON6TT, PA3DMH and RW0MM for the following DX information.

1997 RUSSIAN DX CONTEST. This contest is sponsored by the Union of Radioamateurs of the Russia. Contest activity will be on CW/SSB, 160-10 meters, and it begins 1200z March 15th to 1200z March 16th. Entry classes: A-Single-Op/Multi (CW/SSB/MIX); B-Single-Op/Single Band (MIX only); C-Multi-Op/Multi (MIX); D-SWL Exchange RS(T) and QSO number (Oblast for Russian station). Contacts with Russia count 10 points. Multipliers are the oblast abbreviations + Antarctica, Malyj Vysotskij Island and Franz Josef Land. Final score is QSOs point' x (times) multiplier per band. Separate the logs per band. Awards: Plaques will be awarded to the top world-high scorers. Special certificates to any station working 200 QSOs. Mail logs by April 15th to:
1997 Russian DX Contest, P.O.Box 59, Moscow 105122 Russia.

5R, MALAGASY REPUBLIC. The "DXNS" reports 5R8KH, 5R8DG and 5R8EW are now active on SSTV. Keep a look out on 14230 kHz.

5X, UGANDA (and VK0IR QSLs update). On Sunday March 9th, Peter, ON6TT, left Kampala, Uganda, to pick up his job again, as regional Telecom Manager for the UN. He left his job at the end of November last year to join the VK0IR team to Heard Island. Peter states, "The past 14 weeks have been the most busy, but also the most rewarding and exciting weeks of my life. It was a pleasure sharing it with you, and I hope to hear you on the bands again as 5X1T."
Meanwhile, just before leaving for 5X-land, Peter reports the layout of the QSLs and selection of the pictures for VK0IR, TO0R, TO0R/MM, QSL are finished, and the package was sent to the printer, in Funkamateur, Germany. The printer will have the QSLs ready in 10 days. He will airfreight the 60,000 cards to the QSL manager shortly after that. ADDED

NOTE: There will be an additional bulletin sent to all OPDX InterNet Subscribers (from Bob, KK6EK) about details on ordering the VK0IR video.

7O1A AND DXCC STATUS. In a "DXCC News Release" by Bill Kennamer, K5FUV, the following was reported: "Questions have been asked about the status of the 7O1A operation from Aden, Yemen. ARRL HQ has been in communication with The Ministry of Communications resulting in the following information:
The Ministry of Communications in Sana'a, capital of Yemen, has advised us by both fax and telephone that while it is aware of a document issued by its Aden office, the Ministry of Communications in Sana'a, as the main body responsible for communications, had never issued an official authorization for Amateur Radio.
In accordance with this communication, the 7O1A operation cannot be accepted for DXCC credit."
Meanwhile, Zorro, JH1AJT, has stated in the Japanese DX Magazine of FIVE NINE (Feb. 1997), that he and others will return to 7O-land again some time at the end of April. They will be active on CW, RTTY and 6m in addition to the usual SSB and HF operations.

8P, BARBADOS. Look for David, VE3VET, to be active from here March 25th to April 3rd, as 8P9IJ. Activity will be on all bands with operations SSB with some RTTY. He will also be active in the CQ WPX SSB Contest as a Single-Op/All Band entry. QSL to home call.

9G, GHANA. Andy, G4ZVJ, plans to sign 9G5VJ from Accra, from March 7-17th. This includes activity in the RSGB Commonwealth Contest on March 8-9th (British Commonwealth QSOs only). Activity will be CW ONLY on all HF bands. Suggested frequencies are: 1827, 3503, 7003, 10103, 14027, 18077, 24897, and 28027 kHz +/-. QSL via G4ZVJ via the bureau or direct to: Andy Chadwick, 5 Thorpe Chase, Ripon, North Yorkshire, HG4 1UA, U.K.

CARIBBEAN DXPEDITION (Vacation). JA4DND and JA5AUC will be active as VP2END and VP2EUC from Anguilla, March 16-21st. From VP2E-land, they will travel to St. Martin and be active as FS/JA4DND and FS/JA5AUC from March 21-26th. Their schedule may be changed without announcement. They will be active on 160-10 meters CW/SSB. They plan to bring a TS-690, IC-735, FL-2100Z, CV48 (vertical for 75m/40m), APA80 (multiband vertical) and a FD4 (dipole). QSL to home calls.

HEY! WHERE IS MY DXCC YEARBOOK? It has been reported to OPDX that the yearbook is still at the printers. NO date was mentioned on the distribution.

IZ9, LAMPEDUSA ISLAND. The members of MCC (I4UFH, IV3TAN, I4JMY, IK2SGC, IT9EQO and IT9GSF) will activate this African Italian island (AF-019, CQ Zone 33) with the semi-rare callsign/prefix IZ9Z during the WPX SSB Contest. QSLs will be handled from IT9EQO direct/buro.

J5, GUINEA-BISSAU. Antonio, LX2DW, will be active as J52DW, from March 24-28th. He has stated explicitly that he will not participate in the

upcoming CQWW WPX SSB Contest (unfortunatly). He will be using a log periodic for 20-10 meters, and there might be a possibility for some 80 and 40 meters operations. He will operate SSB only. QSL via LX2DW, bureau or direct.

J7, DOMINICA. Be looking for Larry/AA6MV and Marti/N6ULI to be active this week from March 11-19th. Activity will be mainly on CW, but there will be some SSB. Operations will be on 40-10 meters. Their callsigns will be issued upon their arrival. QSL both via AA6MV.

KG4, GUANTANAMO BAY, CUBA. From March 14-21st, operators Bill, WT4K/KG4GC; Rusty, AE4WH/KG4AU; and Wayne, KG4WD, will be active in the BARTG Spring RTTY Contest as a Multi-Op/All band entry. They will use the callsign KG4AU in the contest. QSL to WT4K, Bill Gallier, 4094 Sandy Run Drive E, Middleburg, FL 32068.

OOOPPPSSS DEPARTMENT. Last week under "JW, SVALBARD" we mentioned OZ8RO's name as "Ray", this is wrong. It should have been Rag.

OK8, CZECH REPUBLIC. Norby, LX1NO, and others (OK1RR, OK1MD and LX2KW) are planning to be active in the CQWW WPX SSB Contest as OK8AUY as a Multi/Single effort. QSL to LX1NO (do NOT use the 96 call-book address!).

POTUGUESE IOTA DXPEDITION. The Northern Portugal DX Group (NPDXG) and The Portuguese DX Group (GPDX), will be active in a joint DXpedition from Insua Island (IOTA EU-150), from the July 24-28th. Activity will include a Multi/Single entry in the 1997 IOTA Contest. The group requested the callsign CQ2I for the contest, but outside the contest the operators will use "/" portable callsigns. They will be active on the usual IOTA stand-by frequencies. Operators will be CT1AHU, CT1BQH, CT1CJJ, CT1DVV, CT1EEB, CT1EEN, CT1ENQ, CT1ESV, CT1FMX and G3TMA.

QSL INFO AND NEWS.....
STATUS OF QSLS FOR 4U1UN. QSL Manager, Jerry, WB8LFO, reports the following: "In order to respond to the comment that has appeared concerning the status of 4U1UN QSLing, we thought it could be useful to furnish some info on this question. Currently, we have about 300 direct response cards on hand, and between 600 and 700 cards to be answered through the bureau. We refer to 4U1UN and variant call signs such as 4U/special anniversary series, e.g. 4U49UN etc. In addition, we are now processing 4U51UN cards and have about 600 cards to be replied. If you have not received a reply to your QSL request, please check to see where the cards were sent to. In the past there have been several routings for 4U1UN cards. Cards should now be sent to WB8LFO via the bureau or direct to: WB8LFO, Jerry Kurucz,
5338 Edgewater Drive, Lorain, Ohio. 44053. If you wish to query us regarding an overdue card please E-Mail us at: wb8lfo@centuryinter.net"

C9RRJ/C91J QSL CARDS. The original QSL route was to W8GIO, but it is now reported that QSLs are being forward to N5FTR. The report states W8GIO has health problems, and even though the operation is over, there is a large amount of cards to be answered yet. Anyone still needing

QSLs from these stations should submit a request for card(s) to N5FTR.

9K2ZZ BUREAU CARDS. Leo, K8PYD, of the 8th Area District, reports bureau cards for 9K2ZZ going to QSL Manager W8CNL are being pitched. W8CNL told Leo that he only answers cards that he receives direct and he no longer answers bureau cards at the request of the former operator of 9K2ZZ. Although the operation is now completed, there is still a large amount of cards still arriving at the bureau. If anyone really wants a card it is recommended they QSL direct to the manager W8CNL, with SASE. He has a limited stock of cards on hand. Leo states, "Eventhough we have been authorized at the bureau to 'pitch' the cards, we have taken the liberty to return some cards to the original sender, via the bureau, noted as 'unclaimed'."

D25L Cards. Alex, PA3DMH, states the D25L QSLs have arrived from the printer, and they will be in the mail as early as next week. Requests received after the 1st week of February will be processed when the other backlog is cleared. Bureau requests will start hitting the bureau in early April.

QSL MANAGER CHANGE. It has been reported that K7EHI is no longer manager of T30A. The new manager is Steven, KU9C. OPDX was told that you can ask Steven by E-mail if your contact is in the log before sending the envelope with the QSL direct. His E-mail address is: ku9c@ix.netcom.com

SSTV (DX) ACTIVITY. THe "DXNS" report the following active on Slow-Scan TV. Look for these station to be active on 14230 kHz:
5R, MALAGASY REPUBLIC. 5R8KH, 5R8DG and 5R8EW.
CN, MOROCCO. CN8LI and CN8NK.
D6, COMOROS. Jean-Pierre, D68ZJ. QSL via CBA.
FR, REUNION. FR5AB and FR5SD.

T8, SEBORGA. Eddie, EA3NY, states he will be here during the CQWW WPX SSB Contest. He will be a Single-Op/Multi Band low power entry. He will use the callsign T0NY (Tango-Zero-November-Yankee). Seborga is located in Northwestern Italy close to France, Monaco and Italy.

USI ALERT (new NC island). Mark your calendars for the Portsmouth Island QRP DXpedition which will take place April 4-6th, starting around 2100z, by the Knight Lites on their Spring Hamventure. The Knight Lites are a group of amateurs who specialize in QRP operations. They will sign WQ4RP. QSL via K4HQ. ADDED NOTE: When qualified (ie- 25 contacts with 2 countries minimum) for USI, the island will be assigned NC-009S. Portsmouth also counts as NA-67. For more information, please visit their Portsmouth Island website at: http://www.ipass.net/~aa4xx/ocra1.htm

ZL9, AUCKLAND ISLAND. Mike, HA/W0YR, currently in Budapest, informed OPDX he had a QSO on March 3rd, at 0639z with Ed, ZL4/K8VIR, and he reports the following: "Ed, K8VIR, will leave the South Island of New Zealand on March 30th for Auckland Island (ZL9) with a group of scientists for an indefinate stay on ZL9. He is the only amateur of the group, and his operation is a

sideline. It is a scientific trip. The expected arrival date at ZL9 is April 2nd. They may have to lay off the island behind a sheltering island if the weather is bad. The call will be ZL9/K8VIR. He said he would work mostly SSB (14.260 start freq) and some CW. QSL to: ZL9/K8VIR, P.O. Box 9, Teanau, New Zealand (No postal code was given.)."

I've used the AEA Isoloop for over a year now; they are very much alike. I don't think a small loop could compete with a dipole "up and in the clear", but that's not why you buy them. The reason for a small loop is that it's the best antenna you can fit in a small attic or similar space.

Mine's in my attic, up about 8 meters. I've had very good luck with it on 17/15/10 meters -- it may not compare with a dipole IN THE CLEAR, bu it does a lot better than the bent/folded 15m "inverted V" I had squeezed into my little attic. It's also not too bad on 20, but requires tuning if you QSY more than 5 kHz or so. Forget about 30 meters (and I've grave doubts about the new MFJ loop that's supposed to work on 40). Tuning is something of a pain even on the high bands.

I've worked over 40 countries with mine, and had a ton of fun with it. But if I lived where I could use a dipole or vertical, I wouldn't use a small loop.

Jeff -- KS4TL

David -- go to URL:
http://www.primenet.com/~ke7gh/index18.htm
There is an excellent page on QSLing.

Also u might want to visit the AC6V DX Reference Pages -- there is 25 clickables regarding QSLing including ARRL In/Out Bureaus, World Wide QSL Bureaus, QSL managers and lots more.

Good Luck
Rod In San Diego

No intrusion, stop by anytime. THe answer to your question depends on
your usage. I will assume that you are a BCB DXer, and if I'm wrong,
then that increased the number by one :)

I perfer the older tube type radio for BCB. I have many, from a model
33 Atwater Kent to a Hammarlund SP600 (SuperPro). The SP600 is the
best of the lot, but many others are fun to use.

THere are also the "Ham" type receivers, many of which work well.

Not to leave out the portable transistor types, I have a Sony ICF2002
whick is about the size of 3 packs of cigarattes and it works fine.

A good antenna is important for most radios, I reccommend that you put
up a long wire antenna.

Hope this helps.

Bob

Hi,

Unless FR5DX has changed his practices you will probably not receive a QSL. He is not a good QSL'er I am told and reports such as yours are common.

I think I would call that 100% success for FR5DX, actually....
he gets 4 x return postage and uses the bureau. This encourages
you to send him more postage and so on.

I think he should get a QSL manager. F6FNU comes to mind,
then we would have only one, and not two, threads that start
every three months.

679. March Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-11 00:00:00 UTC
From: ids@nol.net
Message-ID: <3325bfff.20581880@news.nol.net>
Source record: 33359

PROPAGATION - by AD5Q HOUSTON, TEXAS -- MARCH 1997

Though it is still officially winter, the equinox approaches and brings daylight to northern regions that have been difficult to traverse in recent months. With the low solar flux numbers it is too soon to expect reliable night path conditions on 20, but we will see a steady improve-ment over the next few months.

It is still low band season, and our best long haul DX band for night path propagation is still 40. Nighttime MUF's are on the increase, bringing improved conditions to Europe in the evening hours. The grey line is currently aligned almost due north, making contacts across polar regions easier than they would be. These paths are never easy on the low bands, but now is the time to try them.

DX signals on the low bands will remain good for another month or so, but noise levels will soon be an additional factor. At equinox time, noise levels in both hemispheres are low enough to bring out activity from both sides of the equator. This is the time for lowband work into Australia, the Pacific, South America and southern Africa.

On the high bands, little activity is expected on 10 or 15 and the best bands will be 20 & 17. Our best opportunities on 20 are still in the morning after sunrise and in the afternoon both before and after sunset. The morning brings a pipeline to Europe, Russia and the Middle East, while the dusk opening is the best time for Asia. There will be times when the polar paths won't open very well at sunset, but it is a good idea to check the southern path for Antarctic openings and possible long path to the Orient. African contacts can be made on 20 at anytime in the Afternoon, while the Pacific is usually the last path to close in the evening. Antarctica can also come through late in the evening.

Over the coming months, look for expanded 20 Meter opportunities after dark. The polar paths will be opening up better, nighttime MUF's will continue to rise, and DX activity will move to this band as the noise levels increase on 40. Daypath conditions will improve, but after a peak of a couple hours to Europe in the morning conditions are marginal for the rest of the day. The daypath to Europe will often be more optimum on 17.

The 30 Meter band is another one that mostly closes up at night in the winter. This will be the first band to open up for long haul evening DXing this spring. Polar paths are not difficult on this band when it is open, and islands in the Indian Ocean are very accessible.

DX Bulletin 13 ARLD013
From ARRL Headquarters
Newington CT March 13, 1997
To all radio amateurs

SB DX ARL ARLD013
ARLD013 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, The DXNS and Contest Corral from QST. Thanks to all.

MADAGASCAR, 5R. Look for 5R8KH, 5R8DG and 5R8EW as they are now QRV on SSTV. Keep a look out on 14230 kHz.

ZAMBIA, 9J. Brian, 9J2BO, is QRV on 6 meters. QSL via W6ORD.

ST. MARTIN, FS. Bob, K1YJK, will be QRV from St. Barthelemy Island March 17 to 31. He will sign FJ/K1YJK on 160 through 10 meters, mostly CW. Look for him on the low end of the CW band edges. He will also be QRV on 20 through 10 meters SSB in a limited manner. Bob will also be active in the CQWW WPX SSB Contest. QSL to homecall.

JUAN DE NOVA ISLAND, FR/J. Henry, FR5ZQ, is QRV as FR5ZQ/J, using CW and SSB. His length of stay, and QSL route, are unknown at this time.

GUANTANAMO BAY, KG4. Bill, KG4GC, Rusty, KG4AU, and Wayne, KG4WD, will be QRV as KG4AU as a Multi Op/All band entry in the BARTG Spring RTTY Contest. QSL to WT4K, Bill Gallier, 4094 Sandy Run Drive, Middleburg, FL 32068.

CZECH REPUBLIC, OK. Norby, LX1NO, and others, are planning to be active as a Multi/Single entry in the CQWW WPX SSB Contest. QSL to LX1NO using the 1997 Callbook address only.

ST. HELENS, ZD7. Ray Hudson, ZD7RH, is QRV on 20 through 10 meters with an FT 101E and wire antennas. QSL information is not as yet available.

BURKINA FASO, XT. Dan, N9XAG, currently QRV as XT2DP, will go QRT in either April or May. QSL via WB2YQH.

THIS WEEKEND ON THE RADIO. The CLARA and Family HF Contest, Bermuda Contest, and the Virginia QSO Party should keep you busy this weekend. Please see March QST, page 98 for details.

>I don't think a small loop could compete with a dipole "up and in the
>clear", but that's not why you buy them. The reason for a small loop is

I used the old (20-10) Isoloop in the attic of my old apartment in
Nashville for 3 years. IMHO it is very much competitive with a dipole
at the same height/elevation -- I worked over 150 countries with it in
that period.

Of course, my C3 7-element tribander at 65' here at the house works a
LOT better<G>. But seriously, magnetic loops DO work, and are a VERY
good answer for the apartment-restricted amateur.

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 296
BID: $OPDX.296
March 17, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, K4HQ, AL7J, NL7TB, NC8V, 5X1D, DK6QW, F6AJA, G4BUE & DX News Sheet, PS7AB, RA3AUU, SM0BFJ, VK3XV, YU1OL and ZS9F for the following DX information.

3DA, SWAZILAND. Koji, JM1CAX/ZS6CAX, and Tad, JH7KPU/AA3JA, will be active as a Multi/Single in the CQ WPX SSB Contest using the 3DA5 prefix for the first time. During the contest, they will use the callsign 3DA5A. Outside the contest (before and after), they will be active as 3DA0NX (Koji) and 3DA/AA3JA (Tad). QSL 3DA5A via JH7FQK. QSL 3DA/AA3JA via JH7FQK: Ichio UJIIE, 162 Shionosawa, Kohata, Towa, Adachi-gun, Fukushima 964-02 JAPAN. QSL 3DA0NX via ZS6CAX: Koji Tahara, Japanese Embassy, P.O. Box 11434, Hatfield 0028 SOUTH AFRICA.

3V8, TUNISIA. Hrane, YT1AD, will be active from Tunis as 3V8BB, during the CQWW WPX SSB Contest. He will be operating as a Single Op/All band entry (No WARC activity). QSL via home call YT1AD.

5X, UGANDA. Gus, 5X1D, informed OPDX that he is now active on 144 MHz EME (Earth-Moon-Earth). He is using a 17 element long boomer with 300w output. The first EME contact, which took place on March 11th between 1700-1756z, was with Dave, W5UN, with a good signal. By the way, this was Dave's country number 145 on 2 meter EME. Gus is open for skeds when the Moon is near the horizon. For schedules, send E-mail to Gus at: jageror@wfp.or.ug. QSL via SM0BFJ.

6W, SENEGAL. Jacques, F6BUM, will be here from April 4-17th. He will stay on the Senegalese island called Karabane, which has been reported will count for a new IOTA in Casamance region. He will use an FT900 and R7 antenna, and will be active on SSB and CW with operations on 40-10 meters. QSL via CBA.

6Y, JAMAICA. Look for Jay, K4ZLE, to be active as K4ZLE/6Y5 from "Ocho Rios March", until March 24th. His activity will be mainly CW on 80, 40

and 30 meters. QSL to CBA.

7O1A "THE REAL STORY AND FACTS FROM THE DXCC DESK". OPDX InterNet Subscribers will receive an additional bulletin regarding details on the 7O1A decisions.

9M, LAYANG LAYANG ISLAND (Spratly Island) AND EAST MALAYSIA (UPDATE). If you hear 9M6TCR or 9M6TPR before March 21st, it is Charlotte, KQ1F, and Paul, K1XM, probably active from Borneo (IOTA OC-088, CQ zone 28), East Malaysia. From March 21-28th, they will be active from Layang Layang (IOTA AS-051, CQ zone 26) otherwise known as part of the highly contested Spratly Islands. Those who like to chase YL stations, this will be a rare catch. Charlotte will be signing 9M6TCR. But if you hear Paul active as 9M6TPR, you may request a YL contact, and Paul will try to get Charlottee to come to the mike if she is not busy. They will make an effort to work the U.S., especially the East Coast, mostly on 40 and 20, and possibly 30 meters. Paul will be active during the CQWW WPX Contest, but he will not announce his QTH every QSO (ONE HINT: He will occasionally send 599 26, which means they are at Layang Layang). From March 29th to April 4th, they will be on Sipadan (IOTA OC-133, CQ zone 28, East Malaysia). After April 4th, any additional operation will be from Borneo. Dates are subject to change due to the weather. Also, RTTY operation is not likely, but not totally ruled out.

EW35, BELARUS. The radio club (EW1WB) "The Distant Countries" of Minsk will celebrate their 35th anniversary of foundation. Operations will take place with the special call EW35WB. QSL via EW1WB, Box 380, Minsk-50, 220050, Belarus.

FM, MARTINIQUE. Look for Nicolas, F5TGR, to be active until March 22nd, as FM/F5TGR.

KC6, BELAU. The Japan Palau Crazy Contest Club is planning to be an entry in the CQWW WPX SSB Contest as a Multi/Single signing as T88X. Operators are JA6VZB, JE6DND and JJ6TYG. Activity will be on 80-10 meters (No 160m planned). Before the contest, T88JA will be active on the WARC bands or RTTY. QSL T88JA via JA6BSM (*NOT* JA6VZB). QSL T88X via JE6DND.

KL7, ALASKA QSO PARTY. The QSO Party is sponsored by the South Central ARC, from 0000z March 22nd to 2400z March 23rd. Work Alaska stations only (Alaska stations work everyone). Exchange RS(T) and state/province/DXCC country (AK stations send city). Score 1 pt/phone, 2 pts/cw, digital and SSTV. 160, 80 and satellite count double. Frequencies: 1.835, 3.700, 3.875, 7.035, 7.135, 7.235, 14.035, 14.245, 21.135, 21.335, 28.135, and 28.335 MHz. Final score is QSO pts x AK cities worked (AK stations use states/provinces/DXCC countries). Send logs by May 31 to Kyle Sandel, AL7J, 8811 July Creek Cir, Eagle River, AK 99577. You can E-mail at: sandelkw@alaska.net. Certificates are awarded.

MAJOR QRP IOTA DXPEDITION (Rare County)! The Knightlites, a QRP club consisting of Andrew/K4HQ, Dave/WA4NID, Paul/AA4XX, Steve/AA1BK, Tim/N4EKP, John/WB4OFT, and Bob/AE4IC, will be going to Porstmouth Island (NA-067, NC-0??) on April 4-6th. Portsmouth is an UNINHIBITED island located on a North Carolina map due south of Ocracoke Island and is in Carteret County (the RAREST county is NC!!!) They WILL be running QRP with 4 stations on the air simultaneously! Three stations will be on CW and ONLY one SSB Their antenna will have a triband yagi at approx. 60-80 feet for 10, 15, and 20 meters. For the lower bands, they will have a Carolina Windham and a G5RV, and maybe a 4 square on 40 and 80 meters. Frequencies will be on the common IOTA frequencies, as well as the County Hunter's frequencies and in the DX window, if they need to. QSLS via K4HQ, Andrew Lewis, 7612 Justin Place, Chapel Hill, NC 27514-9708. A special webpage was just setup for the expedition. It has all the info and will be quite helpful in the coming weeks. After the expedition, they will have ALL the LOGS available for checking! The webpage URL is: http://www.ipass.net/~aa4xx/ocra1.htm

OOOOPPPSSS DEPARTMENT. A little mistake in the rules were published under "1997 RUSSIAN DX CONTEST" in OPDX.295. Multipliers should have included DXCC Countries along with oblast abbreviations + Antarctica, Malyj Vysotskij Island and Franz Josef Land. For more information on this contest, send an E-mail message to: ra3auu@contesting.com -or- ra3auu@glasnet.ru. Also, checkout the LA9HW WEB site: http://home.sn.no/~janalme/hammain.html

OY, FAROES ISLANDS. Five German hams will be visiting the islands between June 7th and 20th. They plan to operate 160-10 meters using different antennas (dipol, vertical and beverage). Look for the following callsigns and operators: Claus - OY/DF8QJ, Michael - OY/DK6QW, Joerg - OY/DL3QQ, Werner - OY/DL4YBZ and Reinhard - OY/DL6YFB. QSL all operators to Alfred, DK4QO.

USI ALERT. The Ascension DX Group (ADXG) will have 3 full time stations fired-up 24 hours per day on April 11-13, starting around 2000Z from Grand Island LA-003S (NA-168). The operator list includes: N5VWM, KA5RNH, KB5RZY, W5ZDW, W5XV, AB5XP, WN5W and the old Cajun Pirateer himself, AA5AT!

VK3 AND VK4 BUREAU. The Wireless Institute of Australia Victorian Division and the Wireless Institute of Australia Queensland Division are the only IARU recognised QSL Bureau in the VK3 and VK4 call areas. All cards should be directed to these bureau unless otherwise directed by the station operator. Any other bureau operating in the VK3 or VK4 call areas is privately operated and has no association or distribution agreement with the WIA. The VK3 and VK4 bureau will not process cards from or to any private bureau operating in the respective call areas. Inwards Bureau addresses are unchanged and are as follows: VK3 - G.P.O. Box 757G, Melbourne Vic. 3001, Australia. == VK4 - G.P.O. 638, Brisbane Qld. 4001, Australia.

ZD7, ST HELENA. The "DXNS" reports that Ray, ZD7RH, is a newly licensed station active on 20-10 meters. Please report any QSNs to OPDX.

ZF, CAYMAN ISLANDS. John, NC8V, will be operating from Little Cayman Islands once again as ZF2JC/ZF8 from March 20-27th. Little Cayman is IOTA NA-016. He states that he will operate several hours per day during the entire period he is there and will try to be around 14260 and 21260 khz. Most of his operation will be on SSB, but he will go to CW on request. All QSLs go to his home address at: John Cornwell, 15100 E. Scatter Ridge Rd., Athens OH 45701-8854. A SASEs would be appreciated.

ZS9, SOUTH AFRICA. ZS9F states he will be active during the CQWW WPX SSB Contest on 10, 15 and 20 meters. PLEASE NOTE that this callsign will be cancelled by the Dept. of Communications after the contest. So look for ZS9F for the last time. QSL via KK3S.

ZY2, SAO SEBASTIAO ISLAND (BRAZIL). Operators PY2QA, PY2DUN, PY2MMM, PY2OZF, PY2AE and PU2YSU will be active from IOTA SA-028 (DIB 016), located in the Sao Paulo State East Group, from April 18-21st. They will use the callsign ZY2IB. Operations will be on SSB and CW with activities on 80-10 meters. QSL via PY2AE.

I think the following has been brought up before, but from the recent happenings it might be "reasonable" to once again bring up the question:

Why are countries which do not permit any Ham operations on the DXCC list of countries?

Basic Management teaches that you have to set goals which are achievable. Is having a country which cannot possibly be worked, no matter what a capable team you put together, no matter what amount of funds you raise, a reasonable goal to have on the DXCC list?

Such countries usually strive for broad international recognition. Maybe they should just be crossed off the DXCC list as long as there is no "legitimate" way to obtain a license.

Maybe after they find out that they no longer are "rare", because they don't belong anymore, they are not talked about anymore, noone cares about them anymore, because why should you waste time and energy if they have ruled against amateur radio, then maybe they suddenly haste to permit Ham licenses. After that they would be added to the list, otherwise nothing gained, nothing lost.

We'd have to be diplomatic of course, not to hit a particular authority. Somewhere in the DXCC rules it just should say something like: "... countries which do not issue amateur radio licenses are not to be put on the DXCC list of coutries ..."

Worth a try? What can we loose?

Yep, but I perfer the sr2 over the sr3. The sr3 is larger and a little
too bulkey. but thats the only complaint, well not really it needs a
more accurate display....but man they'll pull in the waves...

These stations are all via the callbook. In many cases they are in
fact managers for other DX stations, but do not have managers for
their own calls (that I am aware of).

722. People Needing QSL Info.

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-18 00:00:00 UTC
From: Kevin <kwoods@sstelco.com>
Message-ID: <01bc33ec.1239af40$2b4189d0@mypc.tdsnet.com>
Source record: 33402

For somtime now I have been reading this newsgroup.
I have responded to alot of requests for people needing QSL information.
But what I don't understand is does'nt some people own callbooks or search
the internet before posting there requests? Alot of the requests I've
responded to have been as simple has looking it up in the callbook. There
are other sites on the internet that have downloadable QSL route
databases, DX newsletters with search engines and QSL info. If you can
spend hundreds of dollars for ham equipment, try spending a few dollars a
year for updated callbooks, the qsl databases are just as cheap and some
are even free off the internet. I don't mind helping with such requests,
but some of the requests posted have been so simple to find that it's
ridiculous.

Message-ID: <5gnf6j$l11@informer1.cis.McMaster.CA>
Source record: 33408

Hi there,
I am a final year student in EE. I am working on microwave links at 38.7GHz for my thesis. The antennas system that we use are built by Harris. It is called the "Microstar".
I would like to know more about the advantages and disadvantages when connecting at such a high frequency in telecommunication.
I am also studying the attenuation and effect of such frequency when it propagates through various type of glass,vegetation and weather.
I am trying to use some formulas in order for me to verify my experimental result with the theoretical result. However, I am not sure about which formulas in optics or microwave that I can use.
If anyone of you have more to say about this, please send an email to winston@cyber-wizard.com . Any other information would be greatly appreciated.

BTW, I hope I am posting up in the right newsgroup. If not, I would like to apologize and please suggest the right group for me. Thanks.

** I have limited excess to newsgroup, so please replying by sending an email to me.

Thanks you for your attention.

Winston

QST de W1AW
DX Bulletin 14 ARLD014
From ARRL Headquarters
Newington CT March 20, 1997
To all radio amateurs

SB DX ARL ARLD014
ARLD014 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX bulletin, the 599Rpt, Jeff, N4UQM, 425DX News, Paul, K1XM, and Contest Corral from QST. Thanks to all.

SPRATLY ISLANDS AND EASTERN MALAYSIA. Paul, K1XM, indicates that any operation by him and Charlotte, KQ1F, before March 21 will be from Borneo Island, IOTA OC 088. From March 21 to 28, operations will be from Layang Layang, Spratly Islands, IOTA AS 051. From March 29 to April 4, they will be QRV from Sipadan Island, IOTA OC 133. For those interested in YL DXCC, look for Charlotte to be QRV possibly as 9M6TCR from Spratly Islands. QSL all calls to K1XM.

ANTARCTICA. Juan, CE9OH, is still active daily on 14260 khz, from 2200 to 2400z. Nick, EM1HO, is QRV from Vernadsky Base on all bands. QSL via I2PJA. KC4AAC can also be found on 14270 khz daily from 2300 to 0100z. QSL via K4MZU.

TUNISIA. Hrane, YT1AD, will be QRV using CW and SSB as 3V8BB from March 26 to 31 on all bands. There will be no newer band activity, however. He also expects to be active during the CQ WW WPX Contest. QSL via homecall.

GUERNSEY, GU. Bob, W7MAE, will be active from this Channel Island March 24 to April 5, signing either MU/ or GU/homecall, using SSB and some RTTY. Bob will check 10 meters first, then 12 and 17 meters and finally 20 meters. QSL to W7MAE.

GUAM, KH2. Jeff, N4UQM, is QRV from Guam using RTTY. He will try to make as many QSOs as possible on 80, 40 and 20 meters. QSL via WB4UBS.

ROMANIA, YO. Gloria, G3VUN, will be QRV as YO/G3VUN/P from Bucharest and other locations from March 27 to April 8 while on a

research project for handicapped children. She can be found QRV using CW and SSB on 80, 40 and 20 meters. QSL via homecall.

CAYMAN ISLANDS, ZF. John, NC8V, will be QRV from Little Cayman, IOTA NA 016, as ZF2JC/ZF8 from March 20 to 27. He will try to be QRV around 14260 and 21260 khz. He will operate mostly SSB, with CW on request. QSL to John Cornwell, 15100 E. Scatter Ridge Rd., Athens OH 45701 8854.

BRAZIL, PY. Operators PY2QA, PY2DUN, PY2MMM, PY2OZF, PY2AE and PU2YSU will be QRV from Sao Sebastiao Island, IOTA SA 028, located in the Sao Paulo State East Group, from April 18 to 21. They will use the callsign ZY2IB. Operations will be on SSB and CW with activity on 80 through 10 meters. QSL via PY2AE.

THIS WEEKEND ON THE RADIO. The Alaska QSO Party and the European EME Contest should round out this first weekend in spring. Please see March QST, page 98 for details.

Kevin

as i was the last person who requested QSL info via this medium i can take it to mean that you are refering to me in your lastest missive.

basically if you don't want to respond to a request DON'T -

i don't really want a reply from someone who takes affront at a request

i believed that the purpose of this group was to share information and if looking for a few calls is too much for you then skip it.

for your information i did search the internet for the calls AS WELL as posting it in here.

while i'm on the subject i'ld like to pass my thanks on to those who did help - my friend is very happy with the information and is looking forward to posting out the qsl cards.

735. QSL Info - ZK1AT

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-20 00:00:00 UTC
From: grhosler1@mmm.com
Message-ID: <5grojq$p88@dawn.mmm.com>
Source record: 33415

I worked Amy back in February on 1994 on 20M SSB. The QSL was
originally sent to:

Amy Tabique
Box 1264
HanaleiI, HI 96714

When I rec'd no response I sent off a second card to a new address
that I had found:

Amy Tabique
Penryhn Atoll
North Cook Islands
Polynesia

I later found that Amy had a manager in WB6EQX. I sent the manager a
card and was informed that he no longer had the logs, and that she was
back in the US. He suggested that I send a card to the following
address:

Amy Taibque
404 North Street
Ward, AR 72176

The card was returned. Somewhere I picked up another address (I think
of a relative) and sent a card & note to:

Amy Taibque
c/o Hugh Thomforde
64 Ridgeway Village
Auburn, AL 36830

I have exhausted my resources at this point. If anyone has a GOOD
route for ZK1AT, please drop me an E-Mail note (no sense wasting the
USENET bandwidth). I have worked a number of N. Cook Island stations
but just can't seem to get a card. Thanks for taking the time to read
this.

With all due respect, if everybody did what you have done:

(1) The call book publishers would go out of business

(2) There would be nothing in this newsgroup but requests for addresses
which already appear in the current callbook.

Perhaps a separate newsgroup should be set up, called
"rec.radio.amateur.callbook.lookup"?

KAWIN NEWS #20 - Announcing KaWin 6.49 and BeaconClock 1.04

Three hot new releases this issue, and all are ready for
download from the KaWin Home Page:

http://www.mutadv.com/kawin

BeaconClock is Freeware for DXers who share an interest in
monitoring the NCDXF/IARU beacons! BeaconClock32 has now
been joined by BcnClk16 - BeaconClock for Win3.x systems.
BeaconClock32 version 1.04 includes minor refinements in the
location data for some of the Beacons.

KaWin 6.49 enhancements include:

Support for the US FCC call sign database. Absolutely the
most current database for US calls - updated weekly and
downloadable from the US FCC web site. Use it by itself or
as automatic fills and updates to your CDROM database. Have
your in-depth database and the latest vanity calls too!

Support for the ANALOG command of the new Kpc-3 Plus,
including on screen monitoring and file logging of sampled
analog levels.

The Statistics context has disappeared - but you can bring
it back any time you want.

New right-click, pop-up menu access to the Record Context
and Disconnect Context commands.

Plus, new macros and more enhancements and fixes - all
described in the Squawk64.wri file.

To subscribe to the KaWin News mailing list, send email to
stan@mutadv.com with the word SUBSCRIBE in the subject line,
or use the handy subscription link on the KaWin Home Page.
To be removed from the list, send email to stan@mutadv.com
with the word UNSUBSCRIBE in the subject line and be sure to
include the email address this message was sent to in the
body - I cannot remove you if I don't know your address!

Walt -

Got to agree with Julie on this one. Firstly, if you've followed
the news lately you would realize that the callbook folks are already
out of business. The paper copies are in the last printing and the
electronic versions won't be far behind...a few years at most. Licensing
information and QSL routing are public information not subject to
limitation to commercial interests. Secondly, Julie is correct - if you
don't like these requests just hit the delete key. No one is obligated to
read every message. Especially when the newsgroup has practically no
information content anyway.
I've gleaned substantial QSL experience over the years and will share
it on this, or any other, newsgroup to anyone who needs it. If you find
this offensive feel free exercise your right of choice.

73,
Doug - W2DR

Source record: 33426

Thought I'd throw in my 2 IRC's on this one. I strongly believe that the Internet is marvelous resource to seek help and assist others. In Ham radio -- many are beginning or casual DXers and to ask for QSL info and help is to be encouraged. As time permits - I answer QSL queries and gently guide them to the resources on the web so that they may find it themselves next time.

Another point is that callbooks, the web, QSL manager lists et al may not have the desired info -- but someone has a card and can supply the info. Such was the case with a 3V card I needed. What goes around -- comes around (most of the time).

My Opinions:
If you need QSL help -- ask!
If you can spare the time to help -- answer! If not, don't read it!

BTW: The AC6V DX Reference Guide below has 20 Plus links to QSLing including a Primer, Postal rates, On-Line QSL collections as well as numerous lookups including Island Operations, Contests and YASME.

749. Learning M Code: HFJ Tutor of value?

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-23 00:00:00 UTC
From: morchar@pacifier.com
Message-ID: <morchar-2303970244020001@ip76.van3.pacifier.com>

Does anyone have experience with a product called the MFJ pocket size Morse Code Tutor?

I would like to learn code in a way that allows me to make use of short sessions several times a day, and don't have a laptop computer.

This product has been advertised in the most recent issue of Amateur Radio Trader, but I am always reluctant to buy a product without objective opinions from happy or unhappy customers.

Please send all responsed to my email if possible?

Thanks,

Mike Orchard KB7SUE

Hi Mike,
I have one of those pocket morse code tutors and find it to be well
built and rather useful.

It has taken away the lulls in my practice, for those times when I
cannot practice on the air or at my computer.

I showed it to one of our Novice Class proctors in the Club which I
belong and he complimented the clean tone it generated.

Like anything else, if it is used and gets you where you want to be, it
is a worth while investment. It will certainly not replace the
excitement of on-air learning though.

Good Luck,

Robert Robinson, KB2PSM

752. FM02 on 6mtrs

Well... Got my 6mtr station completed, hoping that the band would be
starting to open about this time of year. Anybody out there wanting to
confirm fm02 on six meters... I'll be listening between 1500 & 1900
utc. Call KF4HYB in FM02/Charleston,SC.

East Africa, South Asia, and other places on the opposite side of the
globe are very difficult paths. Good luck.

SB DX @ WW $OPDX.297
Ohio/Penn DX Bulletin No. 297

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 297
BID: $OPDX.297
March 24, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1YY, W3UR & The Daily DX, K4MZU, N4GN, N5VWM, W5IJU & Island/DX News, W5KSI, K8CH, 4L2M, DJ7IK, DL4VBP/N0PS, G4BUE & DX News Sheet and VA3CW for the following DX information.

4L, GEORGIA (NEWS). Mamuka, 4L2M, President of The National Association Radioamateurs of Georgia (NARG), informs OPDX the following callsigns are pirated stations: 4L2DX, 4L3Q, 4L44N, 4L50K, 4L55K, 4L6HMC and 4L7F. Georgian Amateurs (all stations) using 4L prefixes (4L1, 4L4, 4L6, 4L7 and 4L0) have only 2 letters in their suffix. Extra Class Amateurs and club stations have 1 letter in the suffix with one number (ex. 4L4L, 4L5O, 4L0B). Also, Georgia has a new QSL bureau address: P.O. Box 123, Tbilisi 380 004, Republic of Georgia. DO NOT use the old address: P.O. Box 1 Tbilisi , 380002 GEORGIA.

9Q, ZAIRE. The "DX News Sheet", reports that Pierre, HB9AMO, will be active for two months as 9Q5BQ from Kinshasa. Operation will be on CW on 20 meters with a vertical, but activity on other bands will come soon. QSL to home call.

ANTARCTICA NEWS. Bob, K4MZU, reports VP8CTR, HF0POL, EM1KA, EM1U, KC4AAA, KC4USV, R1ANT, and R1ANZ still continue to be active daily on most bands. CE9OH is still active daily on 14260 kHz from 2200-2400z. The operator is Juan (and a little Spanish helps!). Nick, EM1HO, at Vernadsky Base is active on all bands. QSL via I2PJA. KC4AAC is heard daily on 14270 from 2300-0100z. Bob also reports he is QSL Manager for these stations and operations: VP8CRE 1995/1996, VP8MS 72/93, VP8MX 1972, KC4/KA7DHE 94/95, KC4/VE7MKZ 94/95, KC4AAB 1972, KC4AAC 1997 (op Craig or Greg only), KC4AAD 1996, KC4AAF 1996, KC4AAG 94/95, KC4USB 94/95/96, KC4USL/am 1997, KC4USV 1995/96 (op Greg only), KC4USX 94/95, R1A/VE0HSS 96/97, KC4/VE0HSS 1996, VE0HSS/am 96/97, and R1ANW 1996 (op Henri only).

BS7, SCARBOROUGH REEF. In a news release by Tim, N4GN, he reports: "Planning for the BS7H 1997 DXpedition to Huang Yan Dao (Scarborough Reef) is proceeding on schedule. Several team members, including Wang, BA1OK and Kan, JA1BK, met recently in Guangzhou to finalize all details regarding the ship with Captain Wang Jian-xi and his crew. Arrangements were also made for generators, fuel, food and the numerous other supplies necessary to ensure the success of the operation. The BS7H 1997 operating team has now been finalized: Wang/BA1OK (Team Leader), Gong/BA1DU, Chen/BA4RC, Wang/BD4RX, Jian/BD7JG, Zhang/BG7KW, Kan/JA1BK, Kazuo/JA1RJU, Wayne/N7NG, Jim/W6EU (ex-WA6AUE) and Bob/W6RGG. Brief "bios" on each of the operators will be added to the BS7H 1997 Home Page (http://www.iglou.com/n4gn/sr/) very soon. Recent additions to the Home Page include a map showing the location of Scarborough Reef and a sketch of the reef itself, indicating the rough position of each of the operating sites. Some interesting comments from Bob, NM7M, regarding propagation between Scarborough Reef and the eastern half of the U.S. have also been added to the Home Page. Check it out!"

EA8 & EA9, CANARY ISLANDS AND CEUTA (WPX 20-meter shootout). Pekka, OH1RY, and Martti, OH2BH, have decided to activate EA8AH (Canary Islands) and EA9AM (Ceuta) respectfully. Both stations will be running single band 20 meters in the CQWPX SSB, and you may catch them to prior the contest which is the weekend of March 29-30th. The two well known DXers want to find out "What is the WORLD'S BEST CONTESTING QTH?" Both operators will be seeking your observations about the signals from these two locations particularly at the beginning and closing of the band from your path. These reports can be submitted to either of these two operators as an exchange of immediate QSL and acknowledgement of the report. Those submitting the reports are entitled to comparison report of these two locations based on the CQ WPX data. (excerpts from a OH2BH message)

GU, GUERNSEY. Look for Bob, W7MAE, (ex K7RDH) to be active this week until April 5th, as MU/W7MAE or GU/W7MAE. Operations will be on SSB with some activity on RTTY. Look for him on 20 and 10 meters. QSL to home call.

HC8, GALAPAGOS ISLANDS. Ted, HC5K, will be active as HC8K on AMTOR, PACTOR, RTTY and SSB. He and another ham will operate on all bands 160-10 meters. Also, there will be some satellite operations. Operations are to commence on March 23rd or could be delayed a couple of days because of transportation. He will stay for about one week. QSL to: Ted, HC5K/HC8K, P.O.Box DX Cuenca, Equador (South America).

KH4, MIDWAY ISLAND. Yuu-san, JA3IG, will be active again from here from April 16-23rd. He will be using his new extra class callsign, KH4/K1NT. It was reported that negotiations were touch-and-go with the U.S. Fish and Wildlife Service since this is the nesting season for the several million albatrosses that inhabit the island this time of year. The U.S. Fish and Wildlife Service had some concerns about birds inadvertently flying into the radio antennas. The ham antennas which were left on the island from past operations are normally taken down during the nesting season, but will be put backup temporarily for this operation. The main bands for

this operation will likely be 80-15 meters. Yuu-san will be looking for Europe on 40 meters from 0430z-0630z. Yuu-san will be using a windom on 40 and 80 meters.

KP2, U.S. VIRGIN ISLANDS. Rich, KF8UN, will be /KP2 from March 26th to April 2nd. He will be an entry in the CQWW WPX SSB Contest. QSL to CBA.

NEW DXAC CHAIRMAN APPOINTED. Well known DXer Wayne Mills, N7NG, has been appointed by ARRL President Rod Stafford, KB6ZV, to chair the DXAC. Congratulations to Wayne. By the way, Wayne will be one of the operators to the next BS7 DXpedition (Read BS7).

NH7, HAWAII. Al, NH7A, will be on for the CQWW WPX SSB Contest on all bands, high power. He will be looking for Europe on 20 meters 0500-0800z. QSL cards will be shipped from the printer April 10th. QSL this operation and AH7G via N2AU.

S0, WESTERN SAHARA. "The Daily DX" reports that S0RASD will be active from March 27-31st. Operators include EA2JG, EA3CB, EA3CZM, EA3GBU, EA4TX and S01A. Other operators may include EA1DAV, EA2CNU and EA4AFA. The will be on both SSB and CW. They will participate in CQWW WPX SSB. This DXpedition is sponsored by LYNX DX Group.

T2, TUVALU. Bernhard, DL2GAC, plans to be on next weekend (March 29-30th). His callsign is currently unknown. QSL to home callsign.

TS, TUNISIA (Attention Prefix Hunters!). It has been reported that Tunisia will be celebrating its 40 years of independence during the period of April 10th to May 10th. On this occasion, a special event station will be on the air as TS40A. Delegations from various amateur radio clubs including the DARC will participate in the celebrations. Next week another special callsign (TS8A) will be assigned to 3V8BB between March 26-31st. This special callsign will be used to celebrate the 8 years of presidency of Mr. Ben Ali. Hrane, YT1AD, will be using this callsign during the WPX contest. The newly founded Association of Tunisian Radio Amateurs (ASTRA) is appling for IARU membership, and it will probably take place at the "Ham Radio 1997" fair in Friedrichshafen/Germany in June. ADDED NOTE: Guest operations from 3V8BB may only be authorized by the DARC foreign department after written applications. The DARC coordinates the dates of operation.

USI ALERT. The Ascension DX Group from Gonzales, LA., will be on Grand Isle, LA., from April 11-13th, operating 24 hours/day. Operators will be Wayne/N5VWM, Don/AA5AT, Joe/KA5RNH, Stew/KB5RZY, Lee/W5ZDW, Richie/W5XV and others to be announced later. Grand Isle counts for IOTA NA-168 and USI Award LA-003S. Listen for Wayne and Don to activate several NEW islands (about 6-7) for the USI Award in the same area as well. QSL via operators home call or via E-QSL. The operations will take place on all bands CW/SSB. In the weeks coming up, look for Don and Wayne to be activating more new islands from around the state of Louisiana from time to time.

V4, ST. KITTS & NEVIS. The "DXNS" report that Jim, G0IXC, will be active next month between April 9-30th, as V47XC from Hurricane Cove. Activity will be SSB on 40, 20, 15 and 10 meters with a dipole and tri-band yagi. QSL to home call.

YM, TURKEY (Attention Prefix Hunter). Thomas/DL3FDU, Felix/DL8OBC/N5BC and Patrick/DL4VBP/N0PS will be active from Izmir, March 25-31st. They will take part in the CQWW WPX SSB Contest and have the permit to use the special callsign YM3DL throughout their stay. Their host in Izmir will be Mustafa, TA3B. They plan to be active outside the contest with operations on all bands 80-10 meters including the WARC bands with a special emphasis on 30 and 40 and 80 meters (160m is still not sure). Although they are aware of the fact that only few DXers need TA as a new one they would be happy to add some bandpoints to your collection. The QSLs for YM3DL go via DL4VBP, direct or via the bureau. If you prefer to send any cards via the postal service, please use only the following address that is also listed correctly in the 1997 Flying Horse callbook as well as in the QRZ callsign database. Please remember: The fee for an airmail letter that is sent outside Europe from Germany is 3 DM; that is about 2 US green stamps.

ZD7, ST HELENA (More activity). ZD7BG was heard on 14010 kHz at 2100z. QSL via POB 157, St. Helena. John, ZD7WRG, was heard on 14205 kHz at 1920z.

Early this morning a mobile crane removed the old trusty KT34XA from
the roof-mounted tower at the Linkoping Institute of Technology. Later
today my sources says the tower and the shack will be removed, and
replaced by a large complex of cooling fans.
All these yucky computer nerds take over and there is no room for
analogue technology. Not even at the Linkoping Institue of Technology.
Shame! Today the graduates with a M.S. or Ph.D. only needs to be able
to count 0 and 1......

Well, we were a happy gang having lots of fun at the radio-club, this
they never can take away from us. The memories will live on!
R.I.P. SK5EU We miss you!

YOU DON'T NEED TO BE A SCOUT OR LEADER TO EARN THE ScoutElmer AWARD!!!
ScoutElmer Award for helping Scouts become ham ops

WHO QUALIFIES FOR THE AWARD?
1. Licensed ham op (any level)
2. Scout or Adult Leader (past or present) or...
3. Any ham that know someone (Scout or leader) currently active in a Scout unit.

WHAT IS REQUIRED FOR THE AWARD?
1. Agree to respond to Scouts via email with their questions about ham radio in your local area, for 1 month.

HOW DO I SIGN-UP FOR THE AWARD?
Email to the address below and fill in the blanks.... that's it!
1. Name & Ham Call Sign:

2. Email address:

3. Locations: (ie London, UK; Los Angeles, CA, USA; etc)

4. What do you want to do: (email only; email & phone; email, phone & ham class)

5. Your Scout affiliation & position (enter past affiliation and date if applies):
(If no current or past affiliation) Your Scout or Scout leader sponsor:

6. Optional comments for your ScoutElmer listing: (ie. ARC Club listing, Explorer post, Troop etc.)

WHAT DO I GET?
ScoutElmer Award recipients will receive special award logo graphic you can add to your website. You also get a certificate (suitable for framing).
Lastly the satisfaction that you helped promote amateur radio in Scouting.

If you've already applied for the award, sorry for the email. You should receive confirmation in the next few days.

ScoutRadio WWW is a "good turn project" of Troop 319, Huntington Beach, California USA.

There are over 250,000 (500,000 worldwide) hams who are or have been envolved in the Scouting movement, helping their communities in times of natural disasters, emergencies and humanitarian aid. We hope you or your ARC can help local Scouts get into ham radio and keep the amateur radio service strong.

760. OPDX Special Update Bulletin #297.1

SB DX @ WW $OPDX297.1
OPDX Special Update Bulletin No. 297.1

The Ohio/Penn Dx PacketCluster
Special Update DX Bulletin No. 297.1
BID: $OPDX297.1
March 24, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, 4L1BW, 4L5O and 4L5A for the following DX information.

4L, GEORGIA (QSL UPDATE NEWS). OPDX has learned from several Georgian Amateurs that the "National Association Radioamateurs of Georgia (NARG)" is not the only organization/QSL Bureau representing 4L amateurs in Georia. Today in Georgia there are at least 4 different organizations working with radio amateurs and associations. AL, 4L5A, President of Friendship World Wide Radioclub (FWWRC), states P.O. Box 1 Tbilisi, 380002 GEORGIA is used by FWWRC. Al recommands when working a 4L station ask the Georgian amateur what organization they belong to. He also states some 4L stations do not belong to any organization. Al was kind enough to supply the following QSL routes of some stations:

4L5A via IK3HHX
4L8A VIA OZ1HPS
4L1DX VIA OZ1HPS
4L1YY VIA SP5LME
4L1AB VIA CBA
4L9A VIA IK3HHX
4L7AA using several different addresses (ASK!).

4L1BW (Sergo) via N3CBW or CBA.
4L5O (Omar) via TA7A CBA.
NARG: P.O. Box 123, Tbilisi 380 004, Republic of Georgia.
FWWRC: P.O. Box 1 Tbilisi, 380002 Georgia.

Who cares !

> (2) There would be nothing in this newsgroup but requests for addresses
> which already appear in the current callbook.

I don't agree with that. There are so many new calls issued, that
I found that around 30% of call signs I am looking for can't be found
in the Call Books, paper and CD Roms. They are obsolete before they
are printed most of the time. So .... the only solution is to ask
others.
If they have it why not share it with other in this newsgroup?

If you don't like the QSL posting just hit the Next button, or DELETE
and that is that.

> Perhaps a separate newsgroup should be set up, called
> "rec.radio.amateur.callbook.lookup"?

Perhaps a separate newsgroup called:

alt.Walt_Davidson_warning_MeVerySeriousDXer.Achtung_QslInfo_Verbotten_here

and the logo could be a small swastika maybe?

763. Morse code program

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-25 00:00:00 UTC
From: Terry Ashland <tashland@ncn.net>
Message-ID: <01bc3934$99fcdea0$233148ce@tashland>
Source record: 33443

Hi everyone, and thanks for reading this. I currently use CT contesting software and like the simple keyer feature found in the program. I have my second parallel port to key the rig and it works very well. However, during the non-contest times (are there any?), I use LogPlus v3.53 which is an excellent logging program. However it doesn't have provisions for CW keying like Log-EQF does. It does, however, have provisions to shell out to another external DOS program. Does anyone know of any dos CW program that utilizes the same wiring for CT which allows you to key your rig? I don't care at all about receiving CW, just using the computer to act as a memory keyer for the same old exchanges. I do have a KAM which I could use within LogPlus, but you have to use it from the dumb terminal program which is still outside the main logging feature.
Any suggestions as well as sources for obtaining the software would be greatly appreciated!

Thanks,
Terry, WK0F

I am absolutely appalled and offended by this blatantly racist remark,
which has no place in an amateur radio newsgroup.

I had hitherto believed that radio amateurs would be above resorting to
such tasteless abuse. Evidently I was mistaken in that belief.

I hope Mr Boukri will see fit to apologise for making such an unseemly
contribution to this debate.

I can't speak for California -- my Gulf Coast QTH admittedly has a
better path to Africa -- but try 7 mHz around 0200-0300 UTC, which
is sunrise at the African end. There have been lots of big signals
from that area even on my dinky multiband dipole.

I don't intend to get involved in the controversy part here but...

I find the discussion amusing in light of the item in April QST..
(for those of you outside the USA, it was reported in April QST that
the 1997 printed Radio Amateur Callbook will be the last printed
edition. In the future, the Callbook will only be available on CD.)

I have worked the following, sent greenstamps, postage, several times
over, but no QSLs yet:
9J2HN on 10-18-94, QSLed via JH8BKL
JW0I on 8-24-94, QSLed direct, and via SP3ASN
TK5EL on 10-3-94, QSLed via F6FNU and direct
UA0QFC on 8-26-94, direct and via bureau
4L1YY on 6-10-94, direct and via UF6FU
4l1AA on 6-22-94, direct and via CT1CJJ

Has anyone else worked the above and received QSL cards?

Hello dear friends worldwide. My name is Francisco EA5VD and
I am sorry to say that though I have never had neither used
one of these G5RV antennas, I hate them.
Actually what I hate is all this stuff and messages about
such antenna. Is there any question which has not been
answered yet? Is still any Han who has any doubt about this
pair of wires? I have never tried the G5RV but I have
headaches and nightmares because everytime I connect to
internet I find messages with G5RV in the title.
Anyway sorry for the joke and enjoy the radio !!!!!!!
By the way, a friend of mine has a vertical antenna for the
WARC bands who bought used and he doesn't know it's name and
chacarteristics. Though there must be only a few WARC
vertical, Can you guess which antenna is it and it's
chacarteristics? It's around 4 meters long and has 2
coils. My friend also wonders if it will need radials and
how many.
Thanks.

```
I love my windom 80-10 metres antenna.

To all radio amateurs

SB DX ARL ARLD015
ARLD015 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX bulletin, the 599Rpt, Ed, K8VIR, The DXNL, Koji, ZS6CAX, Tosy, JA6VZB, Jurek, SP2BIK, the Yankee Clipper Contest Club PacketCluster Network and Contest Corral from QST. Thanks to all.

AUCKLAND ISLAND, ZL9. Ed, K8VIR, will be QRV from here for five days as K8VIR/ZL9, possibly starting on April 2. Operating time will be dependent on weather conditions and his work load. His power source is limited, so QSOs may be kept short. QSL to Ed Hartz, PO Box 9, Te Anaw, New Zealand.

BELAU, T8. The Japan Palau Crazy Contest Club plans to be QRV as a Multi/Single entry in the CQWW WPX SSB Contest as T88X. They expect operations to be on 80 to 10 meters. There is no 160 meter activity planned. QSL T88X via JE6DND. Before the contest, look for T88JA to be active on the newer bands. QSL T88JA via JA6BSM.

SWAZILAND, 3DA. Koji, ZS6CAX, and Tad, JH7PKU, will be QRV as 3DA5A as a Multi/Single entry in the CQWW WPX SSB Contest. Before and after the contest, look for 3DA/AA3JA and 3DA0NX. QSL 3DA5A and 3DA/AA3JA to JH7FQK. QSL 3DA0NX to ZS6CAX.

ZAIRE, 9Q. Pierre, HB9AMO, will be QRV for two months as 9Q5BQ from Kinshasa. Look for his CW on 20 meters. Activity on other bands is also expected. QSL to home call.

GALAPAGOS ISLANDS, HC8. Ted, HC5K, will be active as HC8K on AMTOR, PACTOR, RTTY and SSB for about a week. He and one other amateur will operate on 160 to 10 meters. They also expect there to be some satellite operation. QSL to Ted Jaramillo, PO Box DX, Cuenca, Equador, South America.

US VIRGIN ISLANDS, KP2. Rich, KF8UN, will be QRV as KF8UN/KP2 from March 26 to April 2. He will also be operating in the CQWW WPX SSB Contest. QSL to KF8UN.

POLAND, SP. The City of Gdansk on the Polish Baltic Coast is celebrating its 1000 years birthday. Special Event station HF1GD will be active until December 31, 1997. Look for activity on all bands, including some VHF, UHF and satellite operations. QSL via SP2BIK.

WESTERN SAHARA, S0. S0RASD will be QRV from March 27 to 31. Operators include EA2JG, EA3CB, EA3CZM, EA3GBU, EA4TX and S01A. They will be active using both SSB and CW, and will participate in the CQWW WPX SSB Contest. QSL via EA2JG.

TUVALU, T2. Bernhard, DL2GAC, has been QRV as T22MS. He expects to be here until March 30. QSL to home call.

TURKEY, TA. Thomas, DL3FDU, Felix, DL8OBC, and Patrick, DL4VBP, will be active from Izmir from March 25 to 31. They will be QRV in the CQWW WPX SSB Contest as YM3DL. They plan to be active outside the contest on all bands, including the newer bands as well. There will be special emphasis given to 80, 40 and 30 meters. QSL YM3DL via DL4VBP.

ST. HELENA, ZD7. ZD7BG was heard on 14010 kHz at 2100z. QSL to PO Box 157, St. Helena. John, ZD7WRG, was heard on 14205 kHz at 1920z. John plans to be here until April 9.

THIS WEEKEND ON THE RADIO. You have your choice of either the CQWW WPX SSB Contest, or the Low Power Spring Sprint this holiday weekend. Please see March QST, page 98 for details.

I fail to see what bearing this has on the argument.

All you are talking about is a change of medium from printed paper to
CD-ROM.

Anyway, strictly speaking it is a breach of copyright to publish
extracts from the Callbook (paper or otherwise) on the Internet without
the permission of the publishers.

Yours is the first I have ever seen, Jorge!

Anyway, I agree with you ... the G5RV is a very poor antenna. A doublet (any size) with tuned feeder all the way to the shack and fed through a good ATU is a far superior antenna.

Well, you might be out of luck at this point. I checked the manager list and read a note that the route was NOT by WB6EQX. I checked to see if she had a USA call, without result, and then checked the phone books for her name without success.

Hi everybody,

After careful planning and making sure we have transport, I will activate
3 (very rare) IOTAs. ;-)

Practical info:

Date : July 19th - August 9th 1997
Call : GM/ON4BAM/p
GM/ON4BAM/m
Freqs: IOTA frequencies (highest band possible, propagation permitting)

IOTA numbers: EU-005 whole period except:
EU-010 July 31st- August 2nd (noon)
EU-008 August 2nd (noon) - August 4th (noon)

Working conditions: TS-50S and Outbacker Perth while mobile
TS-50S and wire antenna(s) (evenings)

This was the good news, now the bad news....

Since this is mainly a family holiday I will not be on 24/24....
Because of lack of personnel (hi) there will be no pilot stations to post
daily updates to a dedicated reflector... :-)
There will be no logservers to check if you're 'in the log' :-)
There will be no dedicated webpage with up to date pictures (sorry).
There will be no books nor videos..

I just hope to have as much fun as the VK0 guys and maybe give a few
people a new IOTA.

See you from EU-***

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

You might have better results if you post this at rec.radio.swap. This is a newsgroup dedicated to swap/sell radio equipment not DX like this one is.....

Well, Francisco. I don't know how you could say these things. :-)

Don't you know that the G5RV is a "MAGICAL" antenna for all reasons and all seasons? ....according to many outspoken disciples? It has become a cultish matter into itself. <VBG>

[I can only hope that you can translate the subtleties of the above].

If your Windom works to your needs, fine. There may be, of course, more optimum configurations for _specific purposes_ such a low-angle DX, high-angle Euro coverage, etc., but we all do the best with what land we have available; not so? We can't really satisfy every requirement in theory. Even commercial entities cannot!

Your "wake up" message is much appreciated. Thank you.

798. IOTA activation (GM) extra info

Newsgroup: rec.radio.amateur.dx
Date: 1997-03-30 00:00:00 UTC
From: mauricea@glo.be
Message-ID: <333d8fec.10008872@nntp.z03.glo.be>
Source record: 33230

Hi everybody,

After careful planning and making sure we have transport, I will activate
3 (very rare) IOTAs. ;-)

Practical info:

Date : July 19th - August 9th 1997
Call : GM/ON4BAM/p
GM/ON4BAM/m
Freqs: IOTA frequencies (highest band possible, propagation permitting)

IOTA numbers: EU-005 (mainland Scotland) whole period except:
EU-010 (Isle of Lewis) July 31st- August 2nd (noon)
EU-008 (Isle of Skye) August 2nd (noon) - August 4th (noon)

Working conditions: TS-50S and Outbacker Perth while mobile
TS-50S and wire antenna(s) (evenings)

QSL is preffered via CBA (direct with SAE + postage)

This was the good news, now the bad news....

Since this is mainly a family holiday I will not be on 24/24....
Because of lack of personnel (hi) there will be no pilot stations to post
daily updates to a dedicated reflector... :-)
There will be no logservers to check if you're 'in the log' :-)
There will be no dedicated webpage with up to date pictures (sorry).
There will be no books nor videos..

I just hope to have as much fun as the VK0 guys and maybe give a few
people a new IOTA.

I am interested in creating QSL cards using my
home computer and color ink jet printer.

Contrary to popular comments, size is important.
But I do not know of stock in the "normal"
3.5 x 5.5 qsl format. I've seen card stock
in 3X5, 4X5, etc. these sizes seem to be less
than totally accepted for use with QSL's.

Does anyone have experience creating QSL's
via computer?

thx
KN6PL

Hi Bart -- take a look at K7ON's QSL Primer at URL:
http://www.qsl.net/k7on/index18.htm
It should answer all your questions.

I compose "homebrew" QSL cards with my computer and printer -- B&W for now -- on color stock. Works well -- lotsa cutting tho -- I bought a cutting board -- sure saves time if you send out a lot of cards.

Good QSLing

SB DX @ WW $OPDX.298
Ohio/Penn DX Bulletin No. 298

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 298
BID: $OPDX.298
March 31, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, NG3K, W3UR & The Daily DX, WD8MGQ, W0YG, DK1RP, DJ5NN, G4BUE & DX News Sheet, I1HYW, JA1ELY, OZ5MJ, PS7AB, SP2BIK, VE3UOL, VE9AA and VK4AAR for the following DX information.

6O, SOMALI. Bill, VK6ZX, will be traveling in the northeast region of Somalia in the town of Galkayo. He hopes to be active for a few hours during April 8-9-10th. His XYL, Diane, VK6KYL, will also be with him. Their callsigns will be 6O0X (Six Oscar Zero Xray) and 6O0YL (Six Oscar Zero Yankee Lima) respectively. The callsigns have been allocated by the political organization responsible for this region (SSDF). Bands of operation are expected to include 20 and 40 meters. There is and will be limitations to access of equipment which is also used for regularly scheduled non-political AM shortwave broadcasting inside Somalia. The times of operation will be ruled by availablility of equipment and acceptability of running the generator (for power) during sleeping hours. Bill states, "The radio station is a peace project which was given a major upgrade 3 years ago with funding from the Boulder Rotary Club in Western Australia and the Australian Government. It has been operational for some 4 years now and continues to have an influence on the process to establish an accord resulting in a Somali Government. The Radio station was established by Sam Voron VK2BVS (6O0A). To date, the most commonly used frequency from this location is 14275 kHz by Sharif (6O0SC) and Abdi (6O0W) have been on air. The equipment available for use includes a Yaesu Txcvr with a Henry amplifier. The antenna is a log-periodic at between 30 and 40 metres in the air. SWR on 40m may be too high for high power. No ATU is available yet. QSL is via my call, VK6ZX at the call book address (PO Box 463 Kalgoorlie, WA 6430, Australia). Direct QSL with green stamp will be answered."

CALL BOOK GOING PAPERLESS. Almost every avid DXer has at one time or another used a paper call book, but "TIMES ARE A-CHANGING". Some DXers will be affected by the announcemnet that the printed version of the

"Flying Horse Radio Amateur Callbook" will be discontinued. Beginning with the Spring 1997 edition, the callbook will only be available on CD-rom.

CY9, ST. PAUL ISLAND. Mike, VE9AA, reports the CY9AA DXpedition will now take place from June 26-July 3rd, due to special circumstances. No other details were given.

FY, FRENCH GUIANA. The "DX News Sheet" reports Dave, DJ0PJ, will be active again from April 2nd to May 6th as FY/DJ0PJ. Activity will be "QRP" on 10116, 14060, 18080 and 21060 kHz.

GJ, JERSEY. Peter, DK1RP, will be active from here April 6-12th. He states, "As Jersey is not a very rare country I will try to make some CW-activity on the low bands (160,80,40). As I am travelling by air I will not be able to take 'great equipment' with me, but I will try to find a place with a good offset to USA on the island. Each contact will be confirmed via the bureau."

HF1, POLAND. There will be a special event station be active from the city of Gdansk on Polish Baltic Coast which will celebrate its 1000 years birthday. For this occasion there is a special callsign issued, HF1GD, which will be active from now until December 31st. The station will operate on all HF bands, VHF/UHF and satellites. QSL cards via SP2BIK.

IOTA NEWS/UPDATES.......
Steffen, DJ5NN, informed OPDX that he and others will activate Mando Island (EU-125), a Danish island located in the North Sea Coast Group, from May 1-6th. Activity will be on CW/SSB on all HF-Bands, on the well know IOTA frequencies (also check 144/430 MHz). They will use the callsign OZ/LX9EG/p. Members of the group are: LX1NO, DL8DXL, DL2TG, DL2LTM, DL2DRD, DJ5NN and DH0DW.

MEL ISLAND (IOTA SA-047, DIB 24, DFB PR-01, DFH PR-01) will be active April 15-22nd, using the callsign PQ5L (only!!!!). Operations will be on CW/SSB, all bands (try IOTA freq. and Brazil DX Net). QSL via PP5LL.

SAO FRANCISCO ISLAND (IOTA SA-027, DIB 08) will be active April 22-30th using the callsign PR5L. Operations will be on CW/SSB, all bands (Try IOTA freq. and Brazil DX Net) QSL via PP5LL.

JD1, MINAMI TORISHIMA. JG8NQJ/JD1 is reported to be active and will continue to be active until he returns to the mainland on April 23rd. He prefers CW and can usually be found on 20 and 40 meters after 0100z as late as 0600z and after 1100z (until he goes to bed). He expects to return again in June or July of this year. QSL via JA8CJY, direct to CBA or JARL Bureau.

JUST A REMINDER! NH7A which was active in the WPX contest this past weekend, was really Hawaii. Don't get this confused with Kure Island. All Kure Island callsign suffixes start with a "K" (ex. AH7K, KH7K, NH7K or WH7K).

QSL INFO AND NEWS.....
Alan, VK4AAR, has recently been appointed QSL manager for Frank, YJ8AA, and he will have access to all of Frank's logs. Frank will be going with some friends to the Shepherd Islands (OC-111) and Torres Island (OC-110) sometime later this year (callsigns are not yet known, may use YJ8AA/p). Alan will be managing these operations also. QSL to VK4AAR per '95, '96 '97 CBA ONLY (The earlier callbooks show incorrect information). The correct address is: Alan Roocroft, c/o Post Office, Dalveen. QLD 4374, Australia. ADDED NOTE: Alan still has the logs and cards for the March '96 operation from Melville Is (OC-173) by VK8MI (Stuart & David).

QSL cards for the recent St. Peter & St. Paul Rocks DXpedition, ZY0SG and ZY0SK, are reportedly ready and will be mailed within one week. Don't forget to visit their Home Page and sign their guest book at: http://www.glomec.com.br/rocks/index.html

QSL MIX-UP (V5/W8UVZ AND V5/ZS6YG). Charlie, W0YG (ex KY0A), reports that both George, W8UVZ, and he are getting a lot of cards meant for each other. QSL V5/W8UVZ QSOs "only" to W8UVZ. QSL V5/ZS6YG QSOs "only" to W0YG. Do not try to send QSLs for V5/ZS6YG to the ZS Bureau. They will probably never get to him. QSL V51Z, their ARRL CW Contest callsign, to ZS6EZ "only".

RARE ASIAN DXPEDITION. Steve, HA0DU, reports Zoli, HA5PP (ex-3W8DX, XW8DX, XU8DX, ZA1DX), would like to activate two VERY rare Asian countries soon. He needs equipment support. Those interested can contact him at his E-Mail address: HA5PP@hotmail.com (or if it does not work, send your E-Mail to Steve at: Istvan.Bogyo@mdc.hu).

S2, BANGLADESH (POSSIBLE NEW IOTA ISLAND IN WORKS). Giovanni, I1HYW, received a fax from Vittorio, I1SLY, stating that a S2 operation "MAY" start April 5-6th. It will probably be from Hatia Island instead of the island that they tried for last month since they could not get permission to operate. This one will be a new IOTA and count for S2 little letter "a".

SPECIAL EVENT. To commemorate the fairy tale writer Hans Christian Andersen's 192nd birthday, a special event station will be active, on the April 2nd with a special callsign OZ5HCA. The QTH is Odense where Hans Christian Andersen was born in 1805. Odense is located on the Island of Fyn (IOTA EU-029). Activity will be on 14260 +/-, 7060 +/-, 3670 and 3540 khz starting around 0800z. There will be a special QSL card issued. QSL via bureau. If you want direct QSL you can send it to OZ5MJ, Jens Palle Moreau Jorgensen, Jaegerbakken 13, DK 5260 Odense, Denmark.

V5, NAMIBIA. Charlie, W0YG, will once again head for V5 in July, but he will be active mobile. He will be using 500 watts, and will again try 80 and 160 meters. Charlie states, "My signal wont be strong on these bands, but at least I will attempt it with a little different twist in the installation." He also mentions that he is trying for A2, Z2 and 9J licenses. Charlie says this will take time, and he is not sure he

can do it in the amount he has left before he leaves July 23rd.

XU, KAMPUCHEA (CAMBODIA). Reports indicate Mike, XU6WV, has been active on 3512, 7004 and 7007 kHz. His sunrise is currently around 2304z, and his sunset is currently 1100z. QSL via K0TLM.

YN6, NICARAGUA. Hiro, JA6WFM, was issued the callsign YN6WFM on March 12th and expects to be in Nicaragua until December. He was quite active on 40 meters CW in the early mornings. QSLs via JA6WFM to the bureau or direct to: Hirofumi Nakamura, 1311-11 Miyahara-Machi Yatsushiro Gun, Kumamoto 869-46, JAPAN.

ZL9, AUCKLAND ISLAND (Update). Information from Ed, K8VIR, relayed to OPDX by Alan, VK4AAR, states Ed expects to be active on the 1st or 2nd of April for about 5 days. He will be using ZL9DX and K8VIR/ZL9 mostly on 14260 kHz and, if the band is open, he will be on 21300 kHz. Ed suggests the best QSL route for USA/Europe go to his home call as per the "1997 CallBook". For other areas, they can use this route: Ed Hartz, K8VIR, POB 9, Te Anau, New Zealand.

ZS8, MARION ISAND. The "DXNS" reports Chris, ZS8IR, continues to be active on 1822 kHz from 0300z until after his sun rise as much as he can before going QRT in early May. He has worked 330 different stations on 160 meters including the first QSOs with VK6 and JA recently.

Hello Bart...

I use 8.5" x 11" "cover" stock. It's the right weight, comes in many colors, and is cheap (10 cents or less per sheet) in most office supply stores.

Set up your QSLs 2-up and 2-across on this sheet and cut'em apart with an X-acto knife... gives 4 cards per sheet. Price is right at 2.5 cents per card.

I've made my cards 3.5" x 5.5" which is as close to "standard" as you can get... I have a bit to trim off on the 8.5" dimension of the sheet.

Have fun.

73

Rod Elliott VE3IRF
elliottr@hurontel.on.ca

The 8.5X11 sheet is much easier to feed thru most printers than individual cards.

Hey, Bart.

Have you considered using a self-adhesive label which you affix to an ordinary card after printing? Just a thought.

Best regards,
Lindsay

I've emailed the W1 incoming QSL bureau a couple of times, and they don't respond. The ARRL says they prefer cash to SASE's, and I'm trying to setup the service before all my cards come in (I hope).

Anybody have any scoop on these guys? I already have their email address, and consider it a dead end.

Lets grow up a bit gentlemen! If someone asking for QSL info that is
readily available is eatin ya up, use the DEL key and move on with
life. We don't need a bunch of mudslinging on this USENET group. We
have more than enough of that in rec.radio.amateur.misc and
rec.radio.amateur.policy already. How bout a truce.

That's kind of like the guy on 3.865 who used the call KC8CCI (not the real KC8CCI). He bought a DX-70 and the dealer told him for another $20 he'd give the buyer a ham call. Didn't last very long.

An expedition to the Laponia will take place between April 5th and April 6th.
The locator is JP97.
The reason for the expedition is to celebrate Laponia which includes the 4 national parks, Sarek, Padjelanta, Muddus and Stora Sj�fallet. They are now members of the UNESCO:s World Heritage List. For more info check out this site: http://www.unesco.org/whc/sites/774.htm

All bands except for the WARC-bands will be activated, and also RS-12.
Operators: From Gellivare Malmbergets Amateur radio club (SK2TP).
SM2IEO, SM2IEN, SM2KAL.
(The callsign for the expedition will probably be a 7S2 call.)

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
callsign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" callsign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

Announcing the beginning of the new preeminent Internet DX bulletin. THE DAILY DX, written and produced by Bernie McClenny, W3UR, is the newest, fastest and most innovative way to get up-to-date HF DX information. The Daily DX provides the latest DX information collected from a world wide network of sources. The raw DX data is put in a user friendly format to meet your DXing needs. You will receive information about future DXpeditions, QSL information, propagation forecasts, IOTA (Islands on the air), post DXpedition write ups and more. You will receive instantaneous DX news that is unreliant on the U.S. postal service. The Daily DX will be e-mailed to your home or office 5 days a week, Monday through Friday, 50 weeks a year. Other bulletins may take 2-5 days to reach you. Now you can receive DX news before it's out-of-date. Subscriptions to The Daily DX are $49.00 per year for 250 issues, that's less than 20 cents an issue. If you subscribe between now and April 30, 1997 you will become a charter subscriber and receive The Daily DX for $36.00 per year, that's less than 15 cents an issue. If you are not completely satisfied after 30 days we offer a full money back guarantee. Please visit The Daily DX Homepage at URL http://www.wdn.com/thedailydx Subscribe now to The Daily DX for the fastest DX source. To receive your first two weeks free, send an e-mail to bernie.mcclenny@mail.wdn.com with your name, callsign and e-mail address today.

PS how often can I announce this? Once a day, week, month, year?

I don't have any QSL cards, I am planning to homebrew something. A few years ago a CDROM publisher was working on kitchen cooking recipes. They used track-feed stiff paper. They gave me about a mile of the stuff in a big box. You might want to try this stuff if you can find it. About 3x5 inches? I haven't measured.

Hello Fellow Ham:

You are invited to join the South Florida Hams Mailing list (SFLHams)!
This is a unmoderated amateur radio topic based mailing list open to all
hams in South Florida. SFLHams topics can (and have) ranged from:
meetings, hamfests, emergencies, news and other events.

To Subscribe:
send email to- majordomo@garbage.bridge.net
& in the body of the email put- subscribe sflhams

Please make sure you do this from the address you wouldlike to receive
mail to, else use: subscribe sflhams email@overpriced.domain.us

Shortly Thereafter you should receive a confrimation message including
many other commands which can be used on the list. *IF* you have any
problems subscribing or with anything else involving this list please
```

contact KF4MKT (Greg Albrecht) (954)340-1458 (admin@garbage.bridge.net)

Have Fun!
And Rember: The more people you tell about this list, the more likely it
is you will have something interesting to talk about.

>About 3x5 inches? I haven't measured.

It is real tempting to use common 3x5 "index" card stock for homebrew QSL
cards, but be careful you don't create a card that doesn't qualify for
Postal Service post card rates.

The minimum size to qualify for post card rates is 3-1/2 x 5 inches
The maximum size to qualify for post card rates is 4-1/4 x 6 inches

The minimum thickness to qualify for post card rates is .007 inch, too, so
you can't just cut up a piece of paper, either. :)

I have a layout in my log database which formats log information into a QSL card and prints onto card stock. By turning the card over after it prints the QSO data, I print a message and the address (pulled in from the callbook), again right from the database, on the backside. It turns out just like a post card (after trimming).

I really like the polished look of offset press QSLs, but this is a pretty slick system and my QSLs are 'homebrewed'.

ARLD016 DX news

ZCZC AE16
QST de W1AW
DX Bulletin 16 ARLD016
From ARRL Headquarters
Newington CT April 3, 1997
To all radio amateurs

SB DX ARL ARLD016
ARLD016 DX news

This week's bulletin was made possible with info provided by The 599Rpt, Tedd, KB8NW, the OPDX Bulletin, 425DXnews, The DXNS and Contest Corral from QST. Thanks to all.

TUNISIA, 3V. Tunisia is going to commemorate its 40 years of independence during the period of April 10 to May 10. Look for special event station TS40A to be QRV during this celebration. QSL information to be announced.

QATAR, A7. Jean Jacques, ex J28JJ, is now in Qatar and has permission to operate club station, A71A. He will try to be QRV on Saturdays using RTTY.

FRENCH GUIANA, FY. Dave, DJ0PJ, will be QRV from April 2 to May 6 as FY/DJ0PJ. Look for his QRP activity on 10116, 14060, 18080 and 21060 kHz. QSL to DJ0PJ.

ENGLAND, G. The Torbay ARC is celebrating its 50th Anniversary with the call GB50TR on all bands and modes through the end of the year. QSL via the RSGB bureau.

MINAMI TORISHIMA, JD1. Take, JG8NQJ/JD1, will be QRV until April 23. He prefers CW on 7012, 10104 and 14028 kHz. He works at the meteorological observatory on the island so his activity depends on his work schedule. QSL via JA8CJY.

TUVALU, T2. Bernhard, DL2GAC, is still QRV from here as T22MS. QSL to DL2GAC. Please note his correct address can be found in the 1997 Callbook.

CAMBODIA, XU. Mike, XU6WV, has been active on 3512, 7004 and 7007 kHz. His sunrise is currently around 2304z, and his sunset is currently 1100z. QSL via K0TLM.

NICARAGUA, YN. Hiro, JA6WFM, has been active on 40 meter CW with the callsign YN6WFM. He expects to be here until December. QSL to Hirofumi Nakamura, 1311 11 Miyahara Machi, Yatsushiro Gun, Kumamoto 869 46, Japan.

MARION ISLAND, ZS8. Chris, ZS8IR, is active on 1822 kHz from 0300z until after his sunrise. QSL via ZS6EZ.

CALL CORRECTION. It was mistakenly reported in ARRL DX Bulletin ARLD015 that KF8UN was operating portable from the US Virgin Islands in the CQ WW WPX SSB Contest. The correct call sign was KF8UM.

THIS WEEKEND ON THE RADIO. Take your pick of contests this weekend. Participation in the EA RTTY, Elettra Marconi, Holyland DX, MARAC SSB County Hunter's, The SP DX CW and the DARA FM Zip Contests should keep you busy. Please see April QST, page 98 for details.

The GMDX Group is re introducing the Scottish Activity Weekend. in an effort to encourage activity by all Radio Amateurs in Scotland and provide a world wide interest in contacts with Scottish Stations.

The 1997 activity weekend will start at 0001z on the 19 April and last until 2400z on 20 April.

A certificate "The Scottish Activity Century Award" will be awarded for contacts made or logged during the event as follows.

Scottish Participants

contact with overseas stations 2 points per station per band
contacts with UK/Eire stations 1 point per station per band
contacts with Scottish Stations 0 points
Novice participants contact points x multiplier of 2

All Other Participants

Contact with GM/MM prefix count 1 point per band
Contact with GS/MS prefix count 5 points per band
Contact with 2M prefix count 10 points per band
Novice participants points x multiplier of 2

SWL participants

On a heard basis for logging stations in contact with Scottish stations as above(note no more than 3 loggings including the same Scottish station in any one hour period.)

Award requirements

Fee 3 GB pounds or $5 or 10 IRCs

Basic Award requires 100 points
Silver Award requires 150 points
Gold Award requires 200 points

What I use that works geat is from SPARCO Brand, and it is called Post Cards. The stock number is 00937 and they come in 501 cards per package. It says on the label "Designed for duplicating, typing, copying or writing." These are not pin fed, they work very well in my Canon BJ610. Ny logging program (LOGic4) normally prints my QSL cards, but I have also designed some using Prinst Shop Deluxe that came out pretty well.

Avery sells a line of postcard stock that is 8 1/2 by 11 and has two
postcards per sheet. I am not sure of the final size. Visit your local
office supply or computer store and see if it is acceptable.

Is the prefix for St. Martin, FS or PJ8? Are these the same country. I worked a FS prefix years ago but although the arrl dxcc list shows it, it says it is an unofficial prefix. Does it still count for dxcc. Also, do I still need a PJ8. It lists this one too and I don't know if you can claim both or just one or the other.

Hi John, Avery also sells a peel-off adhesive letter-size paper.
What I do is create four QSLs per page, trim them to size, peel
off the protective layer, and attach them to standard pre-stamped
US postcards. Works Great. Cheaper than the postcard stock.

SB DX @ WW $OPDX.299
Ohio/Penn DX Bulletin No. 299

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 299
BID: $OPDX.299
April 7, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KE2LJ, W3UR & The Daily DX, N4AA & QRZ DX, N4UQM, AC7DX, W5IJU & Island/DX News, EA2CLU, G4BUE & DX News Sheet, G0WMW, HA0DU, LU6EF, ON4BAM, OZ8ABE, URE EA DX and VK4AAR for the following DX information.

3A, MONACO. The "DX News Sheet" reports the special event station 3A7A will be active April 15-30th. The station will be active all on bands/modes to celebrate 700 years of the Grimaldi Dynasty. QSL via bureau.

3B, MAURITIUS. Kenton, NK6F, will be visiting 3B8CF and plans to be active from his QTH as 3B8/NK6F. Operations will be from April 20th to June 8th, with activity mainly on CW. QSL to home call.

3C0, ANNOBON ISLAND. A DXpedition is being planned for next May. The URE (The IARU National Society) is coordinating through the URE EA DX. The operation will use three complete stations (plus some other back-up rigs) with linear amplifiers. The dates of activity will be from May 20-27th. Operators will be: EA3AOK, EA3BT, EA4BPJ, EA4BT, EA5AD, EA5GRC, EA6BH, EA6WV, EA7BJ, EA7JB, DJ9ZB, EA4BQ/OH0XX, EA8AH/OH1RY and W9EVI. QSL via EA4URE. Their budget has been calculated to be 45,000 U.S. green stamps, so the team is looking for contributions. Two planes will be loaded for transportation of operators and material to the island. Any questions about this operation must be sent to: hf@ure.es. They plan to have more information available via their WEB-site. The URL address is: http://www.ure.es/3c0dx.html.

3W (XV), VIETNAM. Activity continues regularly from here. Nick, 3W5FM, can be found usually before 1130z on 40 meters (around 7005 kHz), working Japan and east coast U.S. stations. Then after 1400z on 30 meters, Nick works the west coast U.S. stations on 10101 kHz. Nick does not leave Europe out, between 1530 and 1730z, he can be found on 14009 kHz working Europe on 14009 kHz. QSL via UA0FM. If you do not have any luck with

Nick, look for Rolf, XV7TH, just before 1530z on 14195 kHz usually listening up. QSL via SK7AX.

3Y, BOUVET (DXpedition delayed). The 1997 SSIDXG operation has been delayed until December, 1998, on the authority of the Norwegian Polar Institute. The Convention of the Conservation of Antarctic Marine Lining Resources (CCAMLR) is establishing an ecosystem monitoring program and permission to land has been revoked until a management plan is in place. The Institute's concern is that all activity will disturb the environment to some degree which might cause an unacceptable impact on the monitoring program. Tony, WA4JQS, and Barry, ZS1FJ, are continuing their efforts for this and other operations.

6Y, JAMAICA. The "Island/DX News" states K6JAH will be active through April 13th. The callsign was not given. Operations will be on 40-10 meters with some RS-12.

7O, YEMEM. Steve, HA0DU, reports Zoli, HA5PP, told him he wil be stationed in Aden, Yemen starting in May for a longer period of time, probably a year or so. He is going to try to get permission to operate from Aden, and he will do his best to make his license approved and confirmed by the authorities in Sanaa. Zoli has been successful in the past to secure licensese in Vietnam (3W8DX) and Laos (XW8DX) when it was extremely difficult, so KYFC. His call sign will be published later. He is planning to come on the air in late June. From Aden, he will be making several "side trips" to other countries (E3, T5, ST, ST0 and J2).

8Q, MALDIVE ISLANDS. Juanjo, EA2BP, and Jose, EA2CLU, will be active from May 4-14th, using the callsigns 8Q7BP and 8Q7LU respectively. They will active on all bands SSB/CW, maybe also RTTY. The QSL routes are via home calls. For more information, send E-mail to Jose, ea2clu@ctv.es.

ET, ETHIOPIA. "The Daily DX" reports ET3SID was heard on 14082 working Europe and east coast U.S. stations on RTTY from 1230-1330z. Afterwards he went to SSB on 14284.

IOTA NEWS.... Maurice, ON4BAM, announces he will activate three IOTAs while on holiday with his family. Planned operations will take place July 19th to August 9th, using the callsigns GM/ON4BAM/p and GM/ON4BAM/m. Activity will be on the IOTA frequencies (highest band possible, propagation permitting). Look for him on EU-005 (mainland Scotland) during the whole period except; EU-010 (Isle of Lewis) July 31st- August 2nd (noon); and EU-008 (Isle of Skye) August 2nd (noon) - August 4th (noon). QSL is preferred via CBA (direct with SAE + postage).

KH2, GUAM. During Jeff's (N4UQM) 2 years stay here, he will be signing N4UQM/KH2. He will be active on SSB and RTTY on all bands 80-10 meters. His QSL Mnager will be Carl, WB4UBS, and his address is:
#1 Sweet Bay Drive; Columbia, SC 29209.

KH7K, KURE ISLAND. It has been announced Art, N2NB, expects/plans to operate from Kure from May 17-23rd. It will be a one-man show at this

point. Equipment is an IC-741, A Centaur amp, and an HF9VX, vertical for 160-10 meters. He will try to set the antenna at the waters edge if possible. The expected callsign will be close to KH7K/N2NB. QSLs to NW8F. Art is an employee of a Federal Agency of the U.S., and has had favorable discussions with the Coast Guard, and OTHER necessary agencies. Let's wish him luck.

PIRATE ALERT! A station working as OH0/OZ1WF is a pirate. The real OZ1WF has not been active on HF for years. OZ1WF has received a lot of direct QSL for this operation and he will be sending the cards back. The slim often operates on 80 and 160 meters.

QSL INFO AND NEWS......
NEW QSL MANAGER. Ron, AC7DX, informs OPDX that he is now the new QSL Manager for AH8A. His InterNet E-mail address is: ronlago@efn.org. His snail mail address is: POB 25426, Eugene, Oregon 97402. All QSL direct ONLY.

Bernard, DL2GAC, who has been active on Tuvalu (T22MS) and Solomons (H44MS), wants it known that the CORRECT address to QSL is printed only in the 1997 International Callbook. In previous years the address was for his father's address which will get to him anyway, but the CORRECT ADDRESS is: Bernard Stefan, DL2GAC, Moggenweilerstr 18, D-88677 Markdorf, Germany. However, he prefers the bureau because the postage required is two U.S. green stamps or 1 IRC. By the way, he is preparing to leave Tuvalu for Fiji and then on back to the Solomons.

Raul, LU6EF, GACW's QSL Manager, is glad to report all LU6Z QSL cards have been answered, either via direct or via bureau. He reports there are some problems still happening with some individuals, who are asking second or third time for cards. For these people, Raul states, "Please DO NOT SEND MONEY OR COUPONS AGAIN, we do not expect to make money from you, so only a card and self addressed envelope is OK."

TN, CONGO. Begin looking for Piero, IK2BHX, who is currently active as 9Q5HX for six months and hopes to be active from here. There is no report on what callsign he will be using. QSL via IK2MRZ.

WORLD'S FIRST EVER DX! Commemorating 100 years of DX (since Marconi's first contact between GW and G on 18 May 1897), "Weston-super-Mare RS" has now finalized details allowing an operation from Brean Down, the location of the original G station. The "SPECIAL" callsign GB100BD will be on the air May 17 and 18th ONLY, along with Barry ARS's GB100LP and GB100FI operations already announced. QSL information: GB100BD via RSGB BUREAU ONLY and GB100LP and GB100FI via Glyn, GW0ANA. Glyn will also handle requests for certificates, available for working any two of the special event stations (certificates will be specially endorsed for those working all three). ADDED NOTE: Just a reminder, that the "10th International Marconi Day" takes place April 19th. Some details on stations and other activites will be listed in next week's bulletin.

The island is shared by the Netherlands and France. They are
politically sepperate areas so I would guess they are sepperate
DXCC countries too.

Good luck & 73, Duane

Since this is one of the longer threads I'll add my two cents.

First of all when QSLing I think you must think about the recipient.

Is this someone who is just collecting points on a net like 3905cc or

10-10 or is it a DX station that you had an enjoyable contact with?

If it is just a net contact there is nothing wrong with a cheep homemade

card. I've seen many of these that were quite well done. However if

you want a card from a new country or rare IOTA then I suggest spend a

little to get a decent, professionally made, card. Weather or not you

like it, your card says something about you. Unfortunately a lot of hams

cards say CHEEP! Don't expect to get a nice card in return if

you'er a cheepscape. Also, I don't care how well you brewed your card,

if it's printed on regular paper, it says CHEEP! Use card-stock.

I have two sets of cards. One inexpensive set made by wx9x for my net contacts

(and the ievitable California QSO) and another full color set by Vi-Con that

costs a bit more, but I'm not embarresed to send it out for DX contacts and

memorable QSOs.

Look, you've spent hundreds, maybe thousands of dollars on radio equipment so

don't be a cheepscape when it comes to QSLing. Make a paper chaser happy.

73, Duane

http://www.qrz.com/cgi-bin/qrz_gifs?n0ze.jpg

BTW: I already know what a poor speller I am. You don't have to tell me.

Want to make MONEY fast?????

A little while back, I was browsing these news groups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $5.00! So I thought, "Yeah, right, this must be a scam!" as most people probably thought. But also like most people I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 5 names and address stated in the article. You then place your own name and address in the list at #5, remove the #1 person, and move everyone up a position, and post the article in at least 200 news groups. (There are more than 18,000 of them). No catch, that was it.

So after thinking it over, and talking to a few people first, I thought about trying it. I figured what do I have to lose except 5 stamps, envelopes, sheets of paper and $5.00, right?

Like most of us I was still a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the US. Post Office (1-800-725-2161) and they confirmed that it is indeed legal.

Then I invested the measly $5.00.................

Well GUESS WHAT!!!.. .Within 7 days, I started getting money in the mail! I was shocked! I still figured it to end soon, and didn't give it another thought. But the money just kept coming in. In my first week, I made about $20.00 to $30.00. By the end of the second week I had made a total of just over $ 1,000.00!!! In the third week I had over $5,000.00 and it was still growing. This is now my fourth week and I have made a total of just over $20,000.00 and it's still coming in......

It's certainly worth the $5.00 and 5 stamps. I spent more than that in one week on the lottery!!!

Let me tell you how this works and most importantly, why it works... also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. The process is very simple and consists of 3 easy steps:

STEP 1: Get 5 seperate pieces of paper and write the following on each piece of paper, "PLEASE PUT ME ON YOUR MAILING LIST." Now get 5 $1.00 bills and place ONE inside EACH of the 5 pieces of paper so the bill will not be seen through the envelopes to prevent thievery (THIS STEP

IS VERY IMPORTANT!!!). Next, place one paper in each of the 5 envelopes and seal them. You should now have 5 sealed envelopes, each with a piece of paper stating the above phrase and a $1.00 bill inside. What you are doing is creating a service by this. THIS IS PERFECTLY LEGAL!

Mail the 5 envelopes to the following addresses:

1) I. Guest
1800 A Hillcrest Rd.
Columbia Mo, 65203
USA

2) B. Gelsleichter
RR2 Box 272
Tunkhannock, PA 18657
USA

3) J. Hurless
3649 Yorktown Way
Boise, ID 83706
USA

4) C. Lanning
101-1537 Burnaby St.
Vancouver, BC V6G 1X1
CANADA

5) A. Cole
2580 W. State Road 28
Tipton, IN 46072-9787
USA

STEP 2: NOW take the #1 name off the list that you see above, move the other names up (5 becomes 4, 4 becomes 3, etc...) and add YOUR NAME as #5 on the bottom of the list.

STEP 3: Change anything you need to, but try to keep this article as close to original as posible. Now, post you amended article to at least 250 news groups. All you need is 250, but remember the more you post, the more money you make! Don't know HOW to post in the news groups? Well do exactly the following:

FOR NETSCAPE USERS,

1) Click on any new group, like normal. Then click on "To:News", which is in the top left corner of the news group page. This will bring up a message box.

2) Fill in the SUBJECT with a flashy title, like the one I used, something to catch the eye!!!!

3) Now go to the message part of the box a retype this letter exactly as it is here, with the exception of your few changes. (remember to

add your name to #5 and move the rest up.)

4)When you're done typing in the WHOLE letter, click on "FILE" above the send button. Then, "SAVE AS..." DO NOT SEND YOUR ARTICLE UNTIL YOU SAVE IT!!! (so you don't have to retype this 250 times!)

5) Now that you have saved the letter, go ahead and send your first copy! (click the "SEND" button in the top left corner)

6) This is where you post all 250! OK, go to ANY news group article and click the "TO:NEWS" button again. Type in your flashy subject in the "SUBJECT BOX", then to the the message and place your cursor here. Now click on "ATTACHMENT" which is right below the 'SUBJECT BOX". Click on attach file then find your letter wherever you saved it. Click once on your file then click "OPEN" then click "OK". If you did this right, you should see your filename in the "ATTACHMENT BOX" and it will be shaded.

NOW POST AWAY!!!

IF YOU'RE USING INTERNET EXPLORER:

It's just as easy, holding down the left mouse button, highlight this entire article, then press the "CTRL" key and "C" key at the same time to copy this article. Then print the article for your records to have the names of those you will be sending $1.00 to.

NEXT

Go to the news groups and press "POST AN ARTICLE" type in your flashy subject and click the large window below. Press "CTRL" and "V" and the article will appear in the message window. ***BE SURE TO MAKE YOUR ADDRESS CHANGES TO THE 5 NAMES!!*** Now re-highlight the article and re-copy it so you have the changes...then all you have to do for each news group is "CTRL"and "V" and press "POST". It's that easy!!

THAT'S IT! All you have to do is jump to different news groups and ost away, after you get the hang of it, it will take about 30 seconds for each news group! ***REMEMBER, THE MORE NEWS GROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 250***

Message-ID: <334904DE.53EB@ix.netcom.com>
Source record: 33343
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.equipment,rec.radio.amateur.misc

From Ham 'Accessories to Zones' the DX Reference Guide has expanded to
60 pages and 1277 links. An index is now available for quick clicking to
the subject desired.

The Technical Reference Page now includes links to Amplifier Theory,
SWR, S-Units, dB tables, Antennas and much more.

The origin of '73' and the term 'Ham' are covered along with some
dubious humor and links to a list of 'Famous Hams'.

DXpeditions past and future are summarized and linked.

An extensive search came up with around 40 ham and electronic kits,
components, and circuit boards for homebrew projects.

The Mega-Prefix list covers the weird ones and new UK calls.

FS is French St. Martin and PJ7 or PJ8 is Dutch Sint Maarten,
Netherlands Antilles. Generally the island's north sector
is the French side and the southern side is the Dutch side.

Also, it's a gorgeous island with beautiful beaches and as
the island's motto will tell you, the people are very friendly.

FYI WA7LNW and I built a small station on the Dutch side in the
Simpson Bay Lagoon area and if you want to operate from there,
contact me by return e-mail.

Hi Walt -- you are the first in 6 months to note this. These were taken
from one of the widely published Ham magazines (name omitted). I would
be most happy to correct them if you can supply the correct information
or tell me where they can be found.

Any help would be appreciated.

Hi Rod!

OK ... here goes. My source is the *current* UK amateur license
booklet, published by the Radiocommunications Agency.

G England
GB Special Event Stations anywhere in the UK, Channel Is or Isle of
Man. (Not just England)
GD Isle of Man
GI Northern Ireland
GJ Jersey
GM Scotland
GU Guernsey & Dependencies
GW Wales

2E England (Novices)
2D Isle of Man (Novices)
2I Northern Ireland (Novices)
2J Jersey (Novices)
2M Scotland (Novices)
2U Guernsey & Dependencies (Novices)
2W Wales (Novices)

M England
MD Isle of Man
MI Northern Ireland
MJ Jersey
MM Scotland
MU Guernsey & Dependencies
MW Wales

GX, MX England (Clubs)
GT, MT Isle of Man (Clubs)
GN, MN Northern Ireland (Clubs)
GH, MH Jersey (Clubs)

GS, MS Scotland (Clubs)
GP, MP Guernsey & Dependencies (Clubs)
GC, MC Wales (Clubs)

The meaning of the numeral after the prefix is rather complex, but is related to the License Class. Class A = full privileges, all bands. Class B = no code, for 50 MHz and higher frequency bands only.

1. All calls with one-letter and 2-letter suffixes are Class A.
2. For calls with 3-letter suffixes:
2, 3, 4, 0 after the prefix signify Class A.
1, 6, 7, 8 after the prefix signify Class B.
(At present, there are no 3-letter-suffix callsigns issued containing the numeral 5 and 9)
3. These rules apply to Novices (Class A and B) as well as Full Licenses (Class A and B), but Novices are only allowed to use small sub-bands within the "full" allocations.
4. There have been many "oddities" in respect of GB (Special Event) callsigns, for example GB800, GB100, GB50, GB9, etc. For these calls, it seems "anything goes"! Special Event calls are issued by the RSGB; all others are issued by the Radiocommunications Agency.

Hope this helps.

Good Morning George, According to my DXCC Country List there are two
separate DXCC Countries invoved here. FS, FJ is Saint Martin and PJ5-8
is St. Maarten, Saba, St. Eustatius. Each counts as a DXCC Country.

As to the island -- the north portion commonly called Saint-Martin is a
dependency of the French overseas department of Guadeloupe; the south
potion of the island called Sint Maarten, is internally self governed
and part of the Netherland Antilles. It has a rich history which you can
find on the web at URL:

Our Club is having a Death Valley DX trip April 19th (I am sure we will be up an running in the evening on the 18th). If you are interested in making contacts we will be on or close to the following frequencies:

40m SSB 7.625
40m CW 7.120
20m SSB 14.270
20m CW 14.075
15m SSB 21.400
15m CW 21.140
2m FM 146.52
70cm FM 446.000 (?)

All Freqs +/- and all are tenative.

You are right it was my fault I made a "typo" the frequency is really
7.120.

In case I made other "typos" I have cut and pasted the frequencies below:

40m SSB 7.265
40m CW 7.120
20m SSB 14.270
20m CW 14.075
15m SSB 21.400
15m CW 21.140
2m FM 146.52
70cm FM 446.000 (?)

All Freqs +/- and all are tentative

Reuters Hourly News Summary

Solar Storm May Hit Power Grid

NASA says a big storm on the surface of the sun will hit Earth's magnetic field today with the potential to disrupt communications satellites and power grids. A NASA official described the solar storm as a "big event'' in which matter blown off the face of the sun would strike a "glancing blow'' to the magnetic field that shields the Earth more than 100 miles from its surface. Operators of sensitive satellites and power grids have been warned to take precautions. Scientists still are calculating the precise arrival time of the solar impact, which is likely to produce a shimmering curtain of multi-colored light called an aurora over the North and South poles.

883. Solar flare heading toward Earth (4/9/97, in afternoon EDT)

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-09 00:00:00 UTC
From: Mark Ellis <mellis@ramcad.pica.army.mil>
Message-ID: <E8DnCF.7yG@pica.army.mil>
Source record: 33265
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.space

From www.cnn.com:

Solar flare heading toward Earth
Web posted at: 11:09 p.m. EDT (0309 GMT)
(CNN) -- The sun has produced a storm the likes of which scientists have not seen before, according to a NASA researcher.
The large flare of magnetic energy is expected to hit Earth's upper atmosphere Wednesday afternoon, according to Art Poland, senior scientist with the Solar and Heliosphere Observatory (SOHO) at the Goddard Space Center in Maryland.
SOHO is a relatively new NASA satellite that is pointed at the sun.
The solar flare was formed Monday when the sun generated a giant shock wave of electrified gases called a coronal mass ejection. SOHO photographs show "a flare going off; you see a shock wave leaving (the sun). Basically, it's a tsunami going across the surface of the sun," Poland said in an interview with CNN.
Solar events like this occur every day. Approximately one in 10 heads toward Earth. But this solar flare is about as large as one that destroyed a broadcast satellite in January.
There have been 43 cases of satellite damage as a result of solar flares, according to astrophysicist George Lake, a NASA project scientist. The flares inflict damage by sending a powerful current through the satellites, creating "miniature power plants," according to Lake.
Scientists say they don't know exactly what kind of problems this solar event could cause and what is in its path. Solar-monitoring satellites will provide only one hour's notice of the wave's arrival. Similar events have triggered power outages and interfered with spacecraft operations.
"If the magnetic orientation is opposite to the Earth's magnetic field and all the conditions are right -- what that means I don't know, that's what we're really trying to learn -- it could really interfere with the Earth's magnetic field and then have an impact on us," Poland said.
The solar flare will pose no threat to life on Earth, he said.
But "it is the kind of thing that might create some spectacular viewing in the heavens," said Lake. The aurora borealis, or Northern Lights, might appear brighter.
This event apparently is a sign of things to come. Scientists say solar activity will increase and peak in the next four to five years.

By combining the benefits of the World Wide Web and E-mail, you can use the internet to set up satellite schedules to contact hams all over the world.

DX stations will also find that by establishing prearranged schedules, they can avoid the pile-up mania that makes working the states anything but enjoyable.
Using the same procedure one would use to work the Space Shuttle, you can now (thanks to the World Wide Web) work DX and stateside stations in an orderly and productive way.

Visit http://www.sarrio.com and estabish your own cybersched

888. Any DXers/Contesters from L. A. around?

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-09 00:00:00 UTC
From: Karl-Heinz Merscher <Karl-Heinz.Merscher@uvw.uni-bayreuth.de>
Message-ID: <334B4340.46BD@uvw.uni-bayreuth.de>
Source record: 33270

Hi folks,

I'm despairatly trying to get in contact with local hams in the Los Angeles area!
I was in contact with N6TT but it seems that he moved to another location. Probably he hasn't internet connectivity right now.
Wanna know something about the ham community in L. A.
Are there any clubstations?

I look forward to receive your information.

73's de DL6RDE / AA1KD / OK8EAR , Karl-Heinz "Charlie"

889. Are there any DX/contesters around from Los Angeles

Hi folks,

are there any DXer's Contesters around from the Los Angeles Area.
I recently was in contact with N6TT Steve but I think he moved so he
probably don't have internet connectivity right now.
I wanna know something about the ham community there and whether there
are club stations around?

Please contact me via e-mail!

I look forward to get some information.

Hyperlog has a new web page at:

http://www.akorn.net/~w4wt/

You can go there to download a fully functional trial
copy of the software, or if a registered user, a copy
of the latest release (now at 3.06D).

Major Features of HyperLog:

Interface to major callbooks (SAM, Flying Horse, Buckmaster, and QRZ)
Interfaces with all major radios (Yaesu, Icom, Kenwood, & Ten-Tec)
Tracks awards
Full function Packet interface for HF and VHF
Automatically pulls DX Spots from Packet and displays them in popup window
Will QSY your radio to Packet Spot
Handles up to 2 billion records!
Fully indexed database for fastest access
All major reports available for printing or viewing
Has import engine from most popular formats, or author
will build custom import if you know format of previous
log.

Disclaimer: I have no business or financial interest in this program,
except as a satisfied user for many years.

To all radio amateurs

SB DX ARL ARLD017
ARLD017 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, 425DXnews and Contest Corral from QST. Thanks to all.

MONACO, 3A. Look for Special Event station 3A7A to be active from April 15 to 30. The station will be QRV on all bands and modes to celebrate 700 years of the Grimaldi Dynasty. QSL via bureau.

MAURITIUS, 3B. Kenton, NK6F, will be visiting 3B8CF and plans to be active from his QTH as 3B8/NK6F. He will be QRV from April 20 to June 8, with activity mainly on CW. QSL to home call.

TUNISIA, 3V. Giovanni, I5JHW, will be active from the QTH of 3V8BB from April 28 to May 5. He and I5SNR, I5OYY and IK5EKB will participate in the ARI International Contest, possibly as 3V5I. QSL via I5JHW.

MALDIVES, 8Q. Juan, EA2BP, and Jose, EA2CLU, will be active from May 4 to 14, using the callsigns 8Q7BP and 8Q7LU, respectively. They will be QRV on all bands, using SSB and CW, and possibly some RTTY. QSL to home calls.

TAIWAN, BV. BV9AYA is active from the P'eng Hu Islands, IOTA AS 103. QSL via BV2KI.

BANGLADESH, S2. Vittorio, IK1SLY/S21YS, and Manju, S21AM, are now QRV on 20 meters. QSL via IK1FLF.

CRETE, SV9. Bert, PA3GIO, will be active on 20 to 10 meters, including the newer bands, and possibly on 80 and 40 meters, as SV9/PA3GIO/M and SV9/PA3GIO/P from April 28 to May 5. QSL to home call.

TURKEY, TA. Nilay, TA3YJ, and YL operator Berkin, TA3J, will be QRV as YM3ATA from April 17 to 27, to celebrate Childrens' Day, which occurs on April 23. QSL to TA3YJ.

CANADA, VE. Special Event station CF3L will be activated by The Quinte ARC on April 25 to 26, and from June 19 to July 3, to celebrate the 50th anniversary of Ontario, Canada. Stations in Quinte may use the CF3 prefix, other VE3 stations may use the CI3 prefix and VA3 stations may use the XL3 prefix.

THIS WEEKEND ON THE RADIO. The DXYL NAYL CW, European EME, His Majesty the King of Spain, Japan International CW DX and International HF Grid Location Contests, and the QRP ARCI Spring QSO Party, CW, are all on tap for this weekend. Please see April QST, page 98 for details.

896. HZ1AB Photos and Roster Updated

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-10 00:00:00 UTC
From: Dave Earnest <k7jj@ix.netcom.com>
Message-ID: <334D6051.41C67EA6@ix.netcom.com>
Source record: 33278

I have updated the HZ1AB roster of current and former members of the
Dhahran Amateur Radio Club. There are over 160 people/calls listed
from all US call areas and several countries.

I have also added a couple of photo pages, with more to follow in the
weeks ahead.

Stop by and take a look:

I wonder if this activity has been cleared by the DL group who claim
that all 3V8 operations must first be approved by them.

:-) Bwaaahahahaha!

Sint Maarten (Dutch side), or St. Martin (French side) are indeed on the
same island. The political situation there has been VERY mellow for
150, or so, years. The only thing that tells you've crossed the border
are signs on the road.

From a DXCC perspective, they are, to the best of my knowledge, two
separate countries.

73,
Fred, K9VV

901. Audio/electronics for sale

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-12 00:00:00 UTC
From: believer@telepath.com
Message-ID: <5iohub$mru@usenet81.supernews.com>
Source record: 33283

For sale only:

Pro-Audio recording gear:
British-made "ACES"-brand 24-track 2" recorder with remote, 15/30 ips with vari-speed, sold new for $19,000.00. Also ACES 32-input in-line mixer, 24 groups, 5-band switchable EQ, 5 sends per channel, extensive routing options, patchbay, etc., sold new for $13,500.00. All manuals, wiring harnesses, and lots of spare parts included. Both units are one-owner. I'll sell both for $10,000.00.

For sale or trade:

PATCH BAYS:
19" rack-mount patch-bays, with heavy-duty long-frame mil-spec Switchcraft/ADC 1/4" jacks. Front panel is black phenolic with designation strips, attached to a metal reinforcing frame. Jacks are switching type, and may be wired in a variety of ways such as normaled, semi-normaled, etc. They are wired to a "punch-block" which is mounted on the back of the frame, and connections may be made to the punch-block, or directly to the jacks. I have:
Quantity: 3 Number of jacks: 48 Approx. list price: $150.00
I sell these for $40.00
Quantity: 4 Number of jacks: 72 Approx. list price: $60.00
I sell these for $60.00
Quantity: 3 Number of jacks: 96 Approx. list price: $250.00
I sell these for $80.00

I also have:
POWER SUPPLIES
These are "Sola" brand 117VAC in, 15VDC out bi-polar power supplies, highly filtered and regulated, PC-board mount (but easily adapted), and were used in medical heart-monitoring equipment. You can find them listed in the Allied Electronics catalog. I have:
Quantity: 4 SOLA#84-15-2135 Rated at: 350MA
Allied price: $220.00
I'd like $20.00 each
Quantity: 7 SOLA#84-15-2120 Rated at: 200MA
Allied price: $154.00
I'd like $15.00 each

I also have 2 Tektronix Model 620 X-Y display monitors, with 10X12 cm screens, suitable for analog display data such as ultrasonic detection systems, volume & vibration analysis, auger probes, and biophysical systems as well as computer and data transmission systems. I don't know what they cost new, but they are real nice, and I'd let them go cheap.

Make an offer--I'll horse trade!!

Message-ID: <33501502.41C67EA6@ix.netcom.com>
Source record: 33286

Us sand kickers are still looking for the oldest received HZ1AB
QSL card. Please look in your files for a card that is 1950 or before.
Can't believe all the OOT's are SK! We have only had one input to
our requests.

Remember the thrill of that QSO that resulted in receiving that
cherised piece of cardboard? Well, we are hoping for the same thing.

A 50th anniversary card is being talked about and finding an old
card will move us towards that target.

Send info to me via email or snail mail. CBA is good

AMPN/DOD DIRECTIVE 4650.2 OF 17 JAN 86//

RMKS/1. 48TH ANNUAL ARMED FORCES DAY COMMUNICATION CELEBRATION IS
SCHEDULED FOR SATURDAY, 17 MAY 1997.

2. ARMY, NAVY, MARINE CORPS, AIR FORCE AND COAST GUARD ARE
CO-SPONSORING AN AMATEUR RADIO PROGRAM IN CELEBRATION OF
ARMED FORCES DAY PER REF A. THE CELEBRATION FEATURES
TRADITIONAL MILITARY TO AMATEUR CROSS BAND COMMUNICATIONS
TEST AND MESSAGE RECEIVING TEST. THESE TESTS GIVE AMATEUR
RADIO OPERATORS AND SHORT WAVE LISTENERS AN OPPORTUNITY
TO DEMONSTRATE THEIR INDIVIDUAL TECHNICAL SKILLS. THE AMATEUR
RADIO OPERATORS WILL RECEIVE RECOGNITION FROM A SERVICE MARS
CHIEF OR APPROPRIATE MILITARY RADIO STATION FOR THEIR PROVEN
EXPERTISE.
A. THE PROCEEDINGS WILL INCLUDE OPERATIONS IN SINGLE SIDEBAND
VOICE (SSB) AND DIGITAL MODES (RTTY, PACTOR, AND AMTOR). THERE WILL
BE NO CW TRANSMISSIONS. AS OF 01 OCTOBER 1996, CW TRANSMISSION HAS
BEEN DISCONTINUED ON MARS FREQUENCIES.
B. PARTICIPATING MILITARY RADIO STATIONS WILL AWARD
COMMEMORATIVE ACKNOWLEDGMENT (QSL) CARDS TO AMATEUR RADIO
OPERATORS ACHIEVING A VERIFIED TWO-WAY RADIO CONTACT.
SPECIAL COMMEMORATIVE CERTIFICATES WILL BE AWARDED TO ANYONE
WHO RECEIVES AND ACCURATELY COPIES THE SECRETARY OF DEFENSE
ARMED FORCES DAY MESSAGE. CHIEF ARMY MARS WILL PROVIDE SECRETARY
OF DEFENSE ARMED FORCES DAY MESSAGE TEXT TO THE SERVICE MARS
ORGANIZATIONS.

3. MILITARY-TO-AMATEUR CROSS BAND TEST. OPERATIONS WILL TAKE PLACE FROM 17/1300Z UNIVERSAL TIME (UTC) TO 18/1300Z UTC MAY 1997. MILITARY STATIONS WILL TRANSMIT ON SELECTED MILITARY FREQUENCIES AND LISTEN FOR AMATEUR RADIO STATIONS IN AMATEUR BANDS INDICATED BELOW. THESE FREQUENCIES ASSIGNED BELOW ARE THE "ASSIGNED FREQUENCY"

TO DERIVE "WINDOW FREQUENCY" DROP 1.5KHZ FROM ASSIGNED FREQUENCY FOR UPPER SIDE BAND (USB).
EX: 4005.0 KHZ (ASSIGNED FREQUENCY)
- 1.5 KHZ
4003.5 KHZ (WINDOW/DIAL FREQUENCY)
MILITARY OPERATOR WILL ANNOUNCE THE SPECIFIC AMATEUR BAND FREQUENCY BEING MONITORED. DURATION OF EACH CONTACT SHOULD BE LIMITED TO 3 MINUTES.

Message-ID: <01bc1f17$63ee4600$8e6099ce@roccocon>
Source record: 33290
Cross-posted to: rec.ham-radio,rec.ham-radio.packet,rec.ham-radio.swap,rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.digital,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.swap

Don't be a baby! If you shop around a bit and if you knew anything about HRO
you would know the following:

1. In most cases HRO will give you the same price as anyone else. Just tell them
who has it for the lower price and they will come down to that price.

2. They charge shipping for any order under $100.00.

If you don't do your homework when you are ordering, than don't cry when
you don't have a clue what the final price is. All ypu had to do was ask what
the total was. If you don't like the price, SEND THE ITEM BACK!!!

Rocco

910. "Beacon Wizard" - Freeware

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-13 00:00:00 UTC
From: James Lee Tabor <ku5s@wtrt.net>
Message-ID: <3351265E.368C@wtrt.net>
Source record: 33292

Greetings,

I've developed a little app named "Beacon Wizard" that helps id
the new IARU/NCDXF beacons. I think the new system is really cool.

Beacon Wizard displays the following information:

o Active beacon
o Distance between your location and beacon
o SPath & LPath Azimith
o Local beacon time
o Sunrise/Sunset UTC time at beacon
o Users local UTC Sunrise/Sunset time
o Gray line flag between beacon and user

Beacon Wizard also has the following features:

o Run on Windows 3.1 and above
o User can edit beacon file to update as needed
o Bring up Windows clock from Beacon Wizard
o Info tip hot spots on display

The Beacon Wizard is freeware and available from my web page.

Thanks & 73,
Jim

911. Wireless Doorbells

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-13 00:00:00 UTC
From: Tarkus@skantech.com
Message-ID: <33517229.4756120@news.skantech.com>
Source record: 33293

My parents recently installed a wireless doorbell system in their house which (I assume) works somewhere in the 49-Mhz range. Whenever the weather is windy, the doorbell often rings by itself when nobody presses the button. Any idea why this would happen?

> http://www.netcom.com/~k7jjI visited HZ1AB in 1979 when it was at the old Dhahran airport
and spent
the night working stations with a sargeant there. He gave me a souvenir
QSL card that had a beautiful white Arabian stallion running on the
beach. It's not 50 years old but it may be rare. At the time the
station was in a small white brick building by a red dumpster. It had
several towers with a Yagi on one and log periodics on another. But wht
we used that night was a three-wire rhombic on telephone poles.

73,
Bob Logan, NZ5A

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, W3UR & The Daily DX, W1AA, WB2YQH & 59(9) DXReport, K4TS, WT4K, W5FKX, K7JJ, NL7WA, K8YSE, W0YG, EA2CLU, EY8MM, GB2ATG & British Amateur Radio Teledata Group, G4BUE & DX News Sheet, ON4WW, PS7AB, T93Y, VE9AA and XV7SW for the following DX information.

1997 DX CONVENTION ANNOUNCEMENTS....
The 6th Annual New Orleans International DX Convention will be held August 22-23rd. The Convention is held at the Royal Sonesta Hotel in the French Quarter - rated one of the top ten in the U.S. by Conde Nast Travel magazine. There is a special NO International DX Convention rate; to get it, you should call for reservations and ask for it using the local number (504) 586-0300. The program will be finalized/published in the next few weeks. Early registration is reported to be: Registration and Banquet $60 or Guest tickets for the banquet only $40 (Registration at the door will be $66 and $44 respectively). For early registrations contact Michael Mayer, W5ZPA, 5836 Marcia Avenue, New Orleans, LA 70124, fax: (504) 524-2129

The Lynx DX Group Convention will be held May 1-4th, in Oporto, Portugal, with guest speakers EA8AK, ON5NT (VK0IR) and DF6FK (T31BB). Contact Antonio, CT1BH, or Tony, EA5BY, (agaliana@alc.es) for more information.

NW DX Convention by the BCDXC & Fraser Valley DXC will take place July 25-27th, at the Richmond Inn (7551 Westminster Highway, Richmond, B.C., Canada V6X 1A3 - Phone: (604) 273-7878, Fax (604) 278-0188).
For more information please contact:
Allan/VE7SZ via E-Mail: abucksho@direct.ca
Ken/VE7BXG at PO Box 3048, Blaine, Wa, USA 98231

9X, RWANDA. By the time you read this, Mark, ON4WW, should be back in Kigali. He hopes to obtain permission to operate on new frequencies

(40/80 instead of 20/160m) or even a full license. Mark was active as 9X4WW last time.

A7, Qatar. The "BARTG News" reports Jean, J28JJ, is now active on RTTY from the QARS club station as A71A. He usually can be found on Saturday. QSL via QARS Radio Club, GM 222122, Doha, Qatar.

BIOSPHERE 2 OPERATION. On April 20th, Amateur Radio Operators from the Tucson area will host a special event station at the Biosphere 2 Center in Oracle, AZ. This event will kick off Earth Week Activities at the Biosphere. The activities will include a science fair for school age children along with no admission charges on April 20th, 1997. This is the first time this type of event involving amateur radio has ever been attempted at the Biosphere 2 Center. The Special Event Station will operate with the cooperation of the Southern Arizona DX Association, the Radio Society of Tucson, the Tucson Repeater Association and the Old Pueblo Radio Club. This event will be operating under the club call sign of K7RST from 1300z April 20th to 0000z on the 21st. The following frequencies will be used: SSB - 50130, 28405, 21238, 14238 and 7245 kHz; CW - 21138 (novice), 7117.5 (novice); and FM - 147.140 MHz. A beautiful commemorative certificate will be available. Please QSL with a 9 x 12 SASE to K0DVH (ex-KC7NCB) with signal reports and contact number on your QSL. For more information about the Biosphere 2 Center and Columbia University, (who presently manages the Center) check out the web page at http://www.bio2.edu Other questions can be directed to Dave Kalahar - KD4HXT, SADXA Chairman, at: cool-fm@theriver.com

CY9, ST. PAUL ISLAND. Mike VE9AA, states the CY9AA operation by K7BV, VE1PZ, and himself will now be from June 26th to July 3rd.

EK, ARMENIA. EK6OCM states to look for him to be active on 20 meters RTTY. QSL PSE via K6EID.

FR/J, JUAN DE NOVA. The "59(9) DXReport" states FR5KH/J and FR5FT/J are reportedly active for "50 days from March 21". QSL via F6FNU.

IOTA/USI NEWS......
Clay County DX Assocication of North Florida (N4GZ) will be active from St. George Island (NA-085 and USI FL-007S) April 24-27. The club will be on all bands, both CW and SSB. Please QSL via bureau or direct with SASE to: CCDXA - N4GZ, 3331 Wilderness Circle, Middleburg, FL. 32068-4129.

Tony/WF1N and Lou/KA1DIG will be on Pot Island (The Thimbles, NA-136) April 25-27th. Activity will be SSB on 20 and 40 meters (they will listen down on 40 for DX and up for USA). QSL via home calls (SASE, PSE), via the bureau or EQSL for U.S. Islands. This will be a new island for USI.

OOOOPPPSS DEPARTMENT. Thanks to Rolf, XV7SW, in pointing out the name for XV7TH in OPDX.299 was listed wrong. The name of XV7TH is Torsten, not Rolf.

PIRATE ALERT! Nodir, EY8MM, Vice President of the Tajik Amateur Radio League, reports a station, EY4AA/6, was active on 80 meters the past few weeks. He states there is no license issued for this callsign and possibly this operation is taking place from Krasnodar, Russia (UA6A).

QSL INFO AND UPDATE....
Chuck, K7PT, has informed OPDX that he is now the QSL Manager for 5V7MD. QSLs can be sent to: Chuck Degard, 919 W. Vaughn St., Tempe, Az 85283.

Charlie, W0YG, states to start looking for the V5/ZS6YG cards in the mail. ALL Stateside cards received to date either went into the mail April 10th or 11th. Overseas cards should have gone out during the past weekend.

SPECIAL EVENT STATION. In the middle of this month through the 12th of October, the club station EA2URD will be active with the special callsign EG97CMC to celebrate the "1997 World Cycling Championships of Road" in San Sebastian (October 8-12th). They will operate on all bands and modes with a special emphasis in the CQWW WPX CW Contest (May 24-25th). QSL direct to: EA2URD, P.O. Box 1198, 20.080 San Sebastian, Spain or via the bureau. For more information send Jose, EA2CLU, an E-mail message to: ea2clu@ctv.es. Also check the WEB page: http://www.donsnsn.es/mundial97/

SPECIAL EVENT STATION. Celebrating the 50th Anniversary of the Coast Guard Air Station on Kodiak Island (Alaska), look for KL7HKX (U.S. Coast Guard Amateur Radio Club) to be active for the entire month of April. Look for the operators to be active on 20 meters (14240-14280 kHz). A contact will get you a Special Event QSL card via the callbook address or via the bureau. For more more information contact John/NL7WA at roger@ptialaska.net

SPECIAL GET WELL SOON goes out to Bernie, W3UR, Editor of "The Daily DX", who was admitted to the hospital late in the evening on Wednesday, April 9th, in an emergency situation with acute appendicitis.

SPECIAL REQUEST. Dave, K7JJ, an ex-operator of HZ1AB (1954 & 1977-86), has asked OPDX for help in finding out the actual start date of the HZ1AB station. Present and former operators are attempting to determine if this is the anniversary year for the callsign. Records have been "misplaced" over the years with all the moves the station has made around Dhahran Airport. They think it was 1947 (maybe '46). They are looking for a confirmed contact in the form of an early QSL card received by anyone 50 years or more ago. They can contact Dave with details via E-mail at: k7jj@ix.netcom.com. Dave also has a WEB site at: http://www.netcom.com/~k7jj/hz1ab.html

SV9, CRETE. Bert, PA3GIO, will be active from here April 28-May 5th. Operations will be on 20-10 meters SSB plus WARC bands and maybe 40/80 meters. His callsigns will be SV9/PA3GIO/P and SV9/PA3GIO/M.

T97, BOSNIA-HERZEGOVINA. You still have a few days to work this one. The ARABiH Headquarters states that in the honor of Pope John Paul II's visit to Bosnia-Herzegovina, the members of ARABiH will operate under

the special callsign T97POPE. Activity will be on all HF bands 160-10 meters now through April 15th. Special QSL card can be requested via the bureau or direct to : T97POPE, P.O. Box 61, 71000 Sarajevo, Bosnia-Herzegovina.

W1AA/IMD (Marconi Radio Club Station). Look for this station on April 19th. It represents the Marconi Station CC on Cape Cod where the "First Two Way Transatlantic Radio Spark Transmission" took place in 1903 between the USA and Europe. QSL via W1AA: Marconi Radio Club, R.J. Doberty, P.O. Box 1193, Lakeville, MA 02347-1193.

10TH INTERNATIONAL MARCONI DAY. This event is organized by "The Cornish Radio Amateur Club" and will take place next weekend on April 19th. The activities will run a full 24 hours from 0000 to 2300z and will take place on all HF bands with all modes of communication encouraged. There will be the usual number of high profile official participating groups representing former Marconi operating locations. A certificate is available for contacting these groups (seven different categories available). Here are some of the stations that will be active:

CT1TGM - Coimbra, Portugal DA0IMD - Borkum Island
EI2IMD - Crookhaven, Eire EI3MFT - Letterfrack
EI3IMD - Dublin Bay EI4IMD - Clifden Galway
EI4JAM - Dublin EI5IMD - Crookhaven Site
EI6YXQ - Ballybunnion GB0MAR - Puckpool Iow
ED7IMD - Cadiz.s Spain GB1IMD - Leicester
GB0IMD - Alum Bay I.O.W. GB2MID - Sandbanks Poole
GX0MWT - Chelmsford GB4IMD - Truro
GB2GM - Poldhu Cove GM4MD - Old Carnarfon STN

ZK1, NORTH COOK ISLANDS. The Date Line DX Association is in the final planning stages of an operation to North Cook scheduled for September 20-27th. This operation will have the same goals of its last operation, AL7EL/KH9 Wake Island, that being priority to low bands and East Coast North America and EU. North Cook is currently ranked number 85 in the recent ARRL DXCC Most Wanted 100 and is ranked in the mid 20s for Europe. Three radios will be operational with one of those radios specifically for RTTY where it is ranked number 46 overall on RTTY. Numerous sponsors are providing equipment. Current operators are N7RO, N4RF (ex-AB4AE), WA4YBV, KI6AN and K8XP (ex-AL7EL). They are solicitating for an additional operator, specifically someone who is a Medical Doctor or one with equal professional qualifications. Anyone interested can contact Tom, K8XP, at: K4TSJ@juno.com

ZV, BRAZIL. Look for ZV3A to be active from the Brazilian Tramandai Lighthouse (good for the Brazilian Lighthouse Award (DFB): RS-04) from April 25-27th. Operations will be on SSB 40-20 meters (Also check the Brazil DX Net). QSL via PY3AAC: A.V.Christensen - Rua Ir. Jose Otao 170/1302, 90035-060, P.Alegre/RS/Brazil, or via the bureau.

In my opinion, yes.

Many amateurs are using US $1 bills. In many cases, that works well, but in a few countries it's a serious violation of the law to possess US (or other foreign) money. Personally, I can't keep track of which countries allow it, so unless the DX station specifically asks for a "green stamp" (which so far has only happened once), I use an IRC. It has been suggested two IRCs are needed from Germany due to high international postal rates in that country, though I've also heard Germans say that isn't true.

In the USA an IRC costs $1.05. Of course, I don't know what they cost in Sweden<G>..

923. Converting a 49 Mhz. transceiver into a 6 Meter transceiver

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-14 00:00:00 UTC
From: Patrick Cook <patcook@dimensional.com>
Message-ID: <Pine.SUN.3.95.970414195755.14366E-100000@nova.dimensional.com>
Source record: 33114
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hi everyone:

I've been giving this some thought and I thought it would at least be worth considering. I'm BIG into QRP, but since I'm still a no-code techie, I thought I'd try doing a rather somewhat unique form of QRP.

I have a RS TRC-502 49 Mhz. transceiver that I'd like to convert into 6 meter FM simplex. Now given the band's most recent activity over the last year or two, coupled with the fact we are starting to get back up on the upside of the sunspot cycle, I thought I'd at least give it a try.

My problem is finding places that sell 6 meter conversion kits (with CTCSS tone board) and 6 meter crystals. Anyone have any ideas as to where I might go in order to get these parts???

My rationale for wanting the tone board is that here in the Denver area, 52.525 Mhz is now linked to a 440 Mhz. repeater that gets a fair amount of use, but the repeater is now PL'd.

Any ideas, useful tips and other such information would be greatly appreciated!! :-)

I look forward to your replies!! :-)

73's for now my friends!! :-)

924. old call, new holder

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-14 00:00:00 UTC
From: W1PR@qsl.net
Message-ID: <5is9ra$o6u@mtinsc03.worldnet.att.net>
Source record: 33298

I guess it was bound to happen. Within 3 weeks of my being assigned W1PR in the Great Vanity Party of Nov. 4, I received an NTS radiogram from the W1 buro informing me that it had cards for me. Wow! Talk about speedy QSLing! Though skeptical, I knew I would accumulate my share of cards eventually, and besides, I had already worked a bunch of JAs, so it was plausible that there really were cards for me so quickly. I dutifully sent my green stamps, and yesterday got my first batch of cards under my new call. Some were 10 years old! A few were only 2 or 3 years old. None were for the "new" W1PR.
It gave me a funny feeling. After all, I knew that for the call to be available it had to have been inactive, but I thought that maybe it had been dormant for longer than only a couple of years. Who was the former holder of my brand new call, and how had he been so slovenly as to allow DX cards to accumulate unclaimed at the buro for 10 years? And why did I have to pay the postage to get them?
Well, where ever he is, I hope the propogation is better than it's been here recently. And if the buros suddenly find addresses for calls that have been inactive for years, they might consider that the our vanity is responsible.

>our requests.

Hi Dave!

I can't go quite that far back, but I have one from HZ1AB ("Hot Ziggity One American Boy") dated Dec 27 1958, 14 MHz AM phone, signed by Harry (K6LYM). It came via APO 616, New York, NY and also bears the MARS callsign AJ4AB.

At that time they were using a Collins BC-610 and a rhombic antenna.

I have another card dated Oct 21 1959, signed "John", by which time they had graduated to SSB and were using a Collins 32S1 tx and a 75A4 rx, still to a rhombic antenna.

The cards are "from the largest beach in the world" and have a picture of 2 camels in the desert.

73 de G3NYY
P.S. What does "Ziggity" mean? I have often wondered. :-)

According to the 1989 Flying Horse Callbook, W1PR was a club station!

W1PR Boston College Amateur Radio Club, Devlin Hall Room 500, Geology
Dept, Boston College, Chestnut Hill, MA 02167.

As often happens with clubs ... especially ones on the brink of
extinction ... nobody takes responsibility for QSL-ing!

This is one reason why, in the UK, callsigns are *never* reissued
(unless in very exceptional circumstances).

Walt,

In the US, communication between amateur stations and other stations is allowed when the other stations have been authorized to communicate with us. We have been doing this on Armed Forces Day for a long time. It is about the only routine occurance of cross-service communication I know of, but it is legal.

The NPDXG (Northern Portugal DX Group) has got an Home-page
running on the Web for the Midway Island
DX'pedition 1996 -AH4/AH0W-.

The page is Bilingual, its both in Portuguese and English.
(there is an access to the English page on the Portuguese
version).

The WWW Location is:
http://www.rede-nonio.min-edu.pt/es/esestar/midway

The page contains several Photos of this activity...!
Its our way of being grateful to the AH4/AH0W Teams effort.
Thanks to this operation Midway dropped from
TOP N#1 Most-wanted Country in Portugal (1995 survey),
to the 17th position on the Portuguese 1996 survey.

73 and good DXing,

My internet provider just provided me with some new software
which, contrary to its claims, erased all my bookmarks,
including those for ham radio. Could someone send me
the info for the site where you can check on vanity calls
and general callsign information. I can't remember what it
was, but I know that it is automatically updated each morning
(very early) and has the info straight from the FCC.

Thanks in advance.

(Oh can anyone tell me why these computer folks seem
compelled to fix things that aren't broken?

Does it have a motion sensor or does it require you to push a button?

If it requires a button to be pushed, then the contacts for the button may not have enough of a gap.

Also if there is a motion sensing floodlight on your house or even on a neighbor's house, and it is the type that sends a signal to an indoor lamp module, then it might be on the same channel as your doorbell. You can change the doorbell's channel. It should have more than one. Be sure to change both the transmitter and receiver units to the same new channel.

If neither of those help, try calling Ghostbusters. :-)

By the way, why did you post this in rec.radio.amatuer.dx instead of a more appropriate NG? Or wasn't there any?

JUDGE SAYS RADIO SUIT IS OUT OF HIS HANDS

ARTICLE IN APRIL 16 EDITION NEW JERSEY STAR LEDGER
WRITTEN BY BILL RILEY

A Superior court judge ruled yesterday that FCC regulations prevent him from declaring that interference from short wave radio transmissions in Lafayette, NJ are a nuisance.

Leopold and Karen Korins sued their neighbor, Walter Kornienkos (W2WK), last year claiming transmissions from his 1,500 watt ham radio set were bleeding into their telephone lines, blocked television reception and activated their electric garage door opener.

Attorney Kevin Kelly, representing the Korins, asked Judge Reginald Stanton in Morristown to declare the situation a nuisance and direct Kornienkos to cut back on his hobby.

Kornienko's lawyer, Richard Clark, claimed his client had a right to operate under a federal license and maintained that the Korins could do more to shield their home from unwanted radio signals.

Stanton said Kornienko has been a licensed ham since 1967 and transmitted from his home since 1983 with the highest power permitted by the FCC for amateur radio.

"There is no question that there has been meaningful intrusion into the Korins' home and their expectations of enjoying a reliable and reasonably high quality level of telephone and television reception," Stanton said before noting that there was little he could do about it.

"The FCC controls just about everything to do with the operation of ham radios under very extensive and broad laws and regulations," he said, noting that government policy is aimed at encouraging the use of short wave radio for public safety and information purposes in times of disaster and to promote international goodwill.

"Is it a good policy? I don't know," Stanton said, ruling that he had no authority to limit Kornienko's operations.

"If he is obeying the FCC rules and the Korins can't fix the situation in their home, that's tough and they'll have to lump it"

Stanton said he is not being flippant, only cognizant of his lack of jurisdiction.

"There's not much room for anyone but the FCC to deal with something like this," he added.

Kornienko expressed relief at the ruling.

"Now I hope a normal life will resume in the Kornienko household"

I have recently released my Shareware Callbook for distribution. It
is a complete and fully functional US Callbook that runs on any PC.
(386 may take up to a minute to find a call, 486 and higher 10-15 seconds.)

The callbook is updated up thru February 24, 1997 and includes many
of the recently released vanity calls. The callbook includes calls, names,
and addresses only. It is 24 megabytes to download and takes up 61 megabytes
on your hard disk.

Visit my website for more information: http://www.qsl.net/n7ln/callbook.html
or ftp it directly from ftp.qsl.net in the /pub/n7ln directory. Registration
is only $10. Read the file CALLBOOK.TXT first.

Come check it out!

Steve (KF2TI-Landing, NJ) <adell@mailhost2.planet.net> wrote:

Well, this is some temporary good news. But if I were the Korins', I would pursue it to the next higher level. If enough people make enough noise about these things, something will eventually be done, and it may not turn out all that well for the rest of us. We've seen some legislative motion in this direction already with regard to CB.

Kornienkos should turn off his damn amp every once in a while. He most certainly is radiating more power than necessary for most communications on any given open band - and in such cases would be in violation of FCC rules. You can work all states in less than a year with 2 watts, a ham stick, and no sun spots for chrise sake - and work plenty of DX too.

Busting pile-ups (i.e. radiating in excess of the otherwise appropriate power level so that you may transmit simultaneously on the same frequency and at the same time as dozens of others stations, and be louder than the rest of them put together) is not a charter goal of the amateur service. But the ARRL does give awards for doing this. Some stations are indeed on the "roll of honor" for conducting such activities. 1.5 KW is less than 9 db down from a typical AM broadcast band station, yet look at the disparity in siting requirements.

I don't know what kind of neighbors the Korins' are, but with amateurs thumbing their noses at their neighbors, and defiantly transmitting the legal limit and more deliberately to irritate them, and not seeking to help mitigate the interference they generate, we will inevitably see our privileges abridged as a result. All it takes is one bad apple (and the resulting court battle) to spoil the bunch.

This ruling (which points our the powerlessness of local jurisdiction) will not sit very well with many of the more despotic and tyranical city and state potentates who might seek to impose their own personal vision of esthetics and altruism. Wait 'till they start throwing around the expression "RF Pollution" and see where we get.

Thanks for bringing this to our attention Steve.

Situated on a hilltop overlooking NNJ. I believe he has approx. 3 acres.

> It would
> certainly be unreasonable to run 1500 watts in an apartment or small
> lot.

He runs alot less than 1500 watts. The Korins made an issue that his amp could produce 1500 watts, not that he ran that amount. It's like a car. Just because it can go 100 mph, does not mean that you do.

> But I've seen RFI in larger lots, due strictly to inadequate
> consumer gear. (some of this stuff suffers serious interference from
> a HT!) Luckily, in the cases I've seen cooperative neighbors allowed
> me to apply countermeasures, and everyone was happy. Unfortunately,
> in one case it took the inability of one neighbor to get an antenna
> ordinance through the city council to get his cooperation..

Walter, at his own expense, has offered to rewire the house with double shielded coax and replace the offending phones. Both were refused. The Korins responses were, "Off the air, not curtail"

>
> -- Cooperation is cricital, on BOTH sides. The amateur must be
> willing to help apply appropriate anti-RFI measures -- and the person

To all radio amateurs

SB DX ARL ARLD018
ARLD018 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX bulletin, The 599Rpt, 425DXnews, DXNS, DXNL and Contest Corral from QST. Thanks to all.

SCARBOROUGH REEF, BS7. It is reported that the 1997 BS7H DXpedition to Huang Yan Dao, Scarborough Reef, will start on April 28.

EASTERN MALAYSIA, 9M6-8. Michael, DF8AN, is QRV as 9M8/DF8AN, and can be found using CW on 20 meters. His length of stay unknown. QSL to home call.

RWANDA, 9X. Mark, ON4WW, is QRV as 9X4WW. QSL via ON5NT.

ANGOLA, D2. Pete, OH3MEP, is QRV as D2M on CW. QSL via OH3LQK.

LIBERIA, EL. Rob, ND3A, is QRV from here as ND3A/EL2 until April 25. QSL to home call.

JUAN DE NOVA ISLAND, FR. FR5DJ/J and FR5KH/J will be active on all bands, using CW and SSB until May 15. QSL via F6FNU.

SCOTLAND, GM. Special Event Station GS4TMS will be active April 19 and 20 from the heart of Braveheart Country. QSL via GM4UYE.

SOLOMON ISLANDS, H4. DL2GAC will be QRV as H44MS, probably from Renell Island, IOTA OC 127. QSL to home call.

MIDWAY ISLAND, KH4. Yuu, JA3IG, will be active from Midway Island signing KH4/K1NT on 40 to 15 meters, from April 16 to 23. He will listen for European stations from 0430 to 0630z. QSL to home call.

BRAZIL, PY. Adriano, PY2QA, and a group of Brazilian amateurs will be operating from the Ecological Protection Park Reserve located on Sao Sebastiao Island, IOTA SA 028, from April 18 to 21, using the

callsign ZY2IB. QSL via PY2AE.

GIBRALTAR, ZB. G3RFX will be active as ZB2FX until May 6. His operations will include activity on 160 meters and RS-12. QSL to home call.

SAINT HELENA, ZD7. Johnny, ZD7WRG, is QRV on 6 meters with a magnetic loop. He has been able to hear the V51 beacon and some South American stations. QSL via WA2JUN.

THIS WEEKEND ON THE RADIO. On tap for this weekend is the EU Spring Sprint, Michigan QSO Party, and the YU DX Contest. On April 22, the ARRL VHF/UHF Spring Sprint, for 222 MHz, is also scheduled. Please see April QST, page 98 for details.

I'm afraid it is real. Just because we are legally entitled to run 1500 watts, doesn't mean we should run 1500 watts. To borrow an analogy from another post, just because our car will go 100 MPH, doesn't mean we should drive that fast.

>I operate 75 phone with a group that extends from Maine to Florida.
>You can no more join in such conversations with 2 watts than you can
>fly off the Washington monument.

Boy you aren't kidding! If you don't have at least a 20 over S9 signal, those guys will just talk about you like you aren't even there.

>all of us. It establishes a right and point of law that needs to be
>recognized

Only one ruling is required to establish precident. Quantity does not enter into the figure of merit I'm afraid. My hope is like yours, that we continue to be held in a favorable light. Having a lot of cases like this showing up in court though will ultimately work against us.

This is an unfortunate fact of life that most neighbors do not want
to hear.

I live next door to the neighbor from hell. When I first moved in seven
years ago, and operated a lot more than I do today, this guy was over
almost every day complaining that I was coming through his TV, his
phone, his radio, his VCR, and (get this) the screen on his bedroom
window. (of course, this guy also complains about my grass not being
cut too, so what do you expect? And, here's a good one: once my dog was
barking, so his wife walked over to my parents' house 1/2 mile away to
complain to my parents :-)

Anyway, I attempted to be reasonable with this guy. I tried to explain
how his equipment was acting as a radio receiver. I referred him to the
disclaimer in the front of the user's manual on every piece of equipment
he owned. I explained how we could install some RF chokes on the
different pieces of cabling to help reduce RFI, if indeed that was the
point it was getting in.

Basically, even when shielding was installed, nothing helped. 1) His
equipment is your typical consumer junk, and 2) his house is only 20'
or so from mine (I live on a typical 40x100' city lot. Even at 100
watts, I still overload the front end of his VCR and TV.

Since my antennas are all roughly the same height, mounted off the roof
of my house 10' or so, I explained that if I installed a tower it would
have a good chance of reducing the RFI since my radiator would be higher
and the effective field would be different. No good on that idea, he
didn't buy it (just thought it would make the problem bigger PLUS reduce
his property values.)

Eventually, it got so bad and he became so abusive that I literally told
him if he didn't stop coming over and harassing me I would call the police.
We haven't spoken four sentences to one another in 3 years. His problem
"cleared up", mainly because I don't have the same amount of time as I did
5 years ago to get on and operate.

If RFI was harassing me, I'd probably be pissed too. Sometimes, though,
there is nothing you can do, except move.

True but perhaps not relevant. With respect to telephone RFI (in my experience the most intractable kind of RFI) the FCC has found that there is very little correllation between power and interference, once the power is above a fairly low minimum (less than 100 watts).

I have experienced incredible telephone RFI problems when I was using just 100 watts. If the lines and receivers are not properly shielded, there appears to be very little the ham can do to prevent this sort of interference, short of buying the neighbors all RFI-proof telephones, an impractical idea indeed.

The license was issued in late 1946 and HZ1AB went on the air.

To commemorate 50 years on the air and providing HZ QSO's and QSL's, we the present and former members of this historic DX club station announce a Golden Anniversary celebration for HZ1AB.

The present HZ1AB members at Dhahran will be active in all major international and regional contests during the period May 1997 through April 1998.

A special QSL card will be designed and provided for contacts during this period. Review future issues of ham radio publications and dx bulletins for exact details. Most likely, contest QSOs will be QSLd via the bureaus, with other contacts being via the normal SASE via K8PYD, the HZ1AB QSL manager.

You may also get updates at the web site listed below.

Good hunting!

My sincere apologies to Walter Kornienkis W2WK for using him as a scapegoat in my post. He would appear to be the victim in this particular instance, rather than the perpetrator.

My frustration stems from also being a victim - a victim of circumstances that I did not create. There are indeed amateur radio operators who abuse their privileges in total disregard of others. It is toward those, who have helped to create an increasingly hostile environment in which a ham radio antenna is considered an eyesore - an undisputable source of every imagined type of interference, that I hold my anger.

I resent those who have abused their privileges to the point that I can no longer enjoy mine as fully as I might otherwise, and I fear we have only seen the begining. The judge's disappointment in being forced to decide in favor of the ham in this case is a depressing state of affairs.

> He more than likely tried to work with the neighbors, who probably
> didn't want his help. As long as he's operating within legal
> parameters, I see no reason why Kornienkos can't run QRO.

For the record. Walter's location is almost perfect. Atop a hill over looking much of western NJ and eastern Pa. He runs usually no more than a few 100 watts. The issue is and will be the fact that his amp can produce 1500 watts. It was never determined that he was ever running full legal limit. The assumption is that if it's available, he has it at his disposal. Sort of like buying a Mustang 5.0. Just because it can go 130 mph doesn't necessarily mean that the owner is going to go 130 mph.

As far a thumbing his nose. Walter did not instigate this lawsuit, his neighbors did. Walter was simply defending himself. If James wishes to condemn someone from doing that, maybe he should time travel back to the good ol days when you could hang people has witches. The point of the article is that a Superior Court judge ruled that he had no jurisdiction over this matter. Plain, simple.

Walter offered to replace (at his expense) the Korins twinlead with double shielded coax and the problematic phones. In both cases, the offers were refused. The Korins have stated that they want Walter off the air, period, end of sentence. This being the case, they deserve anything they get. Personally, from what I've heard, their complaints are largely hearsay with little if any documented technical proof

What it boils down to is, here you have a man who bought a home in a rural area, put together a station and then had some people move next door, knowing that this is in their vicinity and begin to complain. In Central NJ there is a group of people who bought $500,000 homes next to a small airport who are now suing the operator stating that the airport (operating since the late '30's) is destroying their quality of life. OHHH TOOO BADDD POOR BABIES.

They get what they deserve

>Breaking pile-ups is nothing more than consentual deliberate interference
>- gaming, parading one's electrical prowess.

I STRONGLY disagree with that assessment. (in most cases. There
are a handful of people who jump into a pile just to prove they can
break it, but they're a small minority.)

Pileups are a natural result of supply and demand. Just as the
interstates become clogged when everybody decides they need to go home
from work at 5pm, a ham frequency will become clogged when everybody
decides they need Bouvet Island for DXCC. Simply going away and
working a German or Canadian instead is not an acceptable replacement
for most of the entrants. (would you voluntarily hang around the
office until 6:00 to ease the traffic jam?)

As has been suggested by others, the real problem lies with CHEAP
consumer electronic companies. Other services are suffering too.
Broadcasters find it difficult to impossible to install needed towers.
(some of your local TV stations may disappear as a result of this,
coupled with the new DTV program which will require them to install a
second transmitter) Cellular-phone services are overloaded because
they can't build necessary towers. I've even heard of neighborhoods
rejecting local police stations after they discovered a police-radio
base station tower was necessary!

If radio amateurs are lucky, the coming proliferation of wireless
Internet access, PCS portable phones, cellular LMCS terrestrial
wireless cable, paging, cellular, digital broadcast TV, and other
commercial transmitters in the home will force consumer-electronic
companies to shield their junk. If we aren't lucky, consumers will
blame commercial interference on us...

>stick, and no sun spots for chrise sake - and work plenty of DX too.

I can cite at least a dozen DX QSOs (and a handful stateside) I could have made if I owned an amplifier, and didn't make because I don't. (yet) And that doesn't count the ones I didn't make because I couldn't break pileups -- just the ones I didn't make because the propagation just wasn't there, or because noise was masking my signals. In fact, there are at least three countries (BY1PK, 9M2HO, 9M6TCR) that would be in my log if I had QRO; all three copied the W9.. (and there was noone else calling) but just couldn't pull out the rest.

I enjoy DX and contesting. I don't enjoy RST/QTH/NAME QSOs with people 300 miles away. I don't enjoy trying to run a ragchew with someone with a 339 signal. I've tried VHF FM and packet (and can see where some might like it) but haven't got into it either. Being restricted to QRP would erase my interest in amateur radio.

Access to QRO is also important for some VHF operations. It's usually required for EME, and usually valuable for meteor-scatter. (also for ATV because of the very wide bandwidth)

I don't know Mr. Kornienkos' lot size or antenna situation. It would certainly be unreasonable to run 1500 watts in an apartment or small lot. But I've seen RFI in larger lots, due strictly to inadequate consumer gear. (some of this stuff suffers serious interference from a HT!) Luckily, in the cases I've seen cooperative neighbors allowed me to apply countermeasures, and everyone was happy. Unfortunately, in one case it took the inability of one neighbor to get an antenna ordinance through the city council to get his cooperation..

In brief:
-- QRP is not a solution for everyone. It's a good subhobby for those who enjoy it, but it's not a universal fix for everyone suffering from RFI.

-- Cooperation is cricital, on BOTH sides. The amateur must be willing to help apply appropriate anti-RFI measures -- and the person suffering RFI must be willing to allow those measures to be applied.

Message-ID: <01bc4ada$6ab36940$24a66bc7@jmclaugh.jps.net>
Source record: 33138

Hello, fellow HF operators!

This Saturday, April 19 1997, several World wide stations will be operating International Marconi Day. This special event is here to celebrate the birth of Marconi, the father of radio. The event starts on 0000 GMT April 19, and runs through the 24 hour period ending on 2359 GMT April 20. QSL cards will be sent to those who make contact with the stations signing /IMD, and certificates will be sent to those who make many QSOs with IMD stations. This event will start on Friday night local for North American stations, and run through Saturday.

The frequencies will be 7037 KHz and 10121 KHz for W6KB/IMD. This station will be transmitting from Bolinas, California with a 1959 Collins 30K-5 running 300 watts output on 40, and 200 on 30. The transmitting antenna will be a 6 MHz dipole 80 feet above the coastal cliff. The cliff itself is 150 feet above the Pacific Ocean. For receiving, we will be 17 miles north of Bolinas, in Point Reyes, California. We will key the transmitter remotely for perfect QSK. The site at Point Reyes employs multiple top-notch commercial grade WJ receivers and many directive antennas pointing in a multitude of directions. An identical site will be on the East coast, in Cape Cod, Massachusetts. We will control the East Coast site also via remote control, thanks to T1 lines. This affords us complete reception of all signals.

Because of this, all stations are welcome. DX stations and QRPpppp operators, this may be your golden opportunity! Last year, one of our operators worked a ham in Colorado running 250 mW from a 49er Transceiver. All QSOs welcome.

Thanks for reading our announcement, and we hope to hear you out there on our frequencies.

I wouldn't blame the "old" W1PR for it!! I've received batches of cards
from buros for "vintage" contacts I never made as well!! I'm not into
QSLing, but since then, I QSL direct ONLY on receipt. I think those cards
with vintage contacts you received from the buro were ones they RECENTLY
received, but it is simply a ruse to get a card of out you and by
backdating the time of contact, they hope you will reply because you
can't find your logs from that far back and if you did, you might think
that you simply forgot to enter it. You could probably get an award like
DXCC without ever being on the air!! Just do a real big mailing blitz of
cards through buros with old contacts, you'll probably get enough cards
back to get your award.

Possibly because the Callbook CD-ROM includes foreign callsign address
information. The QRZ CD-ROM appears to only cover a handful of foreign
countries. As for the price, the resellers who advertise in the back of
QST typically sell the Callbook CD-ROM for a lot less than its list price.

Jim:
1) We as hams need to stick together on this and not fight amongst
ourselves as you are doing with this statement. Where it should be
pursued is with the manufacturer's of the phones and televisions;
they are the ones acting as 'illegal' or non-type-accepted receivers
for the frequencies hams use.
2) How do you know this statement to be true? It is possible to cause
rfi with qrp; you don't need an amp.
3) Busting pile-ups may not be a part of the ham radio charter, but it
is just one facet of this great hobby of ours. Just because you
either don't do it, or can't do it, doesn't mean that someone else
can't do something they want, as long as they are operating legally.
4) I don't think Kornienkos is thumbing his nose at his neighbors.
His station is probably as clean as it can technically be made to be.
He more than likely tried to work with the neighbors, who probably
didn't want his help. As long as he's operating within legal
parameters, I see no reason why Kornienkos can't run QRO. As I said

in #2, QRP can cause rfi. Pop open the back of almost any modern TV
and you'll see that there is NO shielding inside!

I guess, based on this response, AC6XG knows a lot about Walt, K2WK. Then again, maybe not. Yes, Walt is a contester and DX'er. That's why he found and bought a home on several (I forget how many) acres in remote and rural North West NJ to build a modestly competitive station. He eventually got his tower up -- WITH FULL TOWNSHIP APPROVAL. Unfortunately, a couple of nasty, pushy people relocated from CA and bought the house next door. They have made claims of interference to their telephones, TV and their garage door openers. Walt tried to work with them and was supported by other local hams. However the neighbors have totally refused to implement any of the FCC-published recommendations to fix these problems. Instead, they have harassed Walt and his entire family in numerous ways (suits still pending??). They have sued the town for approving his tower. I read their technical expert's report and found it interesting they he found NO direct evidence of TVI. Walt's neighbors did play the expert a video tape with interference, but he could not duplicate it while transmitting on any band or mode even operating with 1500 watts out!

Being sued by vindictive wealthy neighbors is a real threat to all hams (well, MAYBE not to the shack-on-a-belt types). It doesn't matter what your particular interests are (e.g., contesting, ragchewing, SSTV, etc.). In today's society, all it takes is one jerk who decides he doesn't like YOUR hobby to make your life miserable unless you cave in to him/her. (The local paper recently ran a story about a guy with 20 racing pigeons in an upscale semi-rural town whose neighbors were fighting him keeping the pigeons on his multi-acre property!) Walt and his family have been through a lot (financailly and emotionally) just so he can operate a stations that is FULLY legal under Federal, State and local laws.

By the way, if anyone bothered to look at the last SS CW results, you'd have noticed that Walt did bother to turn off his amplifier long enought to make 80K points running low power.

Come on, get real. We are legally entitled to radiate up to 1500
watts. The fact that the FCC takes a hands off attitude with reference
to electronic equipment in the house and interference does not mean we
should tuck out tail between our legs and hide.

I operate 75 phone with a group that extends from Maine to Florida.
You can no more join in such conversations with 2 watts than you can
fly off the Washington monument.

The more rulings we get like the one under discussion the better for
all of us. It establishes a right and point of law that needs to be
recognized

Problem is obnoxious attitudes like yours can and will result in the
laws being changed and becoming much more restrictive.

Yes, I know what you mean. However those were not manditory contacts,
were they?

In fact, there are at least three countries (BY1PK, 9M2HO,
>9M6TCR) that would be in my log if I had QRO; all three copied the
>W9.. (and there was noone else calling) but just couldn't pull out the
>rest.

Yes, absolutely. Your story is not unique. Sometimes the path just isn't
there, or the antenna is too small, or the guy on the other end has QRM,
or a crummy receiver - or is an ALLIGATOR. The more power you run, the
better chance you have of not even hearing the stations who can hear you.

>I enjoy DX and contesting. I don't enjoy RST/QTH/NAME QSOs with
>people 300 miles away. I don't enjoy trying to run a ragchew with
>someone with a 339 signal. I've tried VHF FM and packet (and can see

>restricted to QRP would erase my interest in amateur radio.

Sounds like there are more things you don't like about amateur radio than
things you do like.

>In brief:
>-- QRP is not a solution for everyone. It's a good subhobby for those
>who enjoy it, but it's not a universal fix for everyone suffering from
>RFI.

I of course did not make any claims to the contrary. What I do claim is
that too many ops run considerably in excess of the necessary power.

>Cooperation is cricital, on BOTH sides. The amateur must be
>willing to help apply appropriate anti-RFI measures -- and the person
>suffering RFI must be willing to allow those measures to be applied.

I agree. It's just that too many operators seem to forget that with the
privilege of operating 1500 watts comes a responsibility to operate without

generating interference to others. They seem to take the attitude that the FCC says I can run 1500 watts, so nobody is going to stop me. This is not a cooperative attitude, and it is one that will ultimately lead to problems for us.

>for the frequencies hams use.

I tried to speak the truth Jack. Sorry you took offense to it. I agree
we should not fight amongst ourselves - I was not fighting, just making
some observations. The sooner we see the writing on the wall, the better
off we will be as a lot. We cannot continue to be a burr under the
saddle to those in our communities indefinately. We must actively work
toward engraciating ourselves to our neighbors. We are out numbered.

>2) How do you know this statement to be true? It is possible to cause
>rfi with qrp; you don't need an amp.

I'm sure you're aware of the relationship between ERP and and signal
strength. Yes, it's true - to every rule there is an exception, but in
general, the higher the power, the higher the probability of RFI.

>3) Busting pile-ups may not be a part of the ham radio charter, but it
>is just one facet of this great hobby of ours. Just because you
>either don't do it, or can't do it, doesn't mean that someone else
>can't do something they want, as long as they are operating legally.

Breaking pile-ups is nothing more than consentual deliberate interference
- gaming, parading one's electrical prowess. Not something that
would necessarily substiantiate a need to use 1500 watts to anyone
outside of amateur radio.

>4) I don't think Kornienkos is thumbing his nose at his neighbors.

Well, as I've read ahead to the other posts by now, his neighbors needed
to have a nose thumbed at them. In general though, it's not a practice
which will endear us to those who hold the power over us.

What needs to be done is to make consumer devices that have reasonable
immunity to RF, not legislate hams off the air. The FCC has dropped the
ball on this one.

I think you're jumping to conclusions. We have no idea what the situation
is. Who said he's a DXer? Maybe he's a contester, a traffic handler, a
ragchewer, who knows? The article didn't say. Sounds like you are anti DXing.
Not all DXers run high power.

I have a neighbor that goes ballistic if he gets interference one time a
year. I used to wipe out cable channel 18 for blocks around with only *one*
watt on 2 meters. Am I supposed to stay off of 2m because the cable system
is messed up?

With almost every RFI problem I've had over 27 years the neighbor was totally
unwilling to do anything with their equipment to solve the problem. They
just wanted me off the air. It sounds like this might be the case with
these people who sued. Fortunately it doesn't work that way in this country.
I, for one, am glad to see the judge recognized this.

After seeing that Walt had tried to work with his neighbors to fix there
'unproven' interference problem I'd say it's time for Walt to sue for damages,
harrasment, infringment upon his rights to freedom of speach, and anything
else a smart lawyer can come up with. The ARRL should be backing him too
if they really use their legal department to protect the rights of hams.

I noticed that too. There is a larger point though. I'm sure you know
the type - they're on the air every night, and they never have the amp off.

>Staying within legal limits is defiant?

Staying within the legal limits is manditory, and is beside the point
here. Using in excess of the necessary power is the point. Making no
attempt to use your station with prudence, or mitigate the interference one
may cause is defiant.

>>...and more
>
>Who? The defendant? The beginning of your sentance implys as much.

I applies to anyone to whom it applies. I don't know the defendant, and
my remarks are not necessarily directed toward him. They are of course
directed to r.r.a.p.

>ball on this one.

Very good idea. I want that, too. That would be the right result.
However, subject to the Constitution, ham radio is only a privilege
and we exist because of the will of congress [the people].

Do you suppose for one minute that the majority of
Americans, given all the information, would choose to pay a little extra
for all their consumer electronic devices just so we hams can operate
without bothering them? I suspect not, but you may be more optimistic.

Ham Radio is NOT A CONSTITUTIONAL RIGHT. If the majority
in congress decided one day, because of all the irate citizens (who
LOST in court because we hams were legally "right") wanted it - they
could legislate us right out of existence. No more ham radio by an
act of congress. No Court could save us. It is the will of the people.
We NEED the sympathy of the majority of citizens by and large to keep
the hobby going. I think that is the point being made here.

The specific case we discuss here is not important to the point.
This ham could be a very nice fellow
and the neighbor a nut case just trying to hassle him. That is wrong,
and I am glad for the result. BUT, if we have LOTS of these cases going around
where the neighbor gets real angry and it spreads, we have a real
problem on our hands, even if they are malicious, technically
incompetent, and vengeful neighbors. They can put pressure on the Federal
government just like the good, harmless, technically competent ham
community can. Unfortunately, the non hams outnumber us vastly. We
need to remember that, that's all.

>With almost every RFI problem I've had over 27 years the neighbor was totally

>I, for one, am glad to see the judge recognized this.

See above. I understand the anger, since we hams are by and large a
very good lot. However, if we get enough of those neighbors and they
learn to hate us enough, we are history, even if we are completely
right. That is the hard lesson of Jim's post here. Be happy that
we are technically correct. Try to fend off nasty neighbors. BUT

remember that any effort to keep neighbors happy (even when they are wrong) helps to preserve our hobby.

I don't know if I can agree with the assumptions you're making, Mr. Kelly.

Whether realistic or not, Kornienkos has a license to use 1500 watts. He should be allowed to use it. Like you, I get the feeling that most of the RF power may not radiating from the antenna as much as from his coax. But that's just intuition. We don't know the details of his station, so we can't really pass judgment as to whether the antennas, and the power he uses are appropriate or not.

Another thing: his antennas might be limited by covenant, or city ordinances. His neighbors may also be real cheapskates who will never spend any money to get rid of RFI.

It only takes one obnoxious creep to end up in court. We don't know who was being the creep in this case. It could have been either or both parties. Legality alone does not make one a Gentleman or a Lady.

What I find scary is the judge agreeing with the plaintiffs but making the statement that "his hands are tied." Would he have said the same thing had it been an AM broadcast station doing the RFI? I wonder...

>I guess, based on this response, AC6XG knows a lot about Walt, K2WK.
>Then again, maybe not.

I'll save you the trouble of guessing - I don't know Walt. But then
again, why would I have to know him in order to make a general observation
about the state of current political climate, and the habits of a
signification fraction of the ham community? There was a larger point
being made there. Your sensitivity on the subject perhaps prevented you
from taking note of it. Walt's unfortunate circumstance points out a
problem that I perceive awaits us on the horizon.

I am, like most of us, sensitive to the problems our neighbors can create
for us, and those we can create for them. The point here is that things
are likely to get worse for us, and although this one went the right way,
it went that way very grudgingly. In literature it is called forewarning.

Walt was held harmless in court, I also hold him harmless. There are
others who I do not hold harmless, and you can hear 'em on the bands every
single night.

Thanks for filling in "the rest of the story" Gerry. K2WK sounds like a
great operator - maybe one day I'll be able to match some of his
accomplishments in ham radio.

I didn't realize we were talking about K2WK. I've worked him quite a
few times. While I don't know him personally, I do know he's *NOT*
some kind of arrogant idiot.

I've seen this kind of "neighborly" approach in other people's
situations before. One guy, I helped him install two TH7s and a
90-footer. We had a few RFI problems around the neighborhood; a
handful of Radio Shack toroids left everyone happy. With one
exception. Guy didn't want us in his house, he just wanted the tower
removed. Went so far as to have his alderman introduce a 35-foot
tower ordinance. (the ham representing a district across town got it
promptly quashed..) Luckily, he wasn't prepared to resort to the
courts; after his ordinance failed, he let us fix his phones. (and is
at least civil to his neighbor)

Unfortunately, this is a potential problem for EVERY amateur. For
that matter, it's a potential problem for every citizen. The same
people who won't accept a tower on their neighbor's lot are likely to
not accept your kids' toys left in the back yard, or that handful of
dandelions in the side yard, or your cat, or...

BTW 3 acres is certainly enough to get the antenna far enough from
neighbors for 1500 watts.

In a previous article, JWKELLEY@UCI.EDU ("James W. Kelley") says:

>My sincere apologies to Walter Kornienkis W2WK for using him as a
>scapegoat in my post. He would appear to be the victim in this
>particular instance, rather than the perpetrator.
>
>My frustration stems from also being a victim - a victim of circumstances
>that I did not create. There are indeed amateur radio operators who
>abuse their privileges in total disregard of others. It is toward those,
>who have helped to create an increasingly hostile environment in which a
>ham radio antenna is considered an eyesore - an undisputable source of
>every imagined type of interference, that I hold my anger.
>
>I resent those who have abused their privileges to the point that I can
>no longer enjoy mine as fully as I might otherwise, and I fear we have
>only seen the begining. The judge's disappointment in being forced to
>decide in favor of the ham in this case is a depressing state of
>affairs.
>
>AC6XG

The judge was not forced to rule in favor of the ham. The judge was forced not to rule at all. The FCC at this time declares domain over all such matters and doesn't permit courts to rule on them.

Amateur radio (below 30 MHz) is INTERNATIONALLY regulated. Another earlier posting mentioned something about it being a priviledge issued by Congress or some such. It is not. It is a priviledge issued by international treaty. Individual countries may wish not to issue licenses, but most other countries do issue licenses. It would take an international law to do away with amateur radio completely.

Bringing this back into the DX arena (this IS after all the DX newsgroup) I had some interference problems a few years ago with a neighbor's phone. The first thing I asked was whether she paid more than $50 for the phone. She said "no" and I explained that the cheap phones have no filters in them. Fortunately, she was willing to cooperate (even bought the filters herself!) and that was the end of the problem. BUT ... I spent 20 HOURS calling 3Y0PI before I worked them, that with a barefoot rig (100 watts). It was the barefoot rig that caused the interference. I actually had to cut the power down to about 10 watts before the phone interference died. If I'd been running the legal limit in the pileups, chances are I'd have made it on the first few calls and would have subjected the neighbor to maybe 3 or 4 minutes of potential interference rather than 20 hours of it (the neighbor only used the phone around 10 pm

for about 15 minutes each night, so I actually didn't cause 20 hours of interference.)

So for a DXer, running the legal limit in pileups can actually reduce the amount of interference if he's just out to snag that rare one. Some guys on the Honor Roll only get on the air when that "new one" is on. Others only run a barefoot 100 watts when they ragchew with DL's, EA's etc from the USA and reserve the amp for when it truly is needed (BS7H is gonna be a tough one from here!) ...

>Gerry, W1GD

Bravo! Bravo! We need more people like you defending this nice hobby of
ours (mine for 10 monthes now). Such calm, intelligent information and
debate is extremely helpful.

Even with my HT on 5 watts, it causes nasty TVI with my TV (rabbit ears,
no money to waste on cable (grad student)). One of my neighbors
complained of interference to me recently, and I told her about my
hobby. She saw me outside in the rain a couple nights talking into my
hand and asked if I was a "pirate station"! I told her about amateur
radio and SKYWARN (spotting in the storm) and how to protect from
interference. FOund out most was caused by my 10m rig, and the
random-length wire strung aroung the apartment! I told her I'll keep my
10m activities down (not hard!) until she can get some fixes. I even
told her I'll help her if she has any questions.

So, interference _CAN_ happen QRP. All you need is to talk. If the other party is reluctant to listen, well, in this sue-happy country (USA), you pray the courts will be on your side!

well, i don't think amateur radio antennas are singled out -- people may call them "ham antennas" but thinking about the larger picture..

there used to be a need for every TV to have a good antenna to get a good picture from a broadcaster. things like CATV and satcom have changed that but for those who moved to cable, many left the antennas up to rot.

same with the end of the CB boom in the 1970s.

so now, people just assume that if an antenna goes up that it will rot and be allowed to decay and fall and damage stuff and look bad. if amateur radio was to do a single public relations operation, it would be to catalog antennas that are in disrepair and contact their owners to either help them dispose of them if they're not being used or help to get them fixed up such that they're safe and effective...

A correction. The origional poster gave the wrong spelling of the hams name and incorrect call sig,

Correct name is

Correct name: Kornienko (no s)
Corrdct Call Sign: K2WK

Im told he is a "big gun" multi-multi contester.

No you can all go and argue over a matter that does not concern you but do it with the correct information.

Yes, we were all told the same thing.

>No you can all go and argue over a matter that does not concern you but
>do it with the correct information.

If it didn't "concern" us, we wouldn't be discussing it Bill. If you
were not concerned, I assume you wouldn't be discussing it either.

The discussion veered toward one ham in particular because I unfortunately
directed one of my comments to him. Quoting my own post: "why doesn't he
turn his damn amp off once in a while." This was a mistake, and I have
apologized to Mr. Kornienko.

Whether or not Mr. Kornienko uses prudent amounts of power is actually
peripheral to the issue. The fact that too many hams use excessive power,
and that such practices harm the image of ham radio is precisely the
issue. The point is brought to a focus by the comments made by the judge
in his ruling.

I don't want to be legislated off the air because of some knucklehead who
doesn't have enough sense to know when to turn off the amp or change bands.
We seem to be getting precariously close. If the judge had decided to rule
the other way, we'd be looking at a whole new ball game.

The FCC has now said that if our stations run more than 50 watts, they
need to be evaluated. The next step could be permits, or complete
prohibitions in urban areas. I don't like this any better than anyone else
here.

10 meters is going to be kicking some serious butt for DX over the next
few years, but it has an even greater potential for RFI and TVI than 11
meters. We run the risk of seriously pissing off a lot of folks between
now and 2000. What price do we really want to pay for finally getting
that last island prefix?

Is our privilege to operate really more important in the grand scheme than
our neighbor's right to use his telephone or watch the World Series on TV?
About equal I'd say. Only difference is, he can watch his TV without
affecting our enjoyment of our favorite passtime. There is an inherent

inequity in this balance, of which we must be cognizent.

It is certainly much easier for us just to say - interference? hey, that's the other guy's problem. Well, the other guy is now beginning to search for ways in which to solve his problem. Let's think real hard for a minute.....what would be the easiest way for him to do that?

73,
AC6XG

Thanks to all who have answered my inquiry about this person...I now have his home number and work number and location.

As you may recall, I've been unable to contact him about a deal we had. It is my understanding that he has cashed my check but I still have not received my gear. Another ham has the same problem and has not been contacted by NS6X either. I've left repeated messages on his home number, work number and have sent a few EMail messages...All unanswered.

Just a quick word...I am NOT trying to say anything is wrong here ...yet. He may be on vacation...sick...have personal problems...who knows.

I'll keep the group advised of the status of my "dealings". Hopefully, nothing will come of this...

Best 73...

By combining the benefits of the World Wide Web and E-mail, you can use the internet to set up satellite schedules to contact hams all over the world.

DX stations will also find that by establishing prearranged schedules, they can avoid the pile-up mania that makes working the states anything but enjoyable.
Using the same procedure one would use to work the Space Shuttle, you can now (thanks to the World Wide Web) work DX and stateside stations in an orderly and productive way.

Pile-ups and busting through them was a normal occurance on the HF CW marine bands. In fact, a worldwide pile-up occured every 6 hours, as ships would race to pass time-sensitive WX reports to any shore station whose CQ they could copy. While working at NMO I'd have 4 and 6 MHz in my left headphone, and 8 and 12 MHz in my right (during daylight hours I'd have 8, 12, 16, and 22 MHz in the 'phones). The strongest signals would of course get to pass their WX first. As soon as one WX OBS was copied both headphones would be filled with more ships calling. Calling this "deliberate interference" is probably how an outsider would wrongly observe it, but to those actively participating it was a natural form of communicating; within the 30 minute window that was available everyone would get their turn to pass their WX, and I would have collected about 150 coded reports and passed them on via TTY to OBS METEO WASHINGTON. This ho-hum event occured at every shore station 'round the world simultaneouly every 6 hours for longer than most of us have been living.

Whether on the ham or the marine bands I honestly can't think of a more efficient way to handle a large number of stations who are focusing their attention onto a single op.

The weak of heart should not participate. (But a few cups of *stong* Coast Guard coffee sure helped to get the fingers dancing on the type-writer.)

Gee, that's an absurd and inefficient way to handle tactical traffic.
When we do Wx spotting nets, net control requests stations with

severe Wx to report to call first, those who've experienced other *significant* changes in Wx conditions since the last report to call next, and those with only routine information to queue up last by call sign order. For trained operators, that moves smoothly and quickly, getting the most significant and time critical information passed first, and filling in the lesser information in an orderly manner.

Undisciplined brawls are not an efficent way to accomplish a task. Orderly groups perform much more effectively. That's why armies aren't run like a mob. For net operations, most stations will know their relative position in the queue since mostly the same stations report at each poll, so unnecessary transmissions are reduced, and information flows quickly.

If what you describe was normal operating procedure for Coasties, no wonder that they abandoned it for digital systems where channel discipline and order are enforced by the machine protocols. One would have thought that operator discipline would have been sufficient, but apparently not. I suppose coasties never heard of queueing theory, but I'm surprised that, as a math major, you aren't familiar with it. There are optimum ways to handle information flows, but the chaos you describe isn't one of them.

Hello Everyone.

Well, after several modifications feature additions and improvements,
I have finally completed the software and am making it available to
whoever would like it.

Some of it's new features are:

Track and Hold
Hi Speed scanning and logging
Automatic Station logging
Grapical Analysis and review
Quick "Return to" active frequency
Windows Environment
Funtional Radio Control Panel

To find out how to get a copy of this software please visit my
website at:

http://unix.newnorth.net/~dthimm
Robots, Rockets and More!"

Also, I haven't forgotten all of you with computer capable Rigs other
than Yaesu.... I am going to be working on those versions shortly,
but go ahead and take a look at this one , just run it in demo mode to

get a feel for what your rig's version will be able to do!

Thanks Again for all of your support.

Not small enough. There are a lot of very well-known big guns who
dive into the pile-up every time to work their rare DX "buddy" for
maybe the 18th time, ignoring the fact that there are several dozen
other guys waiting on the frequency for a chance to work a new
country.

>(would you voluntarily hang around the

In the UK, the regulations actually state that although the ham is
routinely licensed to run up to 400 watts output, there may be some
situations in which it will not be possible to do this (e.g. very
close proximity to neighbors, living in condominiums, etc).
Therefore, the license does not confer an *absolute* right to run
maximum power in every circumstance.

On a more positive note, new legislation has just been introduced in
European Union (EU) countries (including the UK) whereby all consumer
electronic equipment sold in the EU must have a specified level of
immunity to rf breakthrough as well as satisfying certain safety
standards.

>Gee, that's an absurd and inefficient way to handle tactical traffic.

As I mentioned above, an outsider with absolutely no experience in handling 100s of ships calling him at once will not be able to comprehend this ITU-sponsored event. But of course Gary will believe he knows more than the ITU and the worldwide marine community.

>When we do Wx spotting nets, net control requests stations with

You are so out of touch with what I was discussing I know not where to begin.

Our planet is about 75% water; the only weather-observation facilities on this portion of the earth's surface are the hundreds if not thousands of boats and ships transiting the ocean lanes. Thus, to provide for more accurate sea surface forecasts, the WMO encouraged all shipping worldwide to collect WX and sea data every six hours and encode it. No shore station was to charge for taking these obs. This *routine* data consisted of sea and swell height, water and air temperature, humidity, WX, cloud type and height, barometric pressure, et cetera. Upon receiving this data, the shore station passed it by TTY to WMO headquarters and computer forecasts would be made for the next 6 hours, and passed to shore stations to be broadcast.

This was a worldwide event, not some little local net.

>Undisciplined brawls are not an efficent way to accomplish a task.

The untrained amateur will never be able to understand. The ships would gather on the ship calling bands (each maybe 30 kHz wide) while shore station receivers automatically scanned each 30 kHz segment (on the 4,6,8,12,16,22 and 26 MHz ship bands). A ship would park on a particular freq'y and for minutes call a particular shore station who's CQ tape they could copy 599. As a shore op with my four rcvrs scanning up and down the calling bands I'd hear dozens of ships calling NMO NMO NMO NMO ... I'd stop a scanner, send DE, then pick out a dozen callsigns; I'd line up about 20 of them (5KWS UR NR1 WJMP UR NR2 FPLW UR NR3 ...), take their WX obs, then turn the CQ tape and scanners back on, and do it all over again. It was very orderly. This was all done at a minimum of 25 wpm.

>Orderly groups perform much more effectively.

And this every 6-hour worldwide event couldn't have been run any more effectively than how I've described.

>For net operations, most stations will know their
>relative position in the queue since mostly the same stations report at
>each poll,

"...same stations report..."??? Ships do not remain stationary and neither does HF propagation. A ship I took traffic from at 0600Z might be calling XSU (China) at 1200Z and VIB (Australia) at 1800Z.

It's obvious you have no HF traffic handling experience on the scale we routinely encountered (every 6 hours).

>If what you describe was normal operating procedure for Coasties,

It was SOP for *all* ship and shore stations worldwide. USCG radio stations number less than a dozen - that amounts to less than 1% of all shore station radio facilities 'round the world. With proper training (something which you obviously lack) the system ran smoothly and served the global community for longer than you've been on this good earth.

This is a DX newsgroup. We who frequent it are DXers. We enjoy DXing as a hobby. I hold 2 jobs and have a couple other hobbies too. Plus enough other activities to make sure I often only get a few hours sleep a night. So I have maybe twice the life of many people.

I have an idea you are not a DXer (nor even a ham.) If you haven't experienced DXing or know the thrill of "talking to some clown in another country", then you have no business commenting on a DX newsgroup.
If I'm just "some clown in another country" you don't need to reply to this.

To be honest, as far as current DX operations are concerned, nothing beats a good weekly DX newsletter such as QRZ out of N4AA in North Carolina. The info and the QSL routes are outstanding. Also, the "GO" List always was a favorite of mine. The callbook on CD-ROM for DX addresses is essential because a growing number of DXpeditions are using overseas QSL managers. Thus, you pays your money and takes your chances. I always go direct to the station or the manager with SASE or SAE and IRCs. Green stamps are asking for trouble. By the way, on two occasions I had to resort to Registered Mail to get cards and IRCs thru to the DX station to avoid pilferage. It was worth it! 73 all, de Red N3TG

Sorry Barry, maybe that's the case in AU, BUT....
Councils (i.e. the local governments) can NOT in the USA
make the existing tower illegal. The US zoning ordinances
operate under a pricipal of "grandfathering" any struture
or non-conforming use if a new law is passed which would
otherwise make it (i.e. the tower) illegal.

Additionally, the federal (US) government (FCC) has passed
PRB-1 which preempts any local councils from passing
outright bans on all towers. Typically, that would generally
cause almost any council to have to accept a tower at
least 35 feet tall and upwards of 50-60 feet.

1014. ZX0F Fernando de Noronha in March?

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-20 00:00:00 UTC
From: dyoder@ksu.edu
Message-ID: <dyoder-2004971150020001@129.130.20.6>
Source record: 32964

I'm researching for a friend who had a QSO with ZX0F in late March.

He was told the station was on Fernando de Noronha.

I haven't seen anything in the various DX bulletins. Was this a valid
DXpedition? Does someone have QSL info?

Any information would be appreciated (email repy preferred)!

Thanks.

David

and just what is wrong with having a radio station that is capable of
operating at full legal capacity?

it's part of the privilege, and things that work fine at a low power,
aren't sufficient for when you're running that 3 kW input...

what would that solve? one ounce of interference knocks out 10 tons of signal.

interfering sources usually don't have to be "loud".

> What is the big deal about talking to some clown in another country.
> The way some hams go on about it you wonder why they don't get a life.

well, it's always nice to find out about some new jokes or acts..can give you ideas in improving your own show.

and it's that you communicated directly from me to you w/o intervening hardware that makes it worthwhile...

Too bad the USCG discontinued the 500 kHz CW watch; they missed another
distress call on that freq'y.

misc.transport.marine

Russian-registry ship uses Morse Code after becoming disabled
off the Netherlands

The Vera (Russian-registry 1,750-dwt dry cargo ship) was disabled
recently when a bridge window broke during bad weather.
Water that entered through the hole shut down electrical equipment on
the bridge, and the ship drifted towards Terschelling Island, the
Netherlands. The only communication equipment working was a 500 KHz
broadcasting unit, which the crew used to send a CW (Morse Code)
distress signal. A station in Ostend, Belgium, received the signal and
the ship was assisted by tugs.

SB DX @ WW $OPDX.301
Ohio/Penn DX Bulletin No. 301

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 301
BID: $OPDX.301
April 21, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W3UR & The Daily DX, WB2YQH & 59(9) DXReport, N4GN, W5IJU & Island/DX News, K7JJ, W9UI, CT1EE, 9K2HN, DJ5AV & DX News Letter, F6AJA, G4BUE & DX News Sheet, HA0HW, JA1ELY, JH1NBN and LZ4BU for the following DX information.

3A, MONACO. No signs or QSNs were reported on the special event station 3A7A which is celebrating 700 years of the Grimaldi Dynasty. Activity is supposed to be until April 30th. QSL via the bureau. Meanwhile, 3A7G has been active and is reportedly celebrating the same event and will be active during the same time period. Activity has been reported on 20 meters. QSL via 3A2LF or via 3A bureau.

8R, GUYANA. Yuki, JH1NBN, will be active as 8R1ZB from April 25-29th. Activity will be on CW, SSB and RTTY with operations on 14-10 meters. QSL via JH1NBN.

A5, BHUTAN (Keep Your Fingers Crossed On This One!). The "DX News Sheet" reports Charlie, K4VUD, will try to be active in July while visiting Nepal (9N).

BS7H, SCARBOROUGH REEF (Excerpts Of An Update by Tim, N4GN). The BS7H 1997 DXpedition to Scarborough Reef is still on target to hit the airwaves in approximately two weeks. Team leader BA1OK met with JA1BK in Tokyo this week to finalize several key details of the operation. The U.S. members of the operating team--N7NG, W6EU and W6RGG--met at the recent International DX Convention in Fresno to review logistics issues with N4GN, a member of the two previous BS7H DXpeditions. Here are some details which will be of interest to the DX community:
* All necessary licenses, operating permits, landing permission, visas, and other documents are now in hand.

* BS7H will be on the air for approximately 7 days, starting 30 April. As with most DXpeditions of this type, the exact schedule is dependent

on weather, transportation and other variables.

* The following transmit frequencies will be used by BS7H:
CW--1826.5, 3505, 7005, 10105, 14024, 18073, 21024, 24895, 28024
and 50110 kHz
SSB--1826.5, 3790 (3750 secondary), 7065, 14195, 18115, 21295,
24935, 28485 and 50110 kHz
RTTY--14083 and 21083 kHz
- BS7H will also be QRV on the Russian RS satellites.

* DXers in Japan should QSL via JA1BK. All others should QSL via W4FRU.

For additional information, please visit the BS7H 1997 Home Page
(http://www.iglou.com/n4gn/sr/) or contact Tim Totten, N4GN, at e-mail
n4gn@iglou.com or fax +1-502-239-7766.

ADDED NOTE: OPDX InterNet Subscribers will receive an unedited version
of Tim's (N4GN) press release as an additional bulletin.

BV, TAIWAN. The "59(9) DXReport" states Johannes, DL5AUJ, will visit
his friend Hans, BV3/DL4AMJ, in Taiwan from May 5-13. He will be active
as BV3/DL5AUJ on all bands. He will also take part in the CQ Mir DX
Contest May 10-11th, as BV0THU along with members of the University
Hsin-Chu. QSL via DL5AUJ.

C6, CROOKED ISLANDS (Bahamas). Look for C6AJR to be active May 30th
to June 2nd. The Crooked Island has an IOTA of NA-113 and is located
in the South Bahamas Group. Operations will be on 80-6 meters. QSL via
Joe Pater, WB8GEX, 1894 Old Oxford Rd., Hamilton, OH 45013 U.S.A.

HB0, LIECHTENSTEIN. The "DX News Letter" reports that DJ9SI, DJ8KI and
DL8SET will be active from Triesenberg on 80-2 meters from May 7-11th.
QSL via DL8SET.

HZ1AB GOLDEN ANNIVERSARY CELEBRATION. The HZ1AB license was issued in
late 1946, and to commemorate 50 years of being on the air providing HZ
QSOs and QSLs, the the present and former members of this historic DX
club station announce a Golden Anniversary celebration for HZ1AB. The
present HZ1AB members at Dhahran, Saudi Arabia, will be active in all
major international and regional contests during the period May 1997
through April, 1998.
A special QSL card will be designed and provided for contacts during
this period. Review future issues of ham radio publications and DX
bulletins for exact details. It is likely that all contest QSOs will
be QSLed via the bureaus, with other contacts being via the normal SASE
via K8PYD, the HZ1AB QSL manager. For more updates, check the web site:
http://www.netcom.com/~k7jj/hz1ab.html

IOTA NEWS. A short DXpedition to Matthew Island (IOTA OC-218) will take
place this week. Operators will be Eric/FK8GM, Robert/FK8AH and Claude/
FK1RF. They will use the callsign FK5M (same as the December, 1996
activity). The QSL will be via F6AJA. They are landing by helicopter
on Tuesday, April 22nd around 2200z and depart Wednesday, April 23rd

around 2000z. Activity will be on SSB and CW on the IOTA frequency.

J8, ST. VINCENT. After his activity in 8R-land Yuki, JH1NBN, will be active as J83ZB from April 29th to May 4th. Activity will also be on CW, SSB and RTTY with operations on 14-10 meters. QSL via JH1NBN.

KH0, MARIANA ISLANDS. The "Island/DX News" reports KH0SI is active from Saipan, often between 1000 and 1200z on 14175 kHz.

OD, LEBANON. The "Daily DX" reports Gaby, OD5NJ, has been active on the lower bands. Check 3800 kHz between 0130 and 0300z and then afterwards check 160 meters fir Gaby.

PACIFIC DXPEDITION. Tada, JA1WPX, will once again be active from the Pacific. Look for him to be active from the Marshall Islands, April 25-26th as V73WP. Then from April 27th to May 5th, he will be active from Western Kiribati as T30WP. He will return to the Marshall Islands May 5-6th. Operations will be on 160-10 meters and the WARC bands. Activity will be on SSB/CW using a TS-50 and a small AMP (300W). QSL via JA1WPX direct to CBA or JARL bureau.

QSL INFO AND NEWS..... It was reported by Peter ON6TT/5X1T, that all printed QSL cards for VK0IR, TO0R and TO0R/MM arrived safely at W4FRU's QTH earlier this past week.

SPECIAL EVENT STATION. This year's 2nd IARU High Speed Telegraphy Championship will take place in Sofia, Bulgaria, from October 6-10th. The special event station, LZ0HST, will be active from now until October 30th. QSL via the Bureau or direct: P.O.Box 830, Sofia-1000, Bulgaria.

ST, SUDAN. Sayed, ST2SA, has been active. Best times to work him is on Saturdays and Sundays between 2000 and 2400z on 20 meters. He does have an antenna for 10, 12, 15, 17 and 20 meters. QSL via the CBA.

SV5, DODECANESE. A group of Hungarians will be active from the Island of Rhodes from June 3-17th. Operators will be Laci/HA0HW, Tomi/HA4GDO, Laci/HA6NL, Zsolt/HA6PS and Tibi/HA6ZV. They will use their home calls with a SV5/ prefixes and /p behind the calls. The team will work on all HF bands from 160-10 meters on CW, SSB and RTTY. Suggested frequencies are:
CW - 1831, 3511, 7011, 10101, 14011, 18071, 21011, 24891 and 28011
SSB - 1841, 3789 (3611 for HAs), 7089, 14189 (14260), 18141, 24941 and 28489
They also want to be active on the satellites such as RS-10, RS-12 and RS-15. Their down link will be 29421/29441 and 29321/29341 kHz. Two stations will be active.

SWODXA DX DINNER BANQUET UPDATE. Bob, W9UI, President of SWODXA, reports the program for this year's SWODXA DX Dinner (Friday of Hamvention weekend) is VK0IR. Also, they are on the schedule for Saturday's SWODXA sponsored DX Forum at Hara Arena. Normally, if they are scheduled for both events, groups show something different at the DX Forum from what is presented at the DX Dinner.

T33, BANABA ISLAND. Ron, ZL1AMO, is currently active as 3D2RW from
Fiji and plans to go to Tawara some time this week. If he can find
passage on a fishing boat, he will be on Banaba the following week. Ron
likes to work mainly on CW and can be usually found on the lower bands
and also the WARC bands.

YI, IRAQ. Sanyi, HA7VK (ex. XU7VK), will be active as YI9VK starting
May 12th. He will be there for a couple of months and will be operational
on the HF bands with 500 watts on CW, SSB and RTTY. QSL via HA0HW. He
will later be joined (if possible) by Laci, HA0HW, signing YI9HW during
the second part of July. QSL via CBA.

You quite in error regarding the grandfather clauses,
in my city a few years ago a commercial site
(30 repeaters) was dismantled when the zoning laws changed.
Yes, it was appealed and they lost.

My son and I are both ham operators. He and his wife and sons
sailed from Florida, thru the Panama Canal, and across the Pacific.
I "worked" him across the ocean on 20 meters. On more than one occasion,
when weather was bad or propogation poor, we reverted to CW to keep
in touch. It was a lifesaver, knowing they were well. Hurray for
CW!

Nothing. S97.313(b) give us that privilege. But (a) instructs us to use
only as much power as necessary to carry out a desired communication.
Next time you listen to one of the NCDXF 20m beacons note what little
difference in readablilty there is between the 100W and 10W levels.

Jeff

Good evening Cliff. If I am not mistaken, the legislation applies to
privately owned (IE: personal towers) and not towers used in commercial
or for commercial applications. This would be more in line with Barry's
and Burt's postings concerning legislation to make amateur operator
towers illegal or fall under restrictive rules.

There are a number of cases where towns have passed legislation limiting
the height of a tower to 35'. In each case, existing towers where
grandfathered, despite having heights ion average of 60-80'.

Commercial towers fall under a different set of circumstances.

> watts.

Maybe where *you* live ... but here in the US, the maximum power limit
is 1500W PEP output ...

Now that limit is over-used and abused by large numbers of hams who
clearly *always* run the "footwarmer" despite rules that require the use
of the minimum power necessary to carry out the desired communications
... for some of these lids, if the report isn't "60 (dB) over" (S-9) they
figure
something's wrong and try to retune to get more "margin" ... they're the
"pileup-busters" ... the ones for whom ham radio is simply an exercise in
electronic machismo, where they get their jollies by demonstrating that
"theirs is bigger than yours" by stomping any and all comers into the dust
with their excessive signals ...

This mentality of "brute force dominance" is not a healthy mentality, but
it's
all too common ... it also demonstrates the technical ignorance of its
adherents who are simply too technically backward and ill-informed to even
begin to grasp the undeniable reality that they could get FAR better

system
performance in terms of "getting the message through" by simply using
better
modulation and coding techniques than by adding humongous PAs.
And it would be FAR cheaper in monetary costs, too ... with hams being the
notorious cheapskates that they are, I'm really surprised that this aspect
of
newer, better technololgy alone doesn't attract more converts from the
backward, Luddite side ... if we could only find a way to get through to
them
and make them realize the technical realities, but since they fear that
which
they don't understand, it's inherently difficult to persuade them to even
listen
with a half-way open mind to any idea involving anything more modern than
the aural decoding of beeping patterns ...

>for that.

Just the opposite. While it's easy to get up-to-date USA addresses on the Internet, it's NOT possible to get much of the same data for foreign countries. Sure, QRZ has *some* DX addresses listed, but they don't have NEARLY the scope of the Callbook CDROM. So if you're QSLing DX direct, having the RAC CDROM is a MUST.

And what proof do you have to make the claim, "Callbook DX info is always out of date"? I've send hundreds of direct cards, and almost all of them come back. That doesn't sound like out-of-date data to me.

That's what makes me kinda glad I'm not on the Honor Roll. What a sad, boring life it must be when you've "done it all, been there, got the T-shirt" and there's nothing left to work!

I just spent much of Saturday chasing the International Marconi Day stations. A lot of fun, and you didn't need a beam and a big amp to do it.

They might if they at least understood that their lifes might depend on hams
the next hurricane of earthquake.
Just suppose all this stuff was happening in FL or CA. I guess that the next
hurricane 'Andrew' might look a bit different without the so much needed ham
equipment and experienced communicators.

That alone is moore than enough reason to take hams into account.
How much more expensive would electronics become anyway...

>We NEED the sympathy of the majority of citizens by and large to keep
>the hobby going. I think that is the point being made here.

That's right. Most people don't even know we exist. I meet lots of people in
my job (interior decorating) and during lunch I always talk to stations with
my HH. This is enough to get a few questions about our hobby and most people
find the possibilities of ham radio facinating.
Good PR never hurt anyone.

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

>John (KC5VEI)

When I was first licenced I put up a 10m (33ft) tower with a dualband colinear and used 15 watts FM on 2 meter. One year later I upgraded my licence and was allowed packet. Then the trouble started. A neighbour living about 70 meter (70 yards) away came to complain about interference to his TV (ALL CHANNELS!!) and his phone (all numbers....).
I talked to him for a while and told him I would decrease power and if he would come back and tell me if it made a difference. I switched to 4 - 5 watts and when he came back he said there was no change in the interference.
He then said that his he was not hooked up to cable (all others in my neighbourhood are hooked up) and he had his antenna in the attic with a broadbanded receive amp. He was not willing to change anything to that setup.
I told him that I would switch back to 15 W and that in fact we were allowed 150 W so that in future he might experience more interference, but that he was allways welcome to complain to the authorities (our local FCC) and that they would come and check my equipment (all approved) and that they would then come over to his place and check HIS TV/phone.
I never heard from him again... seemes that he didn't pay a licence to watch TV (We are taxed for everything but breathing here in Belgium). That's why he had no cableTV (crosscheck TVlicence / cable subs).

I guess he now has no more problems since he doesn't even complain when I'm on HF (150W) or packet (25 W, antenna 19 m AGL).

Most RFI problems are because of lack of shielding in the receiving equipment... It's time there is a type approval for consumer electronics with standards as high as for hamtranceivers... that will cure a lot of problems .

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

Per FCC Part 97.313 subsection B No station may transmit with a
transmitter power exceeding 1.5kW PEP.

Maybe in AU they're allowed 400 watts, but in the US, we're allowed up to
1500.

Besides, the contention by the "hurt" party was the operator had the
ABILITY to use 1500 watts, not that 1500 watts were used. As stated
before, just because a car can do 100 mph does not mean that the operator
will ever drive that fast. Should the driver be ticketed for excessive
speed under the premise that he may do so?? Maybe in AU they do, but not
here

I suggest you research a little harder before making brash erroneous
generalization

Steve is correct, and even for commercial enterprises, the
norm is a grandfathered situation rather than a forcing of an
end to someone's business. I suspect there's more to what
happened in Cliff's city than simply a desire to change
zoning regulations.

This begs the question, why is it necessary for USA amateurs to be licensed for so much more power than those in most other countries? I don't know of any other countries where 1.5 kW output is allowed. A few countries allow 1 kW; most limit amateurs to 400W output or less.

Well, historical reasons to start out with - how many European countries
are thousands of miles wide? Higher power was somewhat more necessary
in an era of relatively insensitive receivers. And in the US, once
something becomes embedded in law, it stays for a looooong time. :-)

Not quite. Pre-1995 built ships are permitted to use the old fashioned
system until 31 Jan 99, in accordance with IMO recommendations and
resolutions.

1047. VHF UHF PROPAGATION & DX NEWS

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-21 00:00:00 UTC
From: ktbx@ktbx.demon.co.uk
Message-ID: <335b7d8f.28468391@news.demon.co.uk>
Source record: 32984

Hello
What I am looking for is the different views on E's propagation.In fact any views on VHF & UHF propagation.I would also like news on DX Exepitions that will use VHF & UHF and could be worked from the Europe.At the moment most DX news is forgotten by the time of the event.I would like to,each week put into the cluster the DX stations of that week.The idea is who it is,where they will be,what there call is.As much information as possible,so stations are listening on the right frequency at the right time.Any stations that would like other stations to listen for them Please let me know.I am sure there are many stations that would listen if they had the information.So Please send me any news or views on VHF,UHF.
With propagation,I will look at your theory and see if it matches the facts,when E's is about.As for DX all information will be past on.
Please feel free to place this in other news groups.

Steve:
There were NO towers involved in this case, only a
couple of phone poles(less than 35') and a house. The area was
previously unzoned, then zoned residential. Another site
with a 75' tower a couple of blocks down the street survived.
I could go into all the gritty details, that's not the point. The point is
that if the municipality want to get rid of something, they can. The
PCS industry is finding this out. Local judges are over ruling
the Telcom legislation almost everyday. They have a catch all
called appropriate use which can mean anything they want.
The bright side is that the PCS industry will fight the tower
wars and hopefully the Hams will benefit. The DBS industry
has been beating its head against this issue for years and
has had some help with federal legislation, but the local
municipalities are under the impression that they can overrule
anybody. I remember a bike path that went to the Supreme
Court twice.

In some countries, especially in Europe, this has already happened.
However, the degree of immunity is often somewhere around 3V/m, not
nearly enough to protect against typical amateur legal-limit operation.
The flip side of this coin is that once the regulators have
susceptibility regulations in effect, it is but a small step to stipulate
that the radio operators not exceed those field-strength limits in their
neighbors' homes. There is something to be said for the status quo, at
least in some circumstances.

Well, the deck is stacked. First, we have the clearly stated federal
pre-emption on our side. We also have some rather clear statements in
the FCC material that fundamental-overload is NOT caused by any defects
in the transmitter. In practice, the only higher level would be to get
changes made in US federal law and FCC regulations.

I am switching from a Yaesu FT890 to an Icom 706, for mobile DX. I have heard unfaltering things about the Icom external tuner, especially pricing.

I have also heard that the Kenwood AT-50 external tuner will work. For those who are using this set-up...

Any problems hooking the two up?

Any special cables or modifications needed?

What type of antenna are you tuning up. I will be running the Outbacker JR. I know there are better, but space and area traveled preclude them.

Any comments or suggestions are graciously accepted.

Thanks and c u on HF

Actually, by transmitter standards, 1500 watts is not all that much
power. Compare this to the 50 kW for AM broadcast stations or the
multi-megawatt ERP of some TV transmitters and it doesn't look all that
big.

About a month ago, the neighbor of a ham came to the ARRL lobby. She was
experiencing telephone interference. I explained the causes and cures,
to little avail. When I learned she lived 15 miles from here, as a
personal volunteer I offered to go to her house and fix her RFI problem,
but stipulated that she and her neighbor would have to talk to each other
and be willing to cooperate to solve the problem. She gave me a dirty
look, and said, "I can see I am wasting my time here!" and stormed out
the front door.

Sometimes, they don't want to fix the RFI problem, they want to be right!

I think there might be a dozen 50 KW clear channel stations in the entire country. And if you want to start working field gain and ERP into the equation, we can do that for ham stations as well.

By the way, does the expression 1 over R squared sound familiar?

From: Marty_Gulseth <marty_gulseth@hp.com>
Message-ID: <335BDD56.55E6@hp.com>
Source record: 32995

Hello to All,

After 30+ years of hamming, the right combination of interest,
equipment, and time
is enabling me to pursue DX'ing a bit more aggressively.

It seems the QSL "rules" have changed since I last looked. I hear that
"QSL via
buro" isn't always best. How can I tell when to use the "buro" and when
to "roll
your own?" I found several articles and a website with "how to" for DIY
QSL'ing,
so that's not the key issue (but, insights, tips, etc. will be
appreciated.)

Thanks for any help or guidance offered. I've logged a few and I want to
get the
QSL process started. Best 73 to all!

I had a neighbor (actually several) that were just like this. When
my application for a special use permit came up for a public hearing,
everyone crawled out of the wood work. One particular neighbor
refused the help of several people to help resolve interference that
I was completely unaware I was causing. The basic comment was "It's
not my problem, why should I have to do anything." Another neighbor
wouldn't let me contact the manufacturer of her equipment as she
couldn't
be bothered to give me enough information to contact anyone. Clearly
solving the problem was much lower on the priority list than being
right.

> especially pricing.

Not use what you mean by "unfaltering" ... but I used an Icom
736 with an Icom autotuner (I believe it was an "AT-2") on the
boat to tune the backstay ... it was insulated from the mast and
other rigging at the top and connected via a humongous bronze
turnbuckle to the chainplate at the bottom. The tuner was below
deck in the very aft part (about 20' from the radio) and was connected
to one of the bolts for the chainplate with a heavy insulated copper
wire (about 4 gauge) ... since the chainplate was throughbolted to
the fiberglass hull, it was insulated pretty well ... and the tuner
had NO problem loading up on anything from 160m (which I used
a fair amount at night from Mexico to the states (SSB)) to 10m.

I ran SSB and AMTOR predominantly, with a little HF packet once
in a great while ...

The key to this working well was grounding and bonding ... the engine
block (down below the floor in the bilge), prop shaft and prop, all of the
tankage (2x 70 gal. stainless for H20 and 2x65 gal epoxy-coated black
iron for diesel), as well as the ballast in the keel (a single 11,800 lb.
cast iron casting, encapsulated in fiberglass) were bonded together with
numberous runs of 4" wide heavy copper tape ... actually it was more like
a very long roll of flashing material ... heavier than typical tape ...

The radio(s) were all bonded to this ground system with the shortest
possible runs of the same copper and a double-wide run ran back to
the auto-tuner from the same point where the HF radio ground joined
the main ground system.

The large area of tankage and keel under water provided a LOT of
capacitive coupling to the sea water surrounding the hull and all
of the exposed surface of the propshaft, prop, and all of the bronze
thruhull fittings provided direct contact ... great performance and I
never had a hint of any electrolysis problems (errosion of underwater
metal parts) ... oh, I forgot, there were NO zincs on the prop shaft,
only two roughtly 4" x 6" plate zincs thru-bolted on either side of the
back, bottom part of the keel, where special contact pads of metal
had been cast to stick out flush to the surface of the fiberglass hull

at the right places. (The zincs would last 6 months, plus.)

> I have also heard that the Kenwood AT-50 external tuner will work.

Can't comment on the Kenwood tuner ... sorry.

YMMV with the Icom tuner, using a shorter mobile antenna ...
I was loading about 65 feet of 5/8x19 stainless steel rigging
wire ... but for me the performance was flawless and the
reliability excellent ... I never had a moment's trouble in
5 years of bouncing around in constant use in the salt
environment of ocean voyaging ...

However, such "rationale" for such a high powe limit is, indeed,
questionable in light of today's technologies ...

Far more improvement in link performance can be achieved by
employing better modulation and coding techniques with a power of
say 250W maximum than by adding huge PAs ... *and* at
a much lower monetary cost. That this does not appeal to the large
number of notorious cheapskates in our ranks is only explained by
two factors: 1) their inability to accept or comprehend the very real
benefits available through this more modern approach and 2) that
these approaches tend away from the "stomp anyone and everyone
else into oblivion with their "mine is bigger than yours" overpowering
signal strength ... more modern, effective techniques apparently don't
meet the "brute-force macho" criteria that some personalties require ...

> resolutions.

That's a stupid policy ... akin to grandfathering incompetent hams into
new license classes with tougher requirements just because they already
have a license ... just as hams should be retested for competency rather
than receiving privelges for which they are technically incompetent ...
perhaps
downright dangerous... commercial shipping should be required to carry a
full complement of modern communications and safety gear ... or stay in
port ...

Anyone who puts a ship to sea with nothing but obsolete communications
gear is a fool ... hell, on my 42 foot sailboat, I had 2 satellite nav
systems
(GPS and Transit), 2x Marine VHF (with spare antennae), marine VHF HT,
HF-SSB, HF ham 160-10m, 2x EPIRB (one in main vessel, one packed in
the deck-mounted liferaft, dual redundant power systems, and dual redundant
charging systems, plus computer communications via AMTOR, SITOR, and
HF packet ... and oh, yes, a 2m/440 dual-band ham rig (50W) which could,
in an emergency, operate on marine freqs as well as a 2m/440 dual band
with the same capabilities ... I also had WESAT/WEFAX and NAVTEX
receive capability. (BTW, backup for the satnav systems was another GPS

... however this second "GPS" took no power ... it was a "Grey Plastic Sextant" of the top-of-the Davis line variety ... quite servicable.)

I have little sympathy for someone who puts a grossly ill-equipped vessel to
sea, then has problems, and complains about the results ... to cite this example of an ill-equipped Russian vessel relying on an antiquated 500kHz OOK Morse system that's being abandoned out from under it (at the direction of the international marine community) as a "reason" for maintaining Morse testing for ham licenses is absurd to the point of obnoxiousness ... it is an
outright attempt to misslead (dupe) the reader into "buying into" a totally bogus
premise ...

I have never, in over 20 years of being a ham, known or even heard of a *single*
ham who mantains a regular watch on the outdated 500 kHz marine
emergency frequency ... or 2182 for that matter ... when I was crusing in the
above-mentioned 42' sailboat, I didn't waste the power leaving the HF radio on
all the time ... monitoring the VHF was quite adequate to assure I'd hear calls
from any nearby vessels who wanted to communicate ... I talked to LOTs of big cargo ships, tankers, and famous cruise ships, including the QEII, Viking
Serenade, and the Rotterdam ... ususally in the wee small hours of the morning,
when I wanted to make sure they were aware we were out there and that they were not planning to make a near-term course change that would put us on a collision course ....

So Alpha has a market for their amps!

I guess there's always Italy with their "300 watts," huh?

ACTUAL CONVERSATION BETWEEN MYSELF (N9VLS) and a local Extra:

Me: Well, I'm more interested in VHF/UHF/Microwave than HF...

Extra Class Operator: Well, it's harder to get ARRL awards for those bands
in Indiana... you should just get on HF.

WHY BOTHER. I want to help "advance the radio art", not trample other stations
in an effort to get that one last contact for HF DXCC....

I pull into the driveway of a house for sale...
Neighbor noticed my ham plate.
Neighbor comments to the effect of "you're not putting up ANY antenna, boy".
This in turn leads me to wonder two things:
1: Why is this gentleman so anti-hamradio?
2: Who is responsible for this???

Dollars to donuts it was someone running a linear amplifier, with no concern
for his neighbors.

Sorry to say but that is not necessarily the case at all. As the FCC
has documented, there are many phones on the market that receive RFI
from a 5-8 watt transmitter. My 100-150 watt VHF+ operations tore
up the phones, radios, TVs, and supposedly garage doors of nearly 10
neighbors (if they can be believed and didn't perjure themselves
in a public hearing.) After upgrading (and losing my petition), I find
that 1500 watts on HF causes fewer problems than 150 watts on VHF+.

The only humorous part of my experience was the incredibly irrate phone
message left on our answering machine from a busy body several blocks
away. She accused me of interferring with her phone conversation at
a time of a personal family crisis and went to great lengths to
chastised me for causing her additional grief. Unfortunately for her,
I was in NH on vacation when this was supposed to have occured.. :-}

Todd:
NOW! NOW! that would increase costs and we would have
inflation. The dirty little secret is that consumer goods are made
as cheaply as possible in the low wage countries. They post
bogus stickers on the goods claiming compliance. The manufacturers
from these countries don't contribute to re-election campaigns
for their health. Why do you think the FCC's budget was
cut so drastically. Isn't beltway politics wonderful!

Even without a law change, one must still defend oneself if a neighbor
however wrong decides to sue you as a public nuisance. The cost of
such a defense can be expensive and there is no (little?) assurance
that you'll be able to recoup your legal expenses. This is besides
the emotional expense for which you can't be reimbursed. Would sure
be nice if consumer electronics gear had a little more immunity
to RFI to prevent this from happening in the first place!

>Actually, by transmitter standards, 1500 watts is not all that much
>power. Compare this to the 50 kW for AM broadcast stations or the
>multi-megawatt ERP of some TV transmitters and it doesn't look all that
>big.

Guys and Gals,
I'd almost support a 100 watt limit if it was world wide. Only on
160, 80 and sometimes 40 meters have I found it all that necessary to run
more power. That is under average conditions, QRM from pileups and contest
excluded. Can anyone deny that 20 meters wouldn't be better if everyone
was limited to 100 watts? But, it isn't going to happen. Look at CB radio
and their power limitation. Nobody can make it work cause their will be
people who always run more power and do not care what the rules say.
Don't think ham radio mentallity is any different.
As for what to do about neighbors who want to shut you down, sure,
try and get on there good side by doing what you can to protect them from
interference. Even if you have to buy hi-pass filters or phone filters
for them. Do everything you can to try and resolve the interference
peacefully. And if they still try to shut you down, SUE THE HE** OUT OF
THEM!
How many times has the ARRL gone before congressional committees
to try and get legislation that would require manufacturers to protect
consumer devices with adequate EMI filtering? Has any of that done any good?
Maybe hams could sue the manufacturers for not protecting there equipment
from legal RF radiation. And what about the radiation they put out when
they are not licensed transmitters? Broadcasting dimmer light switches
are a violation of they law aren't they?
You say nobody cares? You're right, the laws are on the books
but the government don't enforce them.
The only thing the FCC seems to be capable of now days is issueing
and renewing licenses quickly. God, we've come a long way!

In the 7 years of having callsign plates, I have yet to find 1 person,
other than an amateur of the family member of an amateur who knows that
they are call sign plates.

>
> Dollars to donuts it was someone running a linear amplifier, with no concern

Brash assumption at best. You should know you can cause massive
interference without a linear as well

This was not the case here. It is a case of a neighbor who is not
willing to work with an amateur so that all parties can co-exist

Besides, what makes you think he does not think you are a CB operator??

>73, Jeff KH2PZ / KH6

As one of the relatively fewer hams that has held a First Tel,
I can GUARANTEE that you are right... dead on it...

Furhtermore, although what you say is sure true enough for ships
in the general sense, there is a WORSE mode to all this you
did not touch on.

Now days, we take all this satellite image stuff with a grain of salt.

However, back in the early '60's even with all the did you correctly
report, those few ships in the hurricane lanes had a double dose.
In this case, it isn't just every SIX hours, man....

It's every hour on the hour and within five minutes you'd
better have the observation SOMEWHERE on shore so that
they can get as much lead on developing storms as possible..

Try being up every hour on the hour for 24 hours a day for 14 days
to 21 days at a time, along with the Dept of Commerce fellow
zombie who takes the OBS on a two-man operation deep in the
Gulf of Mexico during hurricane season...

I guarantee you the Gulf Coast folks owe a LOT to little KHCI of
Texas A&M and Johnny and Bill Vogt at KLC, plus WNU and a ton
of others for the advance notice that was there long before anyone
was ever punching holes in them with KC130's either, folks.

I think I can chalk up part of my personality changes toward the
more agitatable side to this couple of years of insanity I op'd it.
However, it paid a CHUNK of my way through Texas A&M and for
four kids and wife....

I also know for an absolute fact that your statement is dead on.
There are VERY few ham radio operators that have any real idea
about what it is like to handle traffic under real pressure, day
after day after day after day after day, but then, how can you
EVER put it in words? There simply are no words, you have
to have been there to really understand what you are saying....

>Why, do we station USCG cutters off of the Netherlands?

No, Bill - radio waves can travel farther (and faster) than cutters. If you hadn't done such a hack job of editing you would have seen Gary Coffman's comment about the USCG no longer monitoring 500 kHz.

>Sounds more like a ship that is did not belong
>on the high seas anyway. This was not some
>mini vessel.

Ever been to sea, Bill? Ever seen a 50 foot swell (crest to trough)? Now imagine a 70mph wind blowing; the crest of that swell will now break. Double-hulled ships can be broken in half under such conditions, so surely suffering only a broken bridge window (and losing all electronics) was minor compared to what *could* have happened.

(Think about how high that bridge window is, Bill, from the ocean's surface; 50 feet? 70 feet? Now consider a wave that could reach that height. This is real life on the open ocean, Bill.)

For amrchair sailors such as yourself, a very good book to learn more about what the sea is capable of would be W.Bascom's "Waves and Beaches: The Dynamics of the Ocean Surface."

Thanks Ed.

Besides, more people are burned by electric irons at that same
1500 watts, every now and then, than this world ever dreams of..

<Chuckle>

And more fires are being started by 300 watt quartz halogen
lamps that tip over than you'd really think....

<on a VERY serious note>

It's just that we only seem to pay attention to what
bugs us, doesn't it?

Jim & Others,
Wot de heck if you've gotten this far on the internet, then take the
next step. You don't need to buy a CALL BOOK/CDROM and you don't need to
post on any news group or amateur radio reflector for QSL routes, etc.
Be brave and put the following to use by making it a BOOKMARK on your
'puter.
http://home.sprynet.com/sprynet.wd4ngb/page.htm

--> OR <--

` http://pw2.netcom.com/~ac6v/pageal.html#CLIP

They are loaded with all kinds of goodies for the amateur, including up
to date QSL mgr routes + addresses, Foreign & US ham addresses, etc.

Hope this helps everyone !

Should be unfavorable, but the spell checker did not know that's what I meant when I typed it.

> ... but I used an Icom
> 736 with an Icom autotuner (I believe it was an "AT-2") on the
> boat to tune the backstay ...

A few have mention this tuner, I think it's now model AH-2A or B. I bears looking into. Unfortunately, there are no specs (space is at a premium) I did see some picture and it looks fairly compact

The connections sound straightforward. Both the tuner and the RF section will be mounted in the truck, so the ground connections will be very short and there are places aplenty to find suitable grounds
>
> Carl - wa6vse
> carl@ais.net

So far the vote is 4 for the Icom tuner 2 for the SGC tuner.

Thanks for the input. :)

To: Retail, wholsale, OEM, and industrial customers
From: Connectors Unlimted - Sales Dept.
Date: April 01, 1997

Effective immediately, Connectors Unlimited has terminated all small dollar retail sales. We will continue to supply "Name Brand" products to our wholsale, OEM, and industrial customers who meet the minimum order requirements.

Our "Generic" connector line has been discontinued. Inventory will not be replaced. Most connectors and adaptors are available in one or more of our "Name Brand" lines. These lines are simply higher grade, better quality and manufactured to more stringent specification. Prices are, on average, 60% - 100% higher than our Generic line.

Existing inventory of products in our "Generic" line will be sold by lot with a minimum order of $250.00 or the entire line item. A complete listing of this inventory will soon be available by e:mail and on our Webb site. Any one interested may send a message to:

sales@connect.mv.com

with a subject of "Generic Inventory"

You will be added to a distribution list. Information will be distributed as available.

>them from interference. Even if you have to buy hi-pass filters or
>phone filters for them. Do everything you can to try and resolve the >interference peacefully.

As our RFI material suggests to hams: if the interference is caused by your station (ie, harmonics and such), you must fix it at your station. If not, we suggest that you should probably be a good neighbor and help your neighbor FIND a solution. If you can tell them where to buy the filters and help them understand the instructions that come with them, you have done more than Part 97 requires, and possibly saved a lot of aggravation (yours and your neighbors') in the process.

Part 97 does not require you to buy filters for your neighbors' equipment. If you have only a few neighbors with problems, it may be the easy way out. After all, a big handfull of filters still costs less than the first hour of your attorney's time. OTOH, the fellow who lives in an apartment complex could be talking about a lot of filters. It is too bad more manufacturers don't design in the needed immunity.

>The only thing the FCC seems to be capable of now days is issueing
>and renewing licenses quickly. God, we've come a long way!

The FCC's point is that most interference is not caused by a violation of FCC rules. In their opinion, a "broken" piece of consumer equipment should literally not be a federal case. While I miss the days the FCC van would show up and tell our neighbors that the interference is not our fault, at least under current law, the FCC is right: if there are no rules being violated, the FCC is not officially involved. They could, however, be better "arbitrators," if they had the staff time available.

In the midst of all this, the FCC has taken some positive steps over the past years, at least in the area of information. The current FCC Interference Handbook states pretty clearly what kind of interference is NOT the fault of the radio operator. The document is available on the web page at fcc.gov. Between the FCC book and ARRL's RFI/Consumer pamphlet (SASE to our Technical Dept Secretary for the latter), your neighbors will have every opportunity to read about the issues in relatively nontechnical terms.

Indeed these ships are, regardless of the fitting status of the ship. It was realized in the late 70s that the Morse code based system was becoming obsolete, thus the first proposal in the IMO Covention on the SOLAS (Safety of Life at Sea) for the introduction of DSC (Digital Selective Calling) were first considered in 1978. What Stevenson is demonstrating is his abject ignorance of the international provisions that have resulted over the years international debate and considerations in order to impliment GMDSS. Indeed, the program to impliment GMDSS is nothing like the grandfathering provisions. In accordance with the terms of the SOLAS Treaty, ships that were fitted with radio equipment under the old SOLAS provisions would be issued safety certificates until 1 Feb 99. After that date, these ships would have to comply with those provisions. In other words, the GMDSS and the old system have been running in parallel because it was realized that one could not switch from one system to another abruptly without endangering the lives and property of the maritime service. To claim that shipping equipped with the old system is unsafely plying the world's ocean only demonstrates how utterly ignorant Stevenson is of the GMDSS implementation programme, even exacerbated with his ill-conceived methods debating the issues.

> Anyone who puts a ship to sea with nothing but obsolete communications
> gear is a fool ...

Indeed, the only foolish statements that I can perceive is Stevenson bloody-minded posting on issues and subjects on which he hasn't got a clue of what he is talking about.

Let me cast a vote for the SGC-230 tuner (about $450 from HRO). I used it with my IC-706 during the Pacific Cup sailing race from San Francisco to Hawaii last year. Once installed, it's just about fire-and-forget; no need to push buttons to initiate tuning; and I didn't even bother to install a "TUNED" indicator -- just watched the SWR drop. It tuned my 23-foot marine whip on 160 to less than 2:1 SWR. (No assertions about the radiation efficiency of this configuration, though!)

It's well-built for the outdoor environment and works very well with the 706 in my experience. I chose it over the available Icom tuner at the time.

Been there, done that. So what? The ship sounds like an
embarrasment in terms of being properly outfitted in 1997.

>Now imagine a 70mph wind blowing; the crest of that swell will now
>break. Double-hulled ships can be broken in half under such conditions,
>so surely suffering only a broken bridge window (and losing all
>electronics) was minor compared to what *could* have happened.

If ALL the electronics are taken out by water in the bridge, that's
a design disgrace.

>(Think about how high that bridge window is, Bill, from the ocean's
>surface; 50 feet? 70 feet? Now consider a wave that could reach that
>height. This is real life on the open ocean, Bill.)

Wow, I'm impressed. Damn, I've ridden out enough storms myself
that had green water on the bridge. That's not he point. Today, with

battery back-up and small transcievers, any SHIP should have multiple
back-up.

>For amrchair sailors such as yourself, a very good book to learn more
>about what the sea is capable of would be W.Bascom's "Waves and Beaches:
>The Dynamics of the Ocean Surface."

It is only with the greatest restraint that I don't just tell you
where to go. For your information, I did 4 years on a WW-II destroyer
from 66-70. operated in the Caribbean, the Med and the Far East to
Viet Nam (member, Gulf of Tonkin Yacht Club:-) so don't patronize me
with your claims of nautical prowness on the false assumption that no
one else has experienced severe storm conditions at sea.

1103. Shortwave books for sale

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-24 00:00:00 UTC
From: rackleyd@bmts.comXYZ
Message-ID: <3360bcf7.29430937@news.bmts.com>
Source record: 33189
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.antenna,rec.radio.swap,rec.radio.amateur.dx

I have a few shortwave books for sale. Some are out of date but may be
of interest to someone.

1- The Shortwave Listener's Antenna Handbook
Robert J. Traister

2- Shortwave Listening Guidebook
Harry L. Helms

3- The ARRL Antenna Book - 15th edition

4- Shortwave Directory - A Frequency Guide for the 10kHz-30MHz
Spectrum
Bob Grove - Seventh edition

5- Passport to World Band Radio
1991 edition

5- World Radio TV Handbook
1991 edition

6- Sounds of Shortwave
audio cassette

All books are in excelent condition, although #5 has some
highlighting.

Asking $5,000 but willing to accept less :-)

If anyone is interested I'll throw in a years worth of "DX Ontario"
from 1991. This is the monthly publication put out by the Ontario DX
Assoc. (ODXA)
70+ pages per issue. Lots of good info. I hate to throw them out.

Thanks

Dean

Nobody ever said that Morse didn't provide a useful service in the
past, prior to the times that there were much better systems
available ...

> I think I can chalk up part of my personality changes toward the
> more agitatable side to this couple of years of insanity I op'd it.

> to have been there to really understand what you are saying....

The point is that it is no longer necessary or desirable to force humans
to contort their wetware in such antiquated, disturbing, and inefficient
ways ... there are FAR better systems available for disseminating
information
or gathering it ... none of Jeff's (or your) purely semitmental
reminisences
about "how things were in 'The Good Old Days' " is pertinent in the least
to
the present day or serves in any way to justify continued Morse hazing for
amateur licenses with access to HF ...

What I was saying was that no ship should be permitted to continue to
operate with obsolete communications gear ... that the Russian ship
in question allegedly had ALL of its' comm gear but an old 500kHz CW
rig knocked out by some water coming in through a broken bridge window
```

tells me that their systems were pretty poorly designed and installed in
the
first place ... like ZERO reliability/redundancy ...

> Indeed,
> the program to impliment GMDSS is nothing like the grandfathering
provisions.

> switch from one system to another abruptly without endangering the lives
and
> property of the maritime service.

Certainly parallel operation of old and new is a practical necesity during
a
transitional period ... I never said otherwise ... but reliance on 500 kHZ
Morse
gear is pretty bad, when the USCG, I believe the French, and many others
have stopped even listening there ... EPRIBs and VHF radios are NOT that
damned expensive ... I find it inexcusable that a ship would put to sea
without
them ... if the owners can't afford basic safety gear, they have no
business
operating the vessel ...

> To claim that shipping equipped with the
> old system is unsafely plying the world's ocean only demonstrates how
utterly
> ignorant Stevenson is of the GMDSS implementation programme, even
exacerbated
> with his ill-conceived methods debating the issues.

Jim ... kiss my ass ... you pompus, anal-retentive asshole ... for the past
months, you have taken to criticizing practically anything I say because
you
find my "style" offensive (because I call a spade a spade, like in the
first
line
of this paragraph) ... I note that your e-mail address has moved to the
doc.ca
domain .... that's hardly surprising, since your attitudes are consistent
with
those of some petty bureaucrat ...

There *are* a lot of unsafe commercial ships out there, operating with
obsolete and/or malfunctioning communications equipment and/or

running on autopilot with nobody *really* on watch, relying on their radar alarm to warn them of impending collisions ... many small vessels are quite literally run down by one of these behemoths because they couldn't get a reply to their calls on VHF16 or other calling channels and weren't capable of enough speed to get out of the way of the larger vessel ...

If you don't like my "tell it like it is" style, please feel free to kill-file
me and don't read my posts, but damned well stop trying to squelch me ... you are NOT the conscience or the moderator of the internet ...

> > Anyone who puts a ship to sea with nothing but obsolete communications
> > gear is a fool ...

As one with many thousands of sea mile "under my keel", I stand by the above
statement, Jim ... if you disagree, you, too are a fool IMHO ...

> Indeed, the only foolish statements that I can perceive is Stevenson
> bloody-minded posting on issues and subjects on which he hasn't got a clue of
> what he is talking about.

How many nights have you spent at sea, dodging commercial shipping that couldn't (or wouldn't) respond to radio calls on established calling channels
as you attempted to negotiate passing aggreements ???? (note that while sailing vessels under sail have the right of way under maritime regulations,
being alive is better than being (dead) right, so sailing vessels virtually always
have to ascertain (by radio communications, when possible) or guess (when the ship ignores their repeated calls) what the ships are going to do so the
sailing vessels can dodge them ...)

I suspect that you, Jim, are the one who hasn't a clue (in the *real* world ..

It seems to me that it would be like complaining to your neighbors
if they watched you taking a shower because your builder built
your bathroom and shower stall out of clear glass. If they weren't
around, you wouldn't have a problem with the clear glass as no one
would be around to see you. While it's a stretch, it demonstrates
an obvious error in the process of assigning fault. From the
person receiving the interference, the thought process is "Your
transmissions are messing up something I should normally be able
to do, therefore you are causing me the interference." The fact
a corded phone is acting as a radio receiver when it clearly
shouldn't be or that the amplifier in a stereo is improperly acting
as a receiver is of little consequence to the lay person receiving
the interference. To them the solution is simple, if you don't

transmit, they don't have interference, therefore you need to
fix "the problem".

The sad thing is that in most of the cases I'm aware of, amateurs
(either the neighboring one who's transmissions are being improperly
received or others) have offered help only to be told "It's not
my problem." Awfully hard to fix those situations. Once someone
has come to that conclusion, they will rarely back down from it
as it not only means they have to do something, they also have
to admit they were wrong.

73,
Todd

As someone who *has* been to sea and seen some pretty rough
conditions (in much smaller craft), I can in good conscience state
the following:

If a broken bridge window and some water through it can kill the
entire ship's communications capabilities, someone did a pretty
shitty job of designing and/or installing those communications
systems, Jeff ...

> (Think about how high that bridge window is, Bill, from the ocean's

In article <33604cf0.12740465@news.fastlink.com.au>,
barryoXX@fastlink.com.au says...
>
> You are ignoring the fact that it is the amateur operator that is causing
> all the trouble.
> Have some thought for the neighbour.

This follows the logic of people that move next to active airports then
complain that the airplanes are creating too much noise.

Barry..if the neighbor refuses ALL help and their only answer is to have
you off the air completely, should the neighbor be given any thought??

I would imagine that in AU, things must be very different. Maybe the
fact you guys are all upside down has something to do with it.

Remember. It was the neighbor who instigated all this. It was the
neighbor who refused any help to correct the problem. It was the
neighbor who choice use the legal system to their advantage and LOST. To
put all the blame on the operator shows a total lack of any understanding
of this matter.

Are you basing your conclusions on the (my) original post?? If so, how
did you arrive at these conclusions. If not, please explain where you
found additional information not available to others.

>Anyone who puts a ship to sea with nothing but obsolete communications
>gear is a fool ...

Reread the story. The ship's electrical system was taken out after a
wave crashed through the bridge window. You have no idea what other gear
they had aboard that ship - how can you speculate like you're doing?
The only item left operating was a portable 500 kHz xmtr.

>I have little sympathy for someone who puts a grossly ill-equipped vessel
>to sea,

Then you yourself should never put to sea, for no sea-going man would speak
of fellow sailors like you do in the above sentence. It's your obligation
to care and assist those in need on the high seas.

>then has problems, and complains about the results ...

There were no complaints - they were very happy to be saved. (You probably
would have passed them by - there they are floundering in cold icy water
during a storm and Carl says "Serves you right for losing your electrical
system and only being left with 500 kHz CW." Your cold-heart and mean-
-spirit clearly come out in your posts.)

Jeff

ARLD019 DX news

ZCZC AE19
QST de W1AW
DX Bulletin 19 ARLD019
From ARRL Headquarters
Newington CT April 24, 1997
To all radio amateurs

SB DX ARL ARLD019
ARLD019 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, Toshi, JA1ELY, 425dxnews, FMRE and Contest Corral from QST. Thanks to all.

SCARBOROUGH REEF, BS7. The 1997 BS7H DXpedition to Huang Yan Dao, Scarborough Reef, is expected to begin on April 30 and last for 7 days. Look for activity on 160 to 10 meters, including the newer bands. CW and SSB activity on 6 meters, and RTTY activity on 20 and 15 meters, is expected. Some activity on the Russian RS satellites is also expected. JA stations QSL via JA1BK. All others QSL via W4FRU.

MAURITIUS, 3B8. Fred, F6DBZ, will be QRV from here as 3B8/F6DBZ using CW and SSB, from April 26 to May 21. QSL to home call.

GUYANA, 8R. Yuki, JH1NBN, will be QRV as 8R1ZB from April 25 to 29. Activity will include CW, SSB and RTTY with operations on 14 to 10 meters. QSL to home call.

SPAIN, EA. Club station EA2URD will sign EG97CMC until October 12 to celebrate the 1997 World Cycling Championship in San Sebastian. Activity will be on all bands and modes. QSL to EA2URD.

SWITZERLAND, HB. Special Event Station HB4FG will be QRV April 26 and 27 in celebration of the 90th anniversary of the Firemen of Cavergno. Look for CW and SSB operations on 80, 40 and 20 meters. QSL via bureau.

BULGARIA, LZ. In commemoration of the 2nd IARU High Speed Telegraphy Championship taking place in Sofia, Special Event Station LZ0HST will be active until October 30. QSL via bureau.

SUDAN, ST. Sid, ST2SA, has been active from here. Look for him to be QRV on Saturdays and Sundays between 2000 and 2400z on 20 meters. QSL via CBA.

MARSHALL ISLANDS, V7. Tada, JA1WPX, will be QRV from here as V73WP from April 25 to 26, and again from May 5 and 6. He expects to be on 160 to 10 meters, including the newer bands. QSL to home call.

WESTERN KIRIBATI, T30. Between his Marshall Islands operations, Tada, JA1WPX, will operate from here as T30WP from April 27 to May 5. He will be QRV on 160 to 10 meters, including the newer bands. QSL to home call.

MEXICO, XE. XE1GTD and group are going to put Alacranes Island on the air. A multiband and multimode operation is scheduled for April 25 to 27. An XF1 call sign is expected to be issued.

THIS WEEKEND ON THE RADIO. The DX/NA YL Phone Contest, Hevetia Contest, Nebraska QSO Party, Ontario Party and QRP to the Field will fill your contest weekend. The ARRL VHF/UHF Spring Sprint for 432 MHz, is scheduled for April 30. Please see April QST, pages 98 and 99 for details.

I don't see any conflict with what I said ... I suggested that existing
licensees have until next renewal (as much as 10 years) or 5 years,
whichever was longer, to prepare to be tested to the new standards.

Only at that point would they lose their license if the were unable to
meet the standards. A license is *supposed* to prove one meets
the established standards, right? So why should anyone think they
can be incompetent *forever* and still maintain their license?

That's like saying "Yes, I went blind 10 years ago, but I should still
be able to keep my license to drive an 18-wheeler, because I passed
the test back in '57."

Retesting, with adequate time and notice to prepare to comply with
the new standards, is justifiable ... technology changes too fast and
too much to believe that someone who's been licensed since the
1940s of 1950s is still competent ... IMHO, most *aren't*, plain and
simple because they've refused to keep up ...

If that isn't fair, I don't know what is ... I see NO justification
whatsoever
for a permanent grandfathering of incompetence ...

Actually, in most cases of interference, it not the amateur operator "causing" the trouble, it is the lack of filters and shielding in the design of the consumer equipment. I can certainly understand why a neighbor would be upset; I just wish they would be upset at the manufacturer who designed equipment that doesn't work well near a radio transmitter. Radio transmitters are not rare in residential neighborhoods. (In fairness, the manufacturers are making some progress.)

Don't get me wrong; some interference IS caused by violations of FCC rules -- harmonics or other spurious emissions that interfere with other radio services. In these cases, Part 97 requires that hams fix their transmitters. Almost all hams and the ARRL agree; this is the appropriate thing to do. If interference is caused by spurious emissions, it can ONLY be fixed at the source.

Even in cases where the interference is not caused by a transmitter, the ARRL has always recommended that hams be good neighbors and help their neighbors FIND a solution. This is more than the law requires, and I believe that it does represent a good-faith effort to have some thought to the neighbor.

As Terry may have been alluding to, there are at least a small number of "interference" cases that involve harassment by the neighbors of hams, perhaps in response to other issues, such as a tower. Now, I have always held the personal belief that courts are a solution of last resort. But in cases where interference is caused by consumer equipment, and

neighbors choose to take the matter to court in the face of clear statements from the FCC and offers of friendly cooperation from the ham, it may sometimes be the only avenue open for relief for both parties.

Modest single ~2.5 wavelength yagi of older design (Cushcraft 215WB).
One neighbor could hear me through their TV set when it was "turned
off".
Apparently not only was the shielding lousy on the TV, the audio
circuits weren't powered down when the unit was turned off by the remote
control. They heard it one night when their daughter came in saying
that
a man was in the TV.

> Imagine the fun I used to have with 400 watts to an 18 dBi e.m.e.
> array on 2m! 25 kW ERP sure packs some punch!

If I was vengeful (and rich to pay for the ensuing lawsuits) I'd have
loved to put up 4 long boom yagis and 1500 watts just to see if I
could light my neighbor's florescent lights when they convinced
the village to not allow me to have antennas more than 10 feet
above the roof. :-}

You are ignoring the fact that it is the amateur operator that is causing
all the trouble.
Have some thought for the neighbour.

But you don't know that do you Carl... Your belief is found on pure
specultation, with no information to back up your claim. You have no idea
whatsoever, other than a news report to draw such a conclusion, regardless of
the real fact, now do you Carl?

> Jim ... kiss my ass ...

Carl, you haven't the guts to drop your drawers and bend over in front of me,
so don't issue any challenges that you aren't prepared to go through with.

>you pompus, anal-retentive asshole ...

Is that the best insult you have Carl? Come on, Carl, a scum sucking, bottom
feeder like you should be able to do better.

for the past
> months, you have taken to criticizing practically anything I say because

In other words, YOU reserve the priviledge of calling a spade a spade, while
that rest of us must show restraint. That's intellectual cowardice, Carl.

If you don't like it, why don't you just go away?

> > > Anyone who puts a ship to sea with nothing but obsolete communications

Oh I agree, but you have no idea whether this particular ship was properly equipped in accordance with SOLAS, do you? But you have to shoot off your yap and try to impress us, for no bloody reason, other than to be mean and nasty. The fact that you think that I am a fool is high praise indeed.

>
> I suspect that you, Jim, are the one who hasn't a clue (in the *real* world
> ..
>

You know Carl, the fact that you have spent many nights at sea is irrelevant to the discussion, isn't it? Like many of the pro-code testing arguements, they too attempt to bring in irrelevant factors to the discussion.

So tell me Carl, what are the chances that I really care about your judgements? Go ahead, lay on all the insults you like Carl. The only problem with your continued insulting postings is that it you not only insult that individual, but you assault the dignity of everyone in these newsgroups. But what is so frustrating is that it is all so unnecessary. If being insulting is what you call a spade a spade, I daresay the rest of us wish no part of it. I suppose there is nothing we can do about it, we will just have to grin and bear it. But, you haven't the guts to take some of your own medicine, do you Carl. Anal retentive indeed.

> Carl - wa6vse
> carl@ais.net
>

You haven't the maturity to reform Carl, so I guess there is no point in asking you to refrain from posting....

Good Evening Kent -- I'm not aware of an amplifier news group -- but
there is an 'amp-mail reflector' -- complete info on the
'amplifiers-mail reflector' can be found at URL:
http://www.contesting.com/ampsfaq.html

Also there is an excellent amplifier page at URL:
http://www.vcnet.com/measures/

Amplifier Manufacturer Links can be found at URL:
http://pw2.netcom.com/~ac6v/pageax.html

Links for these and 1277 others can be found at URL:

Hi Ed - There is an email list devoted to CW. I'm including the subscription instructions below.

ZUT!
Jeff KH2PZ / KH6

Welcome to the cw mailing list!

Please save this message for future reference. Thank you.
If you ever want to remove yourself from this mailing list,
you can send mail to <Majordomo@qsl.net> with the following
command in the body of your email message:

unsubscribe cw your@email.address.here

If you ever need to get in contact with the owner of the list,
(if you have trouble unsubscribing, or have questions about the
list itself) send email to <owner-cw@qsl.net> .
This is the general rule for most mailing lists when you need
to contact a human.

****

CW is a mailing list (reflector) devoded to CW (International Morse code)
use in amateur radio activities. In particular, we encourage conversation on:

* Learning and teaching CW (tapes, programs, etc.)

* Keys, bugs, and keyers

* CW detection and receiving (filters, DSP, coherent CW, etc.)

* Breakin (QSK) equipment and skills

* Signal shaping and quality

* Portable CW operating issues

* any other non-inflammatory issues re CW

To be added to the CW mailing list, send email as follows:

To: list-request@qsl.net
Subject:

Body: subscribe cw

To be deleted from the CW mailing list:
send email as follows:

To: list-request@qsl.net
Subject:
Body: unsubscribe cw <your email addr>

To post items to the reflector, send email as follows:

To: cw@qsl.net

If you hve any questions or need assistance contact:

k7gt@qsl.net

See you on the reflector AND on the air!

73 es GL de K7GT

Well, Dayton is almost here. Whata you figure the odds are of finding
one. Probably slim to none, but I'll really look! Whew with that I
could play real well!

Need to verify best UTC time from middle atlantic state of Maryland to Scarborough Reef in the South China Sea on 20 meters. I read that morning hours (e.g. 1100Z-1400Z) will be the best time. Can anyone fine tune that for me please. Also would appreciate UTC times for 40m, same path. Thanks. 73 Murray K3BEQ

Howdy Murray
You might want to take a look at propagation prediction programs at URL:
http://pw2.netcom.com/~ac6v/pageap.html#PROP

On the west coast, I have worked that part of the world early in the
morning on 40M

For 20M -- morning hours and late evening.

Good Hunting

>:
>:Terry
>:KI7M
>
>You are ignoring the fact that it is the amateur operator that is causing
>all the trouble.
>Have some thought for the neighbour.

It is not entirely the radio amateur "causing the problem". The radio amateur should do everything he can to eliminate the problem, but the source is often poorly designed equipment owned by the consumer who is being interfered with. It certainly helps if the person experiencing the interference is willing to cooperate! Something may actually be accomplished in this case! And my assumption is if the person does not want to cooperate, then that person has some hidden agenda or some other reason for complaining.

I worked in the home electronics repair business for 10 years. During that time I heard HUNDREDS of interference complaints and requests to assist. Roughly 25% were complaints of interference from radio amateurs. Another 30% or so from CB interference. The other 45% were complaints from connercial radio and TV stations!

A local FM station moved its transmitter from the very edge of town into the center of the city. Immediately they started getting THOUSANDS of complaints from people who experienced interference on their phones (both cordless and corded), stereos, VCR's, CD players, phone answering machines, etc. These machines had NO shielding or bypass for RFI. Often I could correct the matter by lining the inside of the plastic case with aluminum foil. Sometimes I just could not cure the RFI in a piece of equipment. My advice to the consumer in this case (and this was not as a radio amateur, it was as a professional service person) was to replace the unit with a different brand. Most of the time this worked.

During the 10 years I worked at this repair shop I got to see practically every type of home consumer electronics available in the USA in the last 20 years. The older equipment had considerably more shielding built in than the newer stuff. I think it's just a case of "cutting corners" by the industries. The newer equipment is PITIFUL when it comes to RFI shielding. It's NON-EXISTENT!

Radio Shack and others DO make some "bullet-proof" (RFI-proof) phones. I have one. I do not experience ANY RFI on it on any band under any power run from my own shack. The phone is a bit more expensive. You get what you pay for. And when I demonstrate that I am not experiencing any interference at a distance of 50 or 100 feet from the antenna, neighbors cannot but admit that their phones are at fault (unless they have a hidden agenda as mentioned above).

Well, after a promising early start when most of the postings on this newsgroup were about DX, it looks like it's gone down the toilet.

I just read about 50 postings and only about 30% had to do with DX. Now it's become a cross-posting place for articles that really only belong on rec.radio.amateur.misc and/or rec.radio.amateur.policy. Oh well, it was nice while it lasted.

Just to throw some REAL DX into the posting, does anyone have the QSL route for 4S7AX ? Or was he a slim? I worked this station a year ago and have come up completely blank on it.

(BTW I see NOTHING wrong with requests for QSL routes here if all the standard sources have failed. It's at least about DX!)

DX IS!

1. I do not drink.
2. It was a Sunday morn.
3. I had so much fun the first time I posted, I did it again.
4. I weigh 185.
5. My wife is here, we had a great day.

1172. New Concept! Cyberscheds Your Next DX and Satellite Contact!

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-27 00:00:00 UTC
From: wb6siv@telis.org
Message-ID: <wb6siv-2704972128240001@host45.clr.cyberg8t.com>
Source record: 32868

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's.
I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.
Post Date: Sept. 6, 1996

1173. Soliciting Opinions on Logging Software

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-27 00:00:00 UTC
From: n2ckh@cybercomm.net
Message-ID: <3362a7bc.13208088@news.cybercomm.net>
Source record: 33050

SUBJECT:

Soliciting Opinons on Logging Software

PURPOSE:

Help us to make certain decisions in the development of new
software for the hobby.

REQUEST:

At this time I would like to ask my fellow amateurs via this
medium to respond to this message at my e-mail address, not
to the reflector, with your opinions on the following
questions.

QUESTIONS:

1. What logging software(s) have you used ? (Please list program
name(s) and versions and also indicate if DOS or Windows.)

2. What features in logging software do you love ?

3. What features in logging software do you wish you had ?

4. What characteristics about logging software do you hate ?

5. What environment do you currently use: DOS or Windows v3.x or
Windows 95 or Windows NT or other ? (please list other)

6. What enviroment will you be moving to next ? (see choices in 5.)

I would like to thank everyone in advance for their time it took
to respond.

/s/ Steve, N2CKH

Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

Hi there,

In 1992 I obtained my full ZS licence and have been very active on the bands. Also very active filling out QSL cards and sending them off either direct or via the bureau.

And the return on all the QSL cards I have sent out? Not enough to qualify for the DXCC. I have 76 countries confirmed for DXCC. About 14 US States confirmed. But it seems to me that there are many QSL card collectors out there. They enjoy receiving cards but DO NOT ENJOY sending out cards.

If you have worked ZS4BS and received a QSL card and not yet returned one - how about it? If you have worked ZS4BS and NOT received his card - well let met know and I will ensure that it is in the post to you. [please supply your direct address for express service].

You can QSL via the bureau, or direct to Dennis Green ZS4BS, P.O. Box 12104, BRANDHOF, 9324, Rep of South Africa.

E-mail : dennig@netactive.co.za
Packet : ZS4BS@ZS0BFN.OFS.ZAF.AF

FCC Expected to Unveil Plans For Two Airwave Auctions

WASHINGTON -- Federal regulators are expected this week to set plans for two long-awaited auctions of valuable airwaves, including one for an emerging wireless technology that could bring new competition to the local-telephone and cable-television businesses.

Wireless operators, long-distance phone companies, electric utilities and telecommunications entrepreneurs are eager to bid for licenses to use huge chunks of the amateur radio spectrum to transmit voices, pictures and data.

Wireless Auction

Up for grabs: Licenses to use most of the amateur radio megahertz of electromagnetic spectrum in each of nearly 500 markets nationwide. Repeater frequencies are much in demand by those with the following: Uses: Transmitting voices, pictures and data via small, flat antennas that can rest on a windowsill. Expected bidders: All sorts of telecommunications companies -- but Baby Bells and cable operators will be barred from bidding on licenses in their home territories.

"While the auctions for PCS frequencies were very specific about how the frequencies could be used, rules governing LMDS usage are more liberal and for a bigger chunk of amateur radio bandwidth," said Michael Sprayberry, director ofwireless strategy for MCI Communications Corp.

New Radio Service

The auction rules have been delayed in recent weeks because FCC commissioners couldn't agree on what amateur radio spectrum would be available.

The technology operates with small, flat antennas that communicate with larger antennas mounted on towers. It has tended to work poorly in heavy rains and fog, but industry officials say they are working to fix the problem. Operators also could run into resistance from cities that increasingly are blocking the construction of new antenna towers. However ham towers could be seized as the FCC has decided that the amateur radio service no longer serves the public necessity.

Don't believe you. Your troll was obviously the product of a lonely
mind damaged by years of abuse. It was a little less obnoxious than
your Sarex BS though. A serious question do you hate yourself as much
as you hate other hams.

YOW!!!

>I think the microphone connector on the
>PSU/modulator unit was also a Belling Lee coaxial type. Perhaps
>Labgear had shares in Belling Lee!

Well, I worked for Labgear at one time, and one of their main
businesses was the manufacture of TV accesssories - pre-amplifiers,
pattern generators etc. They also made nice SSB military xcvrs
with a 10.7 MHz i.f.! Backpack jobs that were solid state and ran
about 10 watts best I remember.

No doubt they had plenty of Belling-Lee co-ax connectors for all the
TV stuff.

1189. Summer 50MHz Dx News

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-28 00:00:00 UTC
From: Geoff Brown <equinox@itl.net>
Message-ID: <33656BB1.5BA4@itl.net>
Source record: 32878

Here's the latest 50MHz Summer DX News:
de Geoff GJ4ICD........
Updates on http://user.itl.net/~equinox/50ex.html
****

Renny 9A3FT reports that he will be qrv from JN82 in June/July.

SM4HEJ reports he is now active from JO69OJ. IC706.

V5: Laurence Howell GM4DMA is hoping to be active on all HF band and
50MHz
signing V5/GM4DMA from June 17 1997 for 1 month.

3C: A group of EA's will go to Annobon Isle 3C0 in May, they plan to
operate on all HF
bands and 6 meters. A CW breakable beacon will be on 50.133 cw/ssb and
50.092 for
CW only during all posible hours of no visible openings..... info de
Jose EA7KW

OX: Bo, OX3LX will be QRV on SIX from 29/4-12/5-1997 GRID:GP36,GP35,GP45
RIG:ICOM 736 100W and 3 Elm:
I will try to be QRV from South Greenland GP60 in last part of June 14
days ahead.

TA: HB9SUL is in KN40 for a business trip up to the end of June. He
hopes to get ready
for 50 and 144MHz TROPO / ES. Some MS with 150W and single yagi!
Also a TA call may be available later (eg. TA2ZMS). In the May contest
he will try to
use a vy good QTH in KN41 - so keep an eye in his direction.......HB9SUL

TA: OZ3SDL TA Trip On! My summer expedition to Turkey will now
definitely take
place. Please note that a 50 MHz permit has been authorised by the
Republic of Turkey,
Ministry of Transportation, General Directorate of Radiocommunications;
this can be
made available for inspection if necessary (as can previous permits!).
The station will be
operational from late evening on Saturday 17 May 1997 until late on
Saturday 24 May
at the Club Hotel Sera, Antalya, KM56IV, Lat 36 53 00 N, Long 30 42 06
E. The call
will be TA4/G3SDL. This is mainly a business trip, 19-21 May being
business days,

operations on these 3 days will therefore essentially be at lunch time and in the
evenings.
I will run a 10 Watt beacon on 50.093 MHz when not in the shack, if the beacon is heard
telephone calls may be made to me on +45 40 79 54 42, my GSM mobile telephone
number. I may also take an occasional dip in the swimming pool which will no doubt
coincide with a major opening! My working frequency will likely be 50.135 MHz
depending upon local QRM etc. Equipment will be a Kenwood TS60 and a 2 element
HB9CV on the hotel roof.
Please note this new QSL route as I shall be moving from Denmark to Ireland at the end
of June 1997. Bureau cards should be sent via G3SDL and direct cards for the time
being should be sent to Dave Court, 9 Greenwood Close, Petts Wood, Kent, BR51QG,
England.
Regards to all and look forward to working you all on the magic band this
summer.....73s Dave OZ3SDL/G3SDL

XE1: Andy will be active from mid April using 100 watts on six and signing XE1/G3SVD.
QSL via G3SVD.

SU: Ezzat SU1ER is now qrv with 100w. FT690 + 100w MM Amp.

J6: Plans are being made for an expedition to J6 by a US contingancy. (June)

Tom SP5XMU reports that Locator KN09 will be active 21th and 22nd June 1997 ,
during SP-VHF-C meeting.

V47: Jimmy W6JKV and the gang will be active from V47 again during June.

D44: Julio D44BC promised to put in an appearance this Summer. (50.110) TS60 + 5el.

CY9: Mike VE9AA will be active as CY9AA during late June/July. 500w + big antenna!

JY: JY9QJ should be active for May/June/July with our old antenna we left in JY and an
IC736.

A6: Info from VK states: A6SIX for June? Slim? Not sure abt this one!

7Z/HZ: Lookout for 7Z5OO during June/July.

9K: 9K2CA is now active on the band. 100w IC706.

TF: TF/PA3DWD, June 26-July 16 Expedition. IC706.

4L: June/July Omari 4L5O will be active with 50w and 5el. TS690 (50w)
5el.

C6: Look out for John C6AIE from June 5th to 19th. John has sent mail
stating that he
WILL be breaking the USA pile up's for those in Europe needing C6. He
was heard last
year for 4 hours in GJ off the back of his beam!

YN: YN6WFM (remember when he was in HR2?) as JA6WFM/HR2 and we all
worked
him! Well keep a look out for him all this Summer from YN.

YI: Steve VK3OT reports that a VK is currently in YI and wants to get
active on
50MHz. (UNCHR)

5A: Watch out for 5A1A during June, our Italian friends have promised to
coach him
back on Six!

9G: Lookout for 9G1YR during late May/early June. that's the best time
for TEP/ES.
Last year TR8CA was worked during this period.

The Nordic VHF/UHF/SHF meeting.
It's an annual meeting wich this year will take place in SM on the 6-8th
of June. In the
island of Oland, in the south-east part of SM. There will be lectures,
measurements
(preamps, antennas), barbeque, gd food, flea market and a lot of VHF/SHF
friends
there. SM5BSZ and SM7UFW will probably be the ones responsible for the
antenna-measurements. For info, registration and more:
http://ham.te.hik.se/clubs/sk7ca/vhf97/index.html .....73 de

Why indeed did you follow up to as many news groups as I did. I forgot to trim what's your excuse. I trimmed the list but since you replied from DX I'll send this there as you seem to want. You really should learn to debate rather than resort to personal attacks on completely different subject lines. I noted with interest your message to Carl that you felt it was OK to publish anything you chose to from private email. I presume what is sauce for the goose is sauce for the gander.

Direct from the Sony WEB page:

ICF-SW55
MSRP$ 449.95

AM (LW, MW, SW)/FM stereo reception

Precise manual/scan tuning

Electronic rotary dial for manual tuning

125 station memory presets programmable by station name

Universal time coordinator (UTC) with world time scale

PLL quartz frequency synthesis tuning

10-key Direct Access tuning

Factory-programmed country and frequency presets

Built-in clock with alarm, sleep function and timer stand-by

Backlit LCD readout with contrast adjustment

Tape record-out jack

I bought this a couple of years ago and have used it about 10 hours total.
Just never got the hang of DXing.

It comes with the ac power supply, soft case and deluxe hard case, Sony ear
phones, and the long wire antenna coupler.

I have misplaced the compact long wire antenna that came with it. The internal
antenna works great or you can hook up your own long wire antenna with the
adapter that's included.

Yours for $225.00 plus shipping costs.

Email your offers to: greeby@onramp.net

Absolutely.

A co-worker of mine recently had a neighbor put up a CB antenna. He
immediately began receiving interference on his DSS. Luckily, this
co-worker works for a TV station and rather than raising a ruckus with
his neighbor or calling the sheriff, he called our engineering
department. I learned today that one Radio Shack snap-on toroid on
the DSS feedline totally eliminated the interference.

Just one excellent example of cooperative effort solving a severe EMI
problem without screaming & gnashing of teeth..

> including one for an emerging wireless technology that could bring new
> competition to the local-telephone and cable-television businesses.This service was recently licenced to three Canada wide companies..Cellularvision, Regionalvision, and Maxlink (Digitalvision). The network is a cellular point to point system operating in the 28 Ghz range and is designed to provide bi-directional telecom, cable tv, videoconferencing, and internet/data services to homes and businesses. Each of the three companies in Canada has a licence for a 500Mhz band. As of today, two test "cell" sites are operating in the Metro Toronto area. The system is based on the NY City "Cellularvision" technology, which has been in use in NYC for a few years now to deliver wireless cable tv (MMDS) service. This does not, in any way, affect the ham bands.

1212. new logbook software

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-30 00:00:00 UTC
From: Sipke Wagenaar <fcb@worldonline.nl>
Message-ID: <01bc5548$bb6388c0$348f099a@sw>
Source record: 32901

April 30, 1997

Dear HAM,

In May we (FCB) will come with a new logbook programm for
IBM compatible computers. It's a programm with for example:

* Regio number for Dutch cities in it, together with QTH locator
(new) and distance/angle to your station. (Almost) all Dutch
towns in it.
* Complete QSL registration. It sends for every band a QSL till
the other radiostation confirmed the band.
* See (for every band) if you have worked the radiostation in the
past and if the QSO is already confirmed.
* Holds name, place, info about transceiver, antenna, distance,
angle, locator, etc. of the other radiostation
This info is available during your QSO
* Have a look. during the QSO, to other QSO's you've made
with this radiostation in the past
(You can scroll without leaving the present QSO)
* Have your logbook on the computer screen or print it.
* Many other things

* Do use (in future) the options we'll intend to make for the
programm like: calculations, analysis for QSO's, worldwide
(or local) certificates, contest possibilities - these QSO's in
the logbook for QSL - worldcharts, etc.

For having satisfied customers, we'll only distribute a demo
version of the programm. You can use this for 100 (one
hundred) QSO's. (After registration - for a low fee you can
still use this first 100 QSO's)

The Dutch version will leave us in the beginning of May, the
English version in the end of May. (Please let us know if you
want to have other languages like French, German of Spanish)

You're also free to give a demo version to your (HAM)friends.
With your (demo) programm you can make a demo on diskette.

If you're interested, please do e-mail me at:

fcb@worldonline.nl

and receive shortly information or (if possible) the demo-
programm by internet (e-mail)

With HAM-greetings from FCB (Harlingen, the Netherlands)
Sipke (PA3CWR)

1213. IOTA EU-38 activation

1214. FR5DX - QSL received!

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-30 00:00:00 UTC
From: Andrew Mitchell <"spam.jam@amitchell"@sympatico.ca>
Message-ID: <5k89qodgm1@news2symp>
Source record: 32903

Despite the rumours of poor QSL returns...

I received a card from FR5DX today, only a month after sending it! I enclosed 2 IRCs. It was interesting to note that the card was mailed from Little Rock, AR.

1215. YAESU ANNOUNCES NEW KW HF+6M Amplifier

Newsgroup: rec.radio.amateur.dx
Date: 1997-04-30 00:00:00 UTC
From: Joe BV/N0IAT <joentam@transend.com.tw>
Message-ID: <3366EED6.44B@transend.com.tw>
Source record: 32904
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.dx

I just received my April issue of CQ-Ham Radio (the JA ham
magazine). Several new products are now available in JA, including
new offerings from Yaesu, Alinco, and Icom.

Icom announces IC-706 Mark 2 (old news, I suppose)
Yaesu announce FT-920 (old news, I suppose)
Alinco announces DJ-C1 and DJ-C4 micro slim 300 mW vhf/uhf radios.
Yaesu announces: VL-1000/VP-1000 solid state linear amplifier.

For those not familiar with the JA regulations, they were changed
recently with the primary modification being power output increases
for the various classes of ham licenses. The Class-1 licensee
is now allowed to broadcast at 1KW output, as opposed to the previous
limit of 500W. In line with the power increase, Yaesu has introduced
the VL-1000 1KW solid state linear amplifier. Specs follow, albiet
from my weak Japanese language reading ability. Additionally, Yaesu
announces the matching VP-1000 Amplifier Power supply. Some key
points:

Band Coverage: 160 THRU 6 meters,
Power: out 1KW on 160 thru 10, and 500W on Six Meters
Size of Amp: 41cmX13.5cmX41CM (HWD)
Size of PS: same size as amp...matches amp
Includes built in (integrated) 1KW Automatic Antenna Tuner
capable of matching a 16.7 to 150 ohm load on HF bands and
capable of matching a 20 to 125 ohm load on SIX meters
Transistor line up: 8 X MRF150 MOSFETs
Operating Voltage of amp: 48 amps at 48 volts
Power supply: capable of running on 100 to 120, or 200 to 240 VAC
suggested using 220VAC if running 1KW.
Weight: 15 Kg for the amp, 12 Kg for the power supply

The amplifier display is an "omni glow" LCD readout, and though
the print is small, I believe one can monitor the following
items: Out Power, VSWR, Collector Current, Frequency, and mode.

This is a slick looking amplifier, much better than the predecessor
FL7000, which is now about 12 years old (or more?). Styling
matches the FT920 exactly, with the 1000MP being a close but not
perfect match. To see a picture of the map, go to my ham radio
web page at:

http://www.transend.com.tw/~joentam/VP1000.jpg

73, and hope DXers, contesters, or those looking for an amp find
this information useful.

73,
Joe Fitter BV/N0IAT in Taipei Taiwan R.O.C.

To all radio amateurs

SB DX ARL ARLD020
ARLD020 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, Tim, N4GN, DXNL, 425 DX news and Contest Corral from QST. Thanks to all.

SCARBOROUGH REEF, BS7. The 1997 BS7H DXpedition has begun. Most areas of the world have reported strong signals, while propagation to central and eastern North America has suffered from a moderate increase in geomagnetic activity. The team has made quite a number of QSOs so far. JA stations QSL via JA1BK. All others QSL via W4FRU.

GUINEA, 3X. Philippe, F5IEV, is now signing 3XY3A from Conakry, and will be active until June 15. He can usually be found on 14020 and 14130 kHz. He has also been reported on 21236 kHz between 1730 and 1830z. QSL to home call.

SRI LANKA, 4S7. Mario, HB9BRM, is QRV as 4S7BRG until May 30 and is working RTTY on the weekends. QSL via bureau.

MALDIVES, 8Q. Mike, OE3MZC, and his XYL Barbara, OE3YCB, will be active as 8Q7MZ and 8Q7BZ, respectively, from Rashdu Atoll, Kuramati Island, until May 14. Activity is expected on all bands, with preference given to the IOTA frequency of 14260 kHz. QSL via OE1PYA.

NEPAL, 9N. Kazu, JA8MWU, is active as 9N1WU until May 6. He will be QRV on 80 to 10 meters, SSB only. QSL to Kazu Abe, PO Box 1214, Kathmandu, Nepal. Murray, VE5SM, expects to sign 9N1SM in mid May and be QRV on 40 and 20 meters. QSL via VE8PW.

TAIWAN, BV. Johannes, BV3/DL5AUJ, will be QRV from the QTH of Hans, BV3/DL4AMJ, from May 5 to 13. Both will participate in the MIR Contest as BV0THU. QSL to DL5AUJ.

FRANZ JOSEF LAND, R1FJ. Nick, R1FJV, will be QRV from here for the rest of 1997. He can be found on 40 to 10 meters, using mainly CW. QSL via UA3AGS.

SEYCHELLES, S7. Paddy, S79MAD, will be QRV from here for four months. Activities will include RTTY on the newer bands. QSL via GW4WVO.

FALKLAND ISLANDS, VP8. Duncan, G0NWY, will be QRV as VP8CEH until October 1997. QSL via home call.

LORD HOWE ISLAND, VK9. Ed, K8VIR, will be active from here as VK9EHH until May 6. Look for him to be QRV on 14260 and 21300 kHz. QSL to his 1997 CBA.

THIS WEEKEND ON THE RADIO. This is a busy contest weekend. Participate in the ARI International DX, Danish SSTV, MARAC County Hunters CW and Ten-Ten International Net Spring CW Contests. The Massachusetts, Texas and Connecticut QSO Parties are also scheduled. Please see May QST, page 97 for details.

1217. New logbook software

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-01 00:00:00 UTC
From: Sipke Wagenaar <fcb@worldonline.nl>
Message-ID: <01bc5669$b024fc60$408f099a@sw>
Source record: 32810

May 1, 1997

Dear HAM,

In May we (FCB) will come with a new logbook programm for
IBM compatible computers. It's a programm with for example:

* Regio number for Dutch cities in it, together with QTH locator
(new) and distance/angle to your station. (Almost) all Dutch
towns in it.
* Complete QSL registration. It sends for every band a QSL till
the other radiostation confirmed the band.
* See (for every band) if you have worked the radiostation in the
past and if the QSO is already confirmed.
* Holds name, place, info about transceiver, antenna, distance,
angle, locator, etc. of the other radiostation
This info is available during your QSO
* Have a look. during the QSO, to other QSO's you've made
with this radiostation in the past
(You can scroll without leaving the present QSO)
* Have your logbook on the computer screen or print it.
* Many other things

* Do use (in future) the options we'll intend to make for the
programm like: calculations, analysis for QSO's, worldwide
(or local) certificates, contest possibilities - these QSO's in
the logbook for QSL - worldcharts, etc.

For having satisfied customers, we'll only distribute a demo
version of the programm. You can use this for 100 (one
hundred) QSO's. (After registration - for a low fee you can
still use this first 100 QSO's)

The Dutch version will leave us in the beginning of May, the
English version in the end of May. (Please let us know if you
want to have other languages like French, German of Spanish)

You're also free to give a demo version to your (HAM)friends.
With your (demo) programm you can make a demo on diskette.

If you're interested, please do e-mail me at:

fcb@worldonline.nl

and receive shortly information or (if possible) the demo-
programm by internet (e-mail)

With HAM-greetings from FCB (Harlingen, the Netherlands)
Sipke (PA3CWR)

Without knowing what NG you posted your insults to Burt on there was no
way to trim the header. I'm reading your nonsense on .dx but you might
be on .misc or elsewhere - so what which NGs should be trimmed?

>I forgot but you oh netcop know better.

Tell me which NG you're on and I'll do some trimming; in the meantime,
got any DX news to share with us?

>To the rest sorry for the bandwidth Jeff is a little testy with me just

>Does anybody know the origin of the cw testing v's?(vvv vvv vvv)
>Is it the WW2 "v for victory", or is it older?
>Einar

Hello Einar - My guess would be that one would want to check if the dit-contact adjustment was properly set (if using a Vibroplex or other semi-automatic keyer). If using a straight key, a series of V's would help to loosen up the wrist.

73, Jeff KH2PZ / KH6

P.S. "VVV TEST DE NMO GE" was my usual test on 500 kc; after that 500 would be flooded with GE's from ships and shore stations around the Pacific. ("GE" = Good Evening)

3C0DX bulletin 03

Message #90
Date: Fri, 02 May 1997 01:28:17 +0200
To: 425dxnews@pc.fr.flashnet.it
From: Julio Volpe <jvolpe@lix.intercom.es>
Subject: 425DXNEWS: 3C0DX, Bulletin #3

3C0DX, Annobon Is., Bulletin #3.-

URE is taking special care with the material to take to Annobon Is. for
the next 3C0DX, this May from 20 to 27.
Everything has to be carried there: tranceivers, amplifiers, anntennas,
foods, kitchen's tools, glasses, water depurator, medicines, etc.
A lot of weight to fly. Two litlle planes have been rated to fly from
Libreville to the Island where it is not any big airport. Three complete
stations will fly to Annobon: 3 Kenwood TS-570 D, 1 Kenwood TS-690 S,1
Yaesu FT-290 R, 3 1KW lineals amplifiers, 3 power generators, 2 A3S and 1
R-7000 Cushcraft antennas, 1 Batlle Creek Special-Beverages, 1 5ele. for 50
mHz and 1 9ele. for 144 mHz Tonnas antennas and a few dipoles.
As soon as the operators arrives to the Island we would find them in a
super all band operation in SSB, CW, RTTY, 50 mHz and Satellites.

FOR SALE:
Yaesu FT 840 in NEW Condition. I added optional FM
unit and includes the optional mobile bracket. This is a current model,
not a discontinued one.

The rig has 100 memories and dual vfo's. The price is reduced to $650(
firm) plus shipping. I used the radio very little times. Great H.F. rig
for a potential or General ticket holder. Easy to use! I got the rig in
anticipation of upgrading to General, but haven't had the time. Lots of
nice features. Dual VFO's.

Very nice clean rig, though...

All Motorola software is Licensed.
You must sign a license agreement with Motorola or face
criminal prosecution. And BOY do they prosecute!
Their attorneys are constantly finding software violators
and when they do they are neither kind nor merciful.

Suggestion: Just buy the software from them directly. 800-422-4210
The software may be expensive, but after all it comes
nowhere close to paying an attorney or legal fees.

BTW: I am NOT employed nor am I a representative of Motorola.

1235. New logbook software

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-03 00:00:00 UTC
From: Sipke Wagenaar <fcb@worldonline.nl>
Message-ID: <01bc5789$28c88fe0$358f099a@sw>
Source record: 32825

May 3, 1997

Dear HAM,

In May we (FCB) will come with a new logbook programm for
IBM compatible computers. It's a programm with for example:

* Regio number for Dutch cities in it, together with QTH locator
(new) and distance/angle to your station. (Almost) all Dutch
towns in it.
* Complete QSL registration. It sends for every band a QSL till
the other radiostation confirmed the band.
* See (for every band) if you have worked the radiostation in the
past and if the QSO is already confirmed.
* Holds name, place, info about transceiver, antenna, distance,
angle, locator, etc. of the other radiostation
This info is available during your QSO
* Have a look. during the QSO, to other QSO's you've made
with this radiostation in the past
(You can scroll without leaving the present QSO)
* Have your logbook on the computer screen or print it.
* Many other things

* Do use (in future) the options we'll intend to make for the
programm like: calculations, analysis for QSO's, worldwide
(or local) certificates, contest possibilities - these QSO's in
the logbook for QSL - worldcharts, etc.
For having satisfied customers, we'll only distribute a demo
version of the programm. You can use this for 100 (one
hundred) QSO's. (After registration - for a low fee you can
still use this first 100 QSO's) Of course you can make more
QSO's with the registrated copy.
The Dutch version will leave us in the beginning of May, the
English version in the end of May. (Please let us know if you
want to have other languages like French, German of Spanish)
You're also free to give a demo version to your (HAM)friends.
With your (demo) programm you can make a demo on diskette.
If you're interested, please do e-mail me at:

fcb@worldonline.nl

and receive shortly information or (if possible) the demo-
programm by internet (e-mail)

RECEIVE THE DEMO-VERSION FOR FREE (NO COSTS)
BY E-MAIL

With HAM-greetings from FCB (Harlingen, the Netherlands)
Sipke (PA3CWR)

1236. What is the meaning of a /1 callsign suffix?

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-03 00:00:00 UTC
From: John Charles <jaycee@midmarsh.demon.co.uk>
Message-ID: <KXoWDCANMwazEwl3@midmarsh.demon.co.uk>
Source record: 32826

I am listening to a station working from EU132 (Wolin Island) on 14.261 MHz.

The operator is giving a callsign of SP6ZDA/1 and I was wondering what the /1 suffix indicated as I can't remember hearing this before now.

I notice that in the IOTA list EU132 is listed as SP 1. Could this be where the 1 comes from? Does it indicate that an SP6 is working from an SP1 location?

My atlas doesn't list Wolin - does anyone know exactly where it is?

Murray Green <mgreen@erols.com> wrote:

>Has anyone in the 1,2 and 3 call areas worked BS7H Scarborough Reef on
>SSB. If so at what UTC/band please?

>CW Qs galore but no SSB heard here in the WashDC area.

>73 Murray K3BEQ

Add 4 to that list Murray....They are QRT early just before 0700 5/3.
N4GN said they would work CW as condx were poor and when they did try
to work NA East Coast (they were 5/5 in Maine and Georgia they could
not hear us. 1200Z on 2 may.

I heard 3 QSO's on 18.115 at 0300Z on 1 may...just not quite enough
for QSO from 4 Land atho they did work W9 and W0.

That storm (fully expected) ended all but a few CW Q's on the last
day. They were 559 on CW the first two days but yesterday 239 with
pings up to S4. Times 0900 to 1130Z in Atlanta. Stronger on SSB but
again could not hear us!

Guess there is not enough room on the rock (see the BS7H web page)
to put up antennas good enough for Eastern USA/VE..hopefully when
condx get better they will go back and try again.

The first BS7H (did not count) was worked at 0950Z at loud 5/9. The
Second was worked on CW and only heard on SSB for 5 minutes on the
last day. This operation got there on the last day of a nice 3 day
opening. By day 2 the condx were gone...even JA has been weak on 20
altho YB and VK are loud.

Dave K4JRB

1238. BS7H QRT Early

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-03 00:00:00 UTC
From: thompson@mindspring.com
Message-ID: <5kfadu$3o7@camel2.mindspring.com>
Source record: 32828

The BS7H operation QRT early. Operation mostly CW when heard in Eastern NA. They got there on the last day of a good three opening to Asia for W4 but were on CW while the band was good for us that day. I worked the last op on CW so did not call. By 1 may the bands went sour and the only time they were heard on SSB in W4 (1200 to 1240Z 2 may) at 5/5 they could but hear us altho they listened several times.

Came close on 2 May at just after 0300Z on 17 meters. Heard PY stations calling on 18120 from 0130 to 0300. A PY6 worked them and all of a sudden I could hear a voice. I heard them work three stations and clearly heard them work W0GJ. I called several times but the voice was talking another language in QSO (JA??) and then you could just tell they were there and in 10 minutes it was gone.....Not quite as strong as XZ1N who was worked last fall...

Maybe one day we will get a SSB QSO with BS7H but sunspots will need to be better and the A and K indices must be low...

For now Phone DXCC 360 and holding for well over 3 years.....

Dave K4JRB

Hi John,

The /1 usually means that the station is operating outside his/her normal
callsign area.
in this case sp6 station is working portable sp1.

DX Antenna System For Sale

Antenna system consists of:

1. 80' motorized aluminum crank up tower. This is an extreme duty

two section triangular tower. Bottom section is 36" per side at

the base, and 30" at the top (48'). The top section is 24" per

side and is 32' long. The vertical legs are 2" heavy wall military

spec. aluminum pipe, and the cross ties are solid 1/2" aluminum. All

hardware (nuts, bolts, pins, rollers, etc.) are stainless steel.

This is a stand alone tower (no guys) and is motorized with an

electric winch. Total weight is approx. 490 lbs. Original cost was

6,100.00 in '92. It remains in perfect condition. Cranked down height

is 48'. The base consists of three 2" X 6'6" heavy wall stainless steel

pipes which are inbedded into a 6' cube of reinforced concrete. They

protrude 6" out of the ground, and have stainless mounting plates

welded to them. This part of the tower will have to be refabricated

at a cost of probably around $100. Mast is 12' of 1/4" wall 2 1/2"

Aluminum (cost $90) with a 2 1/2" thrust bearing (cost $80).

2. KLM KTX34A tri-band beam 3 years old (had a mosely pro67b up

for year and a half, but didnt like the performance.) This is a

big antenna, but it's a pileup killer.

3. Cushcraft 2 element 40 meter beam...2 1/2 years old. Have

226 contries confirmed on 40 since I put it up.

4. Yaesu G-1000SDX variable speed rotor with 12' of heavy wall

aluminum mast.

5. Cushcraft 13 element 2 meter beam on side mounted seperate rotor

at top of tower...2 years old.

Since putting this antenna system up in various stages, it withstood

perfectly hurricane Andrew...(That is what it was designed to do). As

far as performance, it took me 2 1/2 years to work 5 band DXCC (Plaque

dated March 27, 1995,) with 308 total confirmed, with 226 on 40 meters.

I am forced to sell this system which I had planned to keep for the rest

of my life, as I am being transferred to Florida. It's just too much

trouble to move it all, and go through setting it all back up. However,

I'm not desperate...I'll store it if I have to.

Selling price is $4,800 U.S. Dollars and I'll take it down. I may split

part of the freight in the eastern U.S.A. If you have a jpeg file

viewer, I attached 2 small Pix.

If Motorola would support their products like other radio mfgs, they wouldn't have a software pirate problem. King, (sub) Standard, and many others only charge minimal fees for software or will post on their bulletin boards for free! I know many shops who have sent in radios for repair only to find it was re-programmed with a newer ver. software and now the shop has to bend over and purchase MORE software just to be able to program a radio they have owned for years! Or one city PD that purchased a large qty of Mots and needed several versions of software to program identicial radios in the same shipment. I have seen more than one radio dealer financially ruined by Mot for software infringment. My personal opinion is SCREW Motorola!!!!! I wish someone out of the country would post the software on the internet so everyone can have it free, and make those big Motorola lawyers squirm.

Why do all the royalties always go to Motorola and not the real creators of the work?

You can talk all day about "work for hire" but I still think all the talk about intellectual
property rights is just another money grab by large corporate interests. There would
be NO talk of this if software creation was treated like an art, with such common
niceties as CREDIT to the actual writers, and ROYALTY agreements. A multimillion
dollar movie credits even the manufacturers of the film and cameras, but in a similarly
sized software project any credit to anybody is hidden, at best.

This ended up being cross posted. This is easy to inadvertently do, as
most mail
programs simply copy multiple group postings in subsequent postings and
replies.

Until the mail programs change, you will see this happen a lot. Not really
a big
deal. Do you really think a glitch this small ruins a newsgroup?

Sure.

First it is just as easy to pay attention to where things are going and
erase the newsgroups that have nothing to do with the subject.
Inadvertant is really inconsiderate.

This is a small ng but why does that mean it can't be "pure". That was
one of the things that was discussed when this ng was born. Postings
that are not "on topic" are a waste of bandwidth and space in my
computer and on the server. How much is wasted when the sender posts
the article across the entire spectrum? A lot.

What it boils down to is that this ng was dedicated to DX. Not FS, not
WTB, not Help my toaster is burning when I'm on 15 cw, etc etc etc.....

Sure.

First it is just as easy to pay attention to where things are going and
erase the newsgroups that have nothing to do with the subject.
Inadvertant is really inconsiderate.

This is a small ng but why does that mean it can't be "pure". That was
one of the things that was discussed when this ng was born. Postings
that are not "on topic" are a waste of bandwidth and space in my
computer and on the server. How much is wasted when the sender posts
the article across the entire spectrum? A lot.

What it boils down to is that this ng was dedicated to DX. Not FS, not
WTB, not Help my toaster is burning when I'm on 15 cw, etc etc etc.....

I'm sorry for my lack off consideration on my last posting. I forgot to check where it was going. Mistakes do happen, but I still feel that we should try to keep the newsgroups on subject.

Hi, John.

Assuming you are referring to the United States Technician license, both Radio Shack and the ARRL have excellent study guides available. The book called "Now You're Talking" is excellent.

Be aware, however, that the question pool for these particular tests will be changed on July 1 of this year. You may want to ensure you get the latest editions of the study guides that will cover these new questions.

Good luck on your tests.

Source record: 32847

May 5, 1997

Dear HAM,

In May we (FCB) will come with a new logbook programm for
IBM compatible computers. It's a programm with for example:

* Regio number for Dutch cities in it, together with QTH locator
(new) and distance/angle to your station. (Almost) all Dutch
towns in it.
* Complete QSL registration. It sends for every band a QSL till
the other radiostation confirmed the band.
* See (for every band) if you have worked the radiostation in the
past and if the QSO is already confirmed.
* Holds name, place, info about transceiver, antenna, distance,
angle, locator, etc. of the other radiostation
This info is available during your QSO
* Have a look. during the QSO, to other QSO's you've made
with this radiostation in the past
(You can scroll without leaving the present QSO)
* Have your logbook on the computer screen or print it.
* Many other things

* Do use (in future) the options we'll intend to make for the
programm like: calculations, analysis for QSO's, worldwide
(or local) certificates, contest possibilities - these QSO's in
the logbook for QSL - worldcharts, etc.
For having satisfied customers, we'll only distribute a demo
version of the programm. You can use this for 100 (one
hundred) QSO's. (After registration - for a low fee you can
still use this first 100 QSO's) Of course you can make more
QSO's with the registrated copy.
The Dutch version will leave us in the beginning of May, the
English version in the end of May. (Please let us know if you
want to have other languages like French, German of Spanish)
You're also free to give a demo version to your (HAM)friends.
With your (demo) programm you can make a demo on diskette.
If you're interested, please do e-mail me at:

fcb@worldonline.nl

and receive shortly information or (if possible) the demo-
programm by internet (e-mail)

RECEIVE THE DEMO-VERSION FOR FREE (NO COSTS)
BY E-MAIL

With HAM-greetings from FCB (Harlingen, the Netherlands)

1258. ATLANTA RADIO CLUB'S HAMFESTIVAL JUNE 21-22 1997

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-04 00:00:00 UTC
From: rychard@atl.mindspring.com
Message-ID: <5kjbpf$8fd@camel1.mindspring.com>
Source record: 32848

THE 69TH ANNUAL ATLANTA RADIO CLUB'S HAMFESTIVAL

The Atlanta Radio Club's Hamfestival on June 21-22,1997 is
the Southeast's premier hamfest.This hamfest is brought to you
by the Atlanta radio club,with the help of many of the local
radio clubs here in the metro atlanta area.This is our club's
69th annual hamfest,and with your attendance we hope it will be
our biggest and best to date.
This years event on June 21-22,1997 will be held at the
Atlanta City Hall East-Exhibition Center,675 Ponce de Leon Ave.This is
the same great site as last year's hamfest,which is near the downtown
area,and very easy to get to,and plenty of free parking.
On the days of the hamfest,we will be usings our clubs repeater
(W4DOC 146.82 Mhz minus 600Khz offset) on top of the Nations Bank for
talk-in.This repeater is used every Sunday night 8:00 pm for the
Atlanta Radio Club's net.If you are in the area your presence on the
net is welcomed.
For much more information about our Club and Hamfest plese check
out our web page at http://www.saf.com/arc.The club's BBS at
770-850-0546 has a lot of info also, or send email to dickb@akorn.net
our regular address is ATLANTA HAMFESTIVAL
P.O. BOX 942150,Atlanta Ga. 31141-2150
No matter what your interest in the radio hobbies are,you will find
you came to the right place.Amateur Radio,Shortwave radio,Scanners,
Satellite radio,Emergency radio,Marine radio,Military surplus
radios,etc.AM,FM,SSB,CW,PACKET,RTTY,SLOWSCAN,FAX,DX,ATV,AMTOR,EME,whatever
your interest this is the place to be.If your into building or
homebrewig equipment,radio or computer this is the place to find those
hard to find parts and gizmos.
The computer hobbies are doing better than ever and these interest
will be well covered at the Hamfest.
Buying,Selling,Trading,Swapping,Dealing,Bartering,Giving will all
be happening at the hamfest,probably some begging also.Whether your
coming with money to buy,a load of goods to sell,or just looking
around this is going to be a great hamfest.

The Atlanta Radio club has our regular meetings the first Thursday
of each month.These meetings are at 7:30 PM,located at the Georgia
Power Fedral Credit Union, 4900 Ashford-Dunwoody Rd.this is near the
I-285 loop on the north side of the city.
The Atlanta Radio Club is a non-profit organization wishing to
promote Amateur radio to all interested.
Our club president is Bill Bass W4LFC ph# 770-493-8438,his email
address is BillW4LFC@juno.com ,our vice-president is John Talipsky,Jr
KA4VQH ph#770-925-7110 his email address is johnka4vqh@juno.com ,our

club Secretary is Penn McClatchey K4PE ph#404-605-0742 his email is pmm@saf.com our Treasurer is Charles Golsen N4TZM ph#404-252-3303 his email address is cgolsen@atlanta.com ,our clubs activities manager is myself Richard Dean Young KR4IU ph#404-622-8433 my email address is rychard@atl.mindspring.com ,the opinions expressed are my own and are probably bias due to my love of the radio hobbies.
Hope to see you at the hamfest soon.

If you work for a corporation and develop software or other intelectual property on company time, the results belong to the corporation. They are paying you for your time and deserve the results of your work. Think of it as working in an auto plant. Since you installed the windshield, does that mean you get to take the car home with you?

If you wish to keep the benefits of your work, then you must produce it independently without the support and resources of the corporation.

Peter Gottlieb <peter_gottlieb@msn.com> wrote:

On 1 May 97 I worked T30WP. He said QSL to JA1WPX, his home call. My call book is a '96 version so I went to the usual on-line sources for confirmation. Well, I now have 3 different addresses!!! QRZ & Buckmaster have different addresses in the state of Mass. while my call book gives a Toyko address. I would appreciate any help in sorting this to enable me to QSL direct.

Masa (masa@writeme-x.com) wrote:
: if you can take a test over the internet, then the people can cheat
: easily.

I am studying right now. And my observations are ...

First, The internet is not the only place to find these question and answer things. I can not be sure that they are from the genuine list of questions, but I was told by one person that "such and such book" is just that. It is a list of all the possible questions. All I had to do was to memorize that book! Even the book I have, "Now Your Talking" has a list of questions in the back as a test to see if you are absorbing the content. Now, I do not know if those are the real questions, but I am under the impression that they are. But, that does not mean it is cheating. Remember, you only get a percentage of the full test anyhow.

This leads me to part Two. There are 550 (five HUNDRED and fifty) questions in the novice and tech tests combined! I don't know about you, but the process of memorizing that many answers was hard for me when I was young and had active brain cells. I have difficulty remembering where I put my pencil ten minutes ago. I could never memorize that many questions.

To be able to remember that many things takes more than just memorization. Or, anyhow that would be the theory. Ah, that is it, learn the thoery, and the questions will make sense, and you will know the answer by understanding it. That is not memorizing, but it is learning.

I understand your concern about giving all the answers for someone to study ahead of time. But, if some poor soul has the wherewithall to memorize that many questions and answers without understanding what they mean, I bow down to their mental powers. It is something I could never do!!

Actually, I heard once that it might be related to the famous "V" sent in Bach's 5th symphony. (No, I'm not kidding.)

E-Mail Your Way To Riches!

Dear Friend,

We all know E-mail is here to stay. It's fun, easy and exciting! Would you be interested if we could show you a way to make well over $1,000 per week doing it?

This is not a joke. You may have seen many people trying to tell you that you can make money by joining this or that scheme! Guess what, you decide to go for it and then you get nothing but frustration and disappointment! We are here to take your frustration and disappointment into an Electrifying Adventure!

We have been marketing on-line for almost 2 years now! We have never spent one red penny on advertising and made nothing but profits. We can show you how to make money every day of the year. Many people may think this is untrue or it just can't be done. We are here to tell you that it is absolutely not true. The biggest mistake people make about marketing on-line is that they sit and wait for people to contact them. You will never make it if this is your approach and we'll tell you why. There are over 60 MILLION people on-line right now, and seven new people logging on every minute of the day world-wide and everyone is offering something. So how do you get a potential client or a new customer before your competition does? The answer is simply " Creative E-mailing" and it WORKS! I'll tell you why. You're taking your product, service or idea directly to the market instead of waiting for the market to come to you!

Here are a few testimonials we'd like to share with you (They're all 100% TRUE!):

Internet Communications, my wife and I owe you so much. We ordered your Creative E-mail System and within the first week we received over $1,150 in orders for my Internet Consulting business!
--Charles -- California

I have bought two so-called E-mail programs that cost me over $600.00 when I received them. They were extremely difficult to operate and it took me about two weeks to figure them out. Once I did, they were so time consuming it just wasn't worth my time. When I received your course it took me about four minutes to install and I was in business! Within the first 24 hours of my first E-mailing I received over $580.00 in sales over the phone. That first week I grossed over $2,000.00! I really can't believe how easy you made this, anyone can do it! Thanks!
--Dennis -- Illinios

Hello, I'm a divorced mother of two children. I wanted to thank you for helping me out. This was my first time buying anything on the Internet. I was skeptical at first but I figured I'd take a chance. This was the best chance I've ever took! My part-time business is now a full-time home-business, thanks to your

Creative E-mail System. I had to hire my two family members to help me out!
This is GREAT, thanks so much! I'd recommend this for anyone!
--Ellen -- Florida

You may have seen other people offering products "E-mail Programs, E-mail Addresses, Extractors, Etc." The vast majority of these products are very over-priced and very difficult to even use. None of them even supply you with current, up-to-date, FRESH & RESPONSIVE E-mail addresses! Our Creative E-mail System puts everything into one package to make your profits soar immediately! Even if you do not have a product or service to offer, we are going to give you over 500 how-to reports that you will have full reprint rights to! What makes our course different from anything else being offered anywhere is that we're dedicated to your success! We do not succeed unless you succeed! All of our E-mail Address Databases are created in house. We do not trade our databases with anyone because people are selling extremely bad lists on the Internet. Many of other people's databases are filled with duplicate addresses and many of them are undeliverable. We keep our own database so we know exactly what we have and we keep nothing but the best. There's no other way. We believe in producing high quality products that should be priced reasonably for your success! Read on to see the special bonuses you will receive.

******** SPECIAL 10 DAY BONUS ********

If you order within the next 10 days we will include:

1) 500 How-To Reports (You may resell these at any price)

2) Your Personal Complete Guide To The Internet -- This 175 page e-book covers every single aspect of the internet. You will never have to buy another internet book! When you complete this book, you will know more about the internet than 90% of the people online right now.

3) When you purchase our 8 MILLION SUPER responsive E-mail list we will include Mega-Mailer. It sends 250,000 E-mails per hour! All other orders will receive Pegasus Mail. It mails about 30,000 per hour.

Here's how to get the Creative E-Mail System:

All orders are delivered on CD-ROM or 100mb Zip Disk (Iomega).

============> E-Mail Databases <================

2 Million FRESH E-mail Addresses only $ 99.95
4 Million FRESH E-mail Addresses only $179.95
6 Million FRESH E-mail Addresses only $249.95
8 Million FRESH E-mail Addresses only $299.95

You will be sending your Marketing Letter to 2, 4, 6 or 8 MILLION People! To mail to 2 MILLION People by U.S. Mail at $.32 per stamp would cost $640,000.00, not including envelopes or paper! The price of 2 MILLION E-mail Addresses isn't even a fraction of the cost. And the great thing is that if you have 10 products, you can E-mail to your list as many times as you want to! Your profits will never stop soaring! Don't pay someone else to send your

advertisement out, do it yourself and save big money! The average cost right now to send your ad one time to ONE MILLION people is $1,400.00. You can send it 100 times to EIGHT MILLION people for only $299.95 and that includes Mega-Mailer that sends 250,000 per hour!

1272. North Jersey DX Association Special Event

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-05 00:00:00 UTC
From: adell@mailhost2.planet.net
Message-ID: <MPG.dd7f6c8d749a23598985f@news.planet.net>
Source record: 32857

In celebration of it's 40th Anniversary, the North Jersey DX Association will be signing W2JT/40 till the end of 1997.

Each week, a different member of the NJDXA will be using the Anniversary suffix IE: KF2TI/W2JT/40. Work as many different operators as possible and submit your logs to K2WE. Certificates will be awarded to those working the most W2JT/40 stations.

GOOD LUCK es HAVE FUN!!

I think jbjr was talking about a sample test over the Internet, rather
than than the real thing. You would take this to assess oneself and see
if one was ready for the actual test. Thus there are no problems with
cheating.

Sure, and it's just as easy to ruin a whole band with hordes of DX nuts spread out over 50-100 KHz of spectrum trying to work the next mega-DXpedition to yoyo-land.

I monitor the 10m band every day and this weekend was the first time all year that we have had an opening worth mentioning. Was this the first big opening of 10m in the new sunspot cycle ?

In England 3rd - 5th May was a holiday so even better. On Saturday the band opened north to Scandinavia and northern Russia at mid-morning and then as the day passed the propagation swung round through the rest of Europe so that as the the band closed as it got dark signals were coming up from the south - Italy. Sunday was exactly the same and Monday was similar but slightly quieter but the early evening was wiped out by S9+++ 1kw +++ spaghetti!

Most of the weekend's activity was piled up on 28.500 give or take a Kc or two. I did not hear any majorly rare DX but all I was using was my FT707 to a 7' Firestik stuck with a mag mount on top of a barbeque in my back room ! I suppose I had better string up a proper aerial and work some DX if these openings continue. What were conditions like around the rest of the world ?

Sounds like a nice opening, but it was probably due to sporadic E
propagation, not F-layer. If the former, then it has nothing much to
do with the new sunspot cycle, but is typical spring/summer E-layer
behavior.

Masa (masa@writeme-x.com) wrote:
: what I was saying that other people can help internet examinee out.
: then it is cheating. 1 year old girl CAN get a license...

No matter how many times you study, you will not be able to memorize the whole 550 questions. Just because you memorized a sample of them seen on the internet, does not mean that is the same sample you will get on testing day. IHMO knowing what the list of qeustions before hand is is not cheating. If you knew the 30 that you will be taking, now, that IS cheating, and should not be tolerated.

BTW: The 1 year old can not read, and hence will not pass the test without a DR's certification of inability to take the test (I don't remember seeing age as a valid handicap). And, she also could not memorize all the questions.

Anybody who actually does memorize ALL the questions, would obvoiusly have learned something from it. Now is that so bad either? If you know the stuff so well that you can memorize all the answers, you have still learned. Cheating or not. (I still feel it is an amazing feat to do this though.)

>are absorbing the content. Now, I do not know if those are the real
>questions, but I am under the impression that they are.

If you read the book "Now You're Talking" more closely you will see that it is the exact pool of questions that are used in the testing. There are about 10 potential questions for each question actually used in an exam. The sequence of the multiple choice answers may be changed around but the question is exactly the same and the wording of the multiple choice answers are the same --- only the order they appear in may change.

You do need to learn things to help pass the test. A staraegy for passing the exam can include learning most of the material and memorizing a few answers to specific questions.

Welcome to the wonderful world of Sporadic E. Openings like this
over 600-900 mile (or something like that) paths will be common over
the next couple of months, as summer is prime Sporadic E season.
It can be real exciting stuff.

But, the solar cycle has little effect on Sporadic E. We are still a
ways from the good days of long haul DX on 10 meters other than
the reliable equatorial paths.

550 questions are not overly difficult to memorize the answers to.
Perhaps "memorize" is the key word that is cause for debate -- I doubt
someone could memorize all 550 questions so they could recite them
word-for-word back to you. It is, however, very easy to become so
familiar with the material that you recognize the correct answer from
the list of 4 possible choices. In many of the exams (I don't recall if
any questions on the tech/novice are like this) there are "patterns"
to whole blocks of questions -- if you merely remember the pattern,
you'll be able to get the answer at exam time.

Last of my serious dx cards on 10 meters came from 1993 and early 1994.
If we are to believe that the bottom has been passed and we are on the
upward leg of the cycle, then two years out would offer some
opportunities for contacts, but certainly it isn't a sure bet. I would
think that 1999 will be sporadic. Just an opinion.

There are several books available with the question pool. The questions are the actual questions that may appear on the test (answers in the same order, etc.)

> I understand your concern about giving all the answers for someone to
> study ahead of time. But, if some poor soul has the wherewithall to

> Ham-gonna-be

Good luck on the exam. If you prepare well you should have no problems passing it. A good practice can be gotten over the Internet at http://w5ac.tamu.edu/ham-exam-v2/ham-exam.html. This page will generate a practice exam for any of the classes of tests and grade you. That way you can see how you are faring. I took the Tech test and passed even though I haven't studied the material in years (I did mis many more than I did when I got my license, however ;)

I have heard that the question pool will be changing soon so you might check on that with a local ham group. Good luck again...

Hey, I've got a brain buster for all those propogation-nuts...
If anybody can tell me, please do so. I realize that it is
a bit far-sighted.

Here's the situation:

There is a good chance I will go to Germany in two years, and
am thinking about bringing along a 10 meter mobile (perhaps a
Uniden 2510 or Ranger 2950, depending on what is cheaper).
Is there a good chance I'll be able to work U.S. stations from
Germany(Berlin an Munich) by June of 1999 with 25 watts SSB/CW(Don't worry, I know I'll
have
to have a recip. license.)?

If the Space Environment Center forecast is anywhere near correct,
smoothed 10.7 cm solar flux may be around 164 in June 1999. This
ought to be enough to support reasonable E/W path propagation on 10m.
The problem is that the summer is typically not a good period for these
paths and I doubt that the MUF would hit 10m at all from June - early August.
I'd think that you'd have far better success in the autumn of 1999,
probably even in the autumn/winter of 1998-99 though, as Gary points out,
openings would likely be infrequent during the earlier period.

After thinking about your comment, I think I may understand why you said this. Are you thinking that the actuall test is being given on the internet? By this it is meant that after you take it, you get a ticket? If this is what you read into it, then ... Yes that would be a problem. The 1 year old would not actually be taking the test. Somebody could be keying it for her.

That is not the case. These are sample tests to get an idea if you are ready or not. Nobody that I know of gets a license out of it. The rules are that a VE must administer the test. I don't think very many would read that as not being able to see in person the person taking the test. If they couldn't see them, I agree taht cheating would be a real problem.

We can limit the garbage by NOT answering the "out-of-spec"
questions in the newsgroup or doing it by email to prevent
garbage threads like "I hate G5RVs" of "FCC kills .." from
growing.

I memorized all basic questions and answers on Canadian Amateur Radio
Question Bank... I didn't even read the questions when I wrote the
test. I got 100% on the portion of question bank's questions. (In
Canada, you will get some questions that are not on the question
banks) I guess I memorized around 500 question + answer sets.

Don't be so sure... I've known people who have memorized the entire bible.
Word-for-word. That's much more than the equivalent of 550 test questions.

And what about people who perform live theater? They have to memorize the
entire script. And I'm sure there are other examples of memorization that far
surpass that.

To all radio amateurs

SB DX ARL ARLD021
ARLD021 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX bulletin, the 599Rpt, Charles, S92SS, DXNS, 425 DX news and Contest Corral from QST. Thanks to all.

EASTER ISLAND, CE0. JA7KXD is QRV as CE0/JA7KXD. He was heard on 7004 kHz at 1000z. QSL to home call.

ANGOLA, D2. Gabriele, D2EB, is QRV using SSB often around 1100z and 1730z to 1900z on 21222 kHz, and later on 14240 Khz at 2215z. QSL via I3LLH.

NEW CALEDONIA, FK. Didier, FK/F5PXQ, is QRV from here for 3 to 4 years and hopes to be on RTTY. QSL to D. Lavisse, Caserne Normandie, BP 12, 98842 Noumea Cedex, New Caledonia.

WALES, GW. Special Event Station GB100FI will be active from Flatholm Island, IOTA EU-124, from May 12 to 16. On May 13, GB100FI and GB100LP will recreate Guglielmo Marconi's first ever radio transmission across water from Lavernock Point to Flatholm island. QSL via GW0ANA.

SAUDI ARABIA, HZ. Mike, K3UOC, is QRV from Riyadh as 7Z5OO, and can be found on 6 meters. He expects to be here until the end of July. QSL via W1AF.

BANGLADESH, S2. Andrew, S21YE, is QRV using SSB. His length of stay is unknown. QSL via G4VLV. John, S21/PA3BTQ, is also QRV from here using SSB and Pactor on 20 meters. QSL to home call.

SAO TOME, S9. Charles, S92SS, reports he and Lesley, S92YL, are QRT from here. After some time spent in the US, they both will move to Kavala, Greece.

CHAD, TT. Baldur, DJ6SI, is currently QRV as TT8DX. He expects to be here until May 9. He is working mainly CW. Check all HF bands near the lower edge. QSL to home call.

MARSHALL ISLANDS, V7. Tim, N2PC, will be here for the next 4 to 5 years and will be QRV as V73AT on all bands. QSL via K2CL.

MONTSERRAT, VP2M. Graham, G0VNW, will be QRV from here as VP2MGG after May 7. He operates mainly SSB but will try CW from time to time. QSL via WB2YQH.

THIS WEEKEND ON THE RADIO. The Oregon and Nevada QSO Parties, and the ARRL VHF/UHF Spring Sprints for 902, 1296 and 2304 MHz are scheduled for this weekend. For the Spring Sprints, please see April QST, page 98 for details. For the two QSO Parties, please see May QST, page 97 for details.

1322. 17 Meters

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-08 00:00:00 UTC
From: Steve Bramham <steve.bramham@turner.com>
Message-ID: <3371EE6C.6C87@turner.com>
Source record: 32805

The 17 meter band has been providing good DX in the early afternoons in the Atlanta area. Usually after 6 or 6:30 PM I've been able to work from the Big Island of Hawaii to Leningrad with less than 100 watts into a dipole antenna up around 40 feet.

This past weekend provide two aeronautical mobiles on 18.130mHz at 40,000 feet somewhere over the Atlantic.

Anyone else on 17 meters with similar results?

Steve Bramham, WA4MPD

1334. Summer 50MHz DX News

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-10 00:00:00 UTC
From: Geoff Brown <equinox@itl.net>
Message-ID: <3374AEC5.3852@itl.net>
Source record: 32724
Cross-posted to: uk.radio.amateur,rec.radio.amateur.dx,

50MHz SUMMER NEWS

There's really so much news for June/July, so here we go!
KP2: SU: 5A: 5X: JY: YI: 4L: JW: CY9: C6: YN: 9G: D44: V47: XE:
TA: OX: 3C: J6: J7:

JN82 QRV!
Renny 9A3FT reports that he will be qrv from JN82 in June/July.

JO69 QRV!
SM4HEJ reports he is now active from JO69OJ. IC706.

KN09 QRV!
Tom SP5XMU reports that Locator KN09 will be active 21th and 22nd June
1997 , during
SP-VHF-C meeting.

KP2 QRV!
NA4I/KP2 Will be operating from St Croix , FK77 from about 12/6 to 18/6.
Hope to be quiet
active during the June contest...73.... Ace, NA4I

KP2 QRV!
Jimmy W6JKV will be active during the June contest and maybe a little
longer, (13th - 15th June)
with 800w and the 11 em M2.....info de W6JKV.

J6 or J7 QRV!
Jimmy W6JKV will now activate J6 or J7 during the last week of June and
the first week of July,
same equipment as KP2 (800w to 11el). info de W6JKV.

HR QRV!
HR: Masa, JE3XRX will be staying in Honduras(HR) for two years until end
of June 1998 as a
Japan Overseas Cooperation Volunteers (JOCV) activity. He is now waiting
for his HR licence
including 50MHz! Callsign is expected to be HR1XRX.

V51 QRV!
V5: Laurence Howell GM4DMA will be hoping to be active on all HF band
and 50MHz signing
V5/GM4DMA from June 17 1997 for 1 month.

3C QRV!
3C: A group of EA's will go to Annobon Isle 3C0 in May, they plan to

operate on all HF bands
and 6 meters. A CW breakable beacon will be on 50.133 cw/ssb and 50.092
for CW only during
all posible hours of no visible openings.....
(May 20th - May 27th)..... info de Jose EA7KW

OX QRV!
OX: Bo, OX3LX will be QRV on SIX from 29/4-12/5-1997 GRID:GP36,GP35,GP45
RIG:ICOM 736 100W and 3 Elm:
I will try to be QRV from South Greenland GP60 in last part of June 14
days ahead.

TA QRV!
TA: HB9SUL is in KN40 for a business trip up to the end of June. He
hopes to get ready for 50
and 144MHz TROPO / ES. Some MS with 150W and single yagi!
Also a TA call may be available later (eg. TA2ZMS). In the May contest
he will try to use a vy
good QTH in KN41 - so keep an eye in his direction.......HB9SUL

TA QRV!
TA4/OZ3SDL Trip On! My summer expedition to Turkey will now definitely
take place. Please
note that a 50 MHz permit has been authorised by the Republic of Turkey,
Ministry of
Transportation, General Directorate of Radiocommunications; this can be
made available for
inspection if necessary (as can previous permits!). The station will be
operational from late evening
on Saturday 17 May 1997 until late on Saturday 24 May at the Club Hotel
Sera, Antalya,
KM56IV, Lat 36 53 00 N, Long 30 42 06 E. The call will be TA4/G3SDL.
This is mainly a
business trip, 19-21 May being business days, operations on these 3 days
will therefore essentially
be at lunch time and in the evenings.
I will run a 10 Watt beacon on 50.093 MHz when not in the shack, if the
beacon is heard
telephone calls may be made to me on +45 40 79 54 42, my GSM mobile
telephone number. I
may also take an occasional dip in the swimming pool which will no doubt
coincide with a major
opening! My working frequency will likely be 50.135 MHz depending upon
local QRM etc.
Equipment will be a Kenwood TS60 and a 2 element HB9CV on the hotel
roof.
Please note this new QSL route as I shall be moving from Denmark to
Ireland at the end of June
1997. Bureau cards should be sent via G3SDL and direct cards for the
time being should be sent
to Dave Court, 9 Greenwood Close, Petts Wood, Kent, BR51QG, England.

Regards to all and look forward to working you all on the magic band
this summer.....73s
Dave

TA QRV! YM7PA
A group of PA0's will go to Turkey in July. Participants of this
DXpedition will probably be: Pim
PA0TLX, Jan-Willem PA0JWU, Omari 4L5O and Allard PE1NWL..... more later

XE QRV!
XE1: Andy will be active from mid April using 100 watts on six and
signing XE1/G3SVD. QSL
via G3SVD.

SU QRV!
SU: Ezzat SU1ER is now qrv with 100w. FT690 + 100w MM Amp.

D44 QRV!
D44: Julio D44BC promised to put in an appearance this Summer. (50.110)
TS60 + 5el.

CY9 QRV!
CY9: Mike VE9AA will be active as CY9AA during late June/July. 500w +
big antenna!

CY9 QRV!
CY9: A group of VE's will also activate CY9 in July for an HF
contest..... more later.

JY QRV!
JY: JY9QJ is now active with 7el antenna and an IC736.

A6 QRV!
A6: Info from VK states: A6SIX for June? Slim? Not sure abt this one!

7Z QRV!
7Z/HZ: Lookout for 7Z5OO during June/July.

9K QRV!
9K: 9K2CA is now active on the band. 100w IC706.

TF QRV!
TF: TF/PA3DWD, June 26-July 16 Expedition. IC706.

4L QRV!
4L: June/July Omari 4L5O will be active with 50w and 5el. TS690 (50w)
5el.

C6 QRV!
C6: Look out for John C6AIE from June 5th to 19th. John has sent mail
stating that he WILL be
breaking the USA pile up's for those in Europe needing C6. He was heard
last year for 4 hours in
GJ off the back of his beam! (50.123)

C6 QRV!
C6: Joe Pater will be active from C6 from May 30th to June 2nd.(No callsign for this Op).

YN QRV!
YN: YN6WFM (remember when he was in HR2?) as JA6WFM/HR2 and we all worked him!
Well keep a look out for him all this Summer from YN.

YI QRV!
YI: Steve VK3OT reports that a VK is currently in YI and wants to get active on 50MHz.

5A QRV!
5A: Watch out for 5A1A during June, our Italian friends have promised to coach him back on Six!

9G QRV!
9G: Lookout for 9G1YR during late May/early June. that's the best time for TEP/ES. Last year
TR8CA was worked during this period.

OJ0 QRV!
A Group will activate OJ0 this summer on 50MHz....more later

Nordic Meeting:
The Nordic VHF/UHF/SHF meeting.
It's an annual meeting wich this year will take place in SM on the 6-8th of June. In the island of
Oland, in the south-east part of SM. There will be lectures, measurements (preamps, antennas),
barbeque, gd food, flea market and a lot of VHF/SHF friends there. SM5BSZ and SM7UFW
will probably be the ones responsible for the antenna-measurements. For info, registration and
more: http://ham.te.hik.se/clubs/sk7ca/vhf97/index.html .....73 de SM7SJR, Bjorn.

Thanks to all who submitted info.

1335. **OVER 2700 Ham Radio WWW Links**

Hi, we'll get right to the point. We operate one of the finest
quality custom color labs in the USA. To introduce you to our
service we're offering the following Internet enlargement special:

Your color negatives hand printed on Kodak Supra Professional
16x20 inch paper. All negatives printed full frame.
Exhibition quality and color corrected---send us any size color
negative (35mm up to 4x5 inches).

* * * * * * * * * *

16 x 20 inch color enlargement special
5 identical prints from same negative-------$79
10 identical prints from same negative------$129

* * * * * * * * * *

Most orders 1 to 2 days in the lab. Add $6 priority mail shipping;
international add $10. We accept Visa and Mastercharge.

Mail your negative(s) and payment to:

>requests.

Just a few questions only, not all, which came into my mind ..

1. If Gary, KA9RLJ is unable to get any logs from HH2PK for several years
now, why is he holding all the many hundreds or thousands of envelopes
with SAE and greenstamps and don't send them back?

2. If Gary is unable to fulfill any request, why is Gary still listed as
HH2PK's QSL-Manager in many popular databases and lists since many years?

3 Has Gary informed the maintainers of the popular QSL-Manager-databases
and lists, that he wants to be deleted as HH2PK's QSL-Manager?

4. If not, why not?

Strange, very strange ...

Thank you Walt for your rude and sarcastic response (Why were you rude? Did you mean to be?). I tried four different international databases on the Yankee Clipper Contest Club WWW site, including German, Italian, and American sites (Buckmaster), and none of them came up with the call. Surprisingly we're not totally stupid on this side of the pond. Thank you however for the information, it is appreciated. (sigh!)

PROPAGATION - by AD5Q HOUSTON, TEXAS -- MAY 1997

20 Meters continues to improve. The evening openings are great, especially if you like running CW Russians. This path follows the post-sunrise area across Siberia and Russia to Eastern Europe and Scandinavia. Around midnight the polar path closes, but signals continue to come through from the west.

On 20 CW, westerly signals from the Pacific, Australia and New Zealand are hardly numerous enough to keep the band jumping with DX activity. Most amateurs in these areas are primarily SSB ops, just as most in Russia and Eastern Europe prefer CW. When paths are open both over the pole and to VK/ZL, an SSB operator on 20 will find most DX activity to the west, while the CW op will more likely notice a band that is wall-to-wall with that sound we all know and love: polar warble. In the late evening, the westerly opening expands as signals cross the darkness back into daylight where it is late afternoon. If the band were to stay open well past midnight (assisted by an extra 10 or 20 points of solar flux), the late afternoon region would approach Asia and a path to Japan would open up nicely. Some excellent runs in past WPX contests come to mind.

In the morning we find good openings over high latitude paths into Asia. Here we routinely work JT, BV, VS6, HS, 9V, V85, etc. while tuning and wishing for signals even more exotic (9N, A5, VU4, XW). This morning pipeline does not last long, but is changing as summer approaches.

At the high end of the solar cycle, we notice a deterioration in 10 Meter conditions during May due to a heating and thinning of the ionosphere that lowers the MUF; effecting 15 Meters in mid-summer and forcing most DX activity down to 20. We call this phenomenon "summer absorbtion." At the low end of the cycle we have already written off 10 and 15 anyway, and should notice that the effect of this summer heating on 20 Meters is beneficial. It keeps the MUF hovering above 14 MHz for most of the morning, lengthening the duration of our opening into the Asian evening darkness. During our own evening, we work into this same broad area of morning as it spans Russia and Siberia. Instead of a narrow pipeline into a sunrise area, a large region of a remote continent is workable - improving QSO rates in the CW WPX beyond what would be expected at the low end of a sunspot cycle.

Thus, 20 Meters will continue its transition to this summer configuration. The main opening to Europe will be in the late afternoon; working into their late evening window to the west before the band closes for them.

Other bands? 40 is still in excellent shape with rising QRN levels (and low band contacts count double in the WPX). I would expect that conditions on 30 are even better, but I have yet to find room for a serious antenna on any WARC band and claim no expertise.

Hey Walt, lighten up. I gave you a chance to publically recind the rudeness bit, but instead you confirmed your intentions. I would have accepted your callbook response and kept looking. The fact was I DID look in an international electronic callbook (read 4) and did not find it; did you read that in my last message? Or were you too busy poo-pooing us American cousins, unable to look past your snooty nose down onto us?

As far as deserving, your attitude sucks. Thanks for confirming you planned to be rude. I asked for help as I have done oh, 3-4 times in the past 4 years, and I get your attitude. Well Walt, have a nice day, and remember -- you are only one person! Please don't try to outdo Burt Fisher, yer getting close (sorry, Burt). Go punch your pillow or something...please take the hint. If you'd like to keep all of this public as you have chosen, you will continue to embarrass yourself. Maybe you have personal problems which cloud your judgement and

influence what you say, and if that's the case, I'm sorry for you.

Who are you, anyways? Have a picture? I do, and I don't hide behind a newsnet posting making potshots at people thousands of miles away! (hint! sigh!) http://www.vari-wave.com/todd.htm

Todd Ellis, N2XL

(PS. Would somebody else please talk to Walt? I thought this was an informational newsgroup, not a spitting contest. I'm done spitting with him; he's gonna drown himself in his own spitoon after looking at all of his other posts!)

Hey: Who the heck is this guy? Anybody know why he posts so many nasty comments to everyone? I thought this was a friendly informational newsgroup, not a spitting/poo-pooing contest.

Walt, for your own safety, please get some professional help with all this agression. Surely you will be all the better for it, and we will all enjoy your company (for once). Besides, I travel to the UK regularly and I'd rather not come across you on the M25 in a flaming wreck or something similarly frightening. Lighten up and enjoy life!

yes

>>My atlas doesn't list Wolin - does anyone know exactly where it is?

it is an island in the north-west part of Poland. If you can find
Szczecin (should be, population about 600000) on your card, go in
northern direction till you reach Baltic Sea, you're there. Locator
JO74. Western of Wolin there is Usedom/Uznam listed as DL/SP1 EU131.

BTW SP6ZDA is a club station (scouts)

Someone asked for a place to find present and past Solar Flux Indices,
and the A and K Indices.
Paul WN6K sent me the following information:

For Solar flux summaries by calendar quarter --1994 to 1997 -- Go to:
ftp://proton.sec.noaa.gov/pub/indices/old_indices/

For Current Months Solar data - Go to:
ftp://proton.sec.noaa.gov/pub/indices/
See -- quar_DGD.txt quar_DPD.txt quar_DSD.txt

There is a Mail List for Solar Data which gives 27 day outlook
forecasts, current HF Propagation Reports Data much more:
<<< subscribe/unsubscribe requests to prop-request@digimark.net >>>

Paul WN6K maintains Solar Graphs at URL:
http://idt.net/~wngk19/

This information will be added to the AC6V Ham and DX Reference Guide
under Propagation -- see URL's
below.

Message-ID: <wb6siv-1405971812210001@host03.clr.cyberg8t.com>
Source record: 32752

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's. I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.

The United States Coast Guard Amateur Radio club on Kodiak Island
Alaska, will be on the air again this saturday - 17 May 97 for
Armed Forces Day - Special Event Station. We will be using the
club callsign - KL7HKX. We will be firing up the rigs around
10AM..Alaska time...noon on the east coast. Look for us on the
20 meter band around 14.240- 14.280 and wherever, dependent
on propagation. A contact with the Coast Guard shack will
give you several categories:
1. Islands on the Air- IOTA NA-19
2. United States Islands Award program- AK- Four Sugar
3. Ten-Ten International number (Club Member-if you collect them)
4. 3rd Judicial District contact for Counties Award
5. Military contact- United States Coast Guard base.

We will not be using duplex frequencies as with the other services
so direct contacts will not be a problem. For a QSL card, we request
a SASE or by the Bureau (takes a while). The QSL address is
United States Coast Guard Amateur Radio Club- KL7HKX
Post Office Box 190421
Kodiak, Alaska
99619-0421

Any questions please contact direct for more info..hope to catch
you all on the bands and 73's from Kodiak Island, Alaska.
John/NL7WA

1367. Download free US Callbook!

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-15 00:00:00 UTC
From: n7ln@qsl.net
Message-ID: <5lfgv2$eev@esnews.corp.es.com>
Source record: 32757
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.swap

You can now download a FREE US Callbook for your PC last updated on
February 24, 1997. The callbook is compressed to 18 megabytes for
downloading and uncompresses on your hard disk to about 44 megabytes.
It contains ALL US calls, names, and addresses as of the above date.

You can enter the callsign and the name and address of the owner is
returned. It is a basic, stripped down callbook for installing on
a hard disk. The information for the callbook was obtained directly
from the FCC's own FTP site, but was stripped, formatted, and sorted
for use with the callbook programs that reads the calls, written by
Darvell Hunt, N7LN. It is a simple DOS program and should work fine
in DOS, Windows 3.x, Windows 95, Windows NT and probably all other
PC operating systems.

Try it out! And let me know what you think of it!

You can find it at --> http://www.qsl.net/n7ln/callbook.html

Thanks & 73's,
Darvell (N7LN)

(PS: The callbook also comes free, with more features, on my QSL Clipart
CD, and runs fine FROM the CD. But it runs faster on your hard disk.)

ARLD022 DX news

ZCZC AE22
QST de W1AW
DX Bulletin 22 ARLD022
From ARRL Headquarters
Newington CT May 15, 1997
To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, The Daily DX, FMRE and Contest Corral from QST. Thanks to all.

ANNOBON ISLAND, 3C0. A group of members of the Spanish Radio Amateur Association, URE, will be QRV from here as 3C0DX starting May 20. Look for them to be active on all HF bands, including the newer bands. Some satellite operation is expected, and they can be found on the downlink frequencies of 29380 and 29430 Khz. Look for SSB activity on 50.133 MHz, and CW on 50.090 MHz. Look for RTTY activity on 7034, 10114, 14084, 18094, 21084, 24924 and 28184 Khz. QSL via EA4URE, PO Box 220, Madrid 28080, Spain.

POLAND, SP. Look for Special Event Station 3Z0JP to be QRV between May 20 and June 15, to celebrate the visit of Pope John Paul II to Poland. Activity will be on CW and SSB with operations on 80 to 10 meters. Look also for some 6 and 2 meter SSB activity. QSL via SP6GVU.

SEYCHELLES, S7. Paddy O'Reilly, GW4MAD/S79MAD, is QRV from here on SSB, CW, RTTY and PacTOR until July or August. He can be found on 40 to 10 meters, including some RTTY activity on the newer bands. QSL via the Wenvoe Club Amateur Radio Group, c/o Transmitting Station, St. Lythans, Wenvoe, Nr. Cardiff CF5 6BQ, Wales, United Kingdom.

CANADA, VE. Steve, operator at VE8RCS, indicates that Station Alert and Amateur Radio Station VE8RCS on Ellesmere Island would be closed by May 15. Ellesmere Island, IOTA NA 088, has been on the air for over thirty years as the communications link for the High Arctic Weather and Experimental Station. It is about 450 miles from the North pole. Experiments at Station Alert have included measurement

of global warming indicators, pollution in the global regions and measurements made by the Canadian team for other governments. All functions will now be automated.

AUSTRALIA, VK. AX1ITU will be QRV on May 16 from 1400z for 24 hours for International Telecommunications Day. QSL via WB2FFY.

MEXICO, XE. Sacrificios Island in Veracruz State will be activated with the call sign XF2NVA from June 6 to 8. QSL via bureau.

THIS WEEKEND ON THE RADIO. The ARRL VHF/UHF Spring Sprint for 50 MHz, EU Spring Sprint, CW, and Armed Forces Day are all scheduled for this weekend. Please see May QST, page 97 for details.

1369. AOL addresses removed from DX Mailing List

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-15 00:00:00 UTC
From: Lyndon Nerenberg <lyndon@ve7tcp.ampr.org>
Message-ID: <nnsozouqjr.fsf@lautrec.esys.ca>
Source record: 32908

For the last several weeks the mailers at AOL have been rejecting
messages destined for perfectly valid addresses. When this happens
I receive just over 100 failure notifications for each messages sent
through the mailing list. Today I got tired of it, and removed every
address with @aol.com on the end from the DX Mailing List.

If you were subscribed from an AOL account, my first suggestion is
that you find a different Internet provider. If that's not an option,
go ahead an resubscribe, but be forwarned that if this problem repeats
I will once again nuke all the aol.com addresses, and probably put
in a filter to block new subscriptions.

Please forward this widely so's the ex AOL list subscribers will
know what hit them.

You can "work" 300 countries anytime on the Internet. I think you mean you have access to 300 countries on the Internet. Working DX requires skill (and a decent signal) and an understanding of propagation etc.

Please don't confuse talking on the telephone with actually competing in a pile up for a Q.

Hello Jonathan. Think you will find that QSL cards are not made for requests. Try having a 2-way contact with some stations and exchange them instead. No doubt you will get a few for viewing but it's not the same as getting one from a station you have actually worked. Hope to meet you on the air. 73's Scott.>

I am just starting in DXing. What is a good reasonably priced receiver to buy?
Are there any used one on the net?

W.C.

You might take a look at rec.radio.swap. There are probably some good
receivers listed there.

Let's see... Jonathon, KF4GKD, holds a technician class license. This is the no-code tech, which, as far as I know, doesn't have much (if any) HF priviledges, for which QSL cards are primarily used for. (No-code tech came into being long after I got my extra, so I don't really know much about it -- corect me if I'm wrong.) So it would be hard to make a schedule with him to exchange cards.

Jonathon, if you want to start collecting cards, I think you need to upgrade. QSL cards are for confirming contacts (or even confirming SWL's), they are not trading cards. And obviously, if you are working for awards, cards that don't confirm contacts are useless.

We encourage your enthusiasm in HAM Radio, Jonathon, but we also encourage you to find out more about it. Exchanging QSL cards can be great fun, especially if you actually TALK to the person on the RADIO before you exchange cards with them!

Good luck,
Darvell

First off ... I believe the number off pool question for the novice and
tech writtens (combined) is more like 900, not 550.

> Don't be so sure... I've known people who have memorized the entire bible.
> Word-for-word. That's much more than the equivalent of 550 test questions.

You've known "people", as in "more than one person", that have memorized
the entire bible...word for word? I find it hard to believe you know
even one person that has done this. A savant perhaps?

> And what about people who perform live theater? They have to memorize the
> entire script. And I'm sure there are other examples of memorization that far
> surpass that.

But they work at it. As far as I am concerned, if someone memorized
900+ questions and the correct answers to the written exams I figure
they must have learned something in the process. If they didn't learn a
thing I would wonder what their motivation was for doing all that
memorizing.

I would also assume that these people in general cause you no more harm
on the air than any other operators.

SB DX @ WW $OPDX.305
Ohio/Penn DX Bulletin No. 305

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 305
BID: $OPDX.305
May 19, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1SP, N2XL, W3UR & The Daily DX, W5FKX, 4L2M, EA2BUF, EA5XX, DL5EBE, G3SWH, G4BUE & DX News Sheet, GM0DEQ, JI3ERV/NH2C, I2VXJ, LA4YW, SM4CNN, VE6JO, VY2RU/VE1RU and YV5LIX for the following DX information.

3C0DX, ANNOBON ISLAND (CANCELLED). Reports indicate that the Guinea's authorities at the very last minute would not allow 11 of the 13 operators visas. Everything was ready: materials, equipments, operators, plane tickets, medical insurance, and enough money for the big expedition. The URE HQ continues to work very hard and has now rescheduled the DXpedition for October 11th.

4L, GEORGIA. 4L2M/Mamuka, 4L5O/Omar, 4L8T/Valentin, 4L4AK/Amiran, 4L4MM/Mero AND 4L4L/Givi will participate in the CQWW WPX Contest. They will use the call 4L7C and be active as a Multi-OP/Single entry. Look for them on all bands 1.8 - 28 MHz. QSL info for 4L7C (ONLY during the conetst period) is: P.O. Box, 387 Yeroham 80500, ISRAEL.

5W, WESTERN SAMOA BUREAU. Scott Porter, N1SP (ex WA1YTW), W1 QSL Bureau Manager (Incoming), received the following from Martin Cook, N1FOC, ARRL QSL Service Manager: "I have been notified today that the 5 W Western Samoa QSL Service is terminated immediately. The President of the W.S.A.R.C Phil Williams, 5W1AU, states that there are only 4 active 5W1 'permanent resident' stations on Western Samoa. Visitors are issued 5W0 callsigns BUT most do not leave forwarding addresses or QSL Manager addresses when they leave, Phil has been operating the Bureau from his own pocket since 1971.
The ARRL Outgoing QSL Bureau will attempt to forward all 5W QSL cards that are currently at League headquarters. Cards with no route will be returned to the sender via the Incoming Bureaus..... I will be updating the ARRL Web Page ASAP & will add 5W to the "Countries Not Served By the Outgoing QSL Service" (Green Info Sheet) when I have the New Sheets Printed." .....Thanks all, Martin Cook, N1FOC

5H, TANZANIA. The "DX News Sheet" reports Lee, N5HG, will be active until July, 1998, as 5H3HG. Activity will be on CW/SSB, 80-15 meters but plans are in the works to put up a 160m antenna. QSL via home call or WY3V.

BV9, ORCHID ISLAND (TAIWAN). Operators JA3YTE, BV4IA, BV8AE, BV8CF and BV8BC (the Taitung branch of CTARL) will be active May 23-26th. QSL via BV8BC.

FO, FRENCH POLYNESIA. Eddie, FO5OK, is on 3798.5 in the mornings; Todd, N2XL, stated he was weak and had some fading, but there, none the less. There were very few U.S. stations on to work him, and there was no pile-up.

IOTA NEWS.....
Giorgio, I2VXJ, will be active during the CQWW WPX CW Contest (May 24-25th) as IZ9R from Lampedusa, African Italy. Lampedusa is IOTA AF-019. QSLs will be sent via the bureau for every QSO. Activity is planned for all bands before and after the contest.

LES ILES GLENAN (IOTA EU-094). Jim, G3RTE, and Phil, G3SWH, will be activating St. Nicolas Island in the Glenans group between June 28th and 30th. They plan to run two stations simultaneously, with F/G3RTE/P on SSB on the usual IOTA frequencies and F/G3SWH/P on CW. Activity is planned for all bands 80-10 meters. QSLs for both stations will be handled by G3SWH (21 Dickensons Grove, Congresbury, Bristol, BS19 5HQ, UK.) or via the RSGB bureau.

MONACH ISLAND (IOTA EU-111). Bob/GM0DEQ, Eddie/GM0KVI and Robbie/ GM0SEI will be active from from May 24-26th (WX permitting). They will be operating on the HF bands SSB/CW as GB6MI and GB2MI. All QSLs answered via manager GM0KVI. They will be around standard IOTA freq's.

ISLAND OF NEGROS (IOTA OC-129). Gary/K9AW will operate K9AW/DU6 from here May 19th to June 1st. He will also operate during the CQWW WPX CW Contest (SO/AB). QSL via WF5T.

PRINCE EDWARD ISLAND (IOTA NA-029). On June 1st, the Confederation Bridge will be opened connecting Prince Edward Island to the mainland of Canada. The ferry service by Marine Atlantic to the mainland will be terminated. The Confederation Bridge will be the "world's longest bridge over ice covered water"at 12.9 kilometers/8 miles and the highest span being 60 meters/131.24 feet above the water.
To commemorate this occasion, Industry Canada and Radio Amateurs of Canada (RAC) have granted all Amateurs of Prince Edward Island the use of "XN0" as a special prefix in place of "VY2" from May 29th, at 0000z to September 1st, at 2400z.
Special calls also have been granted to correspond with the opening of the Confederation Bridge and the last crossing of the Marine Atlantic ferries. Commencing May 30, 31 and June 1, the special call VY2CB (Victor Yankee Two Confederation Bridge) will be used from the Confederation Bridge site and on May 31st, VY2LC (Victor Yankee Two Last Crossing) will be used from aboard one of the ferries making the last crossing of the Northumberland Strait.

A picture of the Confederation Bridge will be on the QSL card confirming contact with these stations. Additional information and photos of the Confederation Bridge can be found on internet at: http://www.peinet.pe.ca/SCDI/bridge.html or http://www.gov.pe.ca LAST MINUTE UPDATE: A homepage is available now. Completed information of this event can be found at the following WEB site: http://www.isn.net/wxsense/vy2cb.htm

L70FM, ARGENTINA. This special event station will be active celebrating the 70th Anniversary of "RADIO CLUB ROSARIO". Details of operations and length of activity were not provided. QSL via LU4FM (NOT LU2FFD).

LM, NORWAY. Liv, LA4YW, states: "Once again, 'Trondheims-gruppen av NRRL' have received a special prefix call, LM2T, this time because of our city, TRONDHEIM, is celebrating 1000 year this year." Liv said they tried for permission to be active for the whole year but were turned down. So, LM2T will only be active for one week. The celebration station will be active for one week between May 30th to June 6th. Activity will be on all bands and modes, and QSL is 100% via the bureau or via LA2T: Trondheimsgruppen av NRRL, Box 929, NO-7001 TRONDHEIM, Norway.

NH2, GUAM. JI3ERV/NH2C, JG3RPL/N1BJ, and JR7OMD/WI3O will be active as NH2C in the upcoming CQWW WPX CW Contest as a Multi-Single entry. QSL via JI3ERV. Sunrise/Sunset: 1953z/0842z

NOIDXC DXER OF THE YEAR..... Al Hernandez, K3VN (ex-WA3YVN), has been named DXer of the Year by the New Orleans International DX Convention. Selected from a slate of nominees, Al is a well-known DXer who has organized, supported and participated in many DXpeditions. For a brief but impressive bio sketch, see the "The Team" on the Heard Island (VK0IR) Web page at: http://www.ccnet.com/~cordell/HI/#Anchor61756
Al will be honored with a plaque at the 6th Annual NOIDX Convention in New Orleans (22-23 Aug 97), where he will also give a presentation of the VK0IR trip.

QSL INFO AND NEWS.....
Dominik, DL5EBE, informs OPDX that some misleading info has been published in various DX bulletins stating he is the QSL Manager for EM1KA and EM1U. Please note that he is not the QSL Manager for these stations, but for VP8CTR, Roman (EM1KA) at Vernadsky Base, Antarctica.

Reports indicate that the 7O1A cards are being received. ADDED NOTE: Just a reminder that this operation does not count for DXCC.

QSLs for LM2SKI (Nordic Skii World Championship February 1997) has been sent to all via the bureau. A total of 6522 QSOs were made in 11 days.

OPDX SPANISH WEB SITE. Thanks to "QTC Magazine", Tony Pernas, EA1CSI, QTC Magazine Staff, informed OPDX that the OPDX Bulletin will now be translated in Spanish and can be found on the World-Wide Web at:

http://www.intercom.es/qtc/qtcopdx.htm

SV5, DODECANESE. Fred, SM7DAY, will be active May 24th through June 13th as SV5/SM7DAY. His operations will be on 20-17 meters from Kalymnos. QSL via the bureau (home call) or direct.

VE8RCS (Ellesmere Island closing down). From Mike Lonneke HA/W0YR, in Budapest, Hungary: "In a QSO with VE8RCS on 12 May at 0848Z (20 M SSB), operator Steve at VE8RCS told me that Station "Alert" and Amateur Radio Station VE8RCS on Ellesmere Island would be closing down on May 15th. Steve, an unlicensed but authorized operator (who is studying for his own call) said the final QSOs from the world's farthest North station will be about 1000Z on May 15 on 20 meter SSB. He said the shutdown is much sooner than was expected.
Ellesmere Island (NA-008) is located at 82.2N, 62.2E and has been on the air for over thirty years as the communications link as the High Arctic Weather and Experimental Station. It is about 450 miles from the North Pole.
Experiments at Station "Alert" have included measurement of global warming indicators, pollution in the pollution in the global regions and measurements made by the Canadian team for other governments. Now, according to Steve, all functions will be automated. Steve said the step to full automation had been contemplated for some time but "they moved this along much faster than anyone thought. All we have left now is this 100 watt transceiver, the microphone and the 5 element yagi. Everything else has been boxed up." .....de HA/W0YR

VF6 & VX6, CANADA (Attention Prefix Hunters). Calgary Amateur Radio Association (CARA) is celebrating the 75th anniversary. The Alberta Radio Experimenters Association (AREA) was formed in 1922. CARA is one of the largest Amateur Radio Clubs in Canada. A special event station VX6CAR will operate from May 18th to May 21st. CARA members can use a special prefix VF6 assigned by Industry Canada from May 21st to June 1st 1997.

WP2, VIRGIN ISLAND. Andy, SM4CNN/DF3IAL, will be active as WP2Z, St. Croix, May 22nd to May 28th (which includes the CQ WPX Contest). QSL to his present callsign: DF3IAL, Anders Larsson, Riedhalsstrasse 10, D-60437 Frankfurt, Germany. Andy will be happy to QSL via the bureau. Requests with QSO info can be obtained via E-mail to DF3IAL@AOL.COM.

I agree that it is very difficult to remember all the questions and answer in the test pool, but memorization is not what we are after. What we should be striving for is comprehension. After all, most of the questions are just reworded from other questions. So, if you know the basic law, what frequencies you can do what on, and electronic and radio theory, then I believe that you would have no problem answering all the questions.

At least we will see if that will work when I take the test next month...

DX Bulletin 23 ARLD023
From ARRL Headquarters
Newington CT May 22, 1997
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with info provided by The 599Rpt, The Daily DX, Tedd, KB8NW, the OPDX Bulletin, Toshinobu, JI3ERV, and Contest Corral from QST. Thanks to all.

ANNOBON ISLAND, 3C0. The planned DXpedition to here has been canceled. The members of the Spanish Amateur Radio Association, URE, have rescheduled this operation for October 11, 1997.

GEORGIA, 4L. Mamuka, 4L2M, Omar, 4L5O, Valentin, 4L8T, Amiran, 4L4AK, Mero, 4L4MM and Givi, 4L4L, will participate as a Multi/Single entry in the CQ WW WPX CW Contest with the callsign 4L7C. Look for them to be QRV on 160 to 10 meters. QSL 4L7C to PO Box 387, Yeroham 80500, Israel.

CYPRUS, 5B. Members from the National Russian Team will be QRV as a Multi/Single entry in the CQ WW WPX CW Contest, using the callsign H22A. QSL via Uldis Silinsh, PO Box 3, Valmiera, LV 4200, Latvia.

PHILIPPINES, DU. K9AW/DU6 is active from Negros Island, IOTA OC 129, until June 1. He will be QRV in the CQ WW WPX CW CONTEST as well. QSL via WF5T

SAUDI ARABIA, HZ. Thomas, SM0CXU/AB5CQ, will be operating as HZ1AB either as a single operator, or on 40 and 20 meters in the CQ WW WPX CW contest. QSL via K8PYD.

JORDAN, JY. George, JY9QJ, and Ulli, JY8YB/DL5MBY, will be QRV from Amman in the CQ WW WPX CW Contest as JY8YB. They plan to be a Multi/Single entry. QSL to JY9QJ.

GUAM, KH2. JI3ERV and two other operators will be QRV as NH2C from Guam as a Multi/Single entry in the CQ WW WPX CW Contest. QSL to JI3ERV.

MARKET REEF, OJ0. Seppo, OH1VR, and Jorma, OH2KI, will be QRV from Market Reef from May 23 to May 25, using the calls OJ0/OH2KI and OH0MMM. Look for activity on 40 and 6 meters, and on the newer bands. There is no RTTY planned for this trip. QSL OJ0/OH2KI to OH2KI. QSL OH0MMM to OH1VR.

DODECANESE, SV5. Fred, SM7DAY, will be active May 24 to June 13 as SV5/SM7DAY from Kalymnos. His operations will be on 20 and 17 meters. QSL to home call.

BELAU, T8. Tosy, JA6VZB, will be QRV in the CQ WW WPX CW contest as T88X. He hopes to be active using RTTY or SSB before the contest. QSL the contest call via JA6BSM.

CANADA, VE. Members from the Calgary Amateur Radio Association will use the VF6 prefix until June 1 in celebration of the club's 75th anniversary. QSL to their regular VE6 callsigns.

THIS WEEKEND ON THE RADIO. The CQ WW WPX Contest, CW, and the ARCI QRP Hoot Owl Sprint, CW, are both on tap for this weekend. Please see May QST, page 97 for details.

1409. 100 hours contest rules

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-22 00:00:00 UTC
From: maury <i862@rocketmail.com>
Message-ID: <5m17ed$761$1@menelao.polito.it>
Source record: 32948
Cross-posted to: rec.radio.amateur,rec.radio.amateur.dx,uk.radio.amateur

100 ORE/HOURS

Period : From 0000 UTC 1 July 1997 until 2359 UTC 31 July 1997
Oper.time: A total of 100 hours divided into no more than twenty periods.
(eg: 10 hours the first period, 5 hours the second, 7 the third

and so on. The sum of the periods not to exceed 100 hours)
Bands : All the frequencies as specified below.
Modes : All modes (SSB, CW, RTTY, SSTV, AM, FM) except packet.
Reports : Only audible stations can be logged. A station reported thru
the
packet cluster must be verified with area QSL (this to avoid
logging a VK on 160 meters at 1000 UTC, unlikely for European
listeners).
Class A : Scope of the contest is to listen the maximum number of
countries,
from DXCC list, during a 100 hour period, using all bands from
160 to 6 metres (WARC included). The same country can be logged

only once independent of band or mode.
Class B : Scope of the contest is to listen the maximum number of
prefixes,
from the VPX rules, during a 100 hour period using all bands
from
160 to 6 metres (WARC included). The same prefix can be logged
only once independent of band or mode.
Class C : Scope of the contest is to listen the maximum number of Italian
stations during a 100 hour period using the band 160, 80, 40,
30
and 20 metres. The same Italian station can be logged only once

independent from band or mode (this class is valid only for
Italian SWL)
Class D : Scope of the contest is to count the maximum distance in
Kilometers
during a 100 hour period. (For QRB, the distance from SWL
Locator
to that of the station logged) using the 2 metres and 70 cm
bands.
On 70 cm the QRB is multiply by 2. The same station can be
logged
only once independent of band or mode.
Class E : Scope of the contest is to listen the maximum number of
stations

during a 100 hour period via satellite (any) on 10, 2 metres and

70 cm. The same station can be logged only once indipendent of
band or mode.
Logs: All logs must show in this order:
- date
- hour (UTC)
- band (in metres)
- callsign
- report (RST as heard by SWL)
- correspondent
- Country (only for class A)
- Prefix (only for class B)
- QRB (only for class D)
- Satellite (only for class E)

Summary : a summary sheet will show:
- name, surname and call of the listener
- address and telephone and (e-mail if possible)
- equipment used
- class of the contest (A, B, C, D, E)
- total number of stations heard during the 100 hour period.
- a breakdown of the 100 hour period (to show the hours of
listening periods)
- a declaration that the reports are true
- comments
Prizes : A certificate to each of the first three in each class.

The same SWL can participate in more than one class, but must send
different
logs for each class. Logs (on a sheet of paper or IBM PC disk) must be sent

before 31 August 1997 to:
I1-21171, Maurizio Bertolino, P.O.Box 2, 12022 Busca (CN)
or via e-mail at: I121171@amsat.org

1410. Sloar Flares and Sunspots

Have any of you ever wondered just what the "numbers" mean that WWV sends out at 18 minutes past every hour? Well I knew they meant either good or bad propagation but was never quite sure how to read them until recently. I have searched the web and finally found a web page that does a super job of explaining it all so I thought I would pass it along in case anyone else can use it and learn from it...

1411. The Software For All Your Needs

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-23 00:00:00 UTC
From: vmi@vmi.it
Message-ID: <5m49m2$30t$1@qualcuno.nettuno.it>
Source record: 32950
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

Hi Everybody, this is Fabrizio IK4VYX.

The latest release of DXTelnet (2.1) is ready and can
be downloaded from WD4NGB's nice web page:

http://home.sprynet.com/sprynet/wd4ngb

As you're there, you can sign on Bruce's guest book and
find many interesting ham related links.

For a complete list of all the features (new and old ones), please
see the above URL.

What's new in DXTelnet 2.1

3 programs in one:
DXTelnet: for telnet connections
DX-TNC: for packet radio connections
DX-Plorer: for connections to OH2BUA's Web Cluster.
The 3 programs can be run simultaneously and the info are
collected and displayed in each DX-Spot window, without
duplications.

Scripts:
DXTelnet and DX-TNC have a per site script facility which allows
automatic connection/reconnection both to Internet clusters and
to packet radio ones.
DX-Plorer performs automatic periodic connections to the Web cluster.
You can, of course, manually refresh data or submit your spots to the
Web.
To submit a spot to the web, you simply have to type the DX-frequency
and the DX-call (not also your call).

A new "talk to" function has been added:
If somebody sends you a talk, you can answer him by simply pressing
the F12 key.
Example: if you get a talk from WD4NGB-5, by pressing F12, the
program types "T WD4NGB-5 " automatically; this means 11 keystrokes
reduced to one!

Conference servers support:
Choose the Hydra site and talk with many hams, all over the world,
about many topics, on more than 30.000 channels

Text Print:
Now it is possible to print the text from any window, in one shot.

Long lines are automatically wrapped to fit the page (not truncated).

Spot Bridge (for Cluster SYSOPs only):
DX spots can be bridged between two Internet Clusters or between
an Internet and a radio packet Cluster.
This feature is not normally available cause dangerous: it requires
a special SYSOP password.

Better scroll and display:
Verticall scroll bars can now be added to better the scroll.
The font, which caused problems in version 1.0, can now be selected
and sized.

Tip of the day:
A neat solution which is immediately available with DX-Telnet 2.1,
is the DX Voice Server: by connecting the Sound Blaster output of
your PC to the Mic Input of any FM radio with a VOX, you can get
a DX-Spot Voice Broadcaster: useful for your locals who have not a
TNC and packet, or are moving aronud in their cars.

For further info you can contact me via email (vmi@vmi.it)
or via packet BBS mail (IK4VYX@I4UJB.IEMR.ITA.EU)
or also send me a talk on the US Packet Cluster Network.

Best 73 de Fabrizio (IK4VYX)

I.I.A. Italian Islands Award

*** IIA TROPHY - 1997 ***

This Trophy is issued by the Crazy DX Group.
Every OM and SWL (world-wide) can participate.
The purpose is to contact/listen/activate the largest number of different
italian islands.
Only referenced islands from the official IIA list will be valid, but also
any possible island reference released after the Trophy's starting.
The participation is free of cost.
Have a good hunting !

PARTICIPATION PERIOD

From June 1st to September 30th 1997.

BANDS

It will be valid every qso/listening/activity on every amateur radio band.

POINTS

Each different contacted/listened/activated italian island will count 1
point.

CATEGORIES AND PRIZES
---
3 categories are available: OM, SWL and DX-PEDITIONERS.
It's possible to participate at more than 1 category. Points of different
categories cannot be combinable.
In the DX-PEDITIONERS category, it's necessary for the participant to be
the
owner of the used call-sign in every activity.
A plaque will be awarded to the top scoring participants in each category.
Complete results will be sent by the postal service to every participant.

LOGS

Complete logs with datas of every qso/listening (call-sign, date, UTC time,
band, mode, IIA reference, correspondent call-sign for SWL category) should
be sent within November 30th 1997 to the following address:

CRAZY DX GROUP - P.O. BOX 11 - 04011 APRILIA - ITALY
or through e-mail: crazy@grisnet.it

For DX-PEDITIONERS category's participants, it will be enough to send the complete activities list (dates, used call-signs and IIA references).

SPECIAL PRIZE FOR THE CRAZY DX GROUP MEMBERS

A special prize will be awarded to the Crazy DX Group member that will achieve the best result.

I.I.A. Italian Islands Award

-- TROFEO IIA 1997 --

Il Trofeo, istituito dal Crazy DX Group, e' aperto a tutti gli OM ed SWL italiani e stranieri.
Scopo della competizione e' di collegare/ascoltare/attivare il maggior numero
di isole italiane diverse.
Fara' testo la lista ufficiale IIA. Saranno valide anche eventuali referenze
assegnate dopo l'inizio del trofeo. La partecipazione e' gratuita.
Buona caccia !!

PERIODO DI PARTECIPAZIONE

Dal 1 Giugno al 30 Settembre 1997.

BANDE

Sono validi i qso/ascolti/attivazioni su tutte le bande radioamatoriali.

PUNTEGGIO

Ogni diversa isola italiana collegata/ascoltata/attivata varra' un punto.

CATEGORIE E PREMI

Sono disponibili 3 categorie di partecipazione: OM, SWL e ATTIVATORI.
E' possibile partecipare anche a piu' di una categoria. Non sono cumulabili i
punteggi delle diverse categorie.
Per la categoria ATTIVATORI e' necessario che il partecipante sia il titolare
del nominativo usato in ogni attivazione.

Saranno premiati con una targa i primi classificati di ogni categoria.
I risultati e le classifiche saranno comunicati per posta a tutti i
partecipanti.

ESTRATTI LOG

Gli estratti log completi dei dati di tutti i qso/ascolti (nominativo,
data,
ora UTC, banda, modo, referenza IIA, nominativo del corrispondente per gli
SWL) dovranno essere inviati entro il 30 Novembre 1997 al seguente
indirizzo:

CRAZY DX GROUP - P.O. BOX 11 - 04011 APRILIA
oppure via e-mail a: crazy@grisnet.it
o via packet a: IK0QDB@IW0FEF.ILAZ.ITA.EU (bbs) o IK0QDB >I0OWK-6
(pcl)

Per i partecipanti alla categoria ATTIVATORI, sara' sufficiente inviare la
lista delle attivazioni completa di date, nominativo usato e referenze IIA.

PREMIO SPECIALE PER I SOCI DEL CRAZY DX GROUP

Un premio speciale verra' assegnato al socio del Crazy DX Group che avra'
conseguito il risultato migliore.

Summary notes of BV callsigns:
Now, ham radio in Taiwan, we have new prefix,
listings below:

BO1 xx -- Matzu island
BO2 xx -- Kinmem island
BO2YA -- CTARL Kinmen island club station
BV 0 xx -- celebration station
BV 1-8 xx -- Taiwan areas
BV9 -- nearby Taiwan islets,
BV9A -- Penhu island
BV9O -- Orchid island
BV9G -- Green island
BV9P -- Pratas island (DXCC)
BM(1-8)abc -- Class 4 callsigns (V/UHF only)
BN(1-8)abc -- Class 4 callsigns (V/UHF only)
BV(1-8)Yx -- CTARL Branch Club stations
BV9AYA -- CTARL Penhu island club station
BV4YL -- CTARL YL/XYL club station, mid-Taiwan area.
BV2Y -- CTARL Taipei office station
BV5Y -- CTARL HQ station

BV Bureau: p.o. Box 73, Taipei 100, Taiwan

CTARL - Chinese Taipei Amateur Radio League, IARU member society.

This isn't a DX question, but this group is so plesant
and well-mannered compared to some that I'll give it
a shot, with apologies.

I just tried the QSL info server at <qsl-info@datasync.com>
to get an address, and found out that it's DX info only.
But this was a stateside contact. (My first HF QSL in a couple
of years; I've got "the bug" back and just tossed up a dipole.)

I also don't have web access at home. Is there a QSL server
for W/K calls accessible via email? Many thanks and 73!

1421. Scarborough Reef DXpedition covered in "The Economist"!

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-25 00:00:00 UTC
From: eckman@exis.net
Message-ID: <slrn45of1r8.emg.eckman@eos1.larc.nasa.gov>
Source record: 32612

I was reading the current (5/24) edition of "The Economist", a prestigous British-based news magazine, and was suprised to come across a story about the current happenings among some of the disputed islands in the South China Sea. Apparently, there was a lot more activity going on during the DXpedition a few weeks ago between the Philippines and China. While "The Economist" seems to cast doubt that the Chinese vessels around Scaborough were actually engaged in "joint international amateur radio exploration activities", I can't help but get the impression that this latest DXpedition was being used by the Chinese government for other reasons than mounting a DXpedition.

I think that the DX community needs to step back and take a careful look at what we are doing in places like Burma (see, e.g., the interesting article in this month's QST on that issue) and Scarborough. I'm certain that our main aim is to get a "rare one" on the air. But is it worth being used by the host government to promote a rather distasteful regime (as in Burma) or to take sides in a territorial dispute between nations (as at Scarborough). I, for one, was rather annoyed by the glowing article on the Mynamar (Burma) DXpedition in last year's QST.

Anyway, I never thought that I'd read about DXing in "The Economist"!

1422. DX is beauty, beauty is DX

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-25 00:00:00 UTC
From: kuzen001@acpub.duke.edu
Message-ID: <5m840f$bc0@newsgate.duke.edu>
Source record: 32613

Wow. I haven't been active in a few years. Last time
I turned on the rig, 15, my favorite band, was deader than
the proverbial coffin nail.

This morning I tossed up a simple 40-m dipole fed with ladder
line--had the bug and there was no stopping it. The DX gods
even smiled on me to the extent that my ancient Griefkit, which
usually turns up broken when I want it, worked fine after a
long dusty lay-off.

Guys, I heard (and had good shouts at) a 9G, a CM, a CT, and
(praise the DX gods!) a OD! The only station I worked was an
EA8 I'd worked before (almost 5 years ago exactly) but never
got a card from. So at least I had another shot at a QSL from
an unconfirmed one.

My wife just got back from a business trip. I won't be on tonight
after all. But I'll be back tomorrow. DX is good. :->

1427. How much (little) power do I really need for 70cm ?

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-25 00:00:00 UTC
From: "Robert (Bob) Diaz" <cqbdiaz@pacbell.net>
Message-ID: <33889130.6B05@pacbell.net>
Source record: 32618

--

If you wish to email me, please remove the letters "cq" from the start
of my email. (I put the letters "cq" so that the automatic email SPAM
programs will get the wrong address.) :-)

This may be like asking a question like, "How high is up?", but I'm
a new ham and I'm trying to get a general feel as to how much power
is really needed to go the distance.

A few weeks ago, I purchased an Alinco DJ-S41T HT. With only 340mW
of power and a 3.5" antenna, I assumed that I might be lucky to get
1 or 2 miles range (if I was lucky). However, I was able to hit a
repeater on top of a hill 5 miles away. The signal reports said I
was coming in clean, no noise.

With the help up a friend checking my signal, I drove to work with
the unit. At different points I'll call my friend and he'd give me
a signal report. It turned out that from the parking lot at work,
he could hear me with just a little bit of noise. According to my
GPS, the parking lot is about 20 miles from the repeater we were using.

I'm well aware that anything that gets into the way of the signal
will reduce the range, but assume that I have a clear shot at a repeater;
How far can one go on 70cm with 340mW ?

Sincerely,

Bob KF6JHG

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 306
BID: $OPDX.306
May 26, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N6VV, EA4BB, I4IFL, IK8VRH, OH2BU/OH7RF, ON4BDS, OZ5MJ, SM6DER, VK4LW and YZ7ED/YU4 for the following DX information.

CANADIAN BC IOTA ISLANDS. In July you will see the first operation from Dundas Island (NA-118) since 1989. Also in July, a group from the U.S. and Canada will particpate in a Multi-Op effort from Queen Charlotte Island (NA-051) during the upcoming IOTA Contest. But before all this starts, Lew, N6VV, will be active as N6VV/VE7 from Quadra Island (NA-091), July 18-21st. Then from July 25-28th, Lew/N6VV/VE7 with K6XV, W7DR and a group of local VE7's will operate a Multi-Op station for the IOTA Contest from Queen Charlotte Island (NA-051). After their contest effort, N6VV/VE7 and W7DR will be active from the Dundas Island Group (Green Island) (NA-118) July 31st to August 2nd. All activity will be on 80-10 meters plus the normal IOTA frequencies with operations on CW and SSB. QSL via N6VV CBA.

D2, ANGOLA. Just before going to print, the OPDX received a message from Fernando, EA4BB and ex 9Q5BB. Fernando states he has received the license, D2BB. He will be working in D2-land and plans to stay for a year and a half. He will be operating all bands in his spare time. For the moment his rig is a CODAN transceiver with 100 W output, and the antenna is just a folded multiband dipole. He plans to upgrade this antenna soon, but is limited to SSB until he can get ahold of a key. QSL is via EA4BB, either bureau or direct.

DAYTON HAMVENTION DX HIGHLIGHTS (by Editor). Still recovering from the long three day event, I figured I should report (share) SOME of the activities that took place. The Southwest Ohio DX Association Dinner Banquet, which took place Friday night (May 16th), was highlighted with an interesting talk/slide show by Bob, KK6EK, on the Heard DXpedition. The majority of the VK0IR team was also present. The Southwest Ohio DX Association awarded the VK0IR team a plaque for DXpedition of the Year.

The SWODXA also awarded Ron, Wright, ZL1AMO, a plaque for DXpeditioner of the Year. The Hospitality suites (Friday and Saturday night) at the Crown Plaza where great as usual. I was especially pleased to see such a good response to the Northern Ohio DX Association's hospitality suite. The DX Forum on Saturday was also great. There was more on Heard Island and the VK0IR team (Just can't get enough - BUY the book and video!). There were also speakers for the TN2U/TN4M, XZ1N and ZL8RI DXpeditions. There was one thing missing this year. Many have commented and noticed that there was no report from the League and the DXCC Desk which usually opens the DX Forum every year. Lastly, I enjoyed myself as always. It is wonderful seeing all the friends I have made over the last few years (especially since I started writing the OPDX). Friendship is a major part of this hobby and I will be looking forward to returning to Dayton next year to see all my friends again. It is a shame that it only happens once a year.... 73 and GUD DX de Tedd KB8NW

FRENCH IOTA'S. David, ON4BDS, will sign F/ON4BDS/P from several French West Coast islands from July 12-28th. Look for David to activate the following IOTA's: EU-157/Cezembre July 13-16; EU-074/Brehat July 16-19; EU-065/Ouessant July 19-22; EU-068/Sein July 22-25; and EU-094/Glenan July 25-28 (This schedule is subject to change). He also plans to be active in the IOTA contest from the Glenan Islands. Operations will be on all HF bands in both SSB and CW (not more than 10 wpm PLEASE!) QSL cards are "OK" via the 1996 Callbook adress, or via the bureau to ON4BDS, his home call.

I.I.A. (Italian Islands Award). This Award/Trophy is issued by the Crazy DX Group. Every OM and SWL (world-wide) can participate. The purpose is to contact/listen/activate the largest number of different Italian islands. Only referenced islands from the official IIA list will be valid, but any possible island reference released after the Trophy's starting time will also be valid. The participation is free of cost. Participation period is from June 1st to September 30th, 1997. For more details checkout the I.I.A. Web site: http://www.mline.peoples.it/crazy

KH0, MARIANA ISLANDS. If you're lucky, you may catch a contact with Aki, JA5DQH, as KH0AA from Saipan before he leaves. He will be there until May 27th. He was active in the CQWW WPX CW contest. Aki will be running 500 watts and use only dipole and vertical antennas on the roof top of his hotel. He plans to be active on the WARC bands and 160 meters. His Sunrise/Sunset is 1944z/0840z. QSL via JA5DQH.

MALYJ VYSOTSKIJ ISLAND (ex-4J1). Jari, OH2BU/OH7RF, reports the following: After a nearly two year hiatus, Malyj Vysotskij (ex 4J1-) will be reactivated this coming June. This 7th M-V Island DXpedition will start operations late afternoon (local) on Thursday, June 5th, and run through Monday morning, June 16th. Two callsigns are in use, OH5AB/MVI and R1MVI. Both calls reflect the uniqueness of this DXCC country located within the territory of Russia but under the control of Finland. Malyj Vysotskij, or Ravansaari, (EU-117) is located in the Bay of Vyborg northwest of St. Petersburg. The all-band, all-mode operation, involving twelve operators

from Finland and Russia, will be running at least three complete stations 24 hours a day. Look for this operation on the following frequencies:
CW - 1830, 3501, 7045, 10101, 14025, 18069, 21025, 24891 and 28025
SSB - 1845, 3795, 7045, 14195/14295, 18145, 21295, 24945 and 28495
RTTY - 14084, 18104, 21084 and 28084 kHz

There will also be some local 144 and 432 MHz operation, but there will be no satellite operation. Operators are Orvo/OH5NE, Ari/OH5KUY, Eero/OH5PT, Veikko/OH5YB, Pentti/OH5WR, Alex/RV1AC, Alex/RU1AS, Alex/RZ1AZ, Vasiliy/RV1AN, Igor/RN1AB, Vlad/RA1ACQ and Vlad/RW1CW. All operators are from Lappeenranta and St.Petersburg Radio Clubs. QSL manager for OH5AB/MVI and R1MVI is: OH5NE, Orvo Arkko, Muukko, FIN-53400 LAPPEENRANTA, FINLAND.

N6, SANTA CATALINA ISLAND (USA). Europeans begin looking for Lew, N6VV, from May 30th to June 2nd, signing portable (N6VV/p) from IOTA NA-066 during the West Coast morning and evening openings. Suggested frequencies: 14260 SSB, 14040 CW, 7260 SSB and 7040 CW. QSL via N6VV CBA. Additional information can be obtained from Lew at lew@premenos.com or his WEB site at: http://www.book.net/N6VV

NEW IBP HF BEACONS. Martin, G3USF, IARU Region 1 HF Beacon Coordinator, reports another of the five-band HF beacon network stations is now operational. The VK6RBP beacon, sited 28km south-east of Perth, is like all the other IBP beacons where the power steps down from 100 watts to 0.1 watt in four stages, transmitting 10 seconds on the IBP frequencies on the 14, 18, 21, 24 and 28 MHz. Also, the JA2IGY beacon which operated on the 14100 kHz frequency only, is now understood to be operational on all five bands. According to Martin, this leaves four beacons not as yet operational (BY, UA, OA and ZL). There are 14 beacons now on the air, and all these beacons are sponsored by NCDXF.

OJ0, MARKET REEF. The planned operation by OH2KI and OH1VR during the CQWW WPX Contest for this past weekend had to be cancelled due to transportation/weather problems.

PARTNERSHIP FOR PEACE (PFP) AWARD. Sten, SM6DER, reports during the "Partnership for Peace" exercise in Sweden, the Hisingens Radioclub (SK6AW) together with Naval Command West (SL6BE and SL6BF), will issue an award for working amateur stations between now and May 31st. Information and rules can be found on the following WEB-site: http://home3.swipnet.se/~w-34041/award/

QSL INFO AND NEWS....
Ivano, I4IFL, reports there is a new address for the QSL Manager of IQ4T: IK4HVR Francesco Tonetti, Via Marmolada 66, 47023 CESENA FO, Italy.

T88X - Operator Tosy, JA6VZB; QSL via JA6BSM for this contest. (Note: WPX SSB is via JE6DND).

YT4I and 4O4C active during CQ WPX CW Contest have the QSL Manager of YU4WU, Robert Babec, P.O.Box 224, R.S. via Yugoslavia.

SPECIAL EVENT (1 DAY!). In celebration of one of the greatest bridge/ tunnel constructions in the world which will be opened for railway traffic June 1st, the following Danish stations will be active on the Store Baelt (Great Belt): OZ2DSB, OZ3DSB, OZ5DSB, OZ6DSB, OZ8DSB and OZ4DSB/GB. The last station will be situated on the bridge. The stations will be active June 1st, from 0800 to 1600z. The frequencies will be 3700, 7060, 14335 kHz and 145.450 Mhz. There will be 3 QSL-cards issued. One of them will be in watercolor showing a freight train leaving the tunnel. QSLs will be sent to all, but if you want a direct QSL or need further information please contact: OZ4IO President for FIRAC/OZ, Oluf Krog, Brinken 5, DK 8260 Viby Jylland, Denmark.

VK9W, WILLIS ISLAND. The Oceania DX Group (ODXG) is planning a DXpedition here with the following operators: Harry/VK4DHM, Bob/VK4MR, Jon/VK4CY, Ann/WA1S, Jon/K7CO/VK2DXT, Gaby/XE2Z/XE2GV, Elvira/IV3FSG, Eric/FK8GM, Bill/VK4FW and one JA YL yet to be announced. The ten operators plan to leave Cairns, Australia, on September 9th, on the 60 foot vessel called "FLOREAT". This journey will take approx. 30 hours and the DXpedition will have over 3 tons of equipment which include 800 litres of petrol. Their 12 day stay on the island will consist of 2 separate campsites set up to operate up to 6 complete HF stations and 1 on 6 meters. They plan to operate 160-10 meters, SSB, CW and RTTY. The budget for this Dxpeditions is $32,400 (USD). Donations are most welcome no matter how big or small. They report that they are fortunate that the vessel has been secured at a reasonable rate, or it would have been $40,000 (USD). Donations can be sent to ODXG WILLIS EFFORT, P.O. BOX 929 Gympie, QLD 4570, AUSTRALIA. A ODXG Dxpedition home page detailing the Willis Island trip by ODXG members has been put online at: http://www.keylink.com.au/odxg

ZP, PARAGUAY. Ernesto, LU6BEG, who was active last weekend as ZP0M during the CQWW WPX CW Contest, will continue to be active after the contest as ZP5/LU6BEG. The length of his activity is unknown. QSL ZP0M via ZP5XF and ZP5/LU6BEG via home call.

Hello, fellow DXers
I just got my IC-765(oldie but new for me, hi.) and I heard there is a
mod. for front end of this rig.
Something to do with PIN diodes to improve noise figures.
If anyone familiar with this mod. please drop me a line. Any other
mod info, on this radio very much appreciated.

1433. ?TS570 experiences?

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-26 00:00:00 UTC
From: on4bds@NOSPAMmicroware.be
Message-ID: <5mcn60$923$2@tornix.tornado.be>
Source record: 32624

Yo all,

I need a new HF rig, and am considering buying the new TS570 from Kenwood (http://kenwood.anv.net/hf/ts570/)

Anybody got any experiences with this rig?

How does it handle strong signals on the lower bands? It is known that mobile rigs often have problems with this when hooked to the 'big antenna'. I would use it as a base station, and on DXpedition.

And what about running contests with it?

Thanks in advance for replies,

73's de David on4bds.

1434. F/ON4BDS/P, French West-coast IOTA DXpedition

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-26 00:00:00 UTC
From: on4bds@NOSPAMmicroware.be
Message-ID: <5mcn63$923$3@tornix.tornado.be>
Source record: 32625

F/ON4BDS/P, French West-coast IOTA DXpedition.

This DXpedition will take place from 13 till 29 July 1997.

I am planning to be active on the following IOTA's:

EU-157 C�zembre : 13 - 16 July
EU-074 Br�hat : 16 - 19 July
EU-065 Ouessant : 19 - 22 July
EU-094 Glenan : 22 - 25 July
EU-068 Sein : 25 - 29 July

This schedule is subject to change.

I will also be active in the IOTA contest, from Sein island EU-068.

Transceiver will be a Kenwood TS50, and antennas will be dipoles, an FD4, and perhaps a 19AVT vertical too. I am aiming especially on Europe, but will provide an antenna for Stateside and Japan.

Operation is planned on all HF bands, in both SSB and CW (cw not more than 10 wpm pse!)

QSL cards are ok via the 1996 Callbook adress, or via the buro to ON4BDS, my home call.

Hope to give you some new ones!

1435. Most wanted list

Hi all,

I am planning a DXpedition in summer to some 6 French IOTA-groups.
Therefor, I would like to know which of the following groups are the
most wanted. So pse check you IOTA directories, and see which ones out
of my list you have not yet worked.

EU-081 Iles St Marcouf
EU-156 Tomberlaine
EU-114 Guersney
EU-013 Jersey
EU-039 Iles Chausey
xEU-099 Les Minqueres
EU-157 Rochefort
EU-074 Brehat
EU-107 Les Sept Iles
EU-065 Ile d'Ouessant
!EU-094 Glenan
EU-068 Sein

Thanks in advance!

73's de David.

Kure call is KH7K

1443. For Sale -- 10 hours of awesome music on ONE CD - $16! MP3!

Newsgroup: rec.radio.amateur.dx
Date: 1997-05-27 00:00:00 UTC
From: mp3@mp3.com
Message-ID: <mp3-ya02408000R2705972359240001@news.supernews.com>
Source record: 32634
Cross-posted to: rec.radio,rec.radio.amateur.digital,rec.radio.amateur.dx

KNEE DEEP IN MP3s
==========

Available here for the first time: a full ten hours of insanely great music on one CD for only $16! Thanks to the mind-bending compression of MP3 technology, we can offer you this disc, Knee Deep in MP3s for a limited time.

What is an MP3?
==========
Well, its a digital audio compression format, similar to the one used on music CDs. Instead of using a whopping 8mb to store one minute of music (like CDs do), MP3 compression allows for ratios around 1mb per minute. That means on a single CD, you can store over ten hours of digital quality music! And that's exactly what Wide Awake has done.

Needless to say, the record companies and major labels do not want you to know about this. It could ruin their big push for DVD in the next six months (or whenever they get off their ass), not to mention the fact that it could spawn rampant trading and copying of music, just as software is traded and copied today.

About the disc
==========
It is available in either a Mac or Windows format (must specify)

Mac Requires	Windows Requires
PowerPC	Pentium
System OS 7.5 or greater	Windows 32-bit (95 or NT)
2x CD-ROM drive	2X CD-ROM drive
Sound Card	

It is optional that your computer be hooked up to an external stereo system, although you will get much more enjoyment out of the files if heard through decent speakers, etc.

All the required software to play the MP3 files have been graciously included on the disc, so all you have to do is pop it in your CD-ROM drive, drag-and-drop a sound file or two, and let it rip! Note : this is a DATA CD, and will NOT play on your normal CD player.

The Music
==========
The final choice of these five categories left us arguing and still unsure. We hope these will work for you.

ALTERNATIVE
Since this rock categorization has recently become mainstream, we will label this the mainstream area. Janes's Addiction, Iggy Pop, Marilyn Manson, NIN, Smashing Pumpkins, No Doubt, Squirrel Nut Zippers, Duran Duran, U2, White Zombie, Garbage, Jewel, Radiohead, B-52s, Cardigans, Enigma, Fiona Apple. And many more.

CLASSICS/RETRO
All your old favorites. Beatles, Grateful Dead, Velvet Underground, Eurythmics, Devo, Stray Cats, Ramones. Plenty to revive your old habits.

ELECTRONIC/ DANCE
Longer and more intelligent dance songs from Orbital, Moby, Fluke, Aphex Twin, Chemical Bros, Dune, The Orb, Yello and a slew of others.

RHYTHM
This split from the Alternative section into its own category. Find Ska, Reggae, and Rap here. Coolio, Jamouriqoai, Sublime, Beastie Boys, Beck, Bob Marley.

MOVIES/TV
It does wonders for your mood to hear the theme to an old TV show. Or a movie's distinctive soundtrack. Find them here. Inspector Gadget, Mission Impossible, Dukes of Hazzard, Star Wars, Blade Runner, The Muppet Show, or the A-Team.

Ordering Info
==========
Call Wide Awake Enterprises toll free at 1-888-553-0246 and leave a message including the following information:
- Name
- Phone Number (with area code)
- Email address
- Product you want (Knee Deep)
- Any other pertinent facts

One of the Wide Awake operators will get back to you and charge the $16 fee (no shipping or handling!) to your Mastercard or Visa. The disc will be shipped to your door the next day.

Look for more compilations in the future, as more and more great artists are added to our collection!

If you have further questions, feel free to email prophet@bigfoot.com.

Sure ... N4BQW/KH7K was just there a week or so ago. QSL via WA4FFW.
He called me (I just love saying that!! ;-) on 20m SSB and then proceeded
to work the pile up from there. He has already left the island ... not
sure what, if any, plans he may have to return in the future. He was
QRV for several days ... but mostly running 100w and simple antennas
as I recall. He was most workable (for me) on 40m and 20m ssb. I think
he only made a few QSOs on CW.

<g>..

Got 'em on 20 CW & SSB and 30 CW myself. Didn't own an amp at the time. Admittedly did have a 7-el Yagi. But I did work well over 250 countries before buying that first Yagi and amp - indeed, over 200 with that kind of station in the last 3-4 years.

Cluster & force are actually more work.. as everyone else is in there calling too. Indeed, if something really rare gets spotted, I usually ignore it; there's no way I'll be able to hear the DX well enough to work it. Instead, I use the cluster to know what's on & try to figure out his operating habits. Then, recheck the appropriate frequencies later & see if I can find him before the crowd.

And then sometimes you're just lucky. (like when the V85, KH3, and T5 answered my CQs...)

it would be a good idea to avoid arranging such contests in the
future.
It is a growing group of persons who are rather annoyed by the selfish

persons who believe the bands are to be used for only the contesters!

I like to operate CW contests, but our national society wish that
different groups of amateur can share their different interests
operating ham radio at the same time.
In our contest rules for 80/40m it is said that we shall only use
3510-3560 cw, 3600-3700ssb, 7010-7040 cw, 7045-7090kHz

wouldn't this idea be wise to follow up???
Isn't it sufficient amount of frustrated persons on the air?
I believe so. Please don't add to this number!

SB DX ARL ARLD024
ARLD024 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, The Daily DX, Ralf, DH3IAJ, Jani, OH2BU, Laci, HA0HW, 425DXnews and Contest Corral from QST. Thanks to all.

TAIWAN, BV. Gus, SM3EVR/BV2 is QRV until October. No specific bands or modes were mentioned. QSL to home call.

BAHAMAS, C6. Joe, WB8GEX, will be QRV as C6AJR from May 30 to June 2. QSL to home call.

ANGOLA, D2. Fernando, EA4BB, will be QRV as D2BB until the end of 1998. He is tentatively using SSB only with 100 watts. CW operations will soon follow. QSL to EA4BB.

IRAN, EP. Ali, EP2AG, is QRV and can be found on 20 meters between 2100 and 2200z. QSL via EP2MHB, PO Box 16765 154, Tehran, Iran.

NORWAY, LA. Special Event station LM2T will be active from May 30 to June 6 to celebrate the 1000 years of Trondheim. QSL via LA2T, Trondheims gruppen av NRRL, Box 929, NO-7001 Trondheim, Norway.

MARKET REEF, OJ0. Markus, DL1IAN, with DL3YEL, DL5IO and DL6GV will be QRV from here from June 1 to 6. The callsigns will be OJ0/homecalls. Expect SSB, RTTY and AMTOR activity on 80 to 10 meters, including the newer bands. QSL all calls via DL5IO.

MALYJ VYSOTSKIJ ISLAND, R1MV. A group of 12 operators from Finland and Russia will be here from June 5 to 16, using the callsigns OH5AB/MVI and R1MVI. Look for CW, SSB and RTTY activity on 160 to 10 meters, including the newer bands. There may also be some local 2 meter and 70 cm activity. No satellite operations are expected. QSL both calls via Orvo Arkko, OH5NE, Muukko, FIN-53400

Lappeenranta, Finland.

POLAND, SP. Look for Special Event Station SN9JP to be QRV from June 1 to 15 in celebration of a visit to Poland by Pope John Paul II. Activity is expected on 80 to 10 meters. Some 2 meter satellite activity is also planned. QSL via SP9PKZ.

DODECANESE, SV5. Laci, HA0HW, with HA4GDO, HA6NL, HA6PS and HA6ZV, will be QRV as SV5/homecalls/p from June 3 to 17. CW, SSB and RTTY activity is expected on 160 to 10 meters, including the newer bands. There may also be some 2 meter and satellite activity. Look for them on RS-10, 12 and 15, with downlink frequencies of 29421/29441 khz and 29321/39341 khz. QSL to home calls.

CAMBODIA, XU. Hiroo, JA2EZD, is QRV as XU2A and can be found on 20 meters between 1800 and 1900z most days.

It would appear, from the use of the word 'listen' that that above contest
is for SWL stations. If your 'growing group' is annoyed by SWL's, seems
to me that you have the problem, not the people arranging the contest.

But then what is really left that you can do on ham radio or post in one of
the ham newsgroups that doesn't annoy someone ?

There always are. With a few minor exceptions, phone and CW contests are NOT held at the same time; you can always work CW during a phone contest, and phone during a CW contest. And the WARC bands are off-limits to all contesting.

Personally, I'd like to see a segment of each band reserved for non-schedule activities. Many a day I've searched a band from one end to the other looking -- unsuccessfully -- for a place to call CQ between the schedules and "nets"..

(BTW I think you have an excellent point about SSB contesters in the CW bands. Though on 40m, the widespread adoption of RTTY -- and of AX.25 packet -- have made is pretty difficult on the SSB op)

My name is Mick Williams and I do I talk show on computers called "CyberLine" here in Dallas, Texas and consult on the side. I too am a Psion 3a user/owner.

Here is my problem:

I have a client I'm trying to sway from buying an HP 200LX (it's discontinued.) or a Windows CE. I've heard from the local Psion rep here that there is software that will allow the Psion to do PSDN (Packet Radio) and other ham stuff (DX Logs, QSL, etc...)

Dose anyone know of a source for such software and how to contact?

Thanks in advance,

Mick Williams

There is an excellent web page with LOTS of ham (amateur radio) stuff for the Psions. There is also a great packet radio program called PocPac from G0HZK (hzk@cix.compulink.co.uk). For all these web pages, check out the Psion programmers on the web reference list at:

This discussion refers to the DXTelnet 2.1 software
version.

URL: http://home.sprynet.com/sprynet/wd4ngb

DXtelnet 2.1 allows automatic connection/reconnection
both via radio (thanks to the included DX-TNC program)
and via telnet.
The user can create a script file, for each site, which
will be used by the program to connect automatically
with a "send/receive" model.
When the automatic reconnection is enabled, a dummy packet
is sent periodically to produce a Cluster prompt which
must be received within a certain timeout.
If the prompt is not received within the stated timeout,
the connection process is restarted automatically.
This, not only grants a monitoring of the connection, but
also fools disconnection idle timeouts with a minimum
extra traffic.
The feature has been tested for long time and proved to
be very stable.

I think it's well worth testing it, also to discover other
very interesting DX related features.

If you plan to test DX-TNC, a TNC in terminal mode, TAPR or
WA8DED, is required: kiss or host modes are not supported.
This software requires a pc with Win 31, Win 95 or Win NT.

Best 73 to all de Fabrizio (IK4VYX)

WWW Message Board Experiment

Folks,

May I engage your services for an experiment...

As you know, I set up a "Personal Web Server" on my
home computer running Win95. Previously, the server
had only a copy of my web page...

But, now...

I have taken the mirror of my home page off and installed
an automated message/discussion group faility called aptly
"Short Circuits"...

Please go to my home page http://www.qsl.net/k7on and click
on the rotating arrow and while I'm connected you'll be then
connected to my personal server where you can access the messages
entered by you and others.

It is threaded and resembles a Usenet newsgroup, but will not
be spammed as it is not connected to the Internet by a static
IP address...(this is part of the experiment, BTW...)

Please give it a shot!

I'll be watching for messages on there and I've put 2 already myself.

73, Brian http://www.qsl.net/k7on

Howdy Paul -- well depends where you are at. Due to propagation
characteristics, I might have propagation to DU land from San Diego--
but you may not hear em on the east coast.

Here in San Diego, the DX Packet cluster shows the "best" freq was 20M
at about 1300 to 1400Z.

You might want to go to the "INDEX" below, click on "DX Packet Clusters"
choose a telenet site and link into the DX packet Cluster near you. The
command on our cluster is "sh/dx/20 DU" this will give the last 20 DX
Spots for the DU prefix -- Phillipines. Haven't tried this myself so not
sure of the results you will obtain.

Another way is get on your local 2M repeater -- ask from time to time
"If any one has DX Packet Cluster capability??" Have them do a search
as above.

Also QST has graphs that show propagation paths from your area to the
world -- these are pretty fair indicators for propagation. But I have
found Packet Cluster spots to be more specific for a particular country.

Hope this helps.

> the Philippines?

Depends on your setup, position and mode of operation.
Not very easy to answer (you don't even give your call sign
to know where you are on planet earth)

Assuming you are in North America East Coast we had some
ExtraDxordinary openings on 20m at night last week with
lots of Pacific and Asiatic stations (VKs, ZL, WH6 etc)

On 40m you may catch some (late afternoon/early morning)
On 80m at sunrise there are from time to time stations from
DU but they are extremely rare and there are ENORMOUS PILUPS.

You can check the propagations charts to help you plan your
"attack" they don't work all the time but they are very usefull.

There are also lots of programs (shareware and other) to compute
probability of good propagation to a specific area of the world.
Check the ARRL FTP site or SIMTEL Hamradio (they are in my pages)

Tentative CallSign License in Taiwan
R:970531/1758z @:BV5AF.#CHA.TWN.AS CHANGHUA TAIWAN Z:50061 #:1008

Hi All
Now, all foreign HAM can enjoy ham radio during staying or visiting
and/or travelling in Taiwan.

The application of Tentative callsign license is very easy and
simple, all he/she should do are listed below:

1, mail or fax his/her home callsign license including VISA copy
to CTARL 2 wks b4 arriving. Of course, pls give us your home addr,
tel/Fax, e-mail etc. at the same time.

2, if been arrived Taiwan, pls contact with CTARL branches office,
or direct fax his inquiry / application to CTARL HQ. All the
applications should include his QSL info and Mailing addr.

3, The max period of each Tentative callsign license is 6 month,
can be renewed every 6 month. (no times limitation.)

4, All are Free of Charge.

5, Can operate ham radio at any of legal BV station,
now, there are about 1500 BV stn in Taiwan.
(not including BM stn, they are more than 5000 stn..
while BM stn are of V/UHF and mobile stn)

6, CTARL HQ info (Chinese Taipei Amateur Radio League)
Fax:+886-4-7385441, Tel: +886-4-7388746.

I have been looking for a used 2M HT, but all of the local
hamfests have fallen short. I was looking for a used 2 meter HT with NO
FEATURES at all, it only needs to transmit and receive.
I will be using it for communication around a Boy Scout camp I
will be working at this summer, and I would use it on hikes to contact
other members of the staff licensed as ham radio operators.
IF ANYONE KNOWS WHERE I CAN GET A RADIO LIKE THIS WITH LITTLE TO
NO FEATURE FOR LITTLE MONEY I WOULD GREATLY APPRECIATE IT and it would
make my scouting experience more enjoyable and fun!

Please e-mail me at: preming@alpha.psd.k12.co.us

I listened for a while this a.m. (13-14Z Sun 1 Jun 97) to
14225, the pileup apparently for KH0I. Man, what a MESS.
Several people just shouted their callsigns (or just "last 2")
every 5-10 seconds, regardless of what was going on or who
was transmitting. So much QRM I never did hear the DX sta's
call and had to check the cluster to find out who it was.

Sure hope I hear a well-mannered pileup with courteous ops
again soon, to get the taste of that out of my metaphorical mouth.

Source record: 32683

Earlier today I was listening to F5VCR/P on 20m who said he was working from AT122. He did announce the name of the island a few times and each time it sounded as though he said it was the French island of Lord but I can't trace anything which sounds like that.

What is the AT listing (presumably Atlantic?). I have the IOTA lists but they don't show any ATs.

SB DX @ WW $OPDX.307
Ohio/Penn DX Bulletin No. 307

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 307
BID: $OPDX.307
June 2, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & 59(9) DXReport, W3UR & The Daily DX, AB4IQ, K4VUD, W4NS, N6ED, K7DBV, K8CX, K8XP, WB8HNC, WZ8D, DJ5AV & DX News Letter, DU9RG, F5ATD, G4BUE & DX News Sheet, G4FUI, HA0HW, IK1DPA, OH2BH, PS7AB and SP9MAX for the following DX information.

7O, YEMEN. "Keep Your Fingers Crossed" for this one! The "DX News Letter" reports Zoli, HA5PP, will arrive in Aden on June 27th, and hopes to be active in September signing 7O/HA5PP, 7O8DX or 7O8CW. QSL via HA5YPP.

7Q, MALAWI. STEVE, 7Q7SB, visited with Paul, ND4X, and Doyl, AB4IQ, in Paducah, KY., on May 26th. He is presently on leave and is living in Midland, TX. He has upgraded his U.S. license to General and is almost ready to take his Advanced. He will return to Malawi July 16th (1997), and will be back on the air sometime in September or October. He should remain there for two or three years. This time he is taking back with him a computer equipped with DXbase, SB200, and a rotator for his Cushcraft beam. AB4IQ will remain as his QSL Manager. With the sunspot cycle improving, he should be quite active as time permits. He is a missionary and maintains a very busy schedule.

9N, NEPAL. Charles, K4VUD, will be in Kathmandu for 20 days beginning July 8th. He plans to operate on 14195 plus or minus and 14.226.5 around 1300z. He is looking for any advice on wire antennas and what other (one) band he should choose. He is hopeful he will have access to the hotel roof for antennas. His E-mail address is: harpole@pegasus.cc.ucf.edu QSLs go to K4VUD callbook address.

A3, TONGA. There will be a couple of station active from here over the next couple of weeks. "The Daily DX" reports Bob, W7TSQ, will be operating from Ha'apal (IOTA OC-169) as A35SQ, from June 4-16th. QSL via W7TSQ direct ONLY. Dennis, W7SNH, may be active as A35DB, from June 4-9th, on RTTY (AMTOR). QSL to W7SNH (ex-WB7SNH). REMEMBER: There is not a

A35 QSL Bureau on Tonga. QSL only to the station's homecall.

A4, OMAN. "The 59(9) DXReport" states Chris, ex-A71CW, is in Oman but not yet active . He reports anyone needing A71CW cards can still use P.O. Box 22101, Doha, Qatar until May, 1998, as his mail will be forwarded.

BV, TAIWAN. Gus, SM3EVR/BV2 will be active until October. No specific bands/modes were mentioned. QSL via homecall.

C6, BAHAMAS. Begin looking for John, WZ8D, from Abaco, Bahamas (IOTA-80), June 5-19th, as C6AIE. Activity will be on 80-2 meter. QSL via WQZ8D: John Walker, 1930 Meredith Ln., Loveland, OH 45140-7216. Skeds can be arranged via E-mail: wz8d@goodnews.net

EP, IRAN. A couple of stations have been active from here. The one may be a SLIM (pirate). EP2MKO (WFWL!) has been showing up on 14004 kHz as early as 2045z and as late as 0130z. QSL via UA6HCW. Ali, EP2AG, shows up sometimes on 14240 with 9K2MU around 2115z. QSL via P.O. Box 16765-154, Tehran, Iran. Also, Moshen, EP2SMH, running QRP, can sometimes be found on 14240 kHz during the same time as EP2AG. QSL via P.O. 17665-441, Tehran, Iran. The best times to look for these stations are on Thursday evenings and Fridays (this is their weekend).

IOTA NEWS. Tony/IK1QBT, Nino/IK1ZOZ and Alex/IK1PLD plan to be active from Gallinara Island (Ligurian group, IP1) IOTA EU-028, between June 7th and 8th. Operators will sign IP1/homecall. Operation will be on all HF bands SSB/CW (WARC bands included) around the standard IOTA frequencies. There will also be activity on 6 meters, VHF and UHF in SSB. Reference number for the Italian Island Award (I.I.A.) is SV-01. QSL via their respectives home calls via bureau or direct.

KP1, NAVASSA ISLAND. The "DX News Sheet" states that rumours from Dayton's HamVention say several groups are looking at an operation in 1998, despite the problems of getting permission to land and operate.

KP2, U.S. VIRGIN ISLAND. Carroll, NA4I, will sign /KP2 from here and will be active June 12-18th. Activity will be mainly on 6 meters which includes an entry in the ARRL VHF Contest on June 13-14th. Also, look for W6JKV/KP2 to be active in the VHF Contest.

QSL INFO AND NEWS......
Well known DXer from DU-land, Robin Go, DU9RG, informs OPDX that he has a new QSL address: Robin U. Go, 818 Acacia Avenue, Ayala Alabang Village, 1780 Muntinlupa City, Philippines. He reports the reason for the change is that he often receives his mail in Cotabato City and it is either lost or opened.

Martin, G4FUI, is now in possession of the logs for his trip last year to Lesotho (7P) and reports the QSL cards have been printed. He has started sending direct cards out this past week. Martin mentions the CallBook address may not be correct. His present postal address is: Martin Rigby (G4FUI), 16, Juniper Way, PENRITH, Cumbria, CA11 8UF, U.K.

QSL info for II1R. The QSL Manager for II1R is IK1DPA. QSL via the bureau or direct to: IK1DPA, Roberto Rebaudo, via Giovanni Pascoli, 14, I - 18038 Sanremo IM, Italy

UA9AJ and RW9USA Callbook addresses are INCORRECT. All QSL requests should go ONLY to UA9AB -- either via the bureau or direct: Gene Shcumat, PO Box 17, Troitsk, 457100, Chelyabinskaya OBL, Russia.

THE CORRECT QSL MANAGER for AH8A is AC7DX (POB 25426, Eugene Oregon, 97402). W6OSP has been getting many cards by mistake. He is NOT the manager. AC7DX has the computer logs back to 1994. QSL direct.

Brett, VS6BG, advises to have patience for his VS96BG cards as his travel schedule has been hectic. He also states VS6 stamps will no longer be valid after the July handover.

Martti, OH2BH, reports all U.S. direct requests for XX9X, XX9TR, C21BH, and XZ2BH were recently mailed. The rest of the world is also currently completed while the JA QSL cards are still in the process. Logs will remain open until the end of June. QSLs will be answered next time at the end of August. In November, all the remaining QSOs will be QSLed through the QSL Bureaus. Please send your request in June for a quick turnaround to: Martti Laine, Nuottaniementie 3D20, 02230 Espoo, Finland.

SP, POLAND. Look for Special Event Station SN9JP to be active between June 1-15th, to celebrate the visit of Pope John Paul II to Poland. Activity will be on CW, SSB and RTTY with operations on 80 to 10 meters. Look also for 2 meter SAT activity. Send QSL cards via SP9PKZ or bureau. Also, remember that 3Z0JP (see OPDX.304) is supposed to be active now until June 15th to celebrate the visit of Pope John Paul II to Poland. QSL via SP6GVU.

SV5, DODECANESE. A Hungarian group will fly to the Island of Rhodes (EU-001) and will be active June 3-17th. The members of team are HA0HW/ Laci, HA4GDO/Tomi, HA6NL/Laci, HA6PS/Zsolt and HA6ZV/Tibi. They will be using their calls with SV5/ prefixes and /p behind the calls. They plan to be active on all HF bands from 160-10 meters on CW, SSB and RTTY, too. Their suggested frequencies are:
CW - 1831, 3511, 7011, 10101, 14011, 18074, 21011, 24891 and 28011 kHz
SSB - 1841, 3789, 3789 (3611 for HAs), 7089, 14189 (14260), 18141, 21289, 24941 and 28489 kHz
They also want to work on the satellites such RS-10 12, RS-15. Their down link will be 29421/29441 and 29321/29341 kHz. They will try to work on 2 meters as well. They will run two separated stations on HF bands at the same time in hopes that everyone who wants to get SV5 on a wanted band and/or mode can work them. They will answer all QSL requests by the way they are received (if arrived via bureau they will go out via the bureau and if they are received direct 'with the appropriate cost to return postage' they will be answered direct).

Meanwhile, also look for SV5/OM3LA to be active from Kos Island from July 9-23rd. Planned activities will be on CW/SSB/RTTY and on all bands. QSL via OM1APD.

T33, BANABA ISLAND. Ron, ZL1AMO, is reportedly back home in Auckland and was not able to get to or be active from Banaba due to transportation problems.

TM0, FRANCE. The callsign, TM0RSE, will be reactived once more on the weekend of June 6, 7 and 8th. This special call is used by a group of French morse code enthusiasts during important celebrations. The Allied invasion in Normandy is such an occasion. The station, installed in the tower of the "Chateau de Creully" (Calvados), will be operating on all H.F. bands from the same location used by BBC news correspondants reporting Allied war operations during the Normandy campaign in 1944. QSL TM0RSE via P.O. Box 22, F-14480 Creully, France.

VK0, MACQUARIE ISLAND. Tom, VK0TS, was heard last week (May 26th) at 0530z on 14260 kHz with Jim, VK9NS, running the show. There are mixed reports on his signal strength from different parts of the world indicating that very few were able to hear him or that he was very strong. Keep a listening!

WEBSITES TO CHECKOUT.....
Tom, K8CX, reports he took 103 photographs at Dayton this year and now has ALL of them up on his Web-site. If you were at the Crown Plaza Hotel, you probably will find yourself in one of these photos. The WEB site is: http://paradox2010.com/dayton97/
Tom is also starting a Ham Gallery web page with pictures of individuals, ham shacks, antenna farms, etc... Please read the info about sending photos on his Dayton97 Web site mentioned above.

HAM/COMPUTER/ELECTRONICS classifieds are available to you on the World Wide Web. Just visit THE VIRTUAL HAMFEST at: http://www.vhamfest.com.

XU, KAMPUCHEA. XU2A and XU2FB were heard active this past weekend. XU2A was heard on 14195 kHz between 1230 and 1500z. XU2FB was heard on 14002 kHz between 1745 and 1900z; and on 14228 kHz at 1244z.

YA, AFGHANISTAN. John, PA3BTQ, who was recently active as S21/PA3BTQ, is now working for the Red Cross in Afghanistan. His callsign, operating frequencies, and length of stay is unknown at this time. QSL via homecall.

ZK1, NORTH COOK ISLANDS (DXPEDITION UPDATE). Tom, K8XP, informed OPDX the team of operators have now been finalized with the addition of Chris, ZS8IR (former operator on Marion Island), and Mike, N6MZ (was one of the team on Heard Island). Mike and Chris will join N4RF, WA4YBV, N7RO, KI6AN and K8XP to complete the team of 7 operators. Their callsign on North Cook will be ZK1XXP, and the QSL route wsll be announced later. The following have also been added to the list of supports: NCDXF, Alpha Delta, DX4WIN, Heil and Astron. All equipment will be assembled at N4RF's QTH in early June and shipped by the 17th. DXpedition dates are currently firm to take place September 20-27th, with 3 stations functional to include RTTY.

ZX7, CABO BRANCO LIGHTHOUSE (Brazil). From June 14-15th, ZX7CB will be active. This station is currently 1 of 65 lighthouses good for the Brazilian Lighthouse Award (DFB) and counts for PB-01. Activity will be on the following suggested frequencies:

SSB - 3750/3760, 7060/7070, 14200/14220, 18130/18140, 21200/21220
and 28440/28450 kHz
CW - 3500/3510, 7015/7030, 14050/14070, 18070/18075, 21140/21160
and 28150 kHz
QSL via: PR7CB, Jorge, PO Box 008, Joao Pessoa/PB, 58001-970, Brazil.
For more information via E-mail contact: pr7rt@openline.com.br

ZW100, BRAZIL. To celebrate the 100th anniversary of Belo Horizonte City,
look for ZW100BH to be active now through December 14th (1997). Activity
will be on all modes and bands. QSL via PY4AA: LABRE/MG, PO Box 314,
Belo Horizonte/MG, 301323-970. For more details send E-mail to:
marcus@gcsnet.com.br

NEW ORLEANS INTERNATIONAL DX CONVENTION, New Orleans, LA, USA

SCHEDULE OF EVENTS

Friday 22 August 1997 1:00 PM to 5:00 PM

Registration Desk opens
QSL checking - Bill Moore, NC1L, ARRL DX Desk
Navassa Island - Dick Brown, W5AA
AH1A, Howland Island video
CY9/W5IJU St. Paul Island - Vance LePierre, W5IJU

8:00 - 11:00 PM Hospitality Suite, Bourbon St. balcony, & open bar
sponsored and hosted by Carl Smith, N4AA, DX Publications.

Saturday 23 August 1997 9:00 AM to 4:30 PM

Registration Desk Opens. Complimentary coffee & tea
QSL checking - Bill Moore, NC1L
Welcome & Introductions
ARRL DXCC Update - Bill Moore, NC1L
Propagation Prediction for the DXer - Ned Stearnes AA7A
JD1/7J1AYK ChiChicima Island - Gary Jones, W5FI
Dxpeditions & Internet Technology - Bob Schmieder, KK6EK
Forum: The DXCC2000 Project - Rick Roderick, K5UR

LUNCH BREAK 12:30 - 1:30 PM

RF Exposure Regulations & the Dxer - Jim Maxwell, W6CF
ZY0SK St. Peter & St. Paul Rocks - Karl Leite, PS7KM
It ALL Starts at the Microphone - Bob Heil, K9EID
AH4/AH0W Midway Island - Frank Smith, AH0W

6:00 PM - 7:00 PM DX ragchew and cash bar

7:15 PM - 10:30 PM Gala Banquet Program

DXer of the Year Award to Al Hernandez K3VN
Featured presentation: VK0IR Heard Isl 1997, Al Hernandez
Note: Evening dress (coat & tie) recommended.

10:30 PM - 12:00 Hospitality Suite, Bourbon St. balcony, & open
bar sponsored and hosted by Carl Smith, N4AA,
DX Publications.

SUNDAY 24 AUGUST 1997 On your own - Enjoy!

73 & DX de NOIDXC

The 6th Annual New Orleans International DX Convention will be held on August 22 & 23, 1997 at the Royal Sonesta Hotel on Bourbon Street in the historic and colorful French Quarter.

If you missed last year's convention, then see the comments that Chod Harris (VP2ML) offered in his DX column in the December 1996 issue of CQ magazine (page 84).

Not only is this a great event for meeting fellow DXers and seeing interesting presentations on DX and technical topics, but it is also a chance to enjoy one of the most interesting tourist spots in the world - the Old New Orleans French Quarter.

To top it off, the Royal Sonesta is rated as one of the world's 10 finest hotels " ...based on surveys submitted by 35,000 readers of Conde Nast's national travel magazine ..." (The Times-Picayune, Sunday, Jan. 5, 1997, F-2).

Plan ahead, mark your calendars and join us!

My name is Jun.
I recently have to have new QSL cards.
And I am planning to have new one.
This time, I would like to design it by myself.
I have ever used DTP soft ware, PageMaker.

I am looking for site or CDrom which store
the graphic for such a purpose.

If anyone has any idea, please advise.

Jun, KG2EC@qrv.net

Hi, Paul.
I have a Tempo S1T with no case which I don't use. IF
this is something you can use, give me an offer including insured
shipping, I'll ship it to you pronto. It is something like ICOM 02AT.
Tony, VE6CGX
P.S. BTW, battery pack is almost new, Panasonic no memory Ni-cads.
It has a wall charger.

I think the problem with contests, Walt, is that too many people don't realize how contesters define the word 'contest'. You are confusing, I think, QRM from small groups with contest activity. There are only about six or seven REAL contests every year - CQWW, ARRL DX, etc. The Podunk Amateur Radio Clubs Annual Hemmoroid Sufferers Roundup and the Delaware QSO Party are not contests, they are weekend adventures of bored people with HF radios. The Japanese hams have many different contests, which involve hams in Japan only, some even during weekdays, but the participation in those is of the magnatude that calling 'wiping out the whole band' is rediculous. I hear Japan all day, every day, almost every band, but the contest activity from Japan in no way affects my operationg. The majority of the small 'contests' are very easy to miss is you aren't looking for them.

Contesting is part of ham radio that many hams enjoy. If they didn't, I wouldn't be able to work 4,000 other stations during a contest weekend. Some parts of ham radio we all enjoy, other parts we all don't like. That's the best part of ham radio, if you don't like one thing, you can find something else you do like.

WPX CW was a few weekends ago. I had the HF radio on all weekend, and didn't even realize that the contest was going on until late Saturday nite, when it was half over. It's a major contest, and I had no problem finding somewhere to operate with my non contest activity.

The problem with contests, in my opinion, is that there are too many small contests that most contesters never heard of. Every time that someone who doesn't like contests turns on the radio and hears one guy calling 'CQ PODUNK HEMMOROID CONTEST", the contesters get immediatly lumped into the group with the guys from Podunk who are 'screwing up the bands all weekend'. Anybody who can't find a place to operate on a weekend because of the guys from Podunk needs to buy some new crystals.........

I operated in one major contest in the last six months. I sure hope it didn't ruin anybodys weekend........

73, Jim KH2D

Jim,

You DON'T want to get into a misery match with DXers, 'cause they'll whup any contester six ways to Sunday. DXer whining is like the monster truck rally of whining; contesters whining is like a go-kart race in comparison.

73, de Hans, K0HB

~~~
Horoscope:

Leo (July 23 - August 22)

Today, someone named "Svlad" will appear at your door, carrying a large inflatable penguin, a climbing belt, and a bag of pistachio nuts. Despite your better judgement, you will show him the way to your antenna farm.

Mint condition Drake R8A with Vhf converter board. Radio is about one year old. Comes with original manuals, original box, Rs-232 interface, Vhf converter (Drake), Scan-cat gold for windows. This radio sells for $1056.00 with out the Vhf converter which costs another $220.00. On top that you get scan-cat gold for windows with the radio. The price is $900.00 FIRM! If interested please email me here or call. Or, if in the Delaware Valley area, stop in and try the radio out! If you like, I will sell it to you with out the VHF board for $790.00.... You just can't beat the price. I guarantee there is nothing wrong with this radio or I will give you your money back....

Don't Wait too long... This is a top rated Radio in all of the SWL and Ham radio review books and Magazines......

Hello,

I'm lookin' for some noise reduction algorithm and an introduction
in that subject.
Does anyone have some literature about it?

It would be nice to hear from you.
You can drop me a mail (see below).

Thanx in advance,
Uli

Well that would be completely pointless on 40 and 80 wouldn't it?
Firstly, we don't have a CW band or a Phone band, we operate whatever
mode wherever we like, but convention rules with CW at the bottom and
SSB at the top. Then remember region 1 is 7-7.1 on
40 and 3.5-3.8 on 80.

Are you telling us that CW contests on 40 only use 7-7.035 and SSB
7.05 - 7.1 ?

I just updated my page 50.400AM page.

Sorry it took 2 weeks for me to add the calls from 5/23/97
What a nice opening it was!
Got in on it late but worked many stations up north.

I'll be on 50.400 today around 15:30(pdt)(22:30z) today for a few hours.
I'll call CQ every half hr. starting at 15:30 pdt.
Hope to catch some of you out there.

Go and check out the grids I worked on AM.
http://www.geocities.com/Hollywood/5860/50am.html

I'll keep adding to the list every week.

2m, 6m, 10m and CB radio bands were open today.
(around 2:00PM ~ 4:30PM PST, June 3(TUE))

I heard some signals from ????? city, California on CB radio.
I tried to make some contacts... but I couldn't !!!!!
I thought a couple of people replied to me, but I couldn't copy it
!!!! Also I only could transmit in the AM mode... it wasn't a good
choice... but I don't have a transmitter for SSB.

I also heard some music (?) + CW on Channel 17 very loudly at one
time. If you knew where it [the station] was, please let me know.

I live in the southern central British Columbia, Canada.
It's quite good. I usually would hear nothing on the CB
channels... as I live in the small city, but I heard something in the
every single channel today !!

I also heard some continuous digital signal (continuous CW or
something ?) on 26.845 MHz very loudly when I was tuning my HF
scanner. I was wondering what it was. If you know something about
it, let me know.

Well... talk to you later sometime !!

This is why amateur radio is a great hobby...we have such friendly and intelligent operators. We should encourage young operators and potential operators, not discourage them.

Hi Phil,

I work in the PC maintenance industry and most of the time, manuals for monitors are as rare as rocking horse s**t. I am afraid that it is unlikely that you will get a service manual for any specific monitor. You could try Mauritron. We repair them by guesswork, skill and knowledge of generic monitor design.

What are the symptoms, I might be able to give you some pointers...

Geoff.

I've had lots of trouble finding circuits. Some manufacturers used to include a circuit with the monitor handbook - which is usually thrown out with the original packaging by the owner!

Try looking this WEB site for lots of good info on repairs, components, other info sources:
http://www.paranoia.com/~filipg/HTML/REPAIR/

Some manufacturers (and even repair shops) now have limited service info online. Some are even searchable by monitor type and fault description. They are pretty trese though, like Dead monitor - check R234, etc. Try this one:
http://www.anatekcorp.com/monitor.htm

Some manufacturers like Zenith regard monitors as disposable items and only repair by replacement!!!!

Good luck,
Mark Harrison

Thanks anyway, Walt, but I think I'll just stay out here and watch the banannas grow. Exactly my point, Walt. The above mentioned activities are best classified as weekend QRM, not contests. Again, I agree with you that the these

type of activities are not necessary, and anyone who is hell bent against contesting should clean up the weekend QRM first and then leave the six or seven weekends used for contesting to the real contests. The only contest you mentioned that we have heard of in this part of the world is the IOTA contest, and I think we can classifiy that as a real one, since island hunting seems to be activity that is accepted by the ham community on a global basis.

The point I was trying to make is this: The peolpe who like to participate in the big, world wide DX contests are constantly receiving the flack because of the people who participate in the local weekend QRM events. I like contests, but you can cancel everything on the list you metioned, with the exception of the IOTA contest, and you won't hurt my feelings one bit.

It would appear to me that the creation of all these little unheard of weekend QRM fests may be directly related with the creators inability to participate sucessfully in the 'major' contests.

>73 de G3NYY

Well, if all the above mentioned are 'international' DX contests, then I should be able to participate from anywhere I guess. I am fully aware of the band

occupancy in Europe. Even at the bottom of the cycle, right now, we still, unfortunatly, have openings to Europe from here..... Whenever the bands are open from here to Europe, it's a constant contest - a contest to see if I can talk to anyone for two minutes without being interupted 200 times......

The problem is, who is to decide which of the contests can
stay. How can you justify that one contest is more desirable than
another? Based on amount of log? But any major contest has been a
small contest at the early days. Based on another criteria? What might
be such a criteria that even half of the active contesters could agree
on it? And last but not least, how could one actually make the contest
organizers to discontinue their own favourite contests?

I don't know how you decide, Jari. Walt might have some suggestions.
I doubt you can stop anyone from having a contest that really wants to
have one, probably the only way would be ask them nicely to stop and
see what happens. Number of logs would be a good way I imagine -
anyone who is running an 'international DX contest' and gets 17 logs
should get the message.

I don't know if you have been following the discussion or not, but I don't
have a problem with contests - I'm just tired of contest bashing. I can
always find somewhere on the bands to talk to someone, contest weekend
or not.....

1535. Sunspots and Global Climate - An Appology

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-05 00:00:00 UTC
From: Mike Flaugher N9LLX <flaugher@thepoint.net>
Message-ID: <01bc71c5$67b8edc0$dfa2f6ce@flaugher.thepoint.net>
Source record: 32577
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.space,rec.radio.shortwave,sci.astro,sci.astro.amateur,sci.environment,sci.geo.meteorology

Over the last few months I've tried to "stir the waters" a bit to provoke some discussion on sunspots and climate, a subject I got interested in as a ham radio operator years ago. Lots of people responded and sent me e-mail, but an article I read the other day by George Reid at http://www.agu.org/revgeophys/reid00.html finally put the while thing into perspective for me. I realized then that I'd been preaching to the choir, and also that it's likely to be SOME time before a real solar-Earth connection is developed.

It seems there are a lot of scientists, good scientists at places like NASA, NOAA, Yale, Harvard, etc. who have found strong correlations between solar change and climate/weather change on Earth. The correlations themselves are not in question. The problem is that they are ONLY correlations and we do not yet understand the mechanisms. Every explanation why a decline or lengthening of the sunspot cycles correlates with global cooling and increase and shortening of the cycles leads to global warming are theory. Proof according to the "scientific method" is needed, and proof promises to be hard to come by in this case. The need for research is great, but right now a lot of our efforts are being poured into anthropogenic (manmade) global warming.

My appologies to anyone and everyone I may have misunderstood. Like many, I have a real gut feeling that the sun is a major player in our weather patterns and long-term climate, but I now understand that we have to play by the rules. Until these things get proven out it's premature to tout solar power as the real biggie. Too bad because if we HAD this knowledge it would go a long way toward helping climatologists explain the warming and cooling anomalies we've been experiencing since sunspot cycle 22 started into decline.

Check out the neat "Graphical comparison of cylces 21, 22 and 23" at the DX Listener's Club page at http://dxlc.com/solar/. Also check out cycle 20 which "correlated" with the cooling patterns of the early 70's. Is another cycle 20 on the way? Hmmmm.

Everything is relative, and some things are more relative than
others!

Before I go to my grave, I hope to work and get a QSL from
ONE European for a 50 MHz contact.

I considered it my lucky night when 20m was open to Europe during
the WPX contest. I might have added a dozen new countries to my
list. And I have yet to work Europe on bands below 40m.

Now, JAs, VKs, and ZLs---that's another story!

From out here on the west coast.

AM spectrum-inefficient??? (6 kHz)
How about FM?

What's next? How about digitized speech?
Or packet when conditions allow only 1/10 error-free packets?

I don't know about how it is where you live, but the 50 MHz band
is big enough here out west for all of them ---- provided they
stay in their place (no FM in the CW bands, for instance!)

DX Bulletin 25 ARLD025
From ARRL Headquarters
Newington CT June 5, 1997
To all radio amateurs

SB DX ARL ARLD025
ARLD025 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, DXNL, The Daily DX, the 599Rpt, FMRE, Patrice, F5ATD and Scott, K8SM. Thanks to all.

MALYJ VYSOTSKIJ ISLAND, R1MV. The group of 12 operators from Finland and Russia are QRV until June 16, using the callsigns OH5AB/MVI and R1MVI. Look for CW, SSB and RTTY activity on 160 to 6 meters, including the newer bands. Local 2 meter and 70 cm activity is still expected. No satellite operations are expected, however. QSL both calls via Orvo Arkko, OH5NE, Muukko, FIN-53400 Lappeenranta, Finland.

TONGA, A3. Bob, W7TSQ, will sign A35SQ until June 16 from Ha'apai. Dennis, W7SNH, will be active on RTTY as A35DB until June 9. QSL to homecalls.

BAHAMAS, C6. John, WZ8D, is QRV as C6AIE from Abaco until June 19. Activity will be on 80 to 2 meters. QSL to homecall.

FRANCE, F. Special Event station TM0RSE will be active from June 6 to 8. QSL to TM0RSE, PO BOX 20 F-14480, Creully, France.

ITALY, I. Tony, IK1QBT, Nino, IK1ZOZ and Alex, IK1PLD will be QRV from Gallinara Island, IOTA EU 028, on June 7 and 8. Operators will sign IP1/homecalls. Activity is expected on all HF bands, including the newer bands. Some 6 meter and VHF/UHF SSB activity is also expected. QSL to their respective homecalls.

US VIRGIN ISLANDS, KP2. Carroll, NA4I, will sign /KP2 from June 12 to 18. Activity will be mainly on 6 meters, and this includes an entry in the ARRL VHF Contest this month. Look for W6JKV/KP2 to be active in the ARRL VHF Contest as well. QSL to homecalls.

BRAZIL, PY. To celebrate the 100th anniversary of Belo Horizonte City, ZW100BH will be active until December 14. Activity is expected on all bands and modes. QSL via PY4AA, LABRE/MG, PO Box 314, Belo Horizonte/MG 301323 970, Brazil.

CAMEROON, TJ. Mark La Point, ex J5UAI, is QRV in Yaounde, Cameroon. He plans to be active on all bands, using CW, SSB, RTTY and other digital modes. QSL via NW8F.

PALAU, V6. Endo, JG2EBN, is QRV from Ponape, IOTA OC 010, and Yap, IOTA OC 012, using the call sign V63ME. He will also sign T88ME from Palau until June 10. Look for him on 20 and 15 meters. QSL to homecall.

MEXICO, XE. Sacrificios Island will be activated by the Valle Radio Amateur Club with the call sign XF4NVA from June 6 to 8. QSL via the bureau.

AFGHANISTAN, YA. John, PA3BTQ, is now QRV as YA/PA3BTQ for an unspecified period of time. QSL to homecall.

From: a
Message-ID: <5n8mka$fr8@newsfep1.sprintmail.com>
Source record: 32590

Mailloop v3.0 is an industrial strength bulk mailer.

Mailloop v3.0 is a bulk mailing program for the internet. It can take a single message and broadcast it to either a listing of e-mail addresses or to a listing of newsgroups. Creates custom newsgroup lists by filtering NNTP servers. Creates custom e-mail lists by extracting them from newsgroups. Can also extract e-mail addresses or newsgroup names from other protocols. Built-in NNTP, SMTP, POP, FTP, HTTP, EXEC, CGI, WHOIS and FINGER clients. Anti-cancelbot feature. Automatically processes remove requests. Includes extensive on-line help.
The most powerful bulk mailer available. Requires Windows 95 or NT 3.51+ and internet access.

The "Program" Mailloop is only available in English.

For more info goto: http://205.199.4.219

http://205.199.4.219

Using it is easy:

1) Create a message (http://205.199.4.219/editor.htm)
...by using the pull down menus or
...by using any editor

2) Create a newsgroups list (http://205.199.4.219/news3.htm)
...by filtering an NNTP server or
...by importing from any text file or
...by manually creating with any editor or
...by extracting from any FTP file or
...by extracting from any HTTP file

3) Create an e-mail list (http://205.199.4.219/em3.htm)
...by extracting from newsgroups or
...by importing from any text file or
...by manually creating with any editor or
...by extracting from a WHOIS response or
...by extracting from a fingering response or
...by extracting from a UNIX response or
...by extracting from any FTP file or

Good Morning Marc -- there are 15 links to finding DX calls at URL:
http://pw2.netcom.com/~ac6v/page2.html
as well as 5 links for domestic calls and several links about the ARRL
QSL bureaus and World wide "burros".

This is 100% a Sucking Military Sender on Ham Frequency's or a Sucking
Beacon Sender on 12 meter or 10 Meter Band.

Jim,
When there's a phone contest involving SSB, you cannot find a gap on
160m here in G land.
After an episode a few weeks ago while I was trying to operate mobile
I've been forced into purchasing a bloody great amplifier to load into
the 90' tower and 340' longwire-on top band.
Jim, I've been one up till now to make do with the stock power out the
back of my rice burner, not anymore, I've had enough.
CQ contest, bull-crap.

Phil

Hey, we know that joki means river, and that niemi means peninsula or point. Therefore, we know that Jokiniemi
means, roughly, riverpoint. So, Mr. Riverpoint, this is what we know, and we want you to know that we know it,
and now everyone knows that you know that we know it.

Other than that, though, you make an excellent point.

Hello everyone!

Once again I'll be out calling CQ on 50.400AM this weekend.

So far I have about 10 grids. Most from up north.

I'll call CQ on the hour starting at 10:00pdt through 20:00pdt.

Hope to get some new grids this weekend.

If you have not checked out my 50AM web page please do so.
I've also updated all the grids and calls to date.

My favorite place to start is http://dxlc.com/solar which is the
Netherlands DX club. Besides getting a good graphical look at what the sun
is up to now in terms of solar flux, the page has links to other sites
which have GOOD explanations of propagation terms.

--
Don't be so proud of this environmental terror
you've created. The power of anthropologic
global warming is INSIGNIFICANT compared to
the power of the sun..
